I. Letter to Shareholders

The outbreak of the COVID-19 pandemic more than two years ago has had a substantial impact on the existing model of globalization. This has changed the ecology of the industry, human consumption behavior, and even the overall economic structure. Thus, we have witnessed reorganizations of the industrial chain, developments of the digital economy, and the emergence of new economic models. While the pandemic is indeed a crisis, there are also many transformational opportunities.

Building on Hon Hai’s foundation of expertise in the ICT industry, the Company adopts a "right customer, right product, and right time" as our ethos to embark on new technological development alongside our global-leading customers; and create an increasingly comprehensive smart lifestyle for humankind. In the spirit of "perpetual betterment", we have continuously improved Group’s core strengths. Facing ever-changing technologies and business environments, Hon Hai’s global reach, strong vertical integration and execution enables us to demonstrate the overall competitiveness of the Group in the face challenging global political and business scenarios; ensuring our pole position amongst key clients and products, allowing the Company to maintain its position as a global leader.

In 2021, even though the impact of the pandemic has caused very drastic changes and uncertainties in the workflow and supply chain, we have successfully overcome these challenges and delivered above expectations. Consolidated revenue for the year reached NT\$5.994 trillion, an increase of 636.2 billion over the previous year, an increase of approximately 12%, and a new record high; the net profit attributable to the parent company for the current period was NT\$139.3 billion, and the earnings per share was a record TWD 10.05, an increase of roughly 37% over the previous year, earnings per share were also the highest since 2008.

## **Continued Strategies for the Information and Communication Industry**

The Company's existing core businesses includes four major product categories: Smart Consumer Electronic Products, Cloud and Networking Products, Computing Products, and Components and Others Products. Benefiting from strong demand for consumer electronics and increased component sales in 2021, we achieved more than double-digit growth and improved gross profit margins.

Affected by a mix of geopolitics, the pandemic, and inflation this year, the market will be more volatile and more challenging. Although the tight supply of some components has eased, it has not been completely resolved, and will be until the second half of the year for better clarity.

Among them, Smart Consumer Electronic Products and Computing Products have experienced considerable growth in the past two years, and their performance will stabilize this year. We will continue to focus on high-end and niche products and will continue to leverage our leading R&D technology, extensive production capacity and mass production capacity to maintain our lead.

The pandemic has driven enterprises and individuals to adopt cloud services, coupled with the rise of AI, blockchain, metaverse, and even electric vehicles, all of which require large and stable high-speed computing and data centers. In 2021, Hon Hai's server revenue has reached the trillion mark, and simultaneously is the world's largest server manufacturer. This year, we expect continued growth in demand, and Hon Hai will also take advantage of its global presence, extensive scale, and joint development of forward-looking technologies with customers to expand its leadership in cloud network products; especially CSP products, which will be our leading ICT offering and an important growth driver.

At the same time, through the established customer base and product composition, we have gradually increased our portfolio of components to improve the overall profitability. This year, we expect the component and other product categories to see the most significant revenue growth of the four categories.

Overall, we will continue to strengthen our market position and improve profitability by optimizing management, adjusting product mix, and focusing on technology research and development, with aims to maximize EPS. The stable cash flow generated by the ICT offerings every year will serve as a strong backing for Hon Hai to develop new businesses and will also sufficiently support the stable annual cash dividend distribution, which is also one of our advantages.

## **Flourishing New Business**

Since initiating "F1.0 optimization of the status-quo; F2.0 digital transformation; F3.0 transformation and upgrade" plans three years ago, we have continued to push forward. By expanding the use of digital technology tools, Hon Hai's operations have not only been unaffected by the pandemic in the past two years, but at the same time posted record high revenues. Last year, the Chengdu factory, Zhengzhou factory, and Wuhan factory were also selected as lighthouse factories, highlighting the continued results of F1.0/F2.0.

In terms of F3.0, the negative effects of the pandemic last year did not deter our pace of transformation. We completed the development of new vehicles within a year, and released three self-developed electric vehicles on the 2021 Hon Hai Tech Day (HHTD21): Model C SUV, The Model E premium business sedan and the Model T electric bus; taking the opportunity to showcase our determination as a global new vehicle manufacturer and demonstrate our speed and efficiency capabilities. Among them, the electric bus has been officially delivered in Taiwan this year, which has been praised and well-received by the market, further cementing the Company's vehicle manufacturing capabilities. Going forward, we will continue to expand the customer base at home and abroad.

We also acknowledge the trend of de-globalization and regional manufacturing, we must maintain an innovative operational mindset to create a win-win situation on the national, local company, and the Hon Hai supply chain levels. Therefore, we utilized the cooperation model of Build-Operate-Localize to localize the operational supply chain, which enables local companies to participate in growth opportunities, allowing partners to share the results, and also enable the global coverage of Hon Hai Electric Vehicles develop in a systemic manner.

In 2021, we have achieved success through various alliances. Through the acquisition of the automobile production base of Lordstown Motors in Ohio, USA, we have obtained a production-ready team and capacity to produce electric vehicles in North America. In the future, we will also create products for key customers such as Fisker and Lordstown. In addition, we have begun cooperation with Thailand PTT to establish and cultivate the electric vehicle industry in Thailand, and will commence building a factory this year. We have also cooperated with Indonesia and Saudi Arabia, and will also build EV and battery related supply chains in these two countries in the future.

Hon Hai's electric vehicle development strategy has not only attracted the cooperation of new car manufacturers, but has also gradually been favored by existing car brands. For example, with Stellantis, the fourth largest car manufacturer in the world, we have established a joint venture company in the smart cockpit market; and are jointly developing automotive chips to meet the needs of future automobiles toward design modularization and functional differentiation. Our goal is to invite customers to enter the global market together.

At the same time as we enhance of vehicle manufacturing business, Hon Hai also places emphasis on key components of electric vehicles. Last year, we invested in an upstream battery material factory, and also cooperated with international manufacturers on motor products,

acquire key technologies, to jointly developed the international market. The goal is to provide a complete service from platform; chassis design; three key components (Battery, motor and electric control system products); component supply; software; EEA architecture; to vehicle manufacturing, so as to enhance the value to customers.

The MIH alliance has already onboarded 2,300 partners from more than 60 countries around the world, which further proves that the electric vehicle industry must work together as a team to achieve win-win and common prosperity. In addition to assisting these partners in business and technology, we have jointly established a new energy vehicle industry fund with CTBC Financial Holding to invest in high-quality companies in the field of new energy vehicle related technologies or manufacturing, enables Taiwan's electronic technology, jointly with traditional automobile industries to join the leading frontier for global new energy vehicles, fueling Taiwan's industrial growth and economic transformation.

Semiconductors is one of our new businesses focuses to support future ICT growth and electric vehicle business. Last year, we invested in a FAB in Malaysia, acquired a six-inch FAB in Taiwan, established a joint venture with Yageo to establish XSEMI, and cooperated with Stellantis to develop and design automotive chips. We also plan to set up a new FAB locally with our Indian partners. We believe that our diversified layout in the semiconductor business can provide customers with high-quality and a stable supply one-stop shopping service, and allow us to better deploy our value chain structure.

### **Research Development Status**

In order to maintain the Company's lead in the ICT industry, Hon Hai invested more than 100 billion in research and development last year. Our R&D center a comprehensive R&D team and a deep technical talent pool, which can cooperate with customers to invest in the development of new products, new materials, new processes and new technologies.

The Hon Hai Research Institute established last year aims to emphasize key technologies in the next three to seven years. The institute established the first "Ion Trap Laboratory" in Taiwan last year, investing in the development of ion traps to seize the opportunity for the development of quantum computing technology.

With the mass adoption of 5G, the application of artificial intelligence, and the metaverse driving the demand for high-speed transmission and efficient computing; servers will also enter the era of a new generation of high-speed transmission interfaces. We have designed a series of servers with X86 and ARM infrastructure equipped with a new generation of high-speed transmission interfaces, and are expected to enter mass production in the second half of 2022, driving a new wave of data center replacements. At the same time, we have developed a series of advanced energy-saving cooling technologies, some products have already been successfully introduced to customers, and more advanced cooling technology products will be launched this year.

Our strategy in Metaverse focuses on providing platforms, complete solutions from wearable devices, software, infrastructure, applications, and access. The Company will also combine powerful external partners, and in the future, through cooperation with various metaverse parties, deepen product capabilities and technical capabilities in software and on the cloud.

In the electric vehicle business in 2022, we will continue to design new cars and invest in the development of key components and solutions. Among the key components, battery technology is of the utmost important, key among which are high-safety lithium iron phosphate batteries, solid-state batteries and upstream related materials. We will continue to speed up research and development, and start planning a battery manufacturing base in Taiwan, so that the two technologies of lithium iron phosphate battery and solid-state battery can be applied to domestic electric buses, electric passenger cars, and electric scooters sooner.

In the research and development of electric vehicle software, our core approach is one of a Software Defined Enterprise, and will launch open platforms, calculation software and other software projects that meet demands of EV vehicles. The focus is on smart cockpit and ride experience applications, intelligent in-vehicle operating systems, and safe autonomous driving functions. Hon Hai officially announced a software R&D center last year, which will assemble more than 1,500 software application talents within the Group, and is expect to recruit more than 1,000 senior software R&D engineers within three years, as an important starting point for "Hon Hai - Defined by Software" going forwards.

Over the past year, we have accelerated the progress of semiconductor research and development, and started the process technology development of third-generation semiconductor silicon carbide to supply the high-voltage key power-related components required for the mass production of electric vehicles. In the development of 2.5D/3D advanced packaging technology, such as substrate-less fan-out packaging and 5G millimeter-wave antenna packaging technology have been launched successively to provide high-performance computing, artificial intelligence, high-frequency communication and other customer needs. For key components of assisted driving in vehicles, we have launched the world's smallest first-generation product in the lidar chip, and are continually optimizing to achieve higher accuracy and meet the needs of future autonomous driving sensing. In automotive ICs, we will work with customers to develop automotive microprocessors, SoCs and small ICs with new electronic and motor architectures for next-generation electric vehicles to assist the Group in the long-term development of electric vehicle technology and businesses.

#### Effects of the External Competitive Environment, Regulatory Environment and Overall Business Environment

As far as the external competitive environment is concerned, the technology and specifications of consumer electronic products are changing with each passing day, which increasingly toughens industrial competition. But overall, Hon Hai has accumulated nearly 50 years of exquisite management strength for talents, funds, logistics, and technology, in-turn creating the industry's largest entry barrier. We also continue to strengthen upstream and downstream

integration, improve technical abilities, and stabilize mass production and cost control; allowing us to brave challenges of industrial competition.

The huge seasonal fluctuations in the ICT industry are also characteristics that make it very difficult for many manufacturers to deal with. The recent addition of geopolitics and the impact of the pandemic on supply chains has exacerbated this characteristic. Hon Hai will overcome these challenges by leveraging its large scale, diverse customers and products, and strong execution. The Company continues to foster intimate collaborative relationships with customers and respond to the needs of customers and the market in real time. Because of the industrial development trend of regionalized manufacturing, we will continue to deploy globally to respond to this change.

In regards to the domestic and foreign regulatory environment, countries around the world are promoting environmental protection regulations, and global brand-leader customers have also formulated stringent supplier codes, which are strictly required by all suppliers. The company will continue to cultivate research and development and mass production, in order to achieve the goal of green carbon-reduction manufacturing. The Company continues to closely monitor possible changes in the legal environment, and actively proposes countermeasures to reduce operational risks.

As the overall business environment becomes more complex, including the pandemic, inflation, international geopolitical risks, etc., and countries have begun to adopt tighter monetary policies and raise interest rates, making future changes and volatility more difficult to predict. The Company continues to pay close attention to changes in the overall environment and prudently formulate the best business strategy.

### **Continuous Efforts for Social Responsibility**

Hon Hai believes that responsible business operations must take into account both operating results and corporate social responsibility. Therefore, we propose the concept of "Sustainable Management = EPS + ESG". Last year, we formulated the Group's ESG vision and six major strategies, and this year we will also set and further announce long-term ESG goals.

Hon Hai values ESG values in line with international standards. In addition to responding to CA100+ and committing to achieve net zero carbon emissions by 2050, we have completed the carbon inventory for participation in SBTi; furthermore, we will be announcing future carbon reduction targets. At the same time, Hon Hai officially became a TCFD supporter, committing to implement the TCFD disclosure framework. In order to respond more actively to the global net zero emission movement, we participated in the "Alliance for Net Zero Emission" as a co-sponsor. In the future, we will use Hon Hai's influence to promote ESG throughout the entire value chain.

For the corporate governance facet, we also set up a nomination committee under the board of directors to assist the board of directors to strengthen the management mechanism this year; with aims to improve the corporate governance structure, and lay the foundation for the sustainable development of the Company.

Evident from the sweeping impact of the pandemic globally and in Taiwan, with the authorization and assistance of relevant units, Hon Hai and Yongling Foundation have allied with other social stakeholders to introduce vaccines and provide them to Taiwan's medical and epidemic prevention system, fulfilling social responsibilities.

### **External Honors and Affirmation**

Facing the ever-changing global landscape, digital transformation has become a standard for enterprise operation and management. Hon Hai utilized top manufacturing technologies accumulated in the past, efficient supply chain management capabilities as the basis, and combines various innovative technologies to create a clear development path for digital transformation. In-turn, Hon Hai was awarded the "Digital Transformation Leader Award", "Smart Manufacturing Leader Award" and "Digital Transformation Revolution Award" from the Harvard Business Review.

Hon Hai continues to focus on the growth of its own business, and ranks 18th in revenue among Forbes 2000 companies; simultaneously ranking 22nd in the world in Fortune Global 500. In addition to business operations, we also pay attention to our employees and the investors. Last year, we ranked 1st in Taiwan by Forbes as the best employer in the world and won the "Best IR Website" award from the world's authoritative "Investor Relations Magazine" (IR Magazine).

Hon Hai's efforts and achievements in ESG have been highly recognized externally for three consecutive years. In 2021, it won the Global Corporate Sustainability Award and the Leadership Award, among others; and was selected as a constituent stock of the ESG relevant index, showing that while in pursuit of EPS, Hon Hai is also deeply committed towards ESG initiatives, sparing no effort to achieve sustainable development and core Environmental, Social, and Governance facets.

Looking towards the future, Hon Hai will continue to maintain a "Sustainable Management = EPS + ESG" philosophy. As global citizens, we strive to continuously improve business performance, while promoting a friendly environmental and sound governance culture. We have also expanded to share these achievements with shareholders, for three consecutive years, the distribution rate of cash dividends has exceeded 50%. This year's cash dividend per share is also the highest since our listing in 1991. We will continue to improve and bring stable returns and increase value to our shareholders.

Chairman Liu, Young-Way

## V. Operational Highlights

### A. Business Content

#### (1) Business Scope

##### (a) Major Business

ICT, communications, automation devices, photo-electricity, precise machinery, auto, production, sales and service related with connectors, casings, radiators, optics, assembled parts of consuming electronics as well as assembly of network cables.

In addition to ICT product, the Company continues to expand into 3 new businesses in EV, robotics, and digital health, as well as the 3 core technology fields of AI, semiconductors and new-generation communications.

##### (b) Revenue Mix

98% of the products are 3C electronics (Computer, Communication, Consumer Electronics). The output and sales volume of the recent two years can be found in the table of Production and Sales.

##### (c) Current Product Items

The products manufactured by the Company include:

1. **Smart Consumer Electronic Products (mainly smartphones, TVs, game consoles, etc.):** Personal consumer electronic products, including smart phones, feature phones, wearable devices, etc.; as well as smart home entertainment systems and equipment, including TVs, game consoles, set-top boxes, speakers, etc. Covers a larger portion of traditional categories of 3C, which encompasses Consumer Electronics and parts of Communications.
2. **Cloud and Networking Products (mainly servers, network communications and related products):** Enterprise and consumer network communication equipment, equipment required by cloud storage, including routers, servers, edge computing, data centers, satellite communications and other related equipment.
3. **Computing Products (mainly computers, tablets, etc.):** Lifestyle and work computing equipment, office and workplace computing products, including desktops, notebooks, tablets, office machines, printers, etc. Covers the Computing aspect of the traditional definition of 3C product category.
4. **Components and Others Product (mainly connectors, mechanical parts, services, etc.):** Upstream manufacturing and development of key components, technical components; including connectors, precision optical components, lenses, electronic components, semiconductor products, automotive electronic parts, tool/mold fixtures and mechanical equipment. Additionally, logistics, warehousing, software development, healthcare services, and industrial internet integration solutions also fall into this category.

##### (d) New Products, New Industries, and Technologies Developments

The Company actively transforms, upgrades, and promotes the transition from brawn-intensive industries to brain-intensive strategies of "F1.0, F2.0, and F3.0". In addition to the development lights-out factories and automation, the Company also focuses on our

defined “3+3 categories” including the three industries of electric vehicles, robotics, and digital health; across three applications of AI, semiconductor and next generation communications. Among these, electric vehicles and semiconductors are one of the Company's main growth drivers in the future. In addition, EV and semiconductors is our drivers in the future. We will continue to expand our clients base, components, and software. Also, we will continue to expand our global manufacturing with local partners to allocate the best resources by our innovative business model – BOL Model (Build, Operate and Localize). We will cooperate with different local government and partners, to build up the ecosystem in local countries and also penetrate into the local market.

As for Metaverse industry, we will build up platforms to provide a complete value chain from wearable devices, software, infrastructure, applications, and to services.

## **(2) Industry Overview**

### **(a) The Current Status of the Industry and Future Developments**

#### **Current Status**

In 2021, The world has been continuously affected by the COVID-19 pandemic, and global governments continued to launch fiscal stimulus policies, which made the market full of liquidity. Working from home and learning from home continue to drive the demand of our Computing Products and Cloud and Networking Products. Additionally, consumers allocated more of their expenses on electronic devices. Therefore, among these 3 major Products have significant growth in 2021.

Regarding the electronics industry in the recent years, smartphone accounts for the largest market share in consumer electronic products. According to Canalys research, global smartphone shipments totaled 1.35 billion units in 2021, 7% increase from 1.26 billion units in 2020. This mainly reflects economic and global supply chain disruptions gradually recovering in the post-pandemic era. In the field of Cloud and Networking Products, the remote work and remote learning has become a new norm. Based on DIGITIMES Research, despite global IC and component shortage, server shipment up by 4.6% to 17 million units in 2021, mainly driven by US and China based large data center provider's demand. In the field of Computing Products, demand for tablets and PCs increased significantly in 2021 because of the demand from remote work and education. For tablets, according to International Data Corporation (IDC), shipments in 2021 increased by 3.2% to 168.8 million units. For PCs, according to Gartner's analysis, PC shipments reached 339.8 million units in 2021, an increase of 10%, which is the highest shipment since 2013. In terms of Components and Others Products area, their demand fluctuates depending on the sale of corresponding end products.

The electric vehicle industry continued to grow significantly in 2021, and EV-Volumes showed that the total global sales increased by 108% to 6.5 million units. Compared with flattish sales of gasoline vehicles, the strong performance of electric vehicles shows that under the shortage of ICs and the increasing market preference for electric vehicles, global automakers have chosen to give priority to the production of electric vehicles, and the global penetration rate of electric vehicles has also increased from 4.2% in 2020 to 8.3%. China and Europe are two major electric vehicle markets, where contributed

50% and 35% of global sales in 2021, respectively.

**Future Developments**

Looking forward to 2022, although the market is still suffering for the pandemic and IC shortage in the first half 2022, the shortage situation is expected to improve by the second half of 2022, due to more capacity supply. Based on IEK analysis, global smartphone shipments will increase to 1.42 billion in 2022, up by 5% from 1.35 billion in 2021.

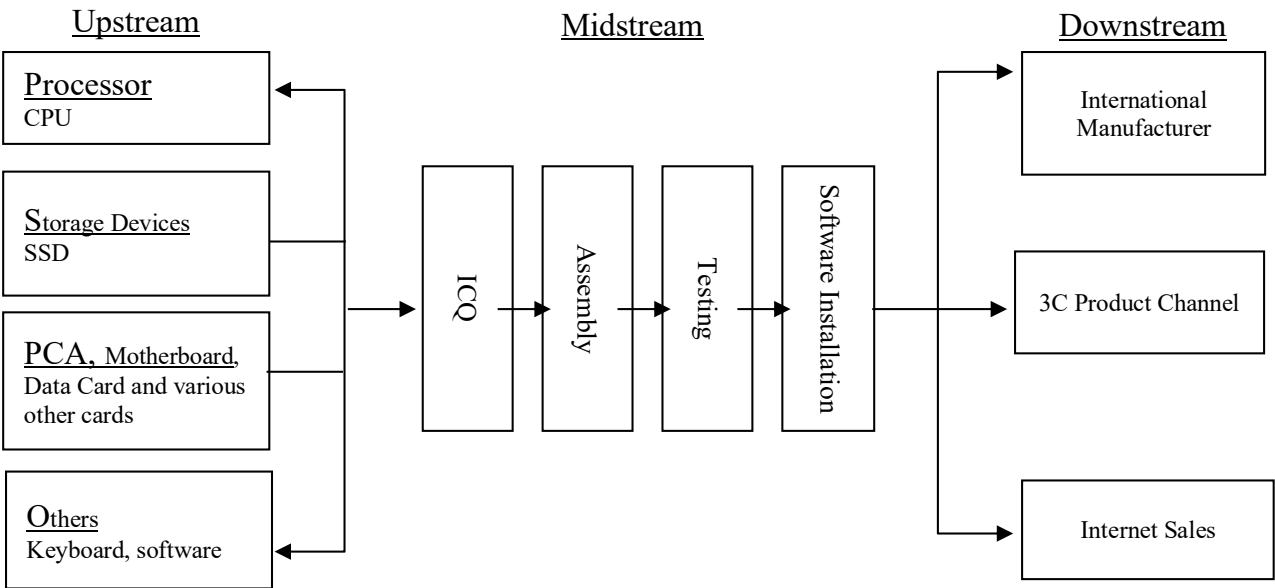

In the field of Cloud and Networking Products, DIGITIMES Research predicts that the global server market will be under supply because of cloud services, work from home, and online services driven by the pandemic. Despite global IC and component shortage, server shipment up by 6.8% in 2022, mainly driven by large data center provider’s demand.

In the field of Computing Products, MIC predicts global NB and PC shipments are expected to be 230 million driven by demand from enterprise. Demand for desktop is expected to recover to 79 million shipment because of returning to office.

As the demand for Smart Consumer Electronics and Server increase, the demand for the relevant component increases as well.

The electric vehicle industry has gradually become the mainstream, because of not only the governments policy support, but also the rising consumers' awareness of the advantages and characteristics of electric vehicles compared with gasoline vehicles. The IDM estimates that the supply of automotive semiconductors will not improve until the second half of 2022. It is expected that automakers will prioritize EV production. The market estimates that the sales of electric vehicles in 2022 will exceed 10 million units, an annual increase of more than 60%. In the long term, electric vehicles will be the largest growing segment of the world's major industries.

**(b) The Industry Value Chain and Relationships**

**(c) Various Product Trends and Competition**

There are four main product categories. In short-term, the company continues to expand the new businesses in EV and semiconductors :

1. Smart Consumer Electronics Products (smartphone, TV and game console)

With the commercial launch of 5G and the gradual adoption of artificial intelligence (AI) into various technological applications, the consumer electronics industry will enter the era of intelligent networking driven by 5G and AI in the coming decade. In the development of 5G, AI and other related products, the Group has advanced deployment plans, analyzed market demand in advance, and continues to work closely with relevant customers; this combined with the Group's advantages, will enable 5G-related smart consumer products to be deployed timely in the market. Many companies have also seen opportunities and invested in. The company's long-term focus on high-end smart phone products, the accumulated competitive advantages in scale, technology, speed, yield rate, cost, and globalization also allow the company to secure the largest share.

2. Cloud and Networking Products Category (mainly servers and networking products)

As a result of the gradual formation of HPC, 5G network and edge computing, enterprise users' purchasing needs of servers to ride on the tailwind of private cloud or even hybrid cloud have been driving worldwide server market growth. The Company has been in the server market for a long time and our quality, technology and service have been one of the most recognized. The swiftly increasing need of a regionalized supply chain under a broad globalized framework from major server customers has raised the bar of manufacturers higher and hence we believe that the Company is well positioned to be a leading system provider on that front. The huge scale and joint development of cutting-edge technologies with customers, which have expanded our leading position in Cloud and Networking Products.

3. Computing Products (computers and tablets)

This is a mature sector and with cross device streaming and cloud services sharing a large part of the performances of personal desktops and notebooks, we expect stable demand for this category. Meanwhile, tablets and smart TVs are now seeing performance pressure and hence a potential upgrade cycle.

The demand and supply of this market is relatively mature. Producing high end Notebook, tablets, desktops, printer have been one of the Company's strengths. We aspire to capture this growth tide by integrating core competencies across manufacturing and services and our access to global channels. And also complete product lines, global footprint, and production capacity, supply chain make the company to obtain greater opportunities.

4. Components and Others Products (connectors, mechanic parts and services)

The Group's long-term strategy is to form strategic partnerships to formulate a comprehensive, vertically integrated supply chain, leveraging our core expertise and advantages. We will take component supply as one of the main goals while we develop our new business. These two fields are relatively large-scale industries at this moment. They attract more investment from different countries and enterprises, and there are different competitors in each field.

The company's key competitiveness lies in its long-term cooperative relationship

with customers, a complete product line, precision manufacturing capabilities, global footprint, and solid operation management. The long-term development strategy is to establish a complete supply chain with our strategic partners, integrate the internal and external resources of the group. This enhance the competitive advantage of vertical integration and further improve our layout in the industry. And it enhance profitability.

5. Electronic Vehicle

The total vehicle market size is around 4 trillion US dollar. Based on the market estimated, by 2025, the global EV market will reach 600 billion US dollar. Under the trend that the vehicles have started to adapt motors, instead of internal combustion engine, the complexity and components has significantly decreased. In addition to the direction of software-defined EV, ICT suppliers will have huge potential.

The Company created the MIH Consotium, an standardized and modularized open platform, with hardware and software integration. By BOL business model, it will help us expand our EV global footprint. On the one hand, it secure our client base and to develop higher-value components and software.

6. Semiconductor

The company purchases chips exceeds 50 billion US dollars every year. In addition to advanced processes, many of them are mature processes. In the past two years, the supply of mature process chips has been tight, which has caused bottlenecks in product production. And it become a room where the company can focus. Moreover, the chips used in electric vehicles in the future can be up to three times higher than the current. Semiconductors account for 30% of the cost of the entire vehicle, of which power IC account for half. It is expected that the cost of SiC will be higher in the future.

Mastering stable supply and differentiated functions ICs means are the key to electric vehicle manufacturing. And it is also one of the ICT clients' values. The company is one of few enterprises with entire semiconductor supply chain from upstream equipment, design, wafer fabs, packaging to testing plants, etc. We secure the capacity by minor share holdings investment, BOL model, joint ventures and acquisition, with asset light approach.

**(3) Technology and R&D**

**(a) Technical and R&D Businesses**

The Company has utilized proprietary management methods for IIDM-SM; Integration; Innovation; Design; Manufacturing to Sales; Marketing, and coupled with Precision Molding; Material Technologies; Sustainable Manufacturing Technology; SMT Manufacturing Technology; Heat Transfer Technology; Plastic Processing; Metal Processing; Testing Capabilities; Automation Capabilities; Photoelectric Consolidation Technologies; Motherboard Design; E-Commerce Capabilities; Server Design; Wireless Communications and Light Display Modules, to achieve core competitive advantage. The Company also strives to provide the best 6C (Computers, Communication, Consumer

electronics, digital Contents, Car parts and modules, Channels) foundry services with our strategic partners globally, and create maximum value for shareholders.

Looking to the future, the Company will remain committed to innovation and R&D; develop cutting-edge prospective applications; commercialize and realize product designs; bring to market the fruits of our research, and continue systemization of management processes, to solidify and maintain the Company's lead in core competencies.

#### **(4) Long and Short-term Business Development Plans**

##### **(a) Short-term Business Development Plans**

The Company pursues continued excellence in operational management and cost control, vertical integration, global footprint and provide a “One-Stop Shop” solution for global leading brands. Our commitment is to maintain the high quality of service and related added-value services enable computing, communication, consumer electronics (3C) to enrich lives of the world population. In the future, the company will leverage ICT advantage and integration capability to enter the electric vehicle market. At the same time, in order to serve customers and create product differentiation, we are also enter the semiconductor industry to provide more diversified services and strive for more business opportunities. The Company will continue this pursuit and provide a diverse range of services, capture business opportunities and deepen our relationships with international brands.

In order to respond to the various economic and trade environment to provide customers with more complete services and strengthen the company's competitiveness, the company not only continues to expand investment but also strengthen our technology, production capacity, automation and other capabilities, in order to match ICT and electric vehicles to regional manufacturing trend. We are also deploying in Europe, America and Asia. In the future, the company will continue to establish relevant production bases, design centers and service centers around the world to meet the needs of customers for design, manufacture and global assembly and delivery.

##### **(b) Long-term Business Development Plans**

The Company has formulated transformation and upgrade plans, beginning the long-term transformation from brawn-intensive to brain-intensive. The Company will take this opportunity to upgrade its level of industry, improve profits, and commit to the development of three main areas of electric vehicles, digital health, and robotics; and also emphasize the three main core technologies of AI, semiconductors, and next generation mobile communication technologies. The Company's development and implementation of the “3+3” new industry, technology fields have also are also an advanced deployment of technologies and products for 3-5 years in advance; among them, the Company has initiated the MIH Alliance in the field of electric vehicles, and will cooperate and strive with more than 1,500 member Companies at home and abroad to become the Android platform of the electric vehicle industry.

Last year, the company also established the Hon Hai Research Institute, with the goal of focusing on key technologies in the next three to seven years. After the research and development results are mature, it will be transferred to the business department for commercialization. The heads of the five institutes of the Research Institute have already been in place. In 2021, the first "Ion Trap Laboratory" in Taiwan was established to invest in the development of ion traps to seize the opportunity for the development of quantum computing technology.

## **B. Production and Sales Status**

### **(1) Market Analysis**

#### **(a) Core Products (Services) and Sales (Supply) Areas**

The Company's products are divided into four categories: Consumer Electronic Products (mainly smartphones, TVs, game consoles, etc.); Cloud Network Products (mainly servers, network communications and related products); Computing End-products (mainly computers, tablets, etc.); and Components and other product areas (mainly connectors, mechanical parts, services, etc.). Core sales areas cover three continents: Europe, America and Asia.

#### **(b) Market Share**

According to Bloomberg, the Company ranks first in 2021 Electronics Manufacturing Services (EMS), with market share of approximately 40%.

#### **(c) Future Industry Supply & Demand and Growth**

The Company's 4 main products are primarily used in industries such as communication devices (smartphones, internet-enabled devices), consumer electronics, computers, and related products, the industry developments for the respective product categories are as follows:

##### **1. Consumer Electronic Products (mainly smartphones, TVs, game consoles, etc.);**

Among them, mainly from the perspective of smart phones, the United States and Europe are already mature markets, and the growth of local phone shipments have slowed. The growth momentum of the smart phone market in the future will come from emerging regions, such as China. China has further increased the number of 5G smart phone users following the increase in 5G coverage. Chinese smart phone brands have gradually matured, and their market share has gradually increased.

In addition, India is also a fast-growing region. As the local smartphone adoption rate is still low; as local telecom companies continue to increase network coverage outside of Tier 1 and Tier 2 cities, the region will attract major smartphone manufacturers to actively invest. It is one of the main driving forces provide growth for global smartphone shipments in the future.

Even with the many years of smartphone hardware developments behind us, the high-end products are still continuing to differentiate and innovate. Leading brands vie to increase added value for smartphones and attract additional income. Smart accessories have become a lynchpin for many brands, accessories such as bracelets, watches and external lenses. With the increasing demand for outsourcing of global smartphone brands; the gradual reduction in the smartphone form factor; increase of functionality, the internal components are more intricate than ever. Therefore,

manufacturers with a proper vertical integration and manufacturing capacity can be paramount to helping clients reduce cost, increase competitiveness, with many more opportunities in the future.

2. Cloud Network Products (mainly servers, network communications and related products)

(1) Servers/storage devices

With the advent of cloud computing, an abundance of corporate information has shifted away from the confines of physical on-site storage, and embraced cloud computing services. Coupled with the needs of calculation on the cloud, server products have also begun to evolve. The main driver for this growth being the tendency for enterprise units to be replaced.

(2) Switches and Routers

With 4G/5G becoming universal, Big Data centers and developments in IoT, brings about a increasing amounts of network traffic. Many countries have been actively expanding their 4G/5G and fiber networks and reinforcing related fundamental infrastructure. To ensure a seamless network traffic, lower response times from databases, cloud service providers have continued to invest in related infrastructure. Overall, this market is maintaining its healthy growth.

3. Computing End-products (mainly computers, tablets, etc.)

(1) Tablet PCs

According to IDC, tablets under 8" are susceptible to competition from large form-factor smartphones, will continue to decline; the future of Tablet products will focus on sizes above 8" or even 9", with the increased screen real-estate and accompanying keyboard to satisfy the content-creation needs of consumers.

(2) Computer Products

Comparative to the smart devices industry, the Wintel camp of PC products have lacked buzz in the recent years. The upgrade of Windows operating system and Intel chips have struggled to captivate consumers to trade-up as it used to. IDC believes that in a mature market, the PC product is reduced to just needs of replacements. In developing regions, PC have also shown little or no growth, because of the increase in functionalities from smartphones and tablet computers filling up many of the functionalities the PC once used to offer. Despite this, the PC has an irreplaceable hold on the corporate market, especially in document processing, file editing, ease of content creation, are all features that are difficult to replace with smart devices.

The PC market have passed the growth stage, and the industry is slowly consolidating, with many smaller brands being merged or forced out. The ongoing competition between remaining brands are less fierce. Under this macro environment, big brands with more resources and vertical integration capabilities are likely to benefit.

4. Components and other product areas (mainly connectors, mechanical parts, services, etc.)

Components include mechanical parts, heat dissipation modules, optics, electronics, PCBs, and semiconductors. With the increasing demand for the products in the abovementioned three categories, the demand for components will rise. In the related components, the optical (touch module, camera module, dot-matrix projector module, etc.) and semiconductor (package and test, semiconductor equipment, chip design, testing and packaging etc.) will be important growth drivers for the Company going forwards.

**(d) Competitive Niche**

The company's competitive advantage lies in its complete global footprint, huge production capacity, vertical integration, speed of mass production, and partnership with customers. These are the reasons why we can maintain our leading position in the industry, and are also the most important value for our customers. In the EMS business, we have accumulated nearly 50 years of highly professional management capabilities in managing people, money, logistics, and technology, and it is even more difficult to imitate. Other competing niches are as follows:

1. Precision molding technology
2. Vertical integration and manufacturing capabilities of plastic molding, stamping, mold-flow, to mechanical components.
3. Creation of internal high speed network systems
4. Mechanical and barebones computer design capabilities
5. Heat transfer and noise treatment capabilities
6. SMT soft/hardware testing capabilities
7. PCBA rapid mass production capabilities
8. Photoelectric consolidation capabilities
9. Management Global supply chain management know-how

**(e) Business Development Advantages, Disadvantages and Countermeasures**

**Advantages**

1. The structure of the global industry is still undergoing adjustment, and the ability of

vertical integration help us to get more outsourcing business opportunities.

2. The turnaround for 3C product life cycle continue to be squeezed, and the importance of timeliness continue to play a key factor, eCMMS is in a prime position to provide speed, quality, engineering services, flexibility and cost considerations, and can assist the Company's opportunities.
3. A complete ecosystem of overseas manufacturing, marketing bases to increase the flexibility and efficiency of global resource integration operations which is well managed and can cater to clients' needs.
4. Globally deployed manufacturing and points of sale, increasing the consolidation of global resources while providing flexibility.
5. Standardization, computerization, and automation, establish a cooperative operation system of industrial management, quality control, production management, and economic management.
6. Establishment of series of synergistic managerial systems of industry, quality, and operations.
7. A firm grasp key capabilities of mold development, and new product development.
8. The electric vehicle industry is growing rapidly, and will move towards division of labor and ICT in the future, with advantages in design, manufacturing, vertical integration, cost, and global layout.
9. The stable supply of mature semiconductors has become the key, and it has the advantages of vertical integration from design, fab, packaging plant, plant, equipment, and customers.

#### Disadvantages and Countermeasures

1. Slowly growth of the ICT industry

Countermeasure: Improve management capabilities, engage more key components, and develop new products to ensure the long-term development of the existing ICT field. At the same time, investing in new businesses such as electric vehicles and semiconductors in the form of light asset BOL, creating a future growth engine.

2. Fiercely competition in core business

Countermeasures: With continuously competition, we are also constantly stabilizing vertical integration, improving technical level, cost control and other production capabilities. And the company can increase our leading position in the face of industrial competitiveness.

3. Regional manufacturing pioneer

Countermeasures: Hon Hai has a diverse and wide range of product lines for many years, so it has carried out regional production in accordance with product

characteristics and customer requirements. The company's business experience accumulated in more than 20 countries and more than 100 bases around the world will be able to expand rapidly and show management advantages.

4. Geopolitics and pandemic

Countermeasures: By flexibly adjust our capacity, supply chain management, inventory management, we shall be able to mitigate short term impact. In the mid to long term, we will leverage our R&D and capacity across major campuses to diversify the risk.

5. Inflation and raw material costs rising

Countermeasures: Inflation and raw material prices rising and have impact on the assembly business and it will dilute the gross profit margin. We will still take customer demand and maximizing EPS as the top priority. High inflation may also affect the demand for low-end consumer products. The Company will continue to focus on high-end products to reduce the impact of inflation.

6. Other costs increasing

Countermeasures: In response to the challenges of rising manpower and various costs, we have established a collaborative operation system of industrial management, quality control, production management, and management through standardization, computerization, and automation. At the same time, the company leverages our global layout for flexible capacity allocation, which is reflected in the selling price in a timely manner to reduce the impact.

7. Environmental regulations and international trends

Countermeasure: Regarding the issue of global warming, the company has responded to the 2050 net zero carbon emission target, introduced renewable energy, invested in scientific carbon emission reduction plans, and joined the net zero carbon emission action alliance, from energy saving, emission reduction, greening. We continuously put efforts in recycling, green energy, etc., echoing global environmental protection trends.

**(2) Core Products, Main Applications, and Manufacturing Process**

The product segments of the Company are Consumer Electronic Products, Cloud Network Products, Computing End-products, and Components and other products. These are mainly used in mobile communication, entertainment, computing, storage, network and other consumer or commercial fields. The company's production process is mainly based on EMS assembly products, and the design, component development, manufacturing and assembly, quality control testing, shipment and other processes are carried out in accordance with customer needs.

**(3) Status of Core Material Suppliers**

The Company's manufactured products such as connectors, foundations, and assembled

products utilize materials such as copper, plastic pellets and auric salt, steel, and the status of suppliers are as below:

1. Copper

Have strategic alliances with several suppliers, to ensure the stability of copper supply.

2. Plastic Pellets

Develop connector-specific materials with domestic and international manufacturers to increase quality. Prices are negotiated annually, and leverages the Company's economy of scale for bulk purchases to ensure price competitiveness.

3. Auric Salt

Prices for auric salt are based on the international gold price, and calculated based on a formula. The supplier ships directly to the manufacturing plant to shorten turnaround for deliver, and lower transportation/storage related risks.

4. Steel

Required materials for computer foundation development with domestic and international manufacturers. The Company utilizes market price or annual price negotiations for steel, and leverages the Company's buying power to maintain favorable prices.

5. Other material requirements for assembly or memory modules, or materials required for IC board printing, capacitors, IC. Specific material needs can be acquired directly through the customer.

**D. Information on Environmental Protection Costs**

(a) **The loss caused by environmental pollution during the latest year and up to the printing date of this Annual Report:**

None

(b) **Information on Environmental Protection Matters**

1. The main workshops and production facilities of the Company are located in Tucheng Industrial Park or Hsinchu Science Park. The Company takes environmental protection as its priority, and carries out immediate correction once discovering any problem. It also makes inspection on the existing preventive facilities. Apart from creating a good working and living environment for its employees and the neighborhood, it strictly complies with the discharge standard. For the pollution and wastes generated in the production process, the Company takes the following steps to protect the environment:
  - i. Prevention of water pollution: set up wastewater treatment plants and water quality analysis laboratory in Tucheng factory. Chemical method is applied in wastewater

treatment, in which pollutants are removed from wastewater and discharged through discharge outlets. The lab has various instruments to measure temperature, PH value, chemical oxygen demand and suspended solid and analyze heavy metal, so that daily inspection on discharging water can be made and water discharge can be well controlled. The Company's factories in Huyue, Minsheng and Hsinchu all received a letter on permit to connect wastewater (or sewage) to the sewer system, under the reference of TFZ No. 1065061681, 0955060439 and YLZ No. 1000004253, and TFZ No. 1035060107 respectively; and have acquired water pollution permit: New Tapei City SHZ No. 04774-01, 05854-00, 05855-00 for Taipei Tiger Leap (Huyao) Factory, Dingpu No.1 Factory, and Dingpu No.2 Factory respectively.

- ii. Prevention of stationary pollution source: waste gas is collected by extraction pipes, and released to the air after the pollutants are removed through the wet scrubber. Every year, the external testing organization is commissioned to detect the viscosity of pollutants in exhaust gas and reports the result to the competent authorities of environmental protection. The Company obtained the Operating Permit of Stationary Pollution Source in 1998 and extended it in June 2008. The permit No. is: BXCZD No. F0447-02. Currently, the total consumption of acid and alkali does not meet the control standards, and the Permit was returned to the authority per Letter No. 1012095840 from the Environmental Protection Bureau.
  - iii. Cleaning of wastes: Works are done in accordance with the Waste Cleaning Plan, and the disposal of waste is reported online in a legal way, and wastes are legally cleaned and recycled.
  - iv. Management on toxic chemicals: Toxic chemicals are stored separately and strictly controlled. Moreover, documents on use and inspection are obtained legally, and periodically reported to the component department of environmental protection.
2. The Company has been adhering to the environmental policy of "pollution control and prevention, continuous waste reduction, providing environment-friendly products, protecting the earth, creating a green enterprise," and strictly abiding by laws and regulations on environmental protection and clients' requirements by means of effectively controlling raw materials, manufacturing process and delivery. Besides, it is dedicated to continuous improvement in order to better product quality, make sure the products free from restricted materials and promote the transformation of upstream suppliers to green supplying chain so as to comply with RoHS requirements.
  3. Current pollution status, the influence of improvement on the Company's earnings, competitive position and capital expenditure, estimated major expenditure on environmental protection in the following two years:
    - i. Estimated expenditure on environmental protection in the next two years: None
    - i. Influence after improvement: None

## **E. Labor Relations**

### **Current important labor agreement and implementation:**

The Company has been treating its employees with sincerity and established mutual trust with them through its welfare system and good training system that guarantee a fulfilling and stable life for them. Though there is no union in the Company, but the Company has established “Workers and Employers Meeting” and have established comprehensive employee communication channels, its employees can give full play to their team spirit, coordinate the Company’s decision, cooperate with each other to create a harmonious environment for working. The Company pursuant to the relevant labor laws and regulations, to protect the legitimate interests of employees, provides employees with safe and healthy working environment, and set up an employee feedback and complaints mechanism. And we disclose employee welfare measures, retirement system and implementation situation on the company's official website. The Company adopts the followings measures to build a harmonious labor relation:

#### **(1) Welfare Measures for Employees:**

Founded in July 1985, apart from members appointed by each Business Unit, the remaining members are proposed and elected by employees. The committee members are re-elected every three years, and there are dedicated members appointed to deal with the routine administrative works of the Committee. Meanwhile, the Company has established the Health Department, which has developed a series of welfare measures to employees and their families in terms of health improvement and health care.

At present, the welfare offerings by the Welfare Committee are as follows:

- (a)** Safe and healthy food service: establishment of staff canteen and food safety inspection center.
- (b)** Comprehensive employee health management
  - i. Health promotion: Topical lectures, weight loss activities and setting up blind masseuse service stations.
  - ii. Health care: In addition to the annual health check and dental care and the implementation of the workplace influenza vaccination plan; during the rapid increase in the epidemic, the Company introduced rapid screening measures and distributed home rapid screening kits, and planned overseas epidemic prevention kits for employees internationally stationed or when on business trips. Disseminate new knowledge on epidemic prevention every week to ensure the safety of employees.
  - iii. Health consultation: Establish a cross-function professional team including physicians, nurses, pharmacists, nutritionists, sports coaches, and physical therapists to provide integrated health management and health monitoring services, and provide remote health consultations based on employee needs, and other medical consultations to cater for employees’ health.
  - iv. Health LOHAS: To maintain on-going health promotion services during the pandemic, online health sessions are organized, covering four subjects including nutrition, exercise, healthy living style, and food safety. We aim to facilitate a healthy vibe by promoting healthy habits through a variety of online programs.
  - v. Cultural recreational activities: Construction of gym for employees and pairing

professional trainers to provide fitness instruction.

Leverage	Operating leverage	5.32	4.34	4.90	4.91	3.93
	Financial leverage	1.52	1.68	2.36	1.57	1.17

The reasons for all financial ratio changes within the most recent two years are as follows:

1. Interest protection: The increase in the interest protection in the current period is mainly due to the decrease in the overall loan interest rate, which reduces the amount of interest paid in the current period.
2. Cash flow ratio: Due to the impact of the pandemic, the increase in shipments at the end of the year led to an increase in the balance of accounts payable to suppliers, resulting in net cash inflows from operating activities, resulting in a relatively high cash flow ratio. As a result, the cash flow adequacy ratio continues to increase.
3. Cash reinvestment ratio: Net cash inflow from operating activities was mainly due to the significant increase in the closing balance of accounts payable last year (compared with the previous year. While the closing balance of inventory for the current period was slightly higher than that of last year, resulting in net cash outflow from operating activities. Therefore, net cash from operating activities during the current period was significantly higher than last year, and cash reinvestment ratio was higher.
4. Financial leverage: The decrease in financial leverage compared to last year was mainly due to the decrease in interest expenses during the current period.

In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

## INDEPENDENT AUDITORS' REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Stockholders of Hon Hai Precision Industry Co., Ltd.

### **Opinion**

We have audited the accompanying consolidated balance sheets of Hon Hai Precision Industry Co., Ltd. and its subsidiaries (the "Group") as of December 31, 2021 and 2020, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, based on our audits and the reports of other independent auditors, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2021 and 2020, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission.

### **Basis for opinion**

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and generally accepted auditing standards in the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. Based on our audits and the reports of other independent auditors, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Key audit matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Group's 2021 consolidated financial statements. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and, in forming our opinion

thereon, we do not provide a separate opinion on these matters.

Key audit matters for the Group's 2021 consolidated financial statements are stated as follows:

### **Cut-off of hub sales revenue**

#### **Description**

Refer to Note 4(35) for accounting policies on revenue recognition.

The Group recognises revenue upon acceptance of the goods by the customers (when control of the products is transferred) if picked up from hub. For pick-ups from hub, the Group recognises sales revenue based on movements of inventories contained in the statements or other information provided by the hub custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and the discrepancy in inventory quantities between the physical inventory and system records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, we identified the cut-off of hub sales revenue as a key audit matter.

#### **How our audit addressed the matter**

We performed the following audit procedures in respect of the above key audit matter:

- A. Assessed and tested the appropriateness of internal controls over cut-off of hub sales revenue for a specific period prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognising movements of inventories and respective transfer of cost of goods sold.
- B. Observed the physical count of inventory quantities held at hubs and agreed to accounting records.

### **Allowance for inventory valuation losses**

#### **Description**

Refer to Note 4(14) for accounting policies on inventory valuation, Note 5(2)3 for uncertainty of accounting estimates and assumptions in relation to inventory valuation losses, and Note 6(8) for details of inventories. As of December 31, 2021, the Group's inventories and allowance for inventory valuation losses amounted to NT\$690,728,262 thousand and NT\$18,582,897 thousand, respectively.

The Group is primarily engaged in manufacturing and sales of 3C electronic products. Due to rapid

technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. The Group recognises inventories at the lower of cost and net realisable value, and the net realisable value is estimated based on historical experience. An allowance for inventory valuation losses is provided for those inventories aged over a certain period and those individually identified as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realisable value for individually obsolete or damaged inventories is subject to management's judgment, we considered the allowance for inventory valuation losses a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

- A. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.
- B. Validated the appropriateness of system logic of inventory aging report utilised by management to ensure proper classification of inventories aged over a certain period.
- C. Evaluated the reasonableness of inventories individually identified as obsolete or damaged by checking the related supporting documents and comparing with the information obtained from physical inventory.
- D. Discussed with management the net realisable value of inventories aged over a certain period and individually identified as obsolete or damaged, validated respective supporting documents and reperformed the calculation.

**Impairment assessment on goodwill arising from the acquisition of Belkin International Inc. ("Belkin") and its subsidiaries**

Description

Refer to Note 4(20) for accounting policy on impairment assessment of non-financial assets, Note 5(2)2 for the critical accounting estimates and assumptions in relation to impairment assessment of goodwill, and Note 6(14) for the details of impairment loss.

As of December 31, 2021, the Group had goodwill arising from the acquisition of Belkin and its subsidiaries for NT\$10,531,410 thousand.

Impairment assessment is performed based on the value in use calculation using the discounted cash flow model to determine the recoverable amounts of the cash-generating unit ("CGU"). As the key

assumptions, including expected growth rate and discount rate, used in the calculation of expected future cash flows involve significant judgment and estimation uncertainty and have a significant impact in assessing goodwill impairment, we considered the impairment assessment on goodwill arising from the acquisition of Belkin and its subsidiaries a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

- A. Understanding and validating the key control procedures performed by management, including review and approval of financial budgets and assumptions.
- B. Assessing the appropriateness of the valuation methodology used in determining the recoverable amount.
- C. Involved valuation specialists to assess the reasonableness of the key assumptions, including expected growth rate, expected gross margin and discount rate used as follows:
  - (a) Evaluated the assumptions used, mainly expected growth rate and expected gross margin used in the impairment assessment by comparing them to historical results, economic and industry forecast;
  - (b) Benchmarked the discount rate range which is used in determining the recoverable amount against certain market data and industry research; and
  - (c) Performed sensitivity analysis over key assumptions used in the model to evaluate the potential impact on the recoverable amounts.

**Other matter – Reference to audits of other independent auditors**

We did not audit the financial statements of certain consolidated subsidiaries. Those financial statements were audited by other independent auditors, whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included in the consolidated financial statements relative to these consolidated subsidiaries was based solely on the reports of other independent auditors. Total assets of those consolidated subsidiaries amounted to NT\$145,992,392 thousand and NT\$151,573,867 thousand, constituting 3.73% and 4.13% of the consolidated total assets as of December 31, 2021 and 2020, respectively, and total operating revenues amounted to NT\$202,530,777 thousand and NT\$232,746,063 thousand, constituting 3.38% and 4.34% of the consolidated total operating revenues for the years then ended, respectively.

**Other matter – Parent company only financial reports**

We have audited and expressed an unqualified opinion on the parent company only financial

statements of Hon Hai Precision Industry Co., Ltd. as at and for the years ended December 31, 2021 and 2020.

### **Responsibilities of management and those charged with governance for the consolidated financial statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing the Group's financial reporting process.

### **Auditors' responsibilities for the audit of the consolidated financial statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with the generally accepted auditing standards in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken based on these consolidated financial statements.

As part of an audit in accordance with generally accepted auditing standards in the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- A. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and

obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.

- B. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal controls.
- C. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- D. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- E. Evaluate the overall presentation, structure, and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- F. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision, and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters

that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Unless otherwise stated, the principal accounting policies applied in the preparation of these consolidated financial statements set out below have been consistently applied to all the periods presented.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers", International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC

Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”).

(2) Basis of preparation

- A. Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:
- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
  - (b) Financial assets at fair value through other comprehensive income.
  - (c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.
- B. The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

- A. Basis for preparation of consolidated financial statements:
- (a) All subsidiaries are included in the Group’s consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
  - (b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
  - (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
  - (d) Changes in a parent’s ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.
  - (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All

amounts previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss or transferred to another category of equity as specified by applicable IFRSs.

- (a) The Group established Foxtron Vehicle Technologies Co., Ltd. with Hua-Chuang Automobile Information Technical Center Co., Ltd. (the “Hua-Chuang”) on November 6, 2020. Hua-Chuang contributed assets with value of \$7,542,000 as capital, while the Group contributed cash of \$7,850,321 as capital and owned 51% equity interest. It was included in the consolidated financial statements since the setup date.
- (b) The Company’s subsidiary, Lankao YuFu Precision Technology Co., Ltd., merged with a 100% subsidiary, LanKao YuDe Environment Material Technology Inc., due to reorganization in the first quarter of 2021. Lankao YuFu Precision Technology Co., Ltd. was the surviving company.
- (c) The Group sold 33.13% Class A shares of Cybertan Technology Corporation in the second quarter of 2021 in order to indirectly dispose the Mainland China investee, Fuyu Properties (Shanghai) Co., Ltd. As the Group lost control over Cybertan Technology Corporation, the Group remeasured any investment retained in the investee at its fair value. The fair value amounting to \$2,231,300 was regarded as the cost on initial recognition of an investment in the associate, and a gain on disposal amounting to \$759,188 was recognised.
- (d) The subsidiary is the Group’s wholly-owned subsidiary newly established on September 24, 2021.
- (e) Linksys Holdings, Inc. (“Linksys”), a 67%-owned subsidiary of the Group’s subsidiary, Foxconn Interconnect Technology Limited (“FIT”), entered into a share purchase agreement

with Fortinet Inc. (“Fortinet”) which is a listed company in U.S. NASDAQ as approved by the Board of Directors of FIT in August 2021. Fortinet subscribed new preference shares of Linksys for a consideration of USD 85 million and acquired additional 18% equity interest in Linksys. All conditions precedent in the share purchase agreement were satisfied and the closing took place on September 25, 2021. As of September 25, 2021, the Group’s shareholding ratio in Linksys decreased to 49% while Fortinet held a 51% equity interest in Linksys. As a result, the Group lost control over Linksys and was not anymore included in the consolidated financial statements. A gain on deemed disposal amounting to \$144,167 was recognised at the date when control was lost. Also, the Group remeasured any investment retained in the investee at its fair value. That fair value amounting to \$4,350,850 was regarded as the cost on initial recognition of an investment in the associate.

- (f) Jusda Supply Chain Management International Co., Ltd., a subsidiary of the Group, acquired a 100% equity interest in Guangxi Yuchai Logistics Co., Ltd. and its subsidiaries for a consideration of RMB 1 billion in July 2021. The acquirees have been included in the consolidated financial statements since the acquisition date.
  - (g) Foxconn Interconnect Technology Limited, a subsidiary of the Group, issued 175,787 thousand new shares to acquire a 100% equity interest in Sound Legend Limited and its subsidiaries in October 2021. The acquirees have been included in the consolidated financial statements since the acquisition date.
  - (h) FIH Mobile Limited, a subsidiary of the Group, and Mobile Drive Netherlands B.V. (“Mobile Drive”), a wholly-owned subsidiary of FIH Mobile Limited, entered into a joint venture agreement with Stellantis N.V. (“Stellantis”), a listed company in NYSE, in August 2021, whereby Stellantis acquired a 50% equity interest in Mobile Drive for a consideration of USD 40 million, and FIH Mobile Limited and its subsidiaries transferred part of its assets and liabilities to Mobile Drive for the remaining 50% equity interest. The closing of the joint venture agreement took place on December 31, 2021. As of December 31, 2021, the Group lost control over Mobile Drive and was not anymore included in the consolidated financial statements. A gain on deemed disposal amounting to \$977,969 was recognised at the date when control was lost. Also, the Group remeasured the remaining 50% equity interest at its fair value. The fair value amounting to \$1,107,200 was regarded as the cost on initial recognition of an investment in the associate or joint venture.

Cash and cash equivalents, beginning of year	5,871,722	8,204,093
Cash and cash equivalents, end of year	<u>\$ 704,003</u>	<u>\$ 5,871,782</u>

Note: The summarised financial information of the subsidiaries stated above were based on each subgroup's consolidated balance sheets, consolidated statements of comprehensive income and consolidated statements of cash flows in the presentation currencies of their own and translated into New Taiwan Dollars at the closing exchange rate at the corresponding balance sheet date and average exchange rates of the corresponding period, respectively.

(4) Foreign currency translation

- A. The consolidated financial statements are presented in New Taiwan Dollars, which is the Company's functional and the Group's presentation currency.
- B. Foreign currency transactions and balances
  - (a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise, except when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges.

- (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.
- (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
- (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within “other gains and losses”.

C. Translation of foreign operations

- (a) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
  - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
  - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
  - iii. All resulting exchange differences are recognised in other comprehensive income.
- (b) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Group still retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.
- (c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.
- (d) Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing exchange rates at the balance sheet date.

(5) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
- (a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;
  - (b) Assets held mainly for trading purposes;
  - (c) Assets that are expected to be realised within twelve months from the balance sheet date;
  - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
- (a) Liabilities that are expected to be settled within the normal operating cycle;
  - (b) Liabilities arising mainly from trading activities;
  - (c) Liabilities that are to be settled within twelve months from the balance sheet date;
  - (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value, and recognises the gain or loss in profit or loss.
- D. The Group recognises the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(8) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial

recognition to recognise changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:

- (a) The objective of the Group's business model is achieved both by collecting contractual cash flows and selling financial assets.
- (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value:
  - (a) The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.
  - (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognised in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

(9) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
  - (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
  - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(10) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.
- C. The Group's operating pattern of accounts receivable that are expected to be factored is for the purpose of receiving contract cash flow and selling, and the accounts receivable are subsequently

measured at fair value, with any changes in fair value recognised in other comprehensive income.

(11) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income and financial assets at amortised cost including accounts receivable that have a significant financing component, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(12) Derecognition of financial assets

The Group derecognises a financial asset when one of the following conditions is met:

- A. The contractual rights to receive the cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows of the financial asset have been transferred; and the Group has not retained control of the financial asset.

(13) Leasing arrangement (lessor) – Lease receivables / Operating leases

- A. Based on the terms of a lease contract, a lease is classified as a finance lease if the lessee assumes substantially all the risks and rewards incidental to ownership of the leased asset.
  - (a) At commencement of the lease term, the lessor should record a finance lease in the balance sheet as 'lease receivables' at an amount equal to the net investment in the lease (including initial direct costs). The difference between gross lease receivable and the present value of the receivable is recognised as 'unearned finance income of finance lease'.
  - (b) The lessor should allocate finance income over the lease term based on a systematic and rational basis reflecting a constant periodic rate of return on the lessor's net investment in the finance lease.
  - (c) Lease payments (excluding costs for services) during the lease term are applied against the gross investment in the lease to reduce both the principal and the unearned finance income.
- B. Lease income from an operating lease (net of any incentives given to the lessee) is recognised in profit or loss on a straight-line basis over the lease term.

(14) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average cost method. The cost of finished goods and work in process comprises raw materials, direct labour, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price

in the ordinary course of business, less the estimated cost of completion and applicable variable selling expense.

(15) Investments accounted for under the equity method / associates

- A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognised at cost.
- B. The Group's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
- C. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Group's ownership percentage of the associate, the Group recognises change in ownership interests in the associate in 'capital surplus' in proportion to its ownership.
- D. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under the equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
- F. Upon loss of significant influence over an associate, the Group remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognised in profit or loss.
- G. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it retains significant influence over this associate, the

amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.

- H. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(16) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each component of property, plant and equipment that is significant in relation to the total cost of the item is depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change.

The estimated useful lives of property, plant and equipment are as follows:

Buildings	15 ~ 51 years
(Auxiliary buildings	5 ~ 11 years)
Machinery and equipment	3 ~ 9 years
Computer and communication equipment	3 ~ 25 years
Other equipment	1 ~ 25 years

(17) Leasing arrangements (lessee) — right-of-use assets / lease liabilities

- A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.
- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments

are comprised of the following:

- (a) Fixed payments, less any lease incentives receivable;
- (b) Variable lease payments that depend on an index or a rate;
- (c) Amounts expected to be payable by the lessee under residual value guarantees;
- (d) The exercise price of a purchase option, if the lessee is reasonably certain to exercise that option; and
- (e) Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The Group subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

C. At the commencement date, the right-of-use asset is stated at cost comprising the following:

- (a) The amount of the initial measurement of lease liability;
- (b) Any lease payments made at or before the commencement date;
- (c) Any initial direct costs incurred by the lessee; and
- (d) An estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

D. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognise the difference between remeasured lease liability in profit or loss.

(18) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Investment property is depreciated on a straight-line basis over its estimated useful life of 6 to 51 years.

(19) Intangible assets

- A. Trademark is amortised on a straight-line basis over its estimated useful life of 3 to 20 years.
- B. Goodwill is generated by adopting the acquisition method when merger and acquisition occurs.
- C. Patent is amortised on a straight-line basis over its estimated useful life of 2 to 20 years.
- D. The developed technologies are obtained from business combination. They are included application technology such as home networking, Internet of Things, model platforms and electric vehicle power systems. Part of the developed technologies are available for use and be

amortised on a straight-line basis over its estimated useful life of 4 to 10 years. The remaining is the developed technologies that is not yet available for use, will be amortised from the date it is available for use on a straight-line basis over its estimated useful life of 7 years.

- E. Customer relationship and Supplier relationship are obtained as a result of a business combination, and are amortised on a straight-line basis over its estimated life of 15 to 16 years.
- F. Software is stated initially at its costs and is amortised on a straight-line basis over its estimated useful life of 3 to 10 years.
- G. Concession obtained individually is stated initially at its costs and is amortised on a straight-line basis over its useful life of 15 to 16 years.

(20) Impairment of non-financial assets

- A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognising impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.
- B. The recoverable amount of goodwill shall be evaluated annually. An impairment is recognised when recoverable amount is lower than carrying amount. Impairment loss should not be reversed in the future.
- C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(21) Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(22) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(23) Financial liabilities at fair value through profit or loss

- A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorised as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss at initial recognition:
- (a) Hybrid (combined) contracts; or
  - (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
  - (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
- B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognised in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognised in profit or loss.
- C. If the credit risk results in fair value changes in financial liabilities designated as at fair value through profit or loss, they are recognised in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognising in profit or loss for loan commitments or financial guarantee contracts.

(24) Bonds payable

Ordinary corporate bonds issued by the Group are initially recognised at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from bonds payable, which is amortised to profit or loss over the period of bond circulation using the effective interest method as an adjustment to 'finance costs'.

(25) Convertible bonds payable

Convertible bonds issued by the Group contain conversion options (that is, the bondholders have the right to convert the bonds into the Group's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Group classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

- (a) The embedded call options and put options are recognised initially at net fair value as 'financial assets or financial liabilities at fair value through profit or loss'. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognised as 'gain or loss on valuation of financial assets or financial liabilities at fair value through profit or loss'.
- (b) The host contracts of bonds are initially recognised at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortised in profit or loss as an adjustment to 'finance costs' over the period of circulation using the effective interest method.
- (c) The embedded conversion options which meet the definition of an equity instrument are initially

recognised in 'capital surplus—share options' at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.

(d) Any transaction costs directly attributable to the issuance are allocated to each liability or equity component in proportion to the initial carrying amount of each abovementioned item.

(e) When bondholders exercise conversion options, the liability component of the bonds shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the abovementioned liability component and 'capital surplus—share options'.

(26) Derecognition of financial liabilities

A financial liability is derecognised when the obligation specified in the contract is either discharged or cancelled or expires.

(27) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(28) Non-hedging and embedded derivatives

Non-hedging derivatives are initially recognised at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognised in profit or loss.

(29) Hedge accounting

A. At the inception of the hedging relationship, there is formal designation and documentation of the hedging relationship and the Group's risk management objective and strategy for undertaking the hedge. That documentation shall include identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements.

B. The Group designates the hedging relationship as follows:

Cash flow hedge: a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction.

C. Cash flow hedges

(a) The cash flow hedge reserve associated with the hedged item is adjusted to the lower of the following (in absolute amounts):

- i. the cumulative gain or loss on the hedging instrument from inception of the hedge; and
- ii. the cumulative change in fair value of the hedged item from inception of the hedge.

(b) The effective portion of the gain or loss on the hedging instrument is recognised in other comprehensive income. The gain or loss on the hedging instrument relating to the ineffective portion is recognised in profit or loss.

- (c) The amount that has been accumulated in the cash flow hedge reserve in accordance with (a) is accounted for as follows:
- i. If a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability, or a hedged forecast transaction for a non-financial asset or non-financial liability becomes a firm commitment for which fair value hedge accounting is applied, the Group shall remove that amount from the cash flow hedge reserve and include it directly in the initial cost or other carrying amount of the asset or liability.
  - ii. For cash flow hedges other than those covered by i. above, that amount shall be reclassified from the cash flow hedge reserve to profit or loss as a reclassification adjustment in the same period or periods during which the hedged expected future cash flows affect profit or loss.
  - iii. If that amount is a loss and the Group expects that all or a portion of that loss will not be recovered in one or more future periods, it shall immediately reclassify the amount that is not expected to be recovered into profit or loss as a reclassification adjustment.
- (d) When the hedging instrument expires, or is sold, terminated, exercised or when the hedging relationship ceases to meet the qualifying criteria, if the forecast transaction is still expected to occur, the amount that has been accumulated in the cash flow hedge reserve shall remain in the cash flow hedge reserve until the forecast transaction occurs; if the forecast transaction is no longer expected to occur, the amount shall be immediately reclassified from the cash flow hedge reserve to profit or loss as a reclassification adjustment.

(30) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognised as interest expense. Provisions are not recognised for future operating losses.

(31) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the

extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.
- ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.
- iii. Past service costs are recognised immediately in profit or loss.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(32) Employee share-based payment

- A. For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognised is based on the number of equity instruments that eventually vest.
- B. Restricted stocks:
  - (a) Restricted stocks issued to employees are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period.
  - (b) For restricted stocks where those stocks do not restrict distribution of dividends to employees and employees are not required to return the dividends received if they resign during the

vesting period, the Group recognises the fair value of the dividends received by the employees who are expected to resign during the vesting period as compensation cost at the date of dividends declared.

- (c) For restricted stocks where employees have to pay to acquire those stocks, if employees resign during the vesting period, they must return the stocks to the Group and the Group must refund their payments on the stocks, the Group recognises the payments from the employees who are expected to resign during the vesting period as liabilities at the grant date, and recognises the payments from the employees who are expected to be eventually vested with the stocks in 'capital surplus – others'.

(33) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred income tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.
- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

- F. A deferred tax asset shall be recognised for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

(34) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(35) Revenue recognition

- A. The Group manufactures and sells consumer electronics products. Sales are recognised when control of the products have transferred, being when the products are delivered to or picked by the customers, the customers has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.
- B. Sales revenue is recognised based on the price specified in the contract, net of the estimated sales discounts and allowances. Revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date. The contract cost does not include a significant financing component as the sales are made with credit term consistent with market practice.
- C. A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.
- D. The Group's obligation to provide a refund for faulty products under the standard warranty terms is recognised as a provision.
- E. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognised. If the payments exceed the products sold, a contract liability is recognised.

(36) Government grants

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises expenses for the related costs for which the grants are intended to compensate.

Government grants related to property, plant and equipment are recognised as non-current liabilities and are amortised to profit or loss over the estimated useful lives of the related assets using the straight-line method.

(37) Business combinations

- A. The Group uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognised amounts of the acquiree's identifiable net assets. All other non-controlling interests should be measured at the acquisition-date fair value.
- B. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognised and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognised directly in profit or loss on the acquisition date.

(38) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments.

5. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS ON UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgments in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. The above information is addressed below:

(1) Critical judgments in applying the Group's accounting policies

A. Revenue recognition

The Group determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e. the Group is a principal) or to arrange for the other party to provide those goods or services (i.e. the Group is an agent) based on the transaction model and its economic

substance. The Group is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Group recognises revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Group is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Group recognises revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

After receiving the materials or services procured, the Group directs the use of the goods and services and provides critical manufacturing processing technique, in order to produce and significantly integrate various goods and services into the combined output as the resulting devices and transfers to a customer. The following indicators are used to determine whether the Group controls the good or service before it is transferred to a customer and considers itself as a principal:

- (a) The Group is primarily responsible for the provision of goods or services;
- (b) The Group assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer.
- (c) The Group has discretion in establishing prices for the goods or services.

#### B. Offsetting financial instruments

The Company's financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

## (2) Critical accounting estimates and assumptions

The Group makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

#### A. Impairment assessment of tangible and intangible assets (excluding goodwill)

The Group assesses impairment based on its subjective judgement and determines the separate cash flows of a specific group of assets, useful lives of assets and the future possible income and expenses arising from the assets depending on how assets are utilized and industrial characteristics. Any changes of economic circumstances or estimates due to the change of Group strategy might cause adjustments on impairment of assets.

#### B. Impairment assessment of goodwill

The Group assesses impairment of goodwill based on subjective judgment which includes identifying and allocating assets, liabilities and goodwill to related cash-generating unit to determine recoverable amount of this unit. Details of impairment assessment of goodwill is provided in Note 6(14).

As of December 31, 2021, the Group recognised goodwill after impairment assessment of

\$16,186,060.

### C. Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Group must determine the net realisable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2021, the carrying amount of inventories was \$672,145,365.

(a) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(b) Forward foreign exchange contracts

The Group enters into foreign exchange forward transactions to reduce the following risk of exchange rate:

A. Operating activities: Import of raw materials and export sales.

B. Investing activities: Import of machinery and equipment.

C. Financing activities: Long-term and short-term foreign currency assets and liabilities.

(c) Convertible bonds payable

The Group's indirect subsidiary, PCE Paragon Solutions Kft., acquired convertible bonds issued by Nanthealth, Inc. in the amount of US\$30 million. The convertible bonds are embedded derivatives. Based on the contract, PCE Paragon Solutions Kft. has the right to require conversion from the issue date to the maturity date if the written consent is submitted in advance. Nanthealth, Inc. repaid in advance in the amount of USD 30,733 thousand in June 2021. The gains (losses) of settlement were recognised in accordance with the requirements of IFRSs.

D. Details of the Group's investments in equity instruments and beneficiary certificates are provided in Table 3.

E. The Group has no financial assets at fair value through profit or loss pledged to others.

F. Information relating to credit risk of financial assets and liabilities at fair value through profit or loss is provided in Note 12(2).

B. The Group invested in the trust fund named Guangdong Finance Trust - Peng Yun Tian Hua Collection Fund Trust in December 2017 which was mainly created for the investment in Guangzhou Guangyin Nanyue Intelligent Technology Industrial Investment Partnership. As of December 31, 2021, the Group has invested a total of RMB 35 billion and has redeemed RMB 14 billion. Under the agreement, the Group will take over the share in the trust of the preferred beneficiary, Bank of Guangzhou, in case it initiates a redemption.

C. The counterparties of the Group's investments have good credit quality.

D. Information relating to financial assets at amortised cost pledged as collateral is provided in Note 8.

E. The other current assets are mainly investment performance bond.

(5) Hedging financial assets and liabilities

	December 31, 2021
	Current assets
Cash flow hedges:	
<u>Exchange rate risk</u>	
Foreign exchange forward contracts	<u>\$ 1,068,785</u>

A. Hedge accounting is applied to remove the accounting inconsistency between the hedging instrument and the hedged item. As the Group's US dollar denominated accounts receivable are exposed to the impact of variable exchange rate, the Group uses the risk exposed during the next 12 months with 1:1 hedge ratio to control the exchange rate risk under the acceptable range based on the Group's risk management policies.

B. The forecast transactions which are highly probable incurred in the Group's companies are designated as hedged item, and the intrinsic value of foreign exchange options is designated as cash flow hedge. Changes in fair value of foreign exchange options are included in other

comprehensive income and are amortised and recognised in profit or loss during the contract period. There are economic relations between the hedging instrument and the hedged item, and the foreign exchange options are in line with major terms, such as monetary items, foreign currency borrowings or the currency and amount of bonds.

C. Transaction information associated with the Group adopting hedge accounting is as follows:

Hedged items	December 31, 2021			
	Hedging instruments	Notional amount		Contract period
<u>Financial assets</u>				
Cash flow hedges:				
Forecast transaction	Foreign exchange	RMB (BUY)	23,259,750	2021.10.21~2022.05.26
	forward contracts	USD (SELL)	3,590,000	2021.10.21~2022.05.26

D. Cash flow hedge

	2021
<u>Other equity - cash flow hedge reserve</u>

Add: Gains on hedge effectiveness-amount recognised in other comprehensive income	1,580,536
Less: Reclassified to profit or loss as the hedged item has affected profit or loss	(1,384,639)
At December 31	<u>\$ 195,897</u>

(a) To hedge exposed exchange rate risk arising from forecast sales of goods and collections, the Group entered into a forward forecast sales agreement of US dollar, and the hedge ratio is 1:1. The effective portion with respect to the changes in the fair value of the hedging instruments is deferred and recognised in the cash flow hedge reserve, which is under other comprehensive income, and will be directly included in the sales revenue when the hedged items are subsequently recognised in accounts receivable.

(b) The Group separates changes in spot price and time value, only change in spot price is designated as hedging instruments. Changes in fair value, which is associated with hedged item, are recognised in other comprehensive income. Meanwhile, time value at hedging commencement date, which is associated with hedged items, are amortised during the period the hedging instrument affects profit or loss. The amortisation will be recognised in profit or loss from other comprehensive income or loss.

E. Information relating to fair value risk of hedging financial assets and liabilities is shown in Note 12(3).

(6) Notes and accounts receivable

	<u>December 31, 2021</u>	<u>December 31, 2020</u>

	<u>\$ 1,125,762,611</u>	<u>\$ 903,070,230</u>

- A. As of December 31, 2021 and 2020, accounts receivable and notes receivable were all from contracts with customers. As of January 1, 2020, the balance of receivables from contracts with customers amounted to \$1,037,840,337.
- B. On December 31, 2021 and 2020, the Group had accounts receivable classified as financial assets at fair value through other comprehensive income in the amounts of \$97,923,986 and \$109,052,508, respectively.
- C. The Group entered into a factoring agreement with the following banks to sell its accounts receivable. Under the agreement, the Group is not obligated to bear the default risk of the transferred accounts receivable, but is liable for the losses incurred on any business dispute. The Group does not have any continuing involvement in the transferred accounts receivable. Thus, the Group derecognised the transferred accounts receivable.

As of December 31, 2021 and 2020, the relevant information of accounts receivable factored but unsettled were as follows:

<u>December 31, 2021</u>			
<u>Accounts receivable factoring not yet due</u>	<u>Amount of accounts receivable derecognised</u>	<u>Amount advanced</u>	<u>Amount of consideration retained</u>
<u>\$ 47,478,385</u>	<u>\$ 47,478,385</u>	<u>\$ 47,478,385</u>	<u>\$ -</u>

A. For the year ended December 31, 2021, the Group either disposed its equity interest or did not participate in the capital increase of certain subsidiaries proportionally to its interest, thereby reducing its shareholding ratios in the subsidiaries, Cybertan Technology Corporation, Linksys Holdings, Inc. and Mobile Drive Netherlands B.V. As a result, the Group lost control over the aforementioned subsidiaries, and remeasured any investment retained in the investees at their fair values totalling \$7,689,350. The related gain on deemed disposals amounting to \$1,881,324 was recognised for the year ended December 31, 2021. Details are provided in Note 4(3).

- A. Details of the aforementioned intangible assets acquired from business combinations are provided in Note 6(40).
- B. The amounts of disposal of subsidiaries stated above is mainly from Linksys, an originally 67%-owned subsidiary of the Group's subsidiary, Foxconn Interconnect Technology Limited, which issued new shares for a cash capital increase in the third quarter of 2021, but the Group did not participate in the capital increase. As the shareholding percentage of the Group in Linksys decreased to 49%, the Group lost control over Linksys and it ceased to be included in the consolidated financial statements. Refer to Note 6(9) for details.
- C. Impairment assessment for goodwill of Belkin International Inc.

The Group acquired Belkin International Inc. (referred herein as "Belkin") which generated goodwill of \$13,563,157. The Group subsequently reduced the goodwill due to the disposal of Linksys, a subsidiary of Belkin. As of December 31, 2021, the balance of goodwill from the acquisition of Belkin amounted to \$10,531,410. Impairment assessment of goodwill is allocated to Belkin's CGU. The recoverable amount of the CGU relating to the goodwill arising from acquisition of Belkin was determined based on value-in-use calculation. The calculation uses projected cash flows based on financial budgets for the next five-year period.

Management determined expected revenue growth rate based on past performance and their expectations of market development. The long-term weighted average growth rates used are consistent with the projection included in industry reports. Pre-tax discount rate used reflects the risk premium of the segment and operating region.

The assumptions used in the main assessment as of December 31, 2021 are as follows:

Five-year compound revenue growth rate	9.7%
Long-term growth rate	2%
Pre-tax discount rate	17.2%

Based on the above assessment, there is no impairment loss on goodwill as of December 31, 2021.

- D. The details of amortisation are as follows:

	Years ended December 31,	
	2021	2020
Operating costs and operating expenses	\$ 3,431,558	\$ 2,302,573

A. 3.5GHz frequency band through Multi Operator Core Network (MOCN)

A subsidiary of the Group, Asia Pacific Telecom Co., Ltd., entered into a cooperation agreement on 3.5GHz frequency band through MOCN with Far EasTone Telecommunications Co., Ltd. (FET). The period of the agreement is from September 4, 2020 to December 31, 2040. This cooperation agreement was approved with conditions by the National Communications Commission (NCC) Committee and the Fair Trade Commission. Both signing parties agreed that the Group will share two-ninths of the network deployment cost of FET's 3.5GHz frequency band in order to obtain use right capacity, of which the cost of spectrum sharing amounted to \$9,473,000.

B. Incremental costs of obtaining a contract

A subsidiary of the Company, Asia Pacific Telecom Co., Ltd., recognises the incremental costs (mainly comprised of sales commissions) of obtaining a contract with a customer as an asset if the Group expects to recover those costs. The recognised asset is amortised on a systematic basis that is consistent with the transfers to the customer of the goods or services to which the asset relates. The Group recognised amortised costs of \$1,924,300 and \$1,858,896 in profit or loss for the years ended December 31, 2021 and 2020, respectively.

C. Details of net investment in lease is provided in Note 6(12).

A. First overseas convertible bond issue of 2017

- (a) The Company issued the first overseas unsecured convertible bonds totaling USD 500 million with the approval of the competent authority on August 22, 2017. The bonds carry zero coupon rate over five years. The circulation period is from November 6, 2017 to November 6, 2022.
- (b) The conversion price is adjusted in line with the model specified in the conversion rules. For the year ended December 31, 2021, no bonds were converted into common stock at the conversion price of NT\$151.583 (using the exchange rate of 1 USD: 30.192 TWD) which was adjusted by the Company on July 30, 2021 based on the conversion rules of the first overseas convertible bond issue of 2017.
- (c) In accordance with the conversion rules, if the convertible bond is purchased (including purchased from the secondary market), early redeemed, or repaid at maturity by the Company, or if the convertible bond is converted into common stocks or redeemed by the bondholder, the bond is to be retired and will not be reissued.
- (d) In accordance with the conversion rules, the rights and obligations of common stocks

converted are the same as the outstanding ones previously subscribed.

- (e) The conversion options for the first overseas convertible bond issue of 2017 are separated from the liabilities and recorded as ‘capital surplus – share options’ amounting to \$1,099,253.
- (f) In accordance with the conversion rules, bondholders have the right to request the Company to redeem any bonds at the price of the bonds’ par value upon three years from the issue date. On November 6, 2020, bondholders requested to redeem bonds totaling \$1,817,558 (USD 60,200 thousand).

#### B. First unsecured convertible bond issue of 2018

- (a) ShunSin Technology Holdings Limited, a subsidiary of the Company, issued the first unsecured convertible bonds totaling \$1,500 million with the approval of the competent authority on January 10, 2018. The bonds carry zero coupon rate over five years. The circulation period is from February 12, 2018 to February 12, 2023.
- (b) The conversion price is NT\$165.4 after adjusting in line with the model specified in the conversion rules.
- (c) As the bondholders have the right to request the Company to redeem the bond at the price of the bond’s par value after three years from the bonds’ issue date (February 12, 2021 is the selling base day of the bondholders), the subsidiary, ShunSin Technology Holdings Limited, needs to redeem the bonds at par value. In the first quarter of 2020, the corporate bonds payable and the financial assets and liabilities at fair value through profit or loss-non-current were reclassified into other current liabilities. Nevertheless, the bonds payable is not required to be fully paid off within one year. On February 12, 2021, no bondholder has requested to redeem the bonds. Therefore, the corporate bonds were reclassified to non-current liabilities.
- (d) The conversion options of the bonds were separated from liabilities and recognised respectively as equity and liabilities at its issuance as follows:

Convertible bonds’ present value at compound interest	\$	1,357,350
Embedded derivatives (i.e. put options and redemption rights)		13,650
Components of equity at issuance		129,000
	\$	<u>1,500,000</u>

- (e) The details of financial asset (liabilities) at fair value through profit or loss are as follows:

	December 31, 2021	December 31, 2020
Embedded derivatives (i.e. put options and redemption rights)	\$ 2,550	\$ 2,250
Valuation (loss) gain	( 2,550)	300
	<u>\$ -</u>	<u>\$ 2,550</u>

#### C. First overseas unsecured convertible bond issue of 2021

- (a) The Company issued the first overseas unsecured convertible bonds totaling USD 700 million with the approval of the competent authority on May 26, 2021. The bonds carry zero coupon rate over five years. The circulation period is from August 5, 2021 to August 5, 2026. The

Company will fully redeem the bonds at the price of the bonds' face value plus -0.41% of the face value at the maturity date.

- (b) The conversion price is adjusted in line with the model specified in the conversion rules. As of December 31, 2021, no bonds were converted into common stock at the conversion price of NT\$163.17 in dollars (using the exchange rate of 1 USD: 27.978 TWD) which was adjusted by the Company on August 5, 2021 based on the conversion rules of the first overseas convertible bond issue of 2021.
  - (c) In accordance with the conversion rules, if the convertible bond is purchased (including purchased from the secondary market), early redeemed, or repaid at maturity by the Company, or if the convertible bond is converted into common stocks or redeemed by the bondholder, the bond is to be retired and will not be reissued.
  - (d) In accordance with the conversion rules, the rights and obligations of common stocks converted are the same as the outstanding ones previously subscribed.
  - (e) The conversion options for the first overseas convertible bond issue of 2021 are separated from the liabilities and recorded as 'capital surplus - share options' amounting to \$336,012.
  - (f) In accordance with the conversion rules, bondholders have the right to request the Company to redeem any bonds at the price of the bonds' par value upon three years from the issue date.
- D. For details of principal, interest rate, maturity and other information of corporate bonds payable and foreign unsecured corporate bonds, please refer to Table 12.

(22) Pensions

A. Defined benefit plans

- (a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law of Taiwan, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by next March.
- (b) The amounts recognised in the balance sheet are as follows (shown as "other non-current liabilities"):

	<u>December 31, 2021</u>	<u>December 31, 2020</u>

(d) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilisation plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the Regulator. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2021 and 2020 is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.

(e) The principal actuarial assumptions used were as follows:

	2021	2020
Discount rate	0.7%	0.4%
Future salary increases	3.5%	3.5%

Assumptions regarding future mortality rate are set based on actuarial advice in accordance with published statistics and experience in each territory.

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis was as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
<u>December 31, 2021</u>				
Effect on present value of defined benefit obligation	(\$ 51,622)	\$ 53,689	\$ 47,774	(\$ 46,292)
<u>December 31, 2020</u>				
Effect on present value of defined benefit obligation	(\$ 59,721)	\$ 62,244	\$ 55,505	(\$ 53,680)

The sensitivity analysis above is based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period

- (g) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2021 amount to \$15,845.
  - (h) As of December 31, 2021, the weighted average duration of the retirement plan is 12 years
- B. Defined contribution plans

- (a) Effective July 1, 2005, the Company and its domestic subsidiaries have established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.
- (b) The subsidiaries in mainland China have defined contribution pension plans and contribute an amount monthly based on 8%~9% of employees’ monthly salaries and wages to an independent fund administered by a government agency. The plan is administered by the government of mainland China. Other than the monthly contributions, the Group does not have further pension liabilities.
- (c) The pension costs under the defined contribution pension plans of the Group for the years ended December 31, 2021 and 2020 were \$16,463,143 and \$10,737,739, respectively. As a result of the coronavirus pandemic in China in early 2020, the local government reduced by

half the pension insurance for a period of six months from February 2020.

(26) Share capital–common stock

A. As of December 31, 2021, the Company's authorised capital was \$180,000,000, consisting of 18 billion shares of ordinary stock, and the paid-in capital was \$138,629,906, consisting of 13,862,991 thousand shares with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected.

B. Pursuant to the resolution adopted at the stockholders' meeting held on June 1, 1999, and after obtaining approval from the SFC, the Company issued 50 million ordinary shares so as to issue 25 million units of global depository receipts (GDRs) in Europe, Asia and the USA. The issuance amounted to USD 347,250 thousand, and the main terms and conditions of the GDRs are as follows:

(a) Voting

Holders of GDRs have no right to directly exercise voting rights or attend the Company's stockholders' meeting, except when a motion is on the election of directors or supervisors.

A holder or holders together holding at least 51% of the GDRs outstanding at the relevant record date of the stockholders' meeting can instruct the Depositary to vote in the same direction in respect of one or more resolutions to be proposed at the meeting.

(b) Sale and withdrawal of GDRs

Under the current R.O.C. law, shares represented by the GDRs may be withdrawn by holders of GDRs commencing three months after the initial issue of GDRs. A holder of a GDR may, provided that the Company has delivered to the custodian physical share certificates in respect of the Deposited Shares, request the Depositary to sell or cause to be sold on behalf of such holder the shares represented by such GDRs.

(c) Dividends

GDR holders are entitled to receive dividends to the same extent as the holders of common stock.

(d) As of December 31, 2021, 90,070 thousand units of GDRs were outstanding, which represents 180,141 thousand shares of common stock.

C. Treasury stocks

(28) Retained earnings

A. The annual net income of the Company shall be appropriated in accordance with the priorities listed as follows:

- (a) Recovery of losses;
- (b) Appropriation of 10% for legal reserve.
- (c) Appropriation or reversal of special reserve pursuant to applicable law or regulation.

As to the earnings available for appropriation to shareholders including accumulated unappropriated earnings and earnings available for appropriation this year, the board of directors is authorized to draft an appropriation plan in accordance with the dividend policy in Section D of the Articles of Incorporation.

The board of directors is authorized to distribute dividends and bonuses in whole or in part, which

may be paid in cash after a resolution has been adopted by a majority vote at a meeting of the board of directors attended by two-thirds of the total number of directors.

The Company is currently at a developing stage. The Company's dividend distribution policy is subject to the Company's current and future investment environment, fund requirements, competition from local and abroad, and capital budgets, as well as taking into consideration the interests of shareholders and the long-term financial planning. Shareholder dividends are appropriated based on accumulated unappropriated earnings, which shall not be less than 15% of distributable earnings for the year and cash dividends shall not be less 10% of total dividends.

- B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.
- C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.
- D. The appropriations of 2021 earnings were proposed during the board meeting on March 23, 2022. The appropriations of 2020 earnings had been resolved at the shareholders' meeting on July 23, 2021. Details are summarized as follows:

At December 31	<u>\$ 192,802,808</u>	<u>\$ 176,869,033</u>

- A. Certain subsidiaries of the Group have issued employee share-based payment and new shares during 2021 and 2020. The Group has not purchased additional shares in proportion to its ownership and thus, the non-controlling interest of the Group increased by \$2,322,773 and \$3,110,549 and equity attributable to owners of the parent increased by \$3,744,555 and \$3,252,539, for the years ended December 31, 2021 and 2020, respectively.
- B. The above changes in 2021 mainly pertain to the subscription of Far EasTone Telecommunications Co., Ltd. of 500,000 thousand shares of the subsidiary of the Group, Asia Pacific Telecom Co., Ltd., on September 24, 2021. As a result, the non-controlling interest of the Group increased by \$5,000,000.
- C. The main reason for the change in 2020 is because the Group established Foxtron Vehicle Technologies Co., Ltd. (“Foxtron Vehicle”) together with Hua-Chuang Automobile Information Technical Center Co., Ltd., where the Group owned 51% equity interest in Foxtron Vehicle. Consequently, the non-controlling interest of the Group increased by \$7,542,000.

## 9. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNISED CONTRACT COMMITMENTS

Except for Note 6(4), contingencies and commitments are as follows:

### (1) Contingencies - Significant legal matter

On March 8, 2019, Microsoft Corporation and Microsoft Licensing, GP sued the Group over the dispute regarding the royalty payment under the patent licensing agreement. The two parties in the case has reached a settlement in August 2020. Accordingly, the Group has properly accrued the settlement value in the financial statements and paid in installments according to the agreement.

(2) Commitments

A. Capital expenditure contracted for at the balance sheet date but not yet incurred is as follows:

	<u>December 31, 2021</u>	<u>December 31, 2020</u>
Property, plant and equipment	<u>\$ 4,267,388</u>	<u>\$ 6,191,809</u>

- B. On November 10, 2021, the Group entered into an asset purchase agreement with Lordstown Motors Corp. and Lordstown EV Corporation, listed companies in U.S. NASDAQ. As of December 31, 2021, the outstanding commitment under the asset purchase agreement was USD 130 million. As of the report date, the above agreement is still pending approval by the Committee on Foreign Investment in the United States. If the transaction will not be completed by April 30, 2022 or terminated by both parties, Lordstown EV Corporation has to return all payments made by the Group.
- C. As of December 31, 2021 and 2020, a subsidiary of the Company, Asia Pacific Telecom Co., Ltd., had outstanding contracts of equipment procurements and base transceiver stations construction totaling \$2,929,991 and \$3,872,453, respectively that will be paid in the future or paid by issuing promissory notes and commercial papers.
- D. A subsidiary of the Group, Asia Pacific Telecom Co., Ltd., has entered into a 3.5GHz MOCN contract with Far EasTone Telecommunications Co., Ltd. (FET). Details are provided in Note 6(15).
- E. In order to enhance spectrum efficiency and increase competitiveness with FET, as resolved by the Board of Directors on November 5, 2020, the Group and FET entered into (a) a MOCN agreement on 700MHz, effective from November 5, 2020 to December 31, 2030, which the Group and FET agreed to share the costs and expenses arising from or related to the agreement in the proportions of two-ninth and seven-ninth, respectively; and (b) a frequency spectrum exchange agreement wherein the Group exchanges its 723MHz~728MHz (uplink) and 778MHz~783MHz (downlink) frequency bands with FET's 2595MHz~2615MHz frequency bands and the exchange value is based on the mutual agreement. The two aforementioned agreements must be approved by the regulatory authorities before they can be executed. However, if the service on 700MHz through MOCN is approved earlier than the frequency exchange exercise date, the frequency exchange agreement is automatically terminated.

10. SIGNIFICANT DISASTER LOSS

None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

1. On September 4, 2020, the Company passed the resolution of the Board of Directors to exchange 527,524,409 ordinary shares of Asia Pacific Telecom Co., Ltd. held by the Company in exchange for approximately 81,842,616 ordinary shares issued by Far EasTone Telecommunications Co., Ltd. After the approval by the authority, the share exchange is expected to be completed on June 30, 2022. On February 25, 2022, the Board of Directors of the Company's subsidiary, Asia Pacific Telecom Co., Ltd., passed the resolution to terminate the share exchange agreement with Far EasTone Telecommunications Co., Ltd.

2. On February 25, 2022, the Board of Directors of the Company's subsidiary, Asia Pacific Telecom Co., Ltd. (Asia Pacific), resolved to merge with the FET, with FET as the surviving entity and Asia Pacific as the dissolved entity. Under the merger, one share of common stock of FET will be issued in exchange for 0.0934406 share of Asia Pacific based on the stockholder on record as reflected in the Shareholder Register on the effective date of merger (tentatively set on September 30, 2022).

After the merger has been resolved at the shareholders' interim meeting and approved by the competent authority, Asia Pacific will de-list from the Taiwan Stock Exchange, cease public offering, and subsequently file for liquidation.

3. The appropriation of 2021 earnings was approved by the Board of Directors on March 23, 2022. Refer to Note 6(28) for details.

## 12. OTHERS

### (1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to operate with the goal to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet less the total intangible assets.

During 2021, the Group's strategy, which was unchanged from 2020, was to maintain the gearing ratio at 70% or below.

### (2) Financial instruments

#### A. Financial instruments by category

Refer to the consolidated balance sheets and Note 6 for the amounts and details of the financial assets (financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets at amortised cost, derivative financial assets for hedging, accounts receivable (including related parties) and other receivables) and financial liabilities (financial liabilities at fair value through profit or loss, accounts payable (including related parties), other payables, short-term loans, long-term loans and corporate bonds payable).

#### B. Financial risk management policies

##### (a) Risk categories:

The Group employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

##### (b) Management objectives:

- i. Except for market risk, which is controlled by outside factors, the remainder of the

foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.

- ii. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.
- iii. The Group's overall risk management policy focuses on the unpredictable item of financial markets and seeks to reduce the risk that potentially pose adverse effects on the Group's financial position and financial performance.
- iv. For the information on the derivative financial instruments that the Group enters into, refer to Notes 6(2) and (5).

(c) Management system:

- i. Risk management is executed by the Group's finance department by following policies approved by the Board. Through cooperation with the Group's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.
- ii. The Board has a written policy covering overall risk management. It also has written policies covering specific issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

C. Significant financial risks and degrees of financial risks

(a) Market risk

i. Foreign exchange risk

(i) Nature:

The Group is a multinational group in the Electronics manufacturing services industry. Most of the exchange rate risk from operating activities come from:

- a. Foreign exchange risk arises from different exchange rates to functional currency as the invoice dates of accounts receivable and payable denominated in non-functional foreign currency are different. Due to the characteristics of the subcontracting industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the variations in currencies of the Company's certain foreign investments in emerging countries (i.e. Brazil, Mexico, etc.) are considered huge, the percentage of the investments is not significant and thus the Company's foreign exchange risk can be maintained in the controllable range. (Note: The Group has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)
- b. Except for the above transactions (operating activities) recognised in the income

statement, assets and liabilities recognised in the balance sheet and the net investment in foreign operations also result in the exchange rate risk.

(ii) Management:

- a. For such risks, the Group has set up policies requiring companies in the Group to manage its exchange rate risks.
- b. As to the exchange rate risk arising from the difference between various functional currencies and the reporting currency in the consolidated financial statements, it is managed by the Group's finance department.

(iii) The source:

a. U.S. dollar and NT dollar:

Foreign exchange risk arises primarily from U.S. dollar-denominated cash, cash equivalents, accounts receivable and other receivables, other assets, loans, accounts payable and other payables and other liabilities, which results in exchange loss or gain when they are converted into New Taiwan dollars.

b. U.S. dollar and RMB:

Foreign exchange risk arises primarily from U.S. dollar-denominated cash, cash equivalents, accounts receivable and other receivables, other assets, loans, accounts payable and other payables and other liabilities, which results in exchange loss or gain when they are converted into RMB.

c. JPY and U.S. dollar:

Foreign exchange risk arises primarily from yen-denominated loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into U.S. dollar.

d. JPY and NT dollar:

Foreign exchange risk arises primarily from yen-denominated loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into New Taiwan dollars.

(iv) Extent

The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

(v) Total exchange gain (loss), including realised and unrealised arising from significant foreign exchange variation on the monetary items held by the Group for the years ended December 31, 2021 and 2020 amounted to a loss of \$5,075,113 and \$1,670,581, respectively.

ii. Equity securities

(i) Nature

The Group primarily invests in domestic and foreign publicly traded equity instruments, which are accounted for as financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. The price of those equity instruments will be affected by the uncertainty of the future value of the investment.

(ii) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held constant, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, and investments in equity at fair value through profit or loss are \$1,153,617 and \$900,878 for the years ended December 31, 2021 and 2020, respectively.

iii. Cash flow and fair value interest rate risk

- (i) The Group's interest rate risk arises from long-term loans and short-term loans. Borrowings with floating rates expose the Group to cash flow interest rate risk, but part of the risks are offset by cash and cash equivalents with variable interest rates. Borrowings with fixed rates expose the Group to fair value interest rate risk. The Group's borrowings are mainly fixed and floating interest rates. During the years ended December 31, 2021 and 2020, the Group's borrowings at variable rate were mainly denominated in US Dollars and Czech Koruna.
- (ii) The Group manages its cash flow interest rate risk by using fixed-to-fixed interest rate swaps. Under these swaps, the Group agrees with other parties to exchange, at specified intervals (mainly quarterly), the difference between fixed contract rates and floating rate interest amounts calculated by reference to the agreed notional principal amounts.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments.

According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The Group assesses the credit quality of the customers by taking into account their financial position, past experience and other factors to conduct its internal risk management.

Individual risk limits are set based on internal or external ratings in accordance with limits set by the board of directors. The utilisation of credit limits is regularly monitored. Major credit risk arises from cash and cash equivalents, derivative financial instruments and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.

- ii. The Group assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 360 days, a default has occurred.
- iii. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
  - (i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
  - (ii) Default or delinquency in interest or principal repayments;
  - (iii) Adverse changes in national or regional economic conditions that are expected to cause a default.

- iv. The aging analysis of notes receivable and accounts receivable (including related parties) is as follows:

	<u>December 31, 2021</u>	<u>December 31, 2020</u>
Not past due	\$ 1,140,964,898	\$ 932,168,658
Up to 90 days	19,830,988	10,579,283
91 to 180 days	1,761,546	652,993
181 to 270 days	235,968	476,187
271 to 360 days	58,333	232,608
Over 361 days	<u>5,917,793</u>	<u>5,319,436</u>
	<u>\$ 1,168,769,526</u>	<u>\$ 949,429,165</u>

The above aging analysis is based on days overdue.

- v. The Group applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:
- (i) Assess the ECLs on an individual basis if a significant default has occurred to certain customers.
  - (ii) Classify the other customers' accounts receivable based on the Group's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix.
  - (iii) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.
  - (iv) As of December 31, 2021 and 2020, the individual provision for impairment of accounts receivable using loss rate methodology or provision matrix is as follows:

(c) Liquidity risk

- i. Cash flow forecasting is performed by each operating entity of the Group and aggregated by Group treasury. The Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance, compliance with internal balance sheet ratio targets and, if applicable, external regulatory or legal requirements, for example, currency restrictions.
- ii. The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

Non-derivative financial liabilities:

(3) Fair value information

- A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's equity investment without active market is included in Level 3.

- B. Fair value information of investment property at cost is provided in Note 6(13).

- C. Financial instruments not measured at fair value:

- (a) Except for those listed in the table below, the carrying amounts of the Group's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortised cost (excluding bank debentures), short-term loans, notes and accounts payable, other payables and long-term loans approximate to their fair values:

December 31, 2021				
	Book Value	Fair Value		
		Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	\$ 262,857,294	\$ -	\$ 255,993,200	\$ -

		Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	\$ 244,358,618	\$ -	\$ 241,667,699	\$ -

- (b) The methods and assumptions of fair value measurement are as follows:

Bonds payable: Regarding the bonds issued by the Group, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present value of the expected cash flows and market interest rate.

- D. The related information on financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at December 31, 2021 and 2020 is as follows:

(b) The methods and assumptions the Group used to measure fair value are as follows:

- i. The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	Listed shares	Open-end fund
Market quoted price	Closing price	Net asset value

- ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.
- iii. When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial

- instruments are normally observable in the market.
- iv. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate (Black-Scholes model).
  - v. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
  - vi. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.
- E. For the year ended December 31, 2021, the shares of Vizio Holding Corporation held by the Group were transferred from Level 2 to Level 1 as the lock-up period of the shares ended in the third quarter. For the year ended December 31, 2020, there was no transfer between Level 1 and Level 2.
- F. The following chart is the movement of Level 3 for the years ended December 31, 2021 and 2020:

	2021	2020
At January 1	\$ 102,351,091	\$ 87,127,295

- G. Investment segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of

information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value. Investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments and ensures compliance with the related requirements in IFRS.

H. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

- E. Acquisition of real estate reaching NT\$300 million or 20% of paid-in capital or more: Please refer to table 5.
- F. Disposal of real estate reaching NT\$300 million or 20% of paid-in capital or more: Please refer to table 6.
- G. Purchases or sales of goods from or to related parties reaching NT\$100 million or 20% of paid-in capital or more: Please refer to table 7.
- H. Receivables from related parties reaching NT\$100 million or 20% of paid-in capital or more: Please refer to table 8.
- I. Trading in derivative instruments undertaken during the reporting periods: Please refer to Note 6(2) and (5).
- J. Significant inter-company transactions during the reporting periods: Please refer to table 9.

(2) Information on investees

Names, locations and other information of investee companies (not including investees in Mainland

China): Please refer to table 10.

(3) Information on investments in Mainland China

A. Basic information: Please refer to table 11.

B. Significant transactions, either directly or indirectly through a third area, with investee companies in the Mainland Area: The Company appointed Foxconn (Far East) Limited's Mainland investee to render processing services and to trade. The transactions were eliminated in the consolidated financial statements. For significant transactions of processing services, trading, receivables and payables, endorsements and guarantees or collaterals provided, and financing, please refer to Note 13(1) A, B, G and H.

(4) Major shareholders

For the names, number and ratio of shares held by shareholders holding over 5% of the Company's shares: Please refer to Table 13.

14. SEGMENT INFORMATION

(1) General information

The Group has adopted eCMMS (E-enabled Components, Modules, Moves & Services) strategy, and provided a one-stop shop to its customers, which are primarily in the 3C industries, with a total solution for design, development, engineering, procurement, manufacturing, logistics and after-sales service.

The Group segregates group systems from both a customer service and product perspective. Operating segments are classified and each segment's performance is assessed based on the operating results of different group systems in the consolidated financial statements reported for review by the chief operating decision maker. There were changes in the composition of the reportable segments as the chief operating decision maker changed the classification of operating segments for reviewing segment performance. The Group has restated the prior period corresponding information for comparison.

(2) Measurement of segment information

The chief operating decision maker assesses performance and allocates resources of the operating segments based on each operating segment's revenue and operating income after adjusting the internal costs and allocated expenses. Except for the recognition of internal costs which shall be in accordance with the Group's related internal calculation basis, the operating segments' accounting policies are the same as disclosed in Note 4.

In accordance with IFRS No. 8, "Operating Segments", the Group has determined the operating segments and reportable operating segments. Operating segments which have met certain quantitative threshold are disclosed individually or aggregately as reportable operating segments depending on whether the segments have similar economic characteristics and the aggregation meets the core principal of the standard; other segments which have not met the quantitative threshold are included in 'all other segments'. When deciding on an aggregate disclosure, the criteria for

consideration include: (1) the nature of the products and services; (2) the nature of the production process; (3) the customer types or categories of the products or services; and (4) the methods used to distribute its products or provide its services. The Group has identified the Hon Hai parent group, FII subgroup and FIH subgroup as reportable segments.

(3) Segment information

A. The segment reports reported to the chief operating decision maker for making operating decisions for each segment is measured in a manner consistent with that in the statement of comprehensive income. Thus, the reconciliation is not required.

B. The segment information provided to the chief operating decision maker for the reportable segments is as follows:

Note 1: Having business relationship.

Note 2: The endorser/guarantor parent company owns directly and indirectly more than 50% voting shares of the endorsed/guaranteed company.

Note 3: The endorser/guarantor parent company owns directly and indirectly more than 90% voting shares of the endorsed/guaranteed company.

Note 5: The total endorsements and guarantees of overseas subsidiaries of which the Company directly or indirectly holds 100% of their voting shares to others should not be in excess of 100% the endorser/guarantor's net assets, and for a single party should not be in excess of 100% of the endorser/guarantor's net assets.

The total endorsements and guarantees of Jusda Supply Chain Management International Co., Ltd. to others should not be in excess of its net assets, and for a single party should not be in excess of its net assets.

The total endorsements and guarantees of Shunsin Technology Holdings Limited to others should not be in excess of its net assets, and for a single party should not be in excess 50% of its net assets.

Note 7: FIH Mobile Limited and its 100% subsidiaries, FIH (Hong Kong) Limited, FIH Mexico Industry S.A. de C.V., S&B Industry, Inc., Great Promote Limited, Eliteday Enterprises Limited, Extra High Enterprises Limited, and FIH Co., Ltd. mutually endorse their bank debts and share the limit.

Among them, the ceiling on the total amount of endorsements/ guarantees provided by FIH Mobile Limited is 100% of its own net asset value, and the ceiling of a single party is 100% of its own net asset value.

The ceiling on the total amount of endorsements/ guarantees provided by FIH Mexico Industry S.A. de C.V., FIH (Hong Kong) Limited, S&B Industry, Inc., Great Promote Limited, Eliteday Enterprises Limited, Extra High Enterprises Limited, and FIH Co., Ltd. is 200% of its own net asset value, and the ceiling of a single party is 100% of its own net asset value.

The above table separately discloses the portion of the endorsement/guarantees provided by FIH Mobile Limited and its subsidiaries in respect of bank debts that have drawn down and are attributable to the respective subsidiaries as a result of the shared limit. The remaining shared limit is included in FIH Mobile Limited's. The net asset value of the endorser/guarantor is used to calculate the limit. Since no company has incurred bank debts, FIH (Hong Kong) Limited acts as the representative of the guarantor. When a company actually incurs bank debts, the actual amount of debts will be disclosed.

The limit on endorsements/guarantees is calculated as follows:

Company name	Limit on endorsements/guarantees provided for a single party	Ceiling on total amount of endorsements/guarantees provided
FIH Mobile Limited	59,751,157	59,751,157
FIH Mexico Industry S.A. de C.V.	3,317,578	6,635,156

Extra High Enterprises Limited	816,024	1,632,048
FIH Co., Ltd.	1,676,631	3,353,262
FIH (Hong Kong) Limited	-	-

Note 8: Foxconn (Far East) Limited endorse the bank debts for Foxconn Singapore Pte. Ltd., Foxconn Slovakia, Spol. S.R.O., Competition Team Ireland Ltd., and eCMMs Precision Singapore Pte.Ltd. The ceiling on the total amount of endorsements/ guarantees is USD 3 billion. Since there is no company has incurred bank debts, Foxconn Slovakia, Spol. S.R.O. acts as the representative of the guarantee to disclose.

When the company actually incurs bank debts, the actual amount of debts will be disclosed.

Note 9: The net assets referred to above are based on the latest audited financial statements.

Note 1:

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

(1) The Company to the consolidated subsidiary.

(2) The consolidated subsidiary to the Company.

(3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed.

All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: Above transactions with related parties were based on the financial statements of the company for the same period which was audited by independent accountants.

## Audit Reports of Independent Accountants

Financial Review No. 21004024 (2022)

To Hon Hai Precision Industry Co., Ltd.

### **Opinion**

We have audited the accompanying parent company only balance sheets of Hon Hai Precision Industry Co., Ltd. (hereinafter referred to as ‘Hon Hai’) as of December 31, 2021 and 2020, and the related parent company only statements of comprehensive income, parent company only statements of changes in equity, parent company only statements of cash flows as of January 1 to December 31, 2021 and 2020, and notes to the parent company only financial statements (including a summary of significant accounting policies).

In our opinion, based on our audit results and the audit reports of other public accountants, the above-mentioned parent company only financial statements present fairly, in all material aspects, the parent company only financial position of Hon Hai as of December 31, 2021 and 2020, and its parent company only financial performance and parent company only cash flows as of January 1 to December 31, 2021 and 2020 in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers."

### **Basis for Opinion**

We conducted our audits in accordance with the “Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants,” and the generally accepted auditing standards in the Republic of China (“ROC GAAS”). Our responsibility under such standards will be further explained in the section titled “Independent accountant’s responsibilities for the audit of the parent company only financial statements.” Our staffs subject to the independence requirements are complied with the Codes of Professional Ethics for Certified Public Accountants in the Republic of China (the “Codes”), independent of Hon Hai, and have fulfilled other ethical responsibilities in accordance with the Codes. Based on our audits and the audit reports of other independent accountants, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Key Audit Matters**

Key audit matters refer to those matters that, in our professional judgment, were of most significance in the audit of Hon Hai's 2021 parent company only financial statements. These matters were addressed in the context of our audit of the parent company only financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters of Hon Hai's 2021 parent company only financial statements are as follows:

### **Cut-off of hub sales revenue**

#### Description

For accounting policies on revenue recognition, please refer to Note 4 (32) in the Parent Company Only Financial Statements.

Hon Hai's revenue from hub sales, among other sales patterns, is recognized when customers pick up goods from the hub (i.e. when control over goods is transferred). For pick-ups from the hub, Hon Hai recognizes sales revenue based on movements of inventories contained in the statements or other information provided by the hub custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and a discrepancy between physical inventory quantities in the hubs and quantities as reflected in accounting records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, the cut-off of hub sales revenue was identified as one of the key audit matter.

#### How our audit addressed the matter

We performed the following audit procedures:

1. Assessed and tested the appropriateness of internal controls over cut-off of hub sales revenue for a specific time prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognizing movements of inventories and respective transfer of the cost of goods sold.
2. Confirmed by letter or conducted on-site count of inventory quantities held at hubs and agreed to accounting records.

## **Allowance for inventory valuation losses**

### Description

Refer to Note 4(13) for accounting policies on inventory valuation, Note 5(2) for uncertainty of accounting estimates and assumptions in relation to inventory valuation, and Note 6(6) for details of inventories. As of December 31, 2021, Hon Hai's inventories and allowance for inventory valuation losses amounted to NT\$81,193,336 thousand and NT\$1,774,735 thousand, respectively.

Hon Hai and its subsidiaries are primarily engaged in the manufacture and sales of electronic products. Due to rapid technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. Hon Hai and its subsidiaries measure inventories sold in the ordinary course of business at the lower of cost and net realizable value; the net realizable value for goods aged over a certain period of time or identified individually as obsolete is derived based on the historical experience of dealing with obsolete inventories. The aforementioned allowance for inventory valuation loss mainly comes from goods aged over a certain period of time or identified individually as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realizable value for individually obsolete or damaged inventories is subject to management's judgment, we consider allowance for inventory valuation losses a key audit matter.

### How our audit addressed the matter

We performed the following procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

1. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.
2. Validated the appropriateness of system logic of inventory aging report utilized by management to ensure proper classification of inventories aged over a certain period of time.
3. Evaluated the reasonableness of inventories individually identified as obsolete or damaged with supporting documents and agreed to information obtained from physical inventory.
4. Discussed with management the net realizable value of inventories aged over a certain period of time and individually identified as obsolete or damaged, validated respective supporting documents and re-performed the calculation.

## **Other matters – Reference to audits of other independent accountants**

Investment accounted for under the equity method included in the Parent Company Only Financial Statements of Hon Hai Precision Industry Co., Ltd. was not audited by us, but by other independent accountants. Therefore, among our opinion on the aforementioned Parent Company Only Financial Statements, the stated amounts and other related information disclosed in Note 13 were based on the audit reports of other independent accountants. As of December 31, 2021 and 2020, the investment accounted for under the equity method amounted to NT\$37,931,908 thousand and NT\$36,873,056 thousand, 1.13% and 1.11% of total assets respectively. Based on the financial statements for 2021 and 2020 audited by other independent accountants, the recognized comprehensive income (comprising share of profit or loss in subsidiaries, associates and joint ventures accounted for under the equity method, and share of other comprehensive income in subsidiaries, associates and joint ventures accounted for under the equity method) amounted to a gain of NT\$1,816,278 thousand and a loss of NT\$224,548 thousand, 1.32% and 0.20% of total comprehensive income respectively.

## **Responsibilities of management and those charged with governance for the parent company only financial statements**

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers”, and for such internal control as management determines is necessary to enable the preparation of the parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing Hon Hai’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Hon Hai or to cease operation, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing Hon Hai’s financial reporting process.

## **Independent accountant’s responsibilities for the audit of the parent company only financial statements**

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ROC GAAS will always detect a

material misstatement when it exists. Misstatements can arise from fraud or error. Such misstatements are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with ROC GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Hon Hai's internal controls.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Hon Hai's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause Hon Hai to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the notes, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within Hon Hai to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the audit, and for forming an audit opinion on the parent company only financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine the key audit matters for Hon Hai's 2021 parent company only financial statements. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

IV. Summary of Significant Accounting Policies

Significant accounting policies adopted during the preparation of the parent company only financial statements are described as follows: Unless otherwise stated, such policies are consistently applicable to all the periods presented.

(I) Compliance statement

The parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

(II) Basis of preparation

1. Except for the following items, these parent company only financial statements have been prepared under the historical cost convention:
  - (1) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
  - (2) Financial assets at fair value through other comprehensive income.
  - (3) Defined benefit liabilities recognized based on the net amount of pension fund assets less present value of defined benefit obligation.
2. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the "IFRSs") requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the parent company only financial statements are disclosed in Note 5.

(III) Foreign currency translation

1. The parent company only financial statements are presented in NTD, which is the Company's functional and presentation currency.
2. Foreign currency transactions and balances
  - (1) Foreign currency transactions are translated into the functional currency at the spot exchange rate prevailing on the dates of the transactions or valuation where items are remeasured, except for those that are deferred to other comprehensive gains and losses in compliance with cash flow hedging. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.
  - (2) Monetary assets and liabilities denominated in foreign currencies at the period end are retranslated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss in the period in which they arise.
  - (3) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in profit or loss in the period in which they arise. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in

foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

- (4) All foreign exchange gains and losses are presented in the statements of comprehensive income within "other gains and losses".

### 3. Translation of foreign operations

- (1) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
  - A. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
  - B. Income and expenses for each statement of comprehensive income are translated at average exchange rates of the period; and
  - C. All resulting exchange differences are recognized in other comprehensive income.
- (2) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Company still retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.
- (3) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Company retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.
- (4) Goodwill and fair value adjustments arising from the acquisition of a foreign unit are deemed as assets and liabilities of the foreign unit, which are translated at the exchange rate at the end of the period.

### (IV) Classification of current and non-current items

#### 1. Assets that meet one of the following criteria are classified as current assets;

- (1) Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;
- (2) held mainly for trading purposes;
- (3) Assets that are expected to be realized within 12 months after the balance sheet date; or
- (4) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than 12 months after the balance sheet date.

Assets that meet none of the above criteria are classified by the Company as non-current assets.

#### 2. Liabilities that meet one of the following criteria are classified as current liabilities:

- (1) Liabilities that are expected to be settled within the normal operating cycle;

- (2) held mainly for trading purposes;
- (3) Liabilities that are to be settled within 12 months after the balance sheet date;
- (4) Liabilities for which the repayment date cannot be extended unconditionally to more than 12 months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Liabilities that meet none of the above criteria are classified by the Company as non-current liabilities.

(V) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(VI) Financial assets at fair value through profit or loss

1. Financial assets at fair value through profit or loss are financial assets that are not measured at amortized cost or fair value through other comprehensive income.
2. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.
3. At initial recognition, the Company measures it at fair value and recognizes the transaction costs in profit or loss. The Company subsequently measures the financial liabilities at fair value, and recognizes the gain or loss in profit or loss.
4. The Company recognizes the dividend income in profit or loss when the right to receive payment is established, future economic benefits associated with the dividend flows to the Company, and the amount of the dividend can be measured reliably.

(VII) Financial assets at fair value through other comprehensive income

1. Financial assets at fair value through other comprehensive income comprise equity instruments which are not held for trading, and for which the Company has made an irrevocable election at initial recognition to recognize changes in fair value in other comprehensive income:
  - (1) The objective of the Company's business model is achieved both by collecting contractual cash flows and selling financial assets; and
  - (2) The assets' contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.
2. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognized and derecognized using trade date accounting.
3. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. The Company subsequently measures the financial assets at fair value:  
The changes in fair value of equity instruments that were recognized in other comprehensive income. Cumulative gain or loss previously recognized in comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the instrument. The Company recognizes the dividend income in profit or loss when the right to

receive payment is established, future economic benefits associated with the dividend flows to the Company, and the amount of the dividend can be measured reliably.

(VIII) Financial asset measured at amortized cost

1. Financial assets at amortized cost are those that meet all of the following criteria:
  - (1) The objective of the Company's business model is achieved by collecting contractual cash flows; and
  - (2) The assets' contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.
2. On a regular way purchase or sale basis, financial assets at amortized cost are recognized and derecognized using trade date accounting.
3. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. Subsequently, impairment loss on and interest income from these financial assets is recognized using the effective interest method in accordance with the amortization procedure. A gain or loss is recognized in profit or loss when the asset is derecognized.
4. The Company's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(IX) Accounts and notes receivable

1. Accounts and notes receivable entitle an unconditional legal right to receive consideration in exchange for transferred goods or rendered services.
2. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.
3. The Company's operating pattern of accounts receivable that are expected to be factored is for the purpose of receiving contractual cash flows and selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognized in other comprehensive gains and losses.

(X) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income, financial assets at amortized cost, and accounts receivable containing a significant financing component, the Company measures, at each balance sheet date, the impairment provision at 12 months expected credit losses if there has no significant increase in credit risk since initial recognition or measures the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Company recognizes the impairment provision for lifetime ECLs.

(XI) Derecognition of financial assets

The Company derecognizes a financial asset when one of the following conditions is met:

1. The contractual rights to receive the cash flows from the financial asset expire.
2. The contractual rights to receive cash flows of the financial asset have been transferred and the Company has transferred substantially all risks and rewards of ownership of the financial asset.

3. The contractual rights to receive cash flows of the financial asset have been transferred; and the Company has not retained control of the financial asset

(XII) Lessor Leasing Transaction - Lease Receivable/Operating lease (lessor)

Lease income from an operating lease (net of any incentives given to the lessee) is recognized in profit or loss on a straight-line basis over the lease term.

(XIII) Inventories

Inventories are measured at the lower of cost and net realizable value. Cost is determined using the weighted-average cost method. The cost of finished goods and goods in process comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). However, loan costs are excluded. The item-by-item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(XIV) Investments accounted for under the equity method / subsidiaries and associates

1. Subsidiaries are entities controlled by the Company (including structured entities). The Company controls the entity when the Company is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
2. All unrealized profit or loss resulting from transactions between the Company and its subsidiaries have been eliminated in full. Accounting policies of subsidiaries have been adjusted when necessary in order to be consistent with those of the Company.
3. The Company's share of profit or loss in subsidiaries after acquisition is recognized in profit or loss, whereas its share of other comprehensive income in subsidiaries after acquisition is recognized in other comprehensive income. If the Company's share of loss in a subsidiary exceeds its share of equity in such a subsidiary, the Company continues to recognize losses in its shareholding percentage.
- 4 If a change in shareholding in a subsidiary does not result in a loss of control (i.e. transactions with non-controlling interests), such a change is accounted for as an equity transaction, that is, a transaction with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.
5. Associates are all entities over which the Company has significant influence but no control. In general, it is presumed that an investor has significant influence if the investor holds directly or indirectly 20% or more of the voting power of the investee. Investments in associates are accounted for under the equity method and are recognized at cost after acquisition.
6. The Company's share of profits or losses after the acquisition of associates is recognized in profit or loss, and its share of other comprehensive income after acquisition is recognized in other comprehensive income. When the Company's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Company does not recognize further losses, unless it has incurred legal or constructive obligations or made

payments on behalf of the associate.

7. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Company's shareholding percentage of the associate, the Company recognizes change in ownership interests in the associate in "capital surplus" in proportion to its shareholding.
8. Unrealized gains or losses on transactions between the Company and its associates are eliminated to the extent of the Company's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
9. In case an associate issues new shares and the Company does not subscribe or acquire new shares proportionately, which results in a change in the Company's ownership percentage of the associate but maintains significant influence on the associate, then "capital surplus" and "investments accounted for under the equity method" shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Company's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
10. Upon loss of significant influence over an associate, the Company remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognized in profit or loss.
11. When the Company disposes of its investment in an associate and loses significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. That is, if any gains or losses previously recognized in other comprehensive income are to be reclassified to profit or loss upon disposal of related assets or liabilities, such gains or losses, when the Company loses significant influence over the associates, are reclassified from equity to profit or loss, or directly transferred to retained earnings in accordance with other IFRS regulations. If it still retains significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
12. According to Regulations Governing the Preparation of Financial Reports by Securities Issuers, the profit or loss of the period and other comprehensive income presented in parent company only financial statements shall be the same as the allocations of profit or loss of the period and of other comprehensive income attributable to owners of the parent presented in the financial statements prepared on a consolidated basis, and the owners' equity presented in the parent company only financial statements shall be the same as the equity attributable to owners of the parent presented in the financial statements prepared on a consolidated basis.

(XV) Property, plant and equipment

1. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
2. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are recognized as profit or loss during the financial period in which they are incurred.
3. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over their estimated useful lives. If each component of property, plant and equipment is significant in relation to the total cost of the item, it must be depreciated separately.
4. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors.' from the date of the change. Useful lives of property, plant and equipment are as follows:

Buildings and structures	15 ~ 51 years
( Buildings and auxiliary facilities	5 ~ 11 years
Machinery and equipment	3 ~ 9 years
Other assets	1~6 years

(XVI) Lessee Leasing Transaction – Right-of-use Assets/Leasing liabilities

1. Leased assets are recognized as right-of-use assets and leasing liabilities as of the date they become available to the Company. When a lease contract is a short-term lease or a lease of a low-value asset, the lease payment is recognized as an expense over the leasing period using the straight-line method.
2. Leasing liabilities are recognized at the commencement date of the lease at the present value of unpaid lease payments discounted by the interest rate on the Company's incremental borrowings, which include:
  - (1) fixed payments, less any lease incentives that may be received;
  - (2) variable lease payments that depend on a certain index or rate;
  - (3) expected amount paid by the Company under the residual value guarantee;
  - (4) the exercise price of purchasing the option if the lessee can be reasonably certain that such option will be exercised; and
  - (5) penalties to be paid for lease termination if lessor intends to exercise the lease termination option during the leasing period.

The leasing liabilities are measured subsequently using the cost amortized by the interest bill, which provides for interest expense over the term of the lease. When a change in non-contractual results in a change in the leasing period or lease payment, the leasing liability is reassessed and the right-of-use asset is remeasured.

3. Right-of-use assets are recognized at cost at the commencement date of the lease, which includes:

- (1) the initial measurement amount of the leasing liability;
- (2) any lease payments made on or before the commencement date;
- (3) any initial direct costs incurred; and
- (4) estimated costs for demolition, removal of the subject asset and location of the recovery period, or restoration of the subject asset to the condition required in the terms and conditions of the lease.

The leasing liabilities are measured subsequently using the cost model, depreciation expenses are provided at the earlier of the end of the useful life of the right-of-use period or the end of the leasing period. When the lease liabilities are remeasured, the right-of-use asset will adjust any amount of remeasurement of the leasing liabilities.

4. For lease modifications that reduce the scope of the lease, the lessee shall reduce the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease and recognizes the difference between this amount and the re-measurement amount of the lease liability in profit or loss.

#### (XVII) Intangible assets

Computer software

Computer software is stated at cost and amortized on a straight-line basis over its estimated useful life of 3 to 5 years.

#### (XVIII) Impairment of financial assets

The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less disposal costs or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortized historical cost would have been if the impairment had not been recognized.

#### (XIX) Loans

1. Loans comprise long-term and short-term loans from banks. Loans are recognized initially at fair value, net of transaction costs incurred. Loans are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the loans using the effective interest method.
2. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it

is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

(XX) Notes and accounts payable

1. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
2. The short-term accounts and notes payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(XXI) Financial liabilities at fair value through profit or loss

1. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as measured at fair value through profit or loss at initial recognition:
  - (1) Hybrid combined contracts; or
  - (2) Capable of eliminating or significantly reducing a measurement or recognition inconsistency; or
  - (3) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
2. At initial recognition, the Company measures it at fair value and recognizes the transaction costs in profit or loss. The Company subsequently measures the financial liabilities at fair value, and recognizes the gain or loss in profit or loss.
3. If the credit risk results in fair value changes in financial liabilities designated as measured at fair value through profit or loss, they are recognized in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognizing in profit or loss for loan commitments or financial guarantee contracts.

(XXII) Ordinary corporate bonds payable

Ordinary corporate bonds issued by the Company are initially recognized at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from corporate bonds payable, which is amortized to profit or loss over the period of bond circulation using the effective interest method as an adjustment to "finance costs".

(XXIII) Convertible corporate bonds payable

Convertible corporate bonds issued by the Company contain conversion options that is, the bondholders have the right to convert the bonds into the Company's common shares by exchanging a fixed amount of cash for a fixed number of common shares, call options and put options. The Company classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

1. The master contracts of corporate bonds are initially recognized at fair value. Any difference

between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortized in profit or loss as an adjustment to "finance costs" over the period of circulation using the effective interest method.

2. The embedded conversion options which meet the definition of an equity instrument are initially recognized in "capital surplus—share options" at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.
3. Any transaction costs directly attributable to the issuance are allocated to each liability and equity component in proportion to the initial carrying amount of each above-mentioned item.
4. When bondholders exercise conversion options, the liability component of the bonds shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the above-mentioned liability component and "capital surplus—share options".

**(XXIV) Derecognition of financial liabilities**

A financial liability is derecognized when the obligation specified in the contract is either discharged or canceled or expires.

**(XXV) Offsetting financial instruments**

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

**(XXVI) Non-hedging derivatives**

Non-hedging derivatives are initially recognized at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognized in profit or loss.

**(XXVII) Provisions**

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense. Provisions are not recognized for future operating losses.

**(XXVIII) Employee benefits**

**1. Short-term employee benefits**

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expense in that period when the employees render service.

**2. Pensions**

(1) Defined contribution plans

For defined contribution plans, the contributions are recognized as pension expense when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

(2) Defined benefit plans Defined benefit plans

- A. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Company in current period or prior periods. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Company uses interest rates of government bonds at the balance sheet date instead.
- B. Remeasurements arising from defined benefit plans are recognized in other comprehensive income in the period in which they arise and are recorded as retained earnings.

3. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in accounting estimates. If employee compensation is paid by shares, the Company calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(XXIX) Income tax

1. The tax expense for the period comprises current and deferred income tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.
2. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company operates and generates taxable income. Management periodically evaluates implementations taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the shareholders resolve to distribute the earnings.
3. Deferred income tax is recognized, using the balance sheet liability method, on temporary

differences arising between the tax bases of assets and liabilities and their carrying amounts in the parent company only balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates and laws that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

4. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.
5. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realize the asset and settle the liability simultaneously.
6. A deferred tax asset shall be recognized for the carry-forward of unused tax credits resulting from research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

(XXX) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to common shares on the effective date of new shares issuance.

(XXXI) Revenue recognition

1. The Company manufactures and sells consumer electronics products. Sales are recognized when control of the products has transferred to, being when the products are delivered to or picked up by the customers, the customers has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied.
2. Sales revenue is recognized in the amount equal to its contractual price less estimated sales discounts and allowance. Sales revenue is recognized to the extent that a significant reversal is highly improbable. Revenue recognition is revisited at each balance sheet date. No element of financing is deemed present as the sales are made with a credit term consistent with market practice.
3. A receivable is recognized when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.
4. The Company's obligation to provide a refund for faulty products under the standard warranty terms is recognized as a provision.

5. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognized. If the payments exceed the products sold, a contract liability is recognized.

#### V. Critical Accounting Judgments, Estimates and Assumptions on Uncertainty

The preparation of these parent company only financial statements requires management to make critical judgments in applying the Company's accounting policies and make critical accounting assumptions and estimates as to have a reasonable expectation of future events based on the circumstances on the balance sheet date. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such estimates and assumptions bear the risk of making material adjustments to the carrying amount of assets and liabilities for the following fiscal year. Below details the uncertainties of critical accounting judgments, estimates and assumptions:

##### (I) Critical judgments in applying the Company's accounting policies

###### Gross or net revenue recognition

The Company determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e., the Company is a principal) or to arrange for the other party to provide those goods or services (i.e., the Company is an agent) based on the transaction model and its economic substance. The Company is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Company recognizes revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Company is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Company recognizes revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

After the Company receives the purchased raw materials or labor services, it directs the use of inventory commodities and labor services and input key process and technologies to provided important manufacturing and product integration, and then transfer the finished product and labor service combinations to customers. Meanwhile, based on the judgment on the following indicators, it is decided that the Company controls the finished goods or labor services and acts as the principal of the transaction before the finished goods or labor services are transferred to the customer:

- (1) The Company is primarily responsible for the provision of goods or services;
- (2) The Company assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer; and
- (3) The Company has discretion in establishing prices for the goods or services.

##### (II) Critical accounting estimates and assumptions

The Company makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

###### Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Company must determine the net realizable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realizable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2021, the carrying amount of inventories was \$79,418,601.

(1) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(2) Foreign exchange forward contracts

The Company enters into foreign exchange forward transactions to hedge the following risks of exchange rate:

A. Operating activities: Proceeds derived from import of raw materials and export sales.

B. Investing activities: Proceeds derived from import of machinery and equipment

C. Financing activities: Long-term and short-term foreign currency assets and liabilities (financing)

4. The Company has no financial assets at fair value through profit or loss pledged to others.

5. Information relating to credit risk of financial assets and liabilities at fair value through profit or loss is provided in Note XII (2).

#### (XIV) Pensions

##### 1. Defined benefit plans

- (1) The Company has a defined benefit pension plan in accordance with the Labor Standards Act, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Labor Standards Act. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last six months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company assesses the balance in the aforementioned labor pension reserve account by December 31 of every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by the end of next March.

(4) Bank of Taiwan was commissioned to manage the fund of the Company's defined benefit pension plan in accordance with the fund's annual investment and utilization plan and the "Regulations for Revenues, Expenditures, Safe guard and Utilization of the Labor Retirement Fund" (Article 6: The scope of utilization for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate secularization products, etc.). Such utilization is supervised by the Labor Funds Supervisory Committee. With regard to the utilization of the fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the competent authority. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2021 and 2020 is given in the Annual Labor Retirement Fund Utilization Report announced by the government.

(5) The principal actuarial assumptions used are summarized as follows:

	2021	2020
Discount rate	0.70%	0.40%
Future salary increases	3.5%	3.5%

Assumptions regarding future mortality experience are set based on actuarial advice in accordance with published statistics and experience in each territory. Due to the change of the main actuarial assumption, the present value of defined benefit obligation is affected. The analysis is as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2021				
Effects on the present value of defined benefit obligation	(\$51,622)	\$53,689	\$47,774	(\$46,292)
	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2020				
Effects on the present value of defined benefit obligation	(\$59,721)	\$62,244	\$55,505	(\$53,680)

The sensitivity analysis above was based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The methods of analyzing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

The sensitivity analysis has been prepared using approaches and assumptions the same as last period.

(6) Expected contributions to the defined benefit pension plans of the Company for the year

2022 amount to \$15,845.

(XVI) Share capital

1. As of December 31, 2021, the Company’s authorized capital was \$180,000,000, consisting of 18 billion shares of ordinary stock, and the paid-in capital was \$138,629,906, consisting of 13,862,991 thousand shares with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected.
2. Pursuant to the resolution adopted at the shareholders' meeting held on June 1, 1999, the Company issued 50,000 thousand common stocks so as to issue 25,000 thousand units of Global Depositary Receipts (GDR). Such issuance of common stocks had been approved and documented by the former Securities and Futures Commission of the Ministry of Finance. GDRs are issued in Europe, Asia, and the United States, totaling US\$ 347,250 thousand. Primary contractual terms are as follows:

(1) Exercise of voting power

Holders of GDRs have no right to directly exercise voting rights or attend the Company’s shareholders' meeting, except when a motion is on the election of directors or supervisors. A holder or holders together holding at least 51% of the GDRs outstanding at the relevant record date of the shareholders' meeting can instruct the Depositary to vote in the same direction in respect of one or more resolutions to be proposed at the meeting.

(2) Sale and withdrawal of GDRs

Under the current R.O.C. law, shares represented by the GDRs may be withdrawn by

holders of GDRs commencing three month after the initial issue of GDRs. A holder of a GDR may, provided that the Company has delivered to the custodian physical share certificates in respect of the Deposited Shares, request the Depositary to sell or cause to be sold on behalf of such holder the shares represented by such GDRs.

(3) Dividends

GDR holders are entitled to receive dividends to the same extent as the holders of common stocks.

(4) After years of capitalization of earnings, as of December 31, 2021, 90,070 thousand units of GDRs were outstanding, which represent 180,141 thousand shares of common stock.

3. Treasury stocks

The Company's subsidiary, Hon Jin International Investment Co., Ltd., acquired common stocks issued by the Company in 1998. As of December 31, 2021 and 2020, the subsidiary owned a total of 1,483,078 shares of the Company's common stocks, respectively, at a cost of \$18,901, which was reduced to \$15,194 after share proceeds were returned due to capital reduction.

(XVII) Capital surplus

Pursuant to the Company Act, capital reserve arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the Securities and Exchange Act requires that the amount of capital reserve to be capitalized mentioned above should not exceed 10% of the paid in capital each year. Capital reserve should not be used to cover accumulated deficit unless the surplus reserve is insufficient.

(XVIII) Retained earnings

1. The Company's net earnings after final account are apportioned in the following order:

(1) Covering accumulated deficits;

(2) 10% shall be set aside as the statutory surplus reserve, but when the statutory surplus reserve has reached the amount of the paid-in capital, this limit is not applicable.

(3) Setting aside or reversing a special reserve in accordance with other regulatory requirements;

The remaining earnings along with the unappropriated earnings at the beginning of the period are considered as accumulated distributable earnings. In accordance with dividend policy under Item 4, the proposal of earnings appropriation is prepared by the Board of Directors and resolved by the shareholders.

The Company authorizes the board of directors to distribute all or part of the dividends and bonuses that should be distributed, capital reserves or statutory surplus reserves in cash with the presence of more than two-thirds of the directors and the resolution of more than half of the directors present. The provisions of the preceding paragraph that shall be resolved by the shareholders' meeting shall not apply.

The Company is at the growing stage. The Company's stock dividend policy shall consider the Company's current and future investment environment, capital needs, local and foreign competition situation and capital budget, along with shareholders' profit and the Company's long-term financial plans. The shareholders' dividends are appropriated based on accumulated distributable earnings, which shall not be lower than 15% of the distributable earnings for the period and the cash dividend shall not be less than 10% of the shareholders' dividends.

2. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.

3. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

4. The distribution of 2021 earnings was adopted in the shareholders' meeting on March 23, 2022 and the distribution of 2020 earnings was adopted in the shareholders' meeting on July 23, 2021. Details are summarized below:

## XII. Others

### (I) Capital management

The objective of the Company's capital management is to ensure that the Company can continue as a going concern, that an optimal capital structure is maintained to lower the cost of capital, and that returns are provided to shareholders. In order to maintain or adjust the capital structure, the Company

may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital on the basis of the debt-to-net worth ratio. This ratio is calculated as net debt divided by net worth. Net debt is calculated as total loans (including "current and non-current loans" as shown in the parent company only balance sheet) less cash and cash equivalents. Net worth is calculated as 'equity' as shown in the parent company only balance sheet less the total intangible assets.

The Company's strategic maintenance in 2021 to pin the debt-to-net worth ratio at or below 70% remains unchanged from that in 2020.

## (II) Financial instruments

### 1. Classification of financial instruments

For information and amounts related to the Company's financial assets, which comprise financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets at amortized cost, accounts receivable (including receivables due from related parties and other receivables), and financial liabilities, which comprise financial liability at fair value through profit or loss, accounts payable (including payables to related parties), other payables, short-term loans, long-term loans and corporate bond payables), refer to Note VI and the parent company only balance sheet.

### 2. Risk management policies

#### (1) Risk categories:

The Company employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

#### (2) Management objectives:

- A. Except for market risk, which is controlled by external factors, the remainder of the foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.
- B. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.
- C. The Company's overall risk management policy focuses on the unpredictable item of financial markets and seeks to reduce the risk that potentially pose adverse effects on the Company financial position and financial performance.
- D. For the information on the derivative financial instruments that the Company enters into, please refer to Note VI (2).

#### (3) Management system:

- A. Risk management is executed by the Company treasury by following policies approved

by the Board. Through cooperation with the Company's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.

- B. The Board of Directors has a written policy covering overall risk management. It also has written policies covering specific scopes and issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

### 3. Significant financial risks and degrees of financial risks

#### (1) Market risk

##### A. Foreign exchange risk

##### (A) Nature

The Company is a multinational company in the electronics manufacturing services industry. Most of the exchange rate risk from operating activities come from:

- a. Foreign exchange risk arises from different exchange rates to functional currency, as the invoice dates of accounts receivable and payable denominated in nonfunctional foreign currency are different. Due to the characteristics of the OEM industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the fluctuations in exchange rates of the Company's certain foreign investments in emerging countries (e.g., Vietnam and India, etc.) are considered huge, the percentage of the investments is not significant and thus the Company's foreign exchange risk can be maintained in the controllable range. (Note: The Company has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)
- b. Besides the above transactions (operating activities) recognized in the income statement, assets and liabilities recognized in the balance sheet also result in the exchange rate risk.

##### (B) Management:

- a. For such risks, the Company has set up policies requiring companies in the Group to manage the exchange rate risks of their functional currencies.
- b. The exchange rate risk arising from the difference between each functional currency and the reporting currency of the consolidated financial statements is managed by the Group's general financial office.

##### (C) Source

##### a. USD and NTD:

Foreign exchange risk arises primarily from USD-denominated assets, such as cash and cash equivalents, accounts receivable, and other receivables, and

USD-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into NTD.

b. JPY and NTD:

Foreign exchange risk arises primarily from JPY-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into NTD.

(D) Extent: The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

December 31, 2021						
(Foreign currency : functional currency)	Foreign currency (in thousands)	Exchange rate	Book value (NT\$ thousand)	Sensitivity analysis		Effect on profit or loss

USD : NTD	\$ 61,374,399	28.48	\$ 1,747,942,884	5%		\$ 87,397,144

(E) The aggregate amount of all exchange gains and losses (including realized and unrealized) recognized in 2021 and 2020 under monetary items of the Company that have a significant impact on exchange rate fluctuations represented a loss of \$2,091,295 and a gain of \$5,073,534, respectively.

B. Equity securities

(A) Nature

The Company primarily invests in domestic and foreign publicly traded equity

instruments, which are accounted for as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and available-for-sale financial assets. The price of those equity instruments will be affected by the uncertainty of the future value of the investment.

(B) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held unchanged, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, investments in equity at fair value through profit or loss and available-for-sale equity instruments were \$34,617 and \$25,088, respectively, for 2021 and 2020.

C. Cash flow and fair value interest rate risk

- (A) The Company's interest rate risk mainly comes from long-term loans and short-term loans. Loans issued at floating interest rates expose the Company to cash flow interest rate risk, which is partially offset by cash and cash equivalents held at floating interest rates. Loans issued at fixed rates expose the Company to fair value interest rate risk. The Company's loans are mainly at fixed and floating rates.
- (B) The Company manages the interest rate risk of cash flow through the exchange of with fixed interest rates converted into fixed interest rate contracts. The Company and the counterparty agree on a fixed interest rate determined on the nominal principal during a specific period (mainly quarterly) and exchanged at the difference between the two floating rates.

(2) Credit risk

- A. Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments.

According to the Company's credit policy, each local entity in the Company is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The internal risk control assesses customers' credit quality by taking into account their financial position, historical experience, and other factors.

Individual risk limits are set by the Board of Directors based on internal or external ratings. The utilization of credit limits is regularly monitored. Major credit risk arises from credit risks of cash and cash equivalents, derivative financial instruments, deposits at banks and financial institutions, investments on short-term wealth management products of banks and financial institutions, and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.

- B. The Company assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since

initial recognition; if past due over 360 days, a default has been occurred.

- C. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
- (A) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
  - (B) Default or delinquency in interest or principal repayments;
  - (C) Adverse changes in national or regional economic conditions that are expected to cause a default.

D. The aging analysis of accounts receivable (including related parties) is as follows:

	December 31, 2021	December 31, 2020
Not past due	\$ 696,596,199	\$ 582,743,419
Up to 90 days	13,236,035	9,037,757
91---180 days	257,556	59,755
181--270 days	20,166	56,621
270--360 days	6,252	20,771
Over 361 days	2,713,555	2,807,855
	<u>\$ 712,829,763</u>	<u>\$ 594,726,178</u>

The table above shows an aging analysis based on the number of days overdue.

E. The Company applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:

- (A) Assess the ECLs on an individual basis if a significant default has occurred.
- (B) Classify the other customers' accounts receivable based on the Company's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix based on different groups.
- (C) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.
- (D) As of December 31, 2021 and 2020, the individual allowance for impairment of accounts receivable and ones estimated using loss rate methodology or provision matrix are as follows:

### (3) Liquidity risk

A. Cash flow forecasting is performed by each operating entity of the Company and aggregated by Company treasury. The Company treasury monitors rolling forecasts of the Company's liquidity requirements and meets various contractual obligations by maintaining sufficient funds and bank facilities.

B. The table below analyzes the Company's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities categorized into relevant maturity groups, i.e. based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(III) Fair value information

1. The different levels of inputs used in the valuation techniques for measuring the fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Company's investment in listed stocks and beneficiary certificates is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Company's investment in convertible corporate bonds payable and most of the derivative instruments is included.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Company's equity investment without active market is included in Level 3.

2. Financial instruments not measured at fair value

- (1) Except for those listed in the table below, the carrying amounts of the Company's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortized cost (excluding bank debentures), short-term loans, notes and accounts payable, other payables and long-term loans) approximate to their fair values.

December 31, 2021				
	Book value	Fair value		
		Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	<u>\$178,761,558</u>	<u>\$ -</u>	<u>\$174,512,528</u>	<u>\$ -</u>
December 31, 2020				
	Book value	Fair value		
		Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	<u>\$143,678,442</u>	<u>\$ -</u>	<u>\$142,340,232</u>	<u>\$ -</u>

- (2) The methods and assumptions of fair value measurement are as follows:

Corporate bonds payable: Regarding the bonds issued by the Company, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present discounted value of the expected cash flows and market interest rate.

3. The Company categorizes financial and non-financial instruments measured at fair value on the basis of the nature, characteristics, risks, and fair value level of the assets and liabilities.

(1) The related information on assets and liabilities categorized by their nature is as follows:

December 31, 2021	Level 1	Level 2	Level 3	Total

<u>Recurring fair value increment</u>

<u>Recurring fair value measurements</u>				
Financial liabilities measured at fair value through profits or losses				
Derivatives	\$ -	(\$ 2,261,752)	\$ -	(\$ 2,261,752)

(2) The methods and assumptions of fair value measurement are as follows:

A. The Company adopts market quoted prices as their fair values (i.e., Level 1), which are listed below by the characteristics of the instruments:

Market quoted price	TWSE (TPEX) listed stocks Closing price	Open-end fund Net asset value
---------------------	--	----------------------------------

- B. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be obtained by reference to the current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including fair value calculated by applying model using market information available at the parent company only balance sheet date.
- C. When assessing non-standard and low-complexity financial instruments, for example, cross currency swap contracts and wealth management products, the Company adopts valuation technique that is widely used by market participants. The parameters used in the evaluation models of such financial instruments are usually market observable information.
- D. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as discount method and option pricing model. Forward foreign exchange contracts are usually evaluated based on the current forward exchange rate. Put options are evaluated based on an appropriate option pricing model (Black-Scholes model).
- E. The output of the evaluation model is an estimated value, and the evaluation technology may not reflect all the relevant factors of the financial and non-financial instruments held by the Company. Therefore, the estimated value of the evaluation model will be appropriately adjusted based on additional parameters, such as model risk or liquidity risk, etc. In accordance with the Company's fair value evaluation model management policies and relevant control procedures, the management believes that in order to properly express the fair value of financial instruments and non-financial instruments in parent company only balance sheets, the evaluation adjustment is appropriate and necessary. The pricing information and inputs used during valuation are carefully assessed and adjusted based on current market conditions.
- F. The Company takes into account credit risk valuation adjustment to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Company's credit quality.

4. For 2021 and 2020, there was no transfer between Level 1 and Level 2.

5. The following chart is the movement of Level 3 in 2021 and 2020:

	2021	2020
	Equity instruments	Equity instruments
January 1	\$ 200,815	\$ 137,061
Gains and losses recognized in other comprehensive income	106,760	63,754
December 31	<u>\$ 307,575</u>	<u>\$ 200,815</u>

6. Investment segment is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming that the resource of information is independent, reliable and in line with other resources and representative of the

exercisable price, frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model, and making any other necessary adjustments to the fair value. In addition, investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments to ensure compliance with the related requirements in IFRS.

7. The following is the quantitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value as at December 31, 2021	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument: Non-listed stocks	<u>\$ 307,370</u>	Net asset value	Discount for lack of marketability	13.00%	The higher the discount for lack of marketability, the lower the fair value
	<u>\$ 205</u>	Comparable company method	Discount for lack of marketability	31.00%	The higher the operating income multiple, the higher the fair value; the higher the discount for lack of marketability, the lower the fair value
			Operating income multiple	0.9318	
	Fair value as at December 31, 2020	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument: Non-listed stocks	<u>\$ 200,603</u>	Net asset value	Discount for lack of marketability	10.00%	The higher the discount for lack of marketability and minority interest discount, the lower the fair value
			Minority interest discount	15.00%

8. The Company has carefully assessed the valuation models and inputs used to measure fair value. However, use of different valuation models or inputs may result in different measurement. The following is the effect on profit or loss or other comprehensive income from financial assets and liabilities categorized within Level 3 if the inputs used in the valuation models have changed:

			December 31, 2021			
			Recognized in profit or loss		Recognized in other comprehensive income

Note 1:

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

(1) The Company to the consolidated subsidiary.

(2) The consolidated subsidiary to the Company.

(3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed.

All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: Above transactions with related parties were based on the financial statements of the company for the same period which was audited by independent accountants.

Note 3: Mainly due to increase in taxable income in the current period, higher income tax expense is recognized.

Note 4: Mainly due to exchange loss caused by exchange rate fluctuations of conversion from Japanese Yen to NTD statements.

## C. Cash Flow Analysis

### (1) Liquidity Analysis of Recent 2 Years

Item \ Year	2021	2020	Ratio Change (%)
Cash flow ratio (%)	(4.92)%	19.71%	(125) %
Cash flow adequacy Ratio (%)	36.40%	61.71%	(41)%
Cash reinvestment ratio (%)	(7.19)%	14.46%	(150) %
Variance Analysis: 1. Cash flow ratio: Due to the customer's advance payment of the company's accounts receivable at the end of 2020, the net cash flow from operating activities in the above two years was affected by the above-mentioned changes. If the impact is not considered, there is little difference in the cash flow ratio between the two years. 2. Cash Flow Adequacy Ratio: The amount of net cash flow from operating activities in the above two years was affected by the above-mentioned changes due to the customer's advance payment of the company's accounts receivable at the end of 2020. In addition, due to the impact of the Covid-19 epidemic on the global industrial supply chain, due to this situation, the inventory level at the end of 2021 was higher than that in 2020. In addition, the expected number of cash dividends to be distributed in 2021 is higher than that in 2020, resulting in a lower cash reinvestment ratio for the current period. 3. Cash reinvestment ratio: At the end of 2020, the customer paid the Company's accounts receivable in advance, resulting in the change of the net cash flow from operating activities in the above two years due to the above-mentioned impact. If the impact is considered, the change in the cash reinvestment ratio between the two years is not significant.			

### (2) Cash Flow Forecast for the Coming Year

Unit: NT\$ Thousand

Cash beginning balance (1)	Cash flow from operating activities (2)	Cash flow in/(out) (3)	Cash ending balance/(shortage) (1)+(2)-(3)	Plan for cash ending balance shortage	
				Investment activities	Financing activities
34,327,574	3,675,368,076	3,646,777,107	62,918,543	-	-
Cash flow variance analysis for year 2021: 1. Operating activities: The Company expects revenue and profit to continue to grow. 2. Investment activities: The Company expects expansion of production facilities to meet business demand. 3. Financing activities: This year, the Company expects to distribute cash dividends, borrow short-term loans, and propose to issue unsecured bonds.					

## D. Major Capital Expenditures

### (1) Major Capital Expenditures and its Sources of Capital:

Unit: NT\$ Thousand

Project	Actual or Planned Source of Capital	Actual or Planned Date of Completion	Total Capital	Actual or Expected Capital Expenditure	
				2021 (Actual)	2022 (Expected)
Equipment Purchases	Retained Earnings and Revenue	Dec. 31, 2022	1,057,130	2,839,050	1,057,130

### (2) Expected Benefits:

The abovementioned major capital expenditures are needed for the business and operation growth of the company, development of EV, semiconductor, 5G/6G, IoT, artificial intelligence, big data, and electric vehicle related equipment and technologies. Furthermore, the project hopes to increase overall efficiency and reduce costs by increasing manufacturing capacity and efficiency, assists in R&D; design; electronic equipment manufacturing and the optimization of processes, to strive for stability whilst maintaining innovation.

## E. Investment Policy, Cause of Profit/Loss and Future Investment Plans:

### (1) Policy for Recent Investments:

Investment Policies are aligned to increase manufacturing capacity, and to aid in the Company's revenues and profits.

### (2) Cause of Profit/Loss for Investments:

The Company's 2021 investment income accounted for under the equity method was NT\$127,570,302, mainly due favorable operations in invested overseas companies.

### (3) Future Investment Plans for the Coming Year:

The Company's long-term investment strategy is one of prudence, and will be in correlation with market and capacity needs. The Company will continue our commitment to strengthening global competitiveness.

## **F. Risk Assessment**

### **(1) Effect of Changes in Interest Rate, Foreign Exchange and Inflation on Corporate Finance, and our Countermeasures.**

#### **(a) Interest Rates**

##### **Interest Rate Changes 2020**

USD: The economy recovery in 2021, superimposed supply chain tensions, and intensified U.S. inflation drove the 10-year U.S. Treasury yield rate to rise, which rose above 1.74% in March. With the popularization of vaccination, countries began to lift restrictions in May, but the Delta virus reappeared mid-year. Risk aversion supported the demand for U.S. Treasury Bond. The U.S. 10-year treasury yield dropped to around 1.18% in August. Later, as the pandemic was gradually brought under control, the market focused on high U.S. inflation again, and expectations of currency normalization increased. U.S. bond yields rose again, to above 1.7% in October, and then the Omicron virus hit, and market worries resurfaced, contributing to the U.S. bond yield rate fall to around 1.5% by the end of the year.

JPY: The pandemic in 2021 has repeatedly disrupted the Japanese economy. In order to boost the economy and save the long-term deflation, the Bank of Japan has maintained its loose monetary policy. However, with the recovery of the U.S. economy, U.S. Treasury Bond interest rates rose, and investors' risk appetite increased, Japanese bonds experienced a sell-off, and Japan's 10-year government bond yield continued to rise from a low of 0.021% in January to a YOY increase of 0.021% at the end of February. The internal high was 0.168%, and then fell back, reaching a low of 0.007% for the year in August, and then followed the US bond interest rate to rise to a maximum of 0.104%, and then fell to 0.089% by the end of the year.

NTD: In 2021, the rediscount rate of Taiwan's central bank will remain unchanged at 1.125%, but with the improved condition of the epidemic in the U.S., economic recovery, inflation expectations, and rising US Treasury Bond interest rates, Taiwan's 10-year bond yield has risen from a low of 0.278% at the beginning of the year to a high at the end of the year of 0.726%.

RMB: In 2021, China's pandemic situation is well controlled; exports are booming, and economic performance is stable. The People's Bank of China maintains a neutral monetary policy in the first three quarters. However, in Q4, with the rebound of the pandemic in Zhejiang, Xi'an and other places and the cumulation of Evergrande's debt default, China's currency policy has turned loose. The monthly deposit reserve ratio in December was reduced from 12.5% to 12%. The one-year MLF interest rate was lowered from 2.95% to 2.85%, and the one-year LPR interest rate was lowered from 3.85% to 3.8%. The 10-year treasury bond yield fluctuated downward throughout the year, reaching around 2.78% by the end of the year.

### **Effect of the Company's Finances**

Debt: A. Short-term interest rates in major operating currencies have risen, which is relatively unfavorable for short-term loans with floating interest rates.

B. Previous fixed-interest financings for ordinary corporate loans are not affected by interest rate fluctuations.

Asset: The rising interest rate will be beneficial to the Company's short-term capital from investment income.

Net Result: Under proper control, the "Net Interest Income" from the last two years are as follows: +NT\$ 7.617 billion for 2020 and +NT\$ 10.498 billion for 2021.

### **Countermeasures**

The impact of the pandemic in 2022 has been relatively weakened, but due to geopolitical conflicts and inflation spike, the central banks of major countries are under great pressure to raise interest rates. To avoid the adverse effects of rising interest rates, the Company will reasonably arrange various financing tools as soon as possible to raise funds in USD, TWD or Japanese yen with low interest rates in mid to long term.

### **(b) Foreign Exchange:**

#### **Foreign Exchange Changes 2021**

USD-JPY: In 2011, while the global pandemic continued to recover, the situation in Japan was persistent, resulting in increased uncertainty about Japan's economic recovery prospects, thus the monetary policy remained loose. USD/JPY fluctuated upward, rising from a low of 102.72 at the beginning of the year to 115.08 at the end of the year.

- USD- NTD: As the U.S. economy recovers and the inflation rises, and U.S. Treasury Yield is on an uptrend, strengthen the dollar. USD/TWD reached to its maximum of 28.602 in 2021/3. Thanks to the post-epidemic recovery, Taiwan's exports have performed well, and the fundamentals have continued to improve. Attracting foreign capital into Taiwan, USD/TWD fell from a high in March to a low of 27.631 in June, and then basically remained within a range of 27.600 to 28.000.
- USD-CNY: In 2021, as other countries began to lift restrictions, strong external demand supported China's exports, and the trade surplus continued to expand. In March, USD/CNY rose to around 6.5718 due to US inflation concerns, and then returned to fundamentals, fluctuating downward, reaching 6.3561 at the end of the year.

### **Effect of the Company's Finances**

#### **1. Attributed Profit/Loss:**

- (A) Pursuant to "IFRS 9 (Financial Instruments)", profit and loss attributed to interest rates' fluctuations should be categorized into the two following categories:
- a. Profit and Loss attributed to Exchange:  
  
Foreign Exchange related assets or debt (such as operational accounts receivable, accounts payable, financial activities related to demand [time] deposits, short [long] term loans) and the discrepancy caused by exchange are attributed to this category.
  - b. Financial Assets (Liabilities) Profit and Loss Valuation:  
  
Foreign exchange related assets or liabilities generated from risk avoidance mechanisms (such as Long-term foreign exchange trading), and the profit and loss generated at fair value are listed in this category.
- (B) In order to review the Profit and Loss generated from exchange-related fluctuations, the two factors listed above should be consolidated to provide a fuller picture.

2. Profit/Loss status:

(Note: +Profit, -Loss)

Unit: NT\$100Million

Type \ Item	2020			2021		
	Profit/Loss attributed to Exchange	Financial Asset (Liability) Profit/Loss Valuation	Total	Profit/Loss attributed to Exchange	Financial Asset (Liability) Profit/Loss Valuation	Total
Consolidated Statement	-16.72	+137.28	+120.56	-50.75	+25.31	-25.44

3. Profit/Loss Description:

The Company has always maintained a conservative approach to risk avoidance, and stringent internal monitoring of trends and changes in foreign exchange and external financial markets. Therefore, the Company can execute risk aversion strategies accordingly, and generate profits attributed to exchange.

**Countermeasures**

1. Fundamental Strategy:

To cater for the complicated external factors at play, the Company attempts to offset liabilities with assets, and reduce the exposure exchange-related fluctuations.

2. Risk Avoidance:

The underlying principle is to square-off the aforementioned net positions.

**(c) Inflation**

**Developments in Inflation**

In 2021, Taiwan's inflation hit 13-year high. The global supply chain was hit by the COVID-19 pandemic. The post-pandemic economy recovered and manufacturers' demand recovered, leading to a sharp rise in raw material prices. In addition to the recovery in domestic demand, the cost of food, meat, air tickets, and rent, etc. all have risen, and the annual average CPI (YOY%) was 1.96%.

**Effect of the Company's Finances**

- A. Fundamentally, the Company is an electronics foundry, and products have a tendency to depreciate over long periods of time. However, with a unified corporate strategy, the Company has reduced costs in various processes to offset the effects of inflation.

**Countermeasures**

- A. The Company will continue to its commitment to various cost-reducing initiatives as a policy, and will be more risk-averse to inflation and deflation related factors.
- B. Raw material prices continue to rise, reaching relatively high levels in recent years, and the Company will keep a close eye on key commodities and adjust procurement strategies accordingly.

**(1) Policies, Main Causes of Profit/Loss and Action Plans with Respect to High-risk, High-leveraged Investment, Lending or Endorsement Guarantee, and Derivatives Transactions**

**(a) High-risk, High-leveraged Investments**

None

**(b) Procedures for Lending Funds to Others and Countermeasures**

**(1) Policy:**

Regarding related procedures mentioned in the Company's consolidated financial reports, please refer to the related companies' "Operational Procedures for Lending Funds to Others".

**(2) Main Reasons:**

The Company's lending to legal entities listed in the consolidated financial report have short-term financing needs.

**(3) Countermeasures:**

Depending on the nature of the loan and target's procedures, the Company will

undertake necessary countermeasures.

**(c) Procedures for Endorsement & Guarantees and Future Countermeasures**

**(1) Policy:**

Regarding related procedures mentioned in the Company's consolidated financial reports, please refer to the related companies' "Procedures for Endorsement & Guarantees".

**(2) Main Reasons:**

The Company's endorsement and guarantees to legal entities listed in the consolidated financial report are parent/subsidiary companies, and endorsements and guarantees are mainly financing related.

**(3) Countermeasures:**

Implement countermeasure according to the endorsement and guarantee process.

**(d) Derivatives Transactions**

**(1) Policy:**

A. The Company and the legal entities listed in the consolidated financial report that partake in derivatives transactions will all be in accordance with FSC's "Regulations Governing the Acquisition and Disposal of Assets by Public Companies" and TWSE's "Taiwan Stock Exchange Corporation Directions for Auditing Internal Control Systems of Listed Companies".

B. As a risk avoidance principle, positions of the Company's asset or liabilities that are in actual possession or expected to be in possession will be closed. This offsets market price fluctuations as risks and risk-avoidance transactions will counteract each other, achieving stable operations.

**(2) Causes for Profit/Loss**

A. Externally:

Political game theory, black swan theory, and the state of the economy has placed various governments in different predicaments. Different countries have undertaken either tightening or relaxing monetary policies, creating a turbulent and unpredictable foreign exchange market.

B. Internally:

As a principle, derivatives trading will aim to "close the underlying net positions of related hedges", therefore when the net position incurs a loss, the derivative transaction will be counter to and gain valuation from the asset (or liability).

**(3) Countermeasures:**

**A. Stance:**

1. Derivative products are a financial tool and should be judge on how the tool is utilized, to achieve what ends, and the mentality in making such decisions.
2. The Company is committed to internal controls regarding financial derivative transactions, and has implemented various principals to reduce to the risks to a minimum.
3. Domestically, IFRS has implemented strict accounting regulations and guidelines regarding financial derivatives trading. The Company's procedures are in compliance and even more rigorous than related regulations.

**B. Policy:**

1. With the recent events, the impacts to the financial markets have been exacerbated. The financial market has been speculative and opportunistic, viciously fueling the outcome of these events. Various price fluctuations are neither based on fundamentals or logic, Additionally, with the hype driven by various financial institutions and media, the risk in the market has risen greatly.
2. Under these conditions, the financial derivatives and its leverage will be used more conservatively and stringently by the Company. Strategically, the Company will not be following the herd or be intimidated by external factors, and actions shall be judge on its "risk avoidance" merits.

**(2) Future Research and Development Projects and Corresponding Budget**

The Company focuses on leading the mass production of high-tech technology products, and its method is to effectively gather outstanding R&D talents, and invest the best R&D technologies and processes related to the Company's core competencies. With an estimated NT\$100 Billion R&D expenses in 2021.

**(3) Effects of Changes in Policies and Regulations on Corporate Finance and Sales and our Countermeasures**

None

**(4) Effects of Technology and Industrial Changes on Corporate Finance and Sales and our Countermeasures**

In recent years, the Company, accorporating with world leading clients, is actively committed to the research and development of the deployment of technology and always maintain a firm

grasp of the changes in the industry. In the future, it will continue to conduct research and development in line with market trends and customer needs. Therefore, there is no impact of technological changes and industrial changes on the Company's financial business.

**(5) The Impact of the Changes of Corporate Image on Corporate Risk Management and our Action Plan**

The Company not only focuses on developing sales operations worldwide, but at the same time actively participates in developing and refining corporate social responsibilities globally. The Company will continue to simulate various large-scale events, and formulate response strategies accordingly, to protect and maximize value for all shareholders and clients.

**(6) Anticipated Results and Risks of Acquisition**

As of the printing of the annual report, the Company has no applicable acquisition.

**(7) Anticipated Results and Risks of Expansion of Factory Buildings**

The main clients of the Company are leading brands of the industry, in an effort to more promptly and better serve these customers, the Company has established foundations in key strategic positions around the globe.

**(8) Risks during Concentrated Stock Replenishment and Sale**

Collaborating on a global scale with like-minded group of quality suppliers, the Company effectively mitigate risks prone to a particular market, product, or sale, but also offsets risks for suppliers against the industry.

**(9) Effects and Risks of the Large Amount of Share Transfers or Changes by Directors, Supervisors, or Major Shareholders**

As of the printing of the annual report, the Company has no applicable risks.

**(10) Effects and Risks of Change in Operating Right**

Jin Ji Full Precision Machinery (WuHan) Co.,Ltd	Development, Production and Operation of Precision Molds,Metal / Non-Metal Mold Components, Machine Components,Electronic Products and Parts; Automation Equipment and related Key Components, Hardware Products,Sheet Metal Products, Injection Molding, plastic products, Electronic Amusement Equipment Development, Design, Production, Sales;Heat Treatment;Metal Material Shear Processing, Sales and Supply of Related Materials for Technology; Testing Equipment Calibration, Repair, Maintenance, Testing; Sales OfLithium Batteries; Electric Bicycles, Non-electric Bicycles, Development, Design, Manufacturing, Assembly, Processing, Operation of Travel Tool Products and Parts, Sales of Similar Products of the abovementioned Products;Wholesale and Retail of Bicycles and Electric Bicycles; import and export of goods, Import / Export of Technology, Export Agent.

Company name	Business Scope
JIN JI FULL PRECISION MACHINERY (QIN HUANG DAO) CO., LTD	Development, Production and Sales of Precision Molds,Metal / Non-Metal Mold Components,Machine Components,Electronic Products and Parts;Automation Equipment and related Key Components,Hardware Products,Sheet Metal Products,Plastic Products Development,Design,Development, Sales;Heat Treatment;Metal Material Shear Processing, Sales and provide related technical services; Testing Equipment Calibration, Repair, Maintenance, Testing, Sales.
Changchun ChenTai Technology Co., Ltd.	Investment in the Construction of Polylactic Acid Degradable Plastic Resin,Modified Plastic Resin Technology Research and Development,Technical Consulting: Services, Production, and Sales.
Changchun YongTai Technology Co., Ltd.	Carbon Dioxide-Based Degradable Plastic Resins,Modified Plastic Resin Technology Research and Development,Technical Consulting: Services, Production, and Sales.
Changchun Leiguan Environmental Plastic Products C	Eco friendly plastic products manufacturing, research and development; environmental protection technology development, service and consultation; environmental protection equipment wholesale; construction and operation of sewage treatment plants.
Qingdao Ruitaitong Supply Chain Management Co., Ltd.	Supply chain management; international trade; entrepot trade; trade between enterprises in the zone and processing and arrangement under trade; self-operated and agency import and export of various commodities and technologies; trade of rubber products and plastic products; international and domestic freight forwarding agency And related business consulting services; agent customs declaration, inspection.
Shin Yan Technology (Foshan) Co., Ltd.	Technical service; technical development; technical consultation; technical exchange; technology transfer; technology promotion; research and development of electronic special materials; software development; electronic product sales; electronic component manufacturing; electronic special material manufacturing; optoelectronic device manufacturing; import and export of goods.
Nanjing Futeng New Energy Vehicle Technology Co., Ltd.	Auto parts research and development; technical service; technology development; technical consultation; technical exchange; technology transfer; technology promotion; auto parts and accessories manufacturing
NANJING HONGFUSHARP PRECISION ELECTRONICS CO., LTD.	Precision Electronic Equipment,Optoelectronic Technology and Related Equipment,Medical Equipment,Medical Equipment, Automation Equipment Research ,Development, Sales,technical services,Technology Consulting,Technology Transfer;Self-owned Housing and Equipment Rental;self- operated and Acting for the import and export of various commodities and technologies.
NanNing FuTaiHong Precision Industrial Co., Ltd.	New Electronic Components,Third-Generation and Subsequent Generations of Mobile Communication Systems, Mobile Phones,Network Cards,Switching Equipment,Digital Clustering System Equipment,Routers, Testing Equipment,Tooling and Manufacturing and Sales of the Abovementioned Products, Provide After-sales Service;The Import / Export of the Aforementioned,Wholesale Operations and related Supporting Services.

Company name	Business Scope
NanNing FuGui Precision Industrial Co., Ltd.	Development and Production of New Electronic Components,Broadband Access Network Communication System Equipment,Transmission Communication System Equipment,Metro Ethernet Communication System Equipment,Wireless Local Area Network (Wide Area Network) Equipment,High-End Routers,High-end Switches,Portable Microcomputers,Interactive Tablets,Vehicle Communication Device,Mobile Internet Device,Tablet Computer,Satellite Navigation and Positioning Receiver Equipments,Wireless Communication Module,Optical Transceiver Module,Module Casing,One Billion Bit Passive Optical Network Terminals,Base Station Filters,Digital Cameras,Video Recording Devices,Digital TV Sets,Digital Audio and Video Decoding Devices,Mobile Phones,Satellite TV Reception Facilities,Solar Cells,Solar Battery Packs,Network Security and Storage Products,Network Servers, Smart home, smart office equipment, POS Sales terminals and related equipment, 3D Printers and related equipment, Molds Fixture Manufacturing and Maintenance, Measuring Instrument Testing and Calibration, Bicycles, Electric Toys and Components of the Aforementioned Products., ancillary products (including Packaging) Business, except for the national exclusive control products), build supporting Development auxiliary facilities,Sales of Self-produced Products, and provision of after-sales services; The Import / Export of the Aforementioned,Wholesale Operations and related Supporting Services; Home Appliances, Household Items, Electronic Products Retail Business; Housing Rental.
Smarter Technology (Shenzhen) Co., Ltd.	Computer Software,Information System Software Technology Development and Sales; Information System Design,Integration, Operation and Maintenance;Information Technology Consulting;Database Services,Database Management;Property Management;Housekeeping Management;Collection of Dry Cleaning;Designated Driver Services ;Cleaning Services;import and export of goods and technology; clothing, textiles,Knitwear,Daily Goods Sales,Stationery,sporting goods,construction materials,Mechanical Equipment,hardware products,Electronic Products,Jewelry, Handicrafts Wholesale and Retail;Indoor and Outdoor Decoration Engineering Design,Decoration Engineering Design,Graphic Design;Engineering Cost Consulting,Network Technology Consulting and Development;Construction and Engineering of Electromechanical Installation, Integrated Wiring Engineering;Design,Development and Sales of Security Products.
Spectacular Co., Ltd.	Intellectual Property. ,Management Consulting Services. ,Research Development Service.
Maoming Yijie Logistics Co., Ltd.	General freight; cargo transfer; warehousing services; distribution services; loading and unloading services; parking lot services; cargo packaging services; freight information consulting services; supply chain management and related supporting services; logistics industry investment; wholesale and retail of food, agricultural and sideline products, feed; self-operated and agency import and export business of various commodities and technologies, economic information consulting, business management consulting.
SOCLE TECHNOLOGY CORP.	Electronic Parts and Components Manufacturing,Software Design Services. ,Digital Information Supply Services. ,Product Designing. ,Other Industry and Commerce Services Not Elsewhere Classified. ,Wholesale of Precision Instruments. ,Wholesale of Computing and Business Machinery Equipment.,Wholesale of Computer Software.,Wholesale of Electronic Materials,Retail sale of Computing and Business Machinery Equipment. ,Retail Sale of Precision Instruments. ,Retail Sale of Computer Software. ,Retail Sale of Electronic Materials. ,telecommunications engineering industry, ,Computing Equipments Installation Construction., International Trade,Research, Design, Development and Manufacturing of the below products:
SOCLE TECHNOLOGY (Shanghai) LTD	Development and Design of Electronic Products, Electronic Components, Integrated Circuits and Components, Transfer of Proprietary Technology Achievements, Wholesale of Similar Products to the Aforementioned, Commission Agency (Excluding Auctions), Import / Export and Related Supporting Services, Trade Information Consulting, International Trade, Entrepot Trade, Intra-firm Trade and Trading Agency.

FUZHUN PRECISION TOOLING (JIASHAN) CO.,LTD	Electronic components and electromechanical component equipment manufacturing; metal tool manufacturing; industrial automatic control system device manufacturing; CNC machine tool manufacturing; electronic measuring instrument manufacturing; Industrial Robots manufacturing; Special task Robots manufacturing; Service consumer Robots manufacturing; Intelligent Robots research and development; Intelligent control System integration; industrial control system and system manufacturing; computer software, hardware and peripheral equipment manufacturing; audio equipment manufacturing; Home Appliances manufacturing; environmental protection equipment manufacturing; plastic products manufacturing; metal material manufacturing; non-ferrous metals alloy manufacturing; Molds manufacturing ; Non-ferrous metals calendaring Processing; mechanical parts, parts processing; artificial intelligence general application system; special equipment repair; general equipment repair; Electronic Equipment repair; automated overhead three-dimensional storage equipment, digital audio (video) encoding and decoding equipment manufacturing. Class II Medical Equipment Development; Class III Medical Equipment Development; import and export of goods.
FuJin Precision Industrial (JinCheng) Co., Ltd.	Development, Design, Development and Sales of Precision Molds for electronic components, precision components for automated machinery, metal Molds, and other industrial precision molds; Development, Production and Sales Semiconductors special materials for components, New Electronic Components, Electronic-specific Equipment, standardization and refinement of ceramic raw materials and precision plastic products, provide after-sales service; Digital Cameras and key parts development.

Company name	Business Scope
FuTaiJing Precision Electronics (BeiJing) Co., Ltd	Development of LCD TVs, New Electronic Components, mobile communication systems, base stations, Switching Equipment, Digital Clustering System Equipment and its components, Electronic Products Testing Equipment, Digital Cameras and key parts, Molds of the above products; Development of Medical Equipment (Class III): non-invasive blood glucose meters; LCD TVs, New Electronic Components, mobile communication systems, base stations, Switching Equipment, Digital Clustering System Equipment and its components, Electronic Products Testing Equipment, Digital Cameras and key parts, the research and development of Molds for the above products; Entrusted Development (Level I) unmanned Flying aircraft and accessories, household electronic appliances, Environmental Protection Equipment and accessories, Smart Wearable Devices and other electronic equipment, office electronic appliances, Computers, Communication Equipment, Electronic Products, Mobile Phones, Home Appliances, radio and television receiving equipment and equipment, automobiles Parts and accessories, Robots, Mechanical Equipment; Sales of Self-produced Products; provide technical services, Technology Consulting, technical training for the above products; LCD TVs, electronic equipment and their raw materials, wholesale, Commission Agent and Import /Export of parts Business. (Development Medical Equipment III category: non-invasive blood glucose meters and projects subject to approval according to law, after approval by relevant departments, carry out Operation activities in accordance with the approved content.)
Futaijing Precision Electronics Yantai Co., Ltd.	R&D and Processing of New Electronic Components, Mobile Communication Systems (including Mobile Phones), Digital Clustering System Equipment and its components, Electronic Products Testing Equipment, Digital Camera Modules and key components, Electronic Products components, Sales of Self-produced Products And provide self-developed Technology Consulting, technical services; electronic equipment and its raw materials, wholesale of parts and components and its Import/Export.
Fu Tai International Investment Co., Ltd	Investment industry, venture capital industry, investment consulting industry, management consulting industry
FuTaiKang Electronics Development (YanTai) Ltd.	Research and development of large and medium-sized electronic Computers, portable electronic Computers, Industrial Computers, New Electronic Components, Electronic-specific Equipment, New Instrument Components, fine blanking dies, Molds standard parts and parts of the above products; research, development and Sales High-End Routers, Network Switches, large-capacity optical (magnetic) disk drives and their components, Digital Cameras and key components, Integrated Circuit, System Integrated Circuit, operating system, software system, Servers, Game Consoles, Mobile Phones and other product appearance Design and mechanical parts Structure Design, automobiles, motorcycles Molds, fixture Design; information technology consulting and services; import and export of goods and technology, agent Import/Export; transfer of own research and development results.
FuTaiKang Precision Components (ShenZhen) Co., Ltd	Development and Production of various New Electronic Components and Tooling, various printed Circuit Boards, power plugs, sockets and computer peripherals. 70% of the products are exported. Increase: Development and Production of electronic Game Consoles, digital audio, video systems and their accessories (Excluding TV Sets), and Nationally Regulated Products), Micro-Computers, computer Mainframe and related stamping hardware, plastic parts and components. 100% of digital audio, video systems and their parts and accessories are sold abroad; 70% of other products are sold abroad. Add: Development and Production of Data Communication Multimedia Systems equipment, new technology equipment supporting the communication network and Mobile Phones and Parts. Increased sales of 5% of products for export. Increased: Development and Production of data and voice switches, Routers and related accessories, engaged in information and communication system network technology development, Technology Consulting, provided Self-produced product After-sales Technical Services; 70% for export.

Futaihua Precision Industry (Weihai) Co., Ltd.	Mold manufacturing; mold sales; chemical product sales (excluding licensed chemical products); metal material manufacturing; metal processing machinery manufacturing; mechanical parts and components processing; metal cutting processing services; mechanical equipment research and development; electronic components manufacturing; Offset printing equipment manufacturing; copying and offset printing equipment sales; cultural and office equipment manufacturing; office equipment sales; office equipment consumables manufacturing; office equipment consumables sales; additive manufacturing equipment manufacturing; additive manufacturing equipment sales; non-residential real estate leasing; goods import export; technology import and export.
FuTaiHua Precision Electronics (ChengDu) Co., Ltd.	Wearable smart devices, projection equipment and and Parts Manufacturing, R&D, Sales and technical services; engaged in Sheet Metal Products Molds, non-Sheet Metal Products Molds, folder Fixtures, inspection and calibration of Fixtures and Parts and Design and manufacturing; engaged in information communication network systems and others Technical development and consulting of application systems; Packaging Business; Warehousing and Storage services; engaged in cutting, bending, welding and processing of various steel plates and aluminum (profile) materials; engaged in the development, development, maintenance and after-sales of Automation Equipment and Components Services; Electronic Products, Digital Products, computer software and hardware and its auxiliary equipment, wholesale and retail of Home Appliances; technical services and after-sales consulting, installation and maintenance services; wholesale, Import/Export and related supporting services for similar products of the above products; Provide after-sales service of self-produced products and Componentstechnical services;Mechanical Equipment Leasing;;Design,Production,agency, Advertising;Photography and video services;corporate marketing planning;Decorative engineering Design and construction;Organize and plan cultural and artistic exchange activities;Graphic Design and Production ;Business Management Consulting; Educational Consulting; Human Resources Intermediary Services; Quality Inspection Technical Services; Development and Sales of Type II Medical Equipment; Development and Sales of Daily Masks (Non-medical); Processing, Manufacturing, Wholesale and Retail of Plastic Products; Recycling and utilization of renewable resources.
FuTaiHua Precision Electronics (ZhengZhou) Co., Ltd.	Production and Operation of Third-Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, base stations, core network equipment and network detection equipment and their components, new electronic components and their accessories; digital audio, video codec equipment and parts ;Research And Development Of Metal, Non-Metallic Materials and Products, heat treatment and surface treatment process research and development, product mold design and manufacturing; development, preparation and application of consumables for processing. Engaged in Engaged in bonded warehousing logistics, maintenance inspection and After-sales service business; house leasing.
FuNeng New Energy Technology (Nanyang) Co., Ltd.	Provide technical diagnosis of energy consumption and design of energy-saving projects, technical energy-saving transformation of lighting system, professional services of operation and maintenance management; New Energy technology service field and planning and technical services of energy-saving and intelligent products, and energy-saving project transformation projects.

FLNET CO., LTD.	Computing Equipments Installation Construction.,Computing Equipments Installation Construction, Wholesale of Computing and Business Machinery Equipment, Wholesale of Telecom Instruments, Wholesale of Computer Software, Wholesale of Electronic Materials,Retail sale of Computing and Business Machinery Equipment, Retail Sale of Telecom Instruments, Retail Sale of Computer Software, Retail Sale of Electronic Materials, Retail sale of Others, Retail Business Without Shop,Other Consultancy, International Trade, Restrained Telecom Radio Frequency Equipments and Materials Import,Telecommunications Number Agencies, Other Industry and Commerce Services Not Elsewhere Classified, Warehousing and Storage,Cargoes Packaging,Wholesale of Stationery Articles, Musical Instruments and Educational Entertainment Articles, Retail sale of Stationery Articles, Musical Instruments and Educational Entertainment Articles, Other machinery and appliances wholesale, retail, Retail Sale of Household Appliance, Wholesale of Motor Vehicle Parts and Supplies, Automobile, motorcycle parts and equipment retail industry, Battery Distributor,battery retail,General Advertising Services, Leaflet Distribution,Arts and Literature Service.,Agency Services,Rental and Leasing Business.,Software Design Services. ,Data Processing Services. , network certification service industry.
FuDing Precision Components (ShenZhen) Co., Ltd.	Development and Production of various plugs and sockets, Plastic Products, Molds and their parts and components, telecommunications connectors, instrumentation equipment, New Electronic Components; 70% of the products are exported. R&D, DevelopmentOperationMobile Phones and Parts, all kinds of power distribution switches, Bluetooth speakers, wireless Audio and video sharing device, carton, foam, non-standard Automation Equipment, automatic optical inspection equipment, Automation Equipment; wholesale, Import/Export, Technology Consulting, technical services and related supporting services for the above products and Components, accessories and similar products; transfer Self-developed technical achievements; door-to-door installation and maintenance service and after-sales service of the above products.
FIH (TIANJIN) PRECISION INDUSTRY CO., LTD.	Development, Processing, Sales and Maintenance Third Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, New Electronic Components, Mobile Communication Systems, base stations, Switching Equipment and Digital Clustering System Equipment and their parts, Electronic Products Testing Equipment, Digital Cameras and key parts and Molds related to the above products, and provide related Technology Consulting and after-sales service; Self-owned Factory Lease.
FIH (NANJING) COMMUNICATION CO.,LTD.	The development and manufacture of mobile phones of the third generation and subsequent mobile communication systems, the development and testing of computer and mobile phone related software and hardware, system integration, application services and related technical services; 2G/3G mobile phones, smart phones, network cards, tablet computers and other communication products, Import and export of communication modules and software, wholesale, commission agency (except auction) and related supporting services. IoT equipment manufacturing; IoT technology research and development; IoT equipment sales; IoT technical services; Software development; Artificial intelligence hardware sales; Smart vehicle equipment sales; Smart robot sales; Electronic components wholesale; Import and export agency; Wholesale of computer software, hardware and auxiliary equipment; computer and office equipment maintenance; network equipment sales; electronic product sales; optoelectronic device sales; communication equipment repair; intelligent unmanned aerial vehicle manufacturing; intelligent unmanned aerial vehicle sales; display device manufacturing; display device sales; Sales of household appliances; technical services, technical development, technical consultation, technical exchange, technology transfer, and technical promotion; retail of computer software, hardware and auxiliary equipment; 5G communication technology services; household appliance repair; research and development of intelligent robots; manufacturing of special operation robots .
FIH CO., LTD.	Management Consulting Services, Wholesale of Telecom Instruments, Retail Sale of Telecom Instruments, Wholesale of Electronic Materials, Retail Sale of Electronic Materials, Product Designing, Software Design Services, Restrained Telecom Radio Frequency Equipments and Materials Import.

Fuzhikang Precision Components (BeiJing) Co., Ltd.	New Instrument Components, Precision Molds, Computers, mobile communication systems and related accessories; research and development of New Instrument Components, Precision Molds, Computers, mobile communication systems and related accessories; Sales of Self-produced Products and similar products in wholesale, retail, Commissioning Agents business; import and export of goods, agent Import/Export, Import / Export of Goods and Technology. Development of air Purification Equipment, medical laboratory and medical disinfection equipment and appliances.
Fuzhikang Precision Electronics (LangFang) Co., Ltd.	Development, Processing of New Electronic Components; Mobile Communication Systems, Mobile Phones, base stations, Switching Equipment and Digital Clustering System Equipment and their parts; Portability Micro-Computers, Lightweight Flat Panel Monitors and their parts; Electronic Products Testing Equipment; Digital Cameras and their key parts, multimedia Electronic Products, electronic equipment and their parts manufacturing; Automation Equipment, Electronic-specific Equipment manufacturing and equipment maintenance; Precision instruments, Robots equipment and machinery Processing and Parts manufacturing; Automobiles parts and accessories manufacturing; and Molds, Fixtures, inspection tools related to the above products, and provide related testing services and self-developed technical services, Technology Consulting, technical training and after-sales service; Sales of the company's own products; similar products and own product Cutting Tools, wholesale, Import/Export, Commissioning Agents business of consumables.
Fuxiang Private equity investment fund joint ventur	Equity investment, industrial investment, investment consulting, investment management, business management consulting, business information consulting.
FuXiang Precision Industrial (KunShan) Co., Ltd.	R&D, Processing New Electronic Components (new electromechanical components); New Instrument Components, Precision Molds, Tooling; portable computers and components; Electronic-specific Equipment, Testing Equipment, CNC machine tools with more than three-axis linkage, digital control system and servo clothing, Digital TV Sets, new flat-panel Monitors, digital sound reproduction equipment, digital audio, video codec equipment, touch systems, smart home equipment, medical equipment and equipment, video recording and playback equipment, communication system equipment, smart consumer equipment and its and Development of Parts and related software; PC+ABS, halogen-free flame-retardant PC+ABS, PC+ABS+glass fiber, ABS+PMMA, ABS+PET and other plastic alloys; reuse of waste plastics; Sales of Self-produced Products.
FuHuaJie Industrial (ShenZhen) Limited	Production and operation of multimedia telephones, packaging business, portable microcomputers, new flat panel display devices, computer-aided design, auxiliary testing, printers, mobile phones, digital audio and video systems, printer ink cartridges, digital cameras and their components, game consoles. Engaged in the wholesale, import and export and related supporting business of similar commodities and optoelectronic products of the above products, solid-state lighting sources (LED and similar products), lamps and accessories.
FU HUAKE PRECISION INDUSTRY (SHENZHEN) CO. LTD.	Electronic information technology, network and communication technology software product development Design; graphic image recognition and processing system development; software product development; wireless local area network (including support for WAPI), wide area Network Equipment development; mobile communication system Mobile Phones, base stations, Development of core network equipment and network testing equipment.
FuhuaKe Precision Industry (GuiZhou) Co., Ltd.	Development and Production Consumer Electronic Products motherboards, Power Boards, Photovoltaic Panels, Drive Boards, Light Strips and related Parts; Consumer Electronic Products and Spare Parts, Sales of surface adhesive technology equipment; Inspection, maintenance and sales of self-produced products After-service. Engaged in Sales, Import / Export and Related Supporting Businesses.equipment leasing services of the above products and Parts, general goods.

Company name	Business Scope
FUGUIKANG PRECISION ELECTRONICS (GUIZHOU) CO., LTD.	R&D, Development and Sales, medium and large TVs, medium and large computers, Portable Computers, Desktop Computers, Multimedia Data Processors, Mobile Communication Systems and Equipment, New Electronic Components, Electronic Whiteboards, Video Wall, New Energy, Energy-Saving Products, LED LAMPS, Solar Lighting System, Smart Light Pole, Smart Internet-enabled Multimedia Machines, New Generation Game Consoles, Digital Electronic Products, Smart Monitoring Devices, Servers, Automatic Optical Switching Network Equipment, high-speed Storage Systems and intelligent storage devices, network signals The analyzer and the peripheral products of the above products and related and Parts, software and hardware application systems integration, and after-sales Repair Services research and development, manufacturing, testing, installation, maintenance LED DISPLAY PRODUCTS, Transformations for Lighting Systems, urban lighting intelligent control system contracts Energy management EMC. Import/Export, wholesale and related supporting businesses of non-self-produced products. Environmental protection facility operation, Environmental Technology Services, commission to provide labor services (excluding queuing services, agency services, foreign labor service cooperation).
FuYang Soleros Technology(NANAYNG) CO., LTD	Photovoltaic Power Generation; investment, procurement, sales, and management of New Energy projects such as Photovoltaic Power Generation, system integration, and related supporting facilities, equipment; and related technology development and application, consulting services; investment management and investment consulting.
FUMENG ELECTRONICAL TECHNOLOGY (HEZE) CO., LTD	R&D, Development, Processing are used for electronic connectors, cable components, New Electronic Components, New Instrument Components for computers and computer peripheral equipment, Servers, network communications equipment, audio-visual, film and television equipment, and automobiles electrical systems; the above products and Parts and related Software development; Sales of Self-produced Products.
Fu Sheng Optoelectronics Technology(Kunshan) Co., Ltd	Development and manufacturing of optoelectronics technology, Technology Transfer, Technology Consulting, technical services, optical communication modules, high-speed connectors and cables; development and testing of New Energy automobiles charging systems, Sales of Self-produced Products; Optoelectronics Sales of the product.
FuDing Electronic Technology (JiaShan) Co., Ltd.	Electronic components and electromechanical component equipment manufacturing; CNC machine tool manufacturing; electronic measuring instrument manufacturing; Industrial Robots manufacturing; Special operation Robots manufacturing; Service consumer Robots manufacturing; Intelligent Robots research and development; Computer software and hardware and peripheral equipment manufacturing; Industrial control computers and System manufacturing; audio equipment manufacturing; Molds manufacturing; mechanical parts and parts Processing; artificial intelligence general application systems; daily masks (non-medical) Development; labor protection products Development; sewage treatment and recycling; intelligent Robots manufacturing; Manufacturing of intelligent storage equipment; manufacturing of digital audio and video encoding and decoding equipment (except for the projects that must be approved according to the law, the operation activities shall be carried out independently with the business license in accordance with the law). Licensed items: Class II Medical Equipment Development; Type III Medical Equipment Development; Medical Mask Development.
FuDing Precision Industrial (ZhengZhou) Co., Ltd.	Development and Production of New Electronic Components, electronic special materials, Electronic-specific Equipment, Testing Equipment, Tooling, portable Micro-Computers, High-End Routers, high-end Servers, Computer Digital Signal Processing Systems and Boards, Solar Cells, third generation and Subsequent communication systems Mobile Phones, Digital Audio and Video Decoding Devices, digital sound reproduction equipment, automobile electronic devices and parts of the above-mentioned products; Design and manufacturing of metals and non-Sheet Metal Products Molds; Development of high-tech non-ferrous metals materials; Scrap Plastic digestion and reuse; Sales of Self-produced Products; Development and DevelopmentOperationAutomation Equipment, related and Parts, and equipment maintenance and after-sales service.

Rich Dreams Network Technology (Hangzhou) Limited	Services:computer software and hardware technology development, technical services, Technology Consulting, Technology Transfer, entrusted to engage in product inspection, testing, and proofing services (for qualifications involving qualification certificate Operation); Sales (including online Sales): computer software and hardware, photographic equipment, electronic components, hardware and electrical equipment, Sales of office supplies, Ceramics, Handicrafts, Mobile Phones and Accessories, auto parts, Electronic Products (except special control), Toys (except analog Toys); trust enterprise asset management; import and export of goods and technology.
KICK2REAL CO.,LTD.	Data Storage Media Manufacturing and Duplicating,Wholesale of Computer Software., International Trade,Intellectual Property. ,Software Design Services. ,Digital Information Supply Services. ,the third party payment,General Advertising Services. ,Product Designing. ,Industry Innovation and Incubation Services,Rental and Leasing Business. ,Retail Sale of Computer Software. ,Retail Business Without Shop. .
Fuhong Cloud Computing (TianJin) Co., Ltd.	import and export of goods. Computer soft and hardware, and external peripheral manufacturing; Computer Hardware and Software and Supporting Equipmentwholesale;Computer Hardware and Software and Supporting Equipment retail; cloud computing equipment Sales; cloud computing equipment manufacturing; Internet data services; Molds manufacturing; Molds Sales; Software Development; technical services, technology development, Technology Consulting, technical exchanges, Technology Transfer, Technology Promotion; computer and communications equipment leasing; Non-residential real estate lease.
ShanXi Yuding Precision Technology Co., Ltd.	Production and operation of third-generation and subsequent generations of mobile communication systems, mobile phones, ,base stations,core network equipment and network detection equipment and their components,new electronic components and their accessories,portable medical electronic products,digital audio and video decoding equipment and their Components are engaged in the research ;development of metal and non-metallic materials and products,heat treatment and surface treatment process research and development, product mold design and manufacturing;Control processing-use consumables, equipment and applications;Engaged in bonded warehousing logistics,maintenance testing and after-sales services to provide related technical consulting and after-sales services, and sells the company's own products to engage in the import and export business of the above-mentioned related products; smart manufacturing upgrade, automation of complete factory lines, Automation Equipment, computer soft and hardware equipment, smart city systems, industrial manufacturing softwares; Industrial Robots technology development,Technology Consulting, transfers, R&D, design, manufacturing, salesand repairs; Import / Export Business.
FULIAN TECHNOLOGY (ZHOU KOU) CO., LTD	Mobile terminal equipment manufacturing; mobile communication equipment manufacturing; communication equipment manufacturing; wearable smart equipment manufacturing; electronic components manufacturing; audio equipment manufacturing; computer software, hardware and peripheral equipment manufacturing; Manufacturing; mold manufacturing; mechanical parts, parts processing; mobile terminal equipment sales; mobile communication equipment sales; communication equipment sales; audio equipment sales; electronic special materials sales; mold sales; metal material sales; metal products repair; mechanical parts, parts Parts sales; renewable resources sales; new material technology research and development; general cargo warehousing services; customs-supervised cargo warehousing services; import and export of goods; technology import and export.

Company name	Business Scope
Fulian Technology (Wuhan) Co., Ltd.	Production of Mobile Communication Systems, Mobile Phones and Parts, Base Stations, core network equipment and network detection equipment and their components, New Electronic Components, portable medical electronic products, digital audio and video decoding equipment and their Components are engaged in the research ; Research And Development Of Metal, Non-Metallic Materials and Products; Heat Treatment and Surface Treatment Process Development and Mold Design, Manufacturing, Wholesale and Retail; Maintenance Inspection Services for Products of the Company;; Warehousing Services; Industrial Robots, Peripheral Automation Fixtures, mechanical Processing and Parts technology development, Development, wholesale; smart home products and their parts, smart wearable products and parts, plastics, Hardware Products, portable automatic data processing equipment, portable electronic browsers, Remote Control , Speakers, smart car Electronic Products, car networking terminal equipment and parts research and development, Development and Sales; import and export of goods, Import / Export of Technology, Export Agent.
FULIAN TECHNOLOGY(JIYUAN)CO.,LTD.	Production and Operation of Third-Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, base stations, core network equipment and network detection equipment and their components, New Electronic Components, digital audio and video decoding equipment and their Components are engaged in the research ; Automation Equipment detection and research and development, precision motion control, mechanism simulation, opto-electromechanical control system, artificial intelligence application integration technology research, realize intelligent manufacturing SCADA/BCS, M2M, intelligent decision control, machine learning diagnosis and prediction, green energy-saving management The introduction, optimization, and promotion of core application systems; the development and introduction of key modules/equipment such as precision and flexible assembly and inspection of small components, automatic detection of product appearance/size/structural defects; mobile communication system Mobile Phones research and development and related software and hardware research and development, testing, System integration, application services and related technical services; engaged in the Design and manufacturing of Metal / Non-Metal Products Mold; and the maintenance and Warehousing and Storage services of the above products.
Fulian Lankao Yuzhan Intelligent Manufacturing Technology Co., Ltd	Production and operation of third-generation and subsequent generations of mobile communication systems, mobile phones, , base stations, core network equipment and network detection equipment and their components, new electronic components and their accessories, portable medical electronic products, digital audio, video decoding equipment and its parts; research and development of metal and non-metallic materials and products, heat treatment and surface treatment process research and development, product mold design and manufacturing; development, preparation and application of consumables for processing; logistics services, Warehousing Services ( Flammable, Combustible, Exception of Sales of Hazardous Chemicals); Maintenance testing and after-sales service; technology development in the field of smart equipment, Automation Equipment, electronic components, and computers, Technology Transfer, Technology Consulting, technical service and related product sales and leasing in the field of smart equipment(excluding financial leasing); Import / Export Businesses of Goods And Technology.
FULIAN TECHNOLOGY(HEBI)CO.,LTD.	Import and export of goods; import and export of technology; warehousing services under customs supervision; labor dispatch services. Mobile terminal equipment manufacturing; mobile communication equipment manufacturing; communication equipment manufacturing; wearable smart equipment manufacturing; electronic component manufacturing; audio equipment manufacturing; computer software, hardware and peripheral equipment manufacturing; electronic special material manufacturing; plastic product manufacturing; metal material manufacturing ; Mold manufacturing; Metal cutting service; Metal surface treatment and heat treatment; Communication equipment repair; Machinery parts, parts processing; Metal products repair; Mobile terminal equipment sales; Mobile communication equipment sales; Communication equipment sales; Wearable smart device sales ; Audio equipment sales; Mould sales; Metal material sales; Mechanical parts, spare parts sales; New material technology promotion services; Industrial design services; Machinery equipment leasing; Non-residential real estate leasing; General cargo warehousing services
