## **I. Letter to Shareholders**

2019 has been a challenging year for the Hon Hai / Foxconn Technology Group, emphasized by the ebb and flows both external and internal factors; externally, the US-China trade war rages on, and while internally the Group has undergone a transition in leadership. Through these trying times when our mettle is tested, we have continued to reach record highs in annual revenues. This was made possible by the solid foundations left behind by our founder; support and vote of confidence from shareholders and clients; and the commitment and dedication from our employees, suppliers, and partners.

The Business Report for 2019 is as follows: The consolidated net revenue for 2019 was NT\$5.343 trillion, an increase of 1% year-over-year growth compared to 2018; the net profit attributable to owners of the parent was NT\$115.31 billion, and earnings per share of NT\$8.32.

Apart from delivering an outstanding performance, the Group is committed to the pursuit of financial performance, striving for long-term stability to create greater economic returns for shareholders. Meanwhile, implementing diligent principles of corporate governance and relentlessly enhancing Hon Hai's transparency regarding information disclosure.

Over the past half-year, the world has been ravaged by the global coronavirus pandemic. On one hand, the Group has dedicated itself to preventative measures to ensure employee safety, and on the other, reaching out to clients to ensure a quick recovery of operations. Even though the pandemic has been strenuous to the global economy, Hon Hai has always upheld a view that "At any point in time, it can be 'both the worst and best era'". Therefore, the Group has been committed to core manufacturing technologies since the beginning, and more recently, proactively developing applications for the industry of internet and communication technologies. The results of these efforts have been evident, and widely recognized, such as being ranked 25th in Forbes "Top 100 Digital Companies", and also shortlisted in the Clarivate Analytics "Derwent Top 100 Global Innovators 2020", being the only company in Taiwan honored for 3 consecutive years for the latter award.

Despite the numerous awards and recognitions, the Group still strives for innovation, and continue the core transformation from "brawns" to "brains", by following the roadmap from; "Foxconn 1.0" optimization of the status-quo; "Foxconn 2.0" digital transformation; and "Foxconn 3.0" focusing on electric vehicles, digital health, and robotics. These three phases seem to focus on completely separate disciplines, but are deeply intertwined and are crucial to the Group in order to achieve our everlasting commitment for better results.

In regards to "Foxconn 1.0", the Company has declared four key areas of implementation including "Division of Labor, Sharing, Profit-making, and Elimination of Fraud". This approach enables the delegation and division of tasks between our various sub-groups, establishes a communication highway to and from the central Group, and in-turn creates a strong core so the fruits of our endeavors can be bore on the outlying branches. In fact, the Group saw the full effects of "Foxconn 1.0" during the beginnings

of the 2020 coronavirus pandemic. Early “Division of Labor” and continued “Sharing” and collaboration of resources within the Group played a crucial role in the systematic resumption of work and manufacturing. Additionally, the Group have implemented systematic procedures in the procurement process, which eliminates unnecessary cost arising from exploitation or fraud due to human factors. Furthermore, Shareholder profits have also seen a marked improvement, effectively achieving “Profit-making, and Elimination of Fraud”.

For the digital transformation of “Foxconn 2.0”, the Group has utilized digital technology to increase the efficiency and effectiveness of operations. For example, we have optimized our website and related platforms for improved communications with our Shareholders and investors. We have also established a supply chain management platform to streamline upstream and downstream information transparency. On one hand, the increase in information transparency enhances supplier management, and on the other the Group can achieve increased agility and timeliness to satisfy changes in customer demands. The Company has also started the conception of several big data databases, and have taken a more objective statistical approach to management, effectively establishing smart, automated strategic procedures. Additionally, in both areas of manufacturing and performance, the Group has also embraced this scientific, metrics-based approach. All-in-all, this has enabled the Group to achieve “Increased Quality and Efficiency, and Decreased Cost and Inventory”, to maximize the returns for the Group.

The Group will leverage R&D capabilities and investments in new industries to achieve the restructuring and upgrade towards “Foxconn 3.0”. As mentioned above, we will be investing in “electric vehicles, digital health, and robotics industries”, and also “artificial intelligence, semiconductors and next-generation communication technologies”, forming the Group’s key “3+3” (industry and technology) strategy. Using electric vehicles as an example, Hon Hai has a formidable global supply chain, and possesses key component manufacturing capabilities, structural R&D capabilities and system integration services. This unique set of proficiencies allow the Group to vertically consolidate services, and also provide services on smart platforms. Hon Hai will maintain its core ethos of sharing, and continue its dedication to innovative technologies to propel the sustainable development of the Group’s automotive ecosystem.

Additionally, to remain a leader in the technical field, the Company has founded the Foxconn Institute for Research in Science and Technology mid-last year, and the anticipated establishment of 5 research faculties: Artificial Intelligence, Next-Generation Communications, Quantum Computing, Cyber-Security, and Nano Semiconductors. The institute will assist the Group with cutting-edge technology and research services, and thus generating new economic growth. The fruits of research will provide prospective support for Hon Hai 5 years down the track, and assist in providing product competitive advantages and impetus for the Group’s foray into new industries.

Hon Hai has always been rooted in Taiwan, and have expanded globally; with customer touchpoints in China, Mexico, Canada, Czech Republic, Netherlands, India,

Vietnam among others. With the investment in the state of Wisconsin progressing according to plan: the Wisconsin Valley Science & Technology Park has been completed, and the Smart Manufacturing Center will begin test-manufacturing mid-2020. Meanwhile, the Group will simultaneously commit to recruiting elite talent from various fields, thus sowing the seeds for the Group's United States supply-chain with advanced manufacturing and future technologies.

Although not end-consumer-facing, the Group's every action is deeply rooted in "commitment as total-solution provides for global customers, and to achieve all-encompassing smart living for humankind". So day in, day out, it is our duty, joy and passion to be able to contribute to the betterment of humankind by providing smart living.

Throughout the 45 years of Hon Hai, we have maintained the unwavering values of "Love, Trust and Determination", and have never neglected our shareholders, employees or social responsibilities. The Group will continue to commit our experiences in cutting-edge manufacturing technology and supply chain management, to research and develop for the future, and utilize the Group's global advantages to lay the foundations for the way forward. We believe in our tradition of the everlasting pursuit of "Speed, Accuracy, Intricacy, Depth, and Breadth", Hon Hai will undoubtedly continue to create value and substantial returns for Shareholders and the society at large.

The sincerest of appreciation for your support in Hon Hai!

We will diligently strive and continue our commitment to you!

Chairman Liu, Young-Way

1. Does the company conducts risk assessments on environmental, social and corporate governance issues related to the company's operations in accordance with the materiality principle, and formulates relevant risk management policies or strategies?	✓		The Company utilizes multiple channels to communicate with stakeholders, and consolidates key areas of interest from various sources. A preliminary selection of key issues is identified based on sustainability, importance, completeness and stakeholder acceptance; the Company's CSR Committee assessment team then applies AA1000 Materiality Test to further divide into two main categories, "Degree of impact on the organization", and "Stakeholder degree of concern". Finally, the results are organized into an array. For more information, please see the Company's Annual CSR Report.	No Difference
2. Does the Company set up exclusively (or concurrently) dedicated units to promote corporate social responsibility, and authorize high level managers to handle and report to the Board of Directors?	✓		In 2007, The Company set up the FGSC Committee. The Committee chairman is a vice president. Given its importance to the Company, we set up three groups which are headed by three executive managers, who serve as vice chairmen of the committee. The director-general is in charge of the daily operation of the Committee. We currently have 6 full-time officers in charge of CSR promotion and supervision of specific affairs. Each Business Group of the Company has set up a CSR branch; there are more than 400 part-time officers in charge of the CSR affairs of the Business Groups. At the end of each year is an annual CSR meeting to formulate CSR work plans and goals for the coming year. After being approved by the Director General to start promoting, regular internal audits of each plant's annual CSR are carried out, to ensure that the plants are in line with the relevant CSR policies of the Company. Each Business Group also periodically reviews the operation of branch performance and reports to the Committee with issues concerning stakeholders for the year. Then the relevant written materials are compiled to produce an annual CSR report, which is submitted to the CSR chairman and Board of Directors.

## **(9) Status of Implementation of Internal Control System**

### **a. Statement of Internal Control System**

#### Hon Hai Precision Industry Co., Ltd. Statement of Internal Controls

Date: 3/30/2020

According to the examination on internal control system done by the Company itself in 2019, we hereby state as follows:

(1) The Company's Board of Directors and management team understand their responsibilities of developing, implementing and maintaining the Company's internal control system, and such a system has been established. The purpose of establishing the internal control system is to reasonably assure the following objectives: (a) The effectiveness and efficiency of business operation (including earnings, operation performance and the safeguard of company assets); (b) Achieve the reliability, timeliness, transparency, and compliance objectives according to the relevant laws and regulations in order to provide reasonable assurances.

(2) Due to the innate limitation in designing a faultless internal control system, this system can only assure the reasonableness of the above three objectives have been fairly achieved. In addition, the effectiveness of internal control system could alter over time due to the change of business environment or situation. Since the Company's internal control system has included self-examination capability, the Company will make immediate corrections when errors are detected.

(3) The evaluation of effectiveness of the internal control system design and implementation is made in accordance with the "Guidelines for the Establishment of Internal Control Systems by Public Companies" (the Guidelines). The Guidelines are made to examine the following five factors during the management and control process:

(1) control environment, (2) risk assessment and response, (3) control activities, (4) information and communication, and (5) supervision. Each factor also includes several items. Details of each factor can be found in the Guidelines.

(4) The Company has examined the effectiveness of each respected area in the internal control system based on the Guidelines.

(5) The examination result indicated that the Company's internal control system (including subsidiary governance) dated December 31, 2019 has effectively assured that the following objectives have been reasonably achieved during the assessing period: (a) The degree that effectiveness and efficiency of business operation; (b) The reliability of the financial and related reports; (c) The compliance of the relevant laws/regulations and company policies

(6) This Statement is a significant part of the Company's annual report and prospectus available to the general public. If it contains false information or omits any material content, the Company is in violation of Article 20, Article 32, Article 171 and Article 174 set forth in the Taiwan's Security and Exchange Act.

(7) The Company hereby declares that this statement had been approved by the Board of Directors on March 30, 2020. Among the 8 attending Directors, to the contents of this statement.

## **V. Operational Highlights**

### **A. Business Activities**

#### **(1) Business Scope**

##### **(a) Major Content of Business Activities**

IT, communications, automation devices, photo-electricity, precise machinery, auto, production, sales and service related with connectors, casings, radiators, assembled parts of consuming electronics as well as assembly of network cables. The products manufactured by the Company include:

1. I/O product line: IN-PUT, OUT-PUT connectors.
2. IC line packaging and product line of expansion memory: connector for IC line and memory IC expansion bracket.
3. Product line of system connector: electrical coupler of host and branch system.
4. Product lines of network connection and output & input device: terminal, scanner, keyboard, monitor, mouse, network integrated connecting cables.
5. Photo-electricity connecting product line: optical connectors and connecting wire network used in digital network.
6. Compound connectors with electronic processing functions: filtering connectors, static-free connectors and high frequency connectors.
7. EISA graphics card connectors under new industrial standard: expansion slot connectors with open framework.
8. Casings, radiators, spare parts processed by precision metal, engineering plastic module, precise machinery components used in IT products, Bare System and consuming electronic products.
9. Assembly and processing of memory card
10. Broadband communications, wireless mobile communications and end-to-end communication products
11. Ethernet switch and wireless network products

**(b) Revenue Mix**

100% of the products are 3C electronics (Computer, Communication, Consumer Electronics). The output and sales volume of the recent two years can be found in the table of Production and Sales.

**(c) Current Product Items**

The Company's products cover key components, modules and system assemblies for 3C electronics. Key components may include 3C connectors, line assembled products and others; the modules may include the machinery modules (e.g. the casing of 3C products) and electronic modules (e.g. surface adhesive product for 3C products); the system assembly is mainly for finished 3C products.

**(d) New Products to be Developed**

As for the R&D of new products, the Company will focus on connectors such as compound, modular, high frequency, photo-electricity and surface-mounted connectors. Besides, it will follow the trend and make its computers and accessories lighter, thinner, shorter, smaller, more surface-mounted and modularized as well as integrated with communications.

**(e) New Technologies to be Developed**

The Group is experiencing and leading industry upgrade to move from labor intensive businesses to intelligence intensive Foxconn 3.0 businesses covering no man factories, automation, and our defined "3+3 categories" including the three industries of robots, digital health and electric car and three applications across AI, semiconductor and next gen communication.

**(2) Industry Overview**

**(a) The Current State of the Industry and Future Developments**

Looking back on 2019, worsened trade war tension has led to conservative approaches and weakened global demand across the industry. Export statistics of many key exporting countries declined year over year, and Taiwan is undoubtedly in the same crew. However, information, communication and video-audio products sector in Taiwan has benefited from the supply chain shift as a result of the trade war and hence the export of these products and key components printed double digit growth for the first three quarters of 2019. Similar positivity was seen in private sector investments and hence the economic climate was generally robust.

IMF predicted a weakening global expansion. The global economy is projected to grow at 2.9% in 2019, 0.7 percentage point below that of 2018, reflecting a slowdown for both advanced and emerging countries.

For advanced markets, the US suffered from a downward revision, enterprises have been hesitant in investments as stimulus programs became less effective in addition to the continuous uncertainty from the trade war. The Euro zone, on the other hand, faced new minimum emission standards for petrol vehicles, slowing demand from China, and labor strikes in France. Yet Japan was relatively strong among advanced markets displaying year over year growth due to better consumer and business performances and government's fiscal expenditure expansion to offset the negative impact of an increase in consumer tax. Switching gear, emerging markets were structurally weak mainly from China's slow-down and the above-mentioned supply chain shift as a result of the trade war. In addition, India, Russia, Turkey, Mexico, Saudi Arabia and Argentina experienced even worse economic downturns each for their own reason.

The PMI index registered 50.9% in October 2019, a historical low since the beginning of 2018, and climbed back to 52.2% in January 2020, reflecting less tension among trade war negotiations and the official Brexit deal. Quantitative easing and interest rate cut have proven to inject confidence in enterprises.

For the electronics industry, smartphones have remained the largest market in the recent years. Under the steady improvements in mobile internet coverage and broadband, the smartphone has integrated seamlessly into the lives of consumers, and globally, manufacturers have actively invested into this space. Market research firm Canalys's statistics have placed 2019 global smartphone shipments at 1.37 billion units, a slight decrease of 2% compared to 2018. This is believed to be the saturation of the market and consumers' unwillingness to trade up devices.

Looking into 2020, CCS Insight believes that COVID-19 will drag down global shipments of smartphones to 1.26 billion units, compared to the 1.37 billion units of 2019.

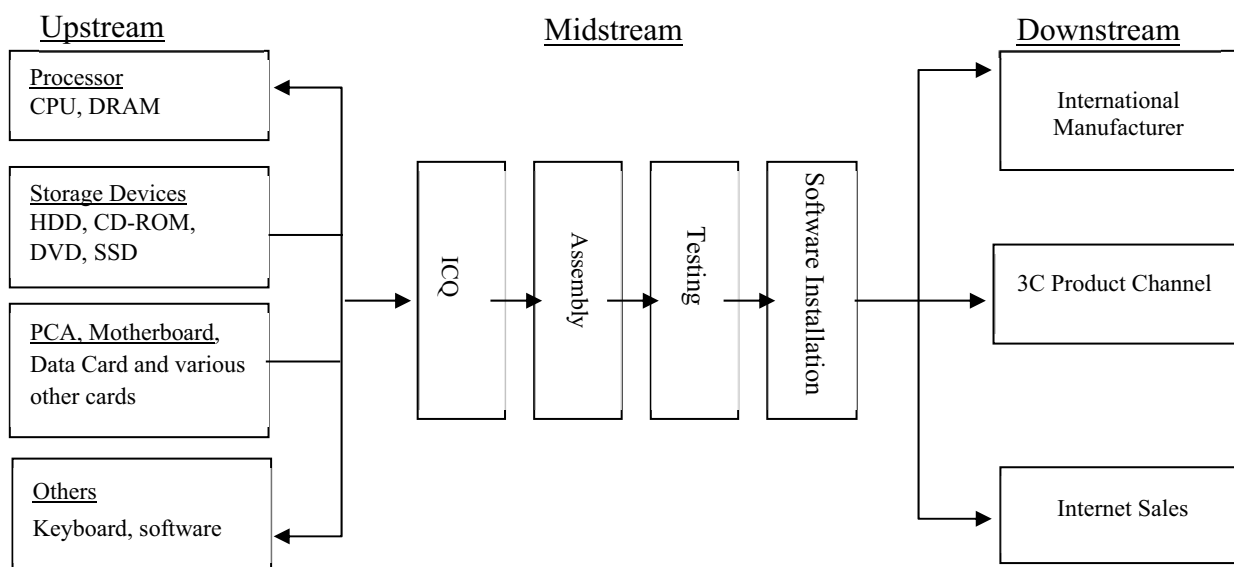

Tablets, according to IDC's statistics have disclosed 144 million units shipped, a 1.5% decrease from 2019.

According to Gartner's statistics, 2019 global PC shipments arrived at 0.261 billion units, the first year over year increase in seven years though the increase was only 0.6%. Looking into 2020, the degree of COVID-19 impacts on the PC market remains uncertain as work-from-home might decrease PC demands or lengthen enterprise upgrade cycles.

Regarding emerging electronic industries, such as IoT, wearables, electric

vehicles, robotics, participants in the space have taken their own approaches, developed these approaches into competitive advantages, and are expected gradually enter the commercialization phase.

**(b) The Industry Value Chain and Relationships**

**(c) Various Product Trends and Competition**

There are four main product categories:

1. Consumer and smart devices (smartphone, TV and game console)  
 This product category includes: personal consumer devices such as smartphones, feature phones, wearable devices; and smart home entertainment systems and devices, for example TV, game console, set-top box and speakers. The categorization comprises of traditional definitions of Consumer Electronics in 3C, and includes part of the Communications category.

The Company believes that all consumer electronics will be connected thanks to 5G and AI over the next decade and hence the age of Internet of Everything shall arrive. Therefore, the Company aspires to take the lead and secure a key position in the market of 5G by bringing together core competencies across companies within the group to provide “smart” solutions echoing this trend with our closely partnered customers.

2. Cloud Network Product Category (mainly servers and networking products)  
 This product category includes: enterprise and personal level networking devices; cloud related infrastructures, such as routers, servers, edge

computing, data centers, satellite communication and related equipments. As a result of the gradual formation of HPC, 5G network and edge computing, enterprise users' purchasing needs of servers to ride on the tailwind of private cloud or even hybrid cloud have been driving worldwide server market growth.

The Company has been in the server market for a long time and our quality, technology and service have been one of the most recognized. The swiftly increasing need of a regionalized supply chain under a broad globalized framework from major server customers has raised the bar of manufacturers higher and hence we believe that the Company is well positioned to be a leading system provider on that front.

3. Computing end products (computers and tablets)

This product category includes: all computing devices as defined traditionally for one's work and life, for example desktops, notebooks, tablets, enterprise computers, and printers, comprising of traditional definitions of Computing.

This is a mature sector and with cross device streaming and cloud services sharing a large part of the performances of personal desktops and notebooks, we expect stable demand for this category. Meanwhile, tablets and smart TVs are now seeing performance pressure and hence a potential upgrade cycle.

Producing tablets has long been one of the Company's strengths. We expect to see rising demands of tablets thanks to virtual meetings, work-from-home, and home-schooling trends. We aspire to capture this growth tide by integrating core competencies across manufacturing and services and our access to global channels.

4. Components and other products (connectors, mechanic parts and services)

This product category includes: upstream key components such as connectors, mechanic and electronic parts, semiconductors, automobile electronics, tooling/molding and machinery equipment related to development and manufacturing; logistics, warehousing, software development, medical and health services, and internet of industry and consolidation are also under this categorization.

The Group's long-term strategy is to form strategic partnerships to formulate a comprehensive, vertically integrated supply chain, leveraging our core expertise and advantages.

### (3) Technology and R&D

#### (a) Technical and R&D Businesses

The Company has utilized proprietary management methods for IIDM-SM; Integration; Innovation; Design; Manufacturing to Sales; Marketing, and coupled with Precision Molding; Material Technologies; Sustainable Manufacturing Technology; SMT Manufacturing Technology; Heat Transfer Technology; Plastic Processing; Metal Processing; Testing Capabilities; Automation Capabilities; Photoelectric Consolidation Technologies; Motherboard Design; E-Commerce Capabilities; Server Design; Wireless Communications and Light Display Modules, to achieve core competitive advantage. The Company also strives to provide the best 6C (Computers, Communication, Consumer electronics, digital Contents, Car parts and modules, Channels) foundry services with our strategic partners globally, and create maximum value for shareholders.

Looking to the future, the Company will remain committed to innovation and R&D; develop cutting-edge prospective applications; commercialize and realize product designs; bring to market the fruits of our research, and continue systemization of management processes, to solidify and maintain the Company's lead in core competencies.

#### **(4) Long and Short-term Business Development Plans**

##### **(a) Short-term Business Development Plans**

The Company pursues continued excellence in operational management and cost control, and provide a “One-Stop Shop” solution for global leading brands. Our commitment is to maintain the high quality of service and related added-value services enable computing, communication, consumer electronics (3C) to enrich lives of the world population. The Company will continue this pursuit and provide a diverse range of services, capture business opportunities and deepen our relationships with international brands.

In order to provide our customers with more timely services, the Company has actively established related manufacturing bases; design centers; service centers in the Europe, the Americas, and Asia to satisfy our clients’ global design, manufacturing and assembly needs.

##### **(b) Long-term Business Development Plans**

The Company spared no effort in innovation and R&D, with research and development centers sprawled across Asia, the Americas, and Europe, enabling around-the-clock R&D capabilities, thus enabling the shortest product-to-market cycle. The Company’s global R&D center in Dingpu is fitted with precision machinery, precision molds and nanotechnology research facilities. Leveraging the leadership of the R&D center, this enables the Company to better integrate towards technology, including forays into new territories, or applying new technologies to traditional manufacturing methods, to increase quality, reduce wasted resources, and increase global standards.

At the same time, the Company has expanded beyond the Greater China region, actively searching for investments and collaborations across US, Japan, Korea, Germany, India and South East Asian countries, established Foxconn Institute for Research in Science and Technology and attracting advanced R&D talents. In turn, uniting the world’s leading technologies and talents, and creating business synergies with our partners, solidifying the Company’s long-term competitive edge.

Similarly, the Company has formulated transformation and upgrade plans, beginning the long-term transformation from brawn-intensive to brain-intensive. The Company will take this opportunity to upgrade its level of industry, improve profits, and commit to the development of three main areas of electric vehicles, digital health, and robotics; and also emphasize the three main core technologies of AI, semiconductors, and 5<sup>th</sup>/6<sup>th</sup> generation

mobile communication technologies; an advanced deployment of technologies and products by 3-5 years.

Throughout the years, the Company has actively addressed Social and Environmental Responsibility (SER) issues, both on a company-level and also an industry-level with Electronic Industry Citizenship Coalition (EICC). The Company continues to dedicate resources to address issues such as energy saving, carbon emissions, recycling and environmentally friendly initiatives. Looking to 2019, the Company will leverage innovations in software and technological services to expand the environmental protection/energy industry, and promote global energy savings and emission reduction. Simultaneously, the Company will be increasingly active in sharing the Group's global consolidated platform with like-minded companies, to "Stand Together and Strive Together", and manage the economies on a global scale. The Company seeks the cooperation of the shareholders, clients, employees, strategic partners and the general public, to promote SER related issues, accelerate the industry's global competitiveness, and create the maximum value for shareholders.

## **B. Production and Sales Status**

### **(1) Market Analysis**

#### **(a) Core Products, Sales & Services Areas**

##### **1. Components**

Computer Connectors are one of the core products of the Company, the product serves as the neural network for computer equipment and is widely used in information/communication devices, and consumer electronics. Clients focus primarily on the specifications provided by the Company, but sometimes commission designs. In the domestic market, the Company is one of the leader manufacturers of this product, and the sales department is responsible for promoting the product category to mid-to-large sized clients, SMEs are serviced by our domestic dealers. Internationally, the sales and service is either handled directly by the head office or international subsidiaries for order transfers, and the sales promotion of the respective markets are the responsibilities of the dealers.

##### **2. Modules**

Module's specifications are mainly tailors to the clients commissioned designs; within the domestic market, the sales department is wholly responsible for the sales promotion; internationally, overseas companies oversee the local distributors and the dealers take charge of sales and promotion.

### 3. Assembly

Regarding the manufacturing and sales of integrating connectors; cable installation; computer foundations; surface adhesives; memory; central processing units; related software; assembly of communication and consumer electronic devices, the sales regions include the continents of Europe, the Americas, and Asia.

#### **(b) Market Share**

According to Bloomberg, the Company ranks first in Electronics Manufacturing Services (EMS), with a market share of 41.1%.

#### **(c) Future Industry Supply & Demand and Growth**

The Company's products are primarily used in industries such as communication devices (smartphones, internet-enabled devices), consumer electronics, computers, and related products, the industry developments for the respective product categories is as follows:

##### 1. Smartphones

IDC's statistics have placed 2019 smartphone shipments of 1.39 billion units, and 1.54 billion by 2023, with an annual growth rate of 1.7%.

Currently, the United States and Western Europe are mature, saturated markets, the smartphone units in these regions have begun to taper. The future demand of the smartphone relies heavily on developing regions, such as China with its increased coverage of 5G, creating a surge of 5G smartphone users. Chinese smartphone brands have slowly matured and steadily captured market share. In addition to this, India is also a rapidly growing region, due to the low adoption rates of smartphones, and with the local carriers increasing internet coverage outside of tier 1 and tier 2 cities, in turn attracting many leading smartphone brands to aggressively invest in this region. With this in mind, India is expected to be a catalyst in the future growth of smartphone shipments.

Even with the many years of smartphone hardware developments behind us, the high-end products are still continuing to differentiate and innovate. Leading brands vie to increase added value for smartphones and attract additional income. Smart accessories have become a lynchpin for many brands, accessories such as bracelets, watches and external lenses. Additionally, many smartphone brands have adopted 4K screens, curved screen; dual camera; advanced camera features; biometrics and

application integration; modular components; increase battery capacities; wireless charging; full projections; voice commands; virtual assistants; and mood sensors to hopes to differentiate their products.

With the increasing demand for outsourcing of global smartphone brands; the gradual reduction in the smartphone form factor; increase of functionality, the internal components are more intricate than ever. Therefore, manufacturers with a proper vertical integration and manufacturing capacity can be paramount to helping clients reduce cost, increase competitiveness, with many more opportunities in the future.

## 2. Tablet Computers

According to IDC, tablets under 8” are susceptible to competition from large form-factor smartphones, will continue to decline; the future of Tablet products will focus on sizes above 8” or even 9”, with the increased screen real-estate and accompanying keyboard to satisfy the content-creation needs of consumers.

## 3. Computer Products

Comparative to the smart devices industry, the Wintel camp of PC products have lacked buzz in the recent years. The upgrade of Windows operating system and Intel chips have struggled to captivate consumers to trade-up as it used to. IDC believes that in a mature market, the PC product is reduced to just needs of replacements. In developing regions, PC have also shown little or no growth, because of the increase in functionalities from smartphones and tablet computers filling up many of the functionalities the PC once used to offer. Despite this, the PC has an irreplaceable hold on the corporate market, especially in document processing, file editing, ease of content creation, are all features that are difficult to replace with smart devices. Therefore, the PC market is still substantial, and in the consumer market, many PC brands are opting for smaller form-factors and mobility, so there is still space for development.

The PC market have passed the growth stage, and the industry is slowly consolidating, with many smaller brands being merged or forced out. The ongoing competition between remaining brands are less fierce. Under this macro environment, big brands with more resources and vertical integration capabilities are likely to benefit.

## 4. Cloud Computing Products

The main products include servers, storage devices and networking devices, the related industry outlook is as follows:

- Servers/storage devices

With the advent of cloud computing, an abundance of corporate information has shifted away from the confines of physical on-site storage, and embraced cloud computing services. Coupled with the needs of calculation on the cloud, server products have also begun to evolve. The main driver for this growth being the tendency for enterprise units to be replaced.

Corporations and cloud service providers data processing needs grow on a daily basis, and with Big Data related technologies and solutions reaching maturity, large volumes of diverse data structures are required to be processed quickly. Coinciding is the need for storage equipment, data back-up and recovery solutions, pushing the overall demand for storage equipment market. Currently, flexible, scaling storage, along with optimized hardware and efficient software is the golden standard for cost-performance for corporate data storage.

- Switches and Routers

With 4G/5G becoming universal, Big Data centers and developments in IoT, brings about a increasing amounts of network traffic. Many countries have been actively expanding their 4G/5G and fiber networks and reinforcing related fundamental infrastructure. To ensure a seamless network traffic, lower response times from databases, cloud service providers have continued to invest in related infrastructure. Overall, this market is maintaining its healthy growth.

**(d) Competitive Niche**

1. Precision molding technology
2. Vertical integration and manufacturing capabilities of plastic molding, stamping, mold-flow, to mechanical components.
3. Creation of internal high speed network systems
4. Mechanical and barebones computer design capabilities
5. Heat transfer and noise treatment capabilities

6. SMT soft/hardware testing capabilities
7. PCBA rapid mass production capabilities
8. Photoelectric consolidation capabilities
9. Management Global supply chain management know-how

**(e) Business Development Advantages, Disadvantages and Countermeasures**

Advantages

1. The structure of the global industry is still undergoing adjustment, the foundry requirements of 3C and electronic industries grow year over year, and is advantageous for the Company.
2. The turnaround for 3C product life cycle continue to be squeezed, and the importance of timeliness continue to play a key factor, eCMMS is in a prime position to provide speed, quality, engineering services, flexibility and cost considerations, and can assist the Company's opportunities.
3. A complete ecosystem of overseas manufacturing, which is well managed and can cater to clients' needs.
4. Globally deployed manufacturing and points of sale, increasing the consolidation of global resources while providing flexibility.
5. Standardization, computerization, and automation.
6. Establishment of series of synergistic managerial systems of industry, quality, and operations.
7. A firm grasp key capabilities of mold development, and new product development.

Disadvantages and Countermeasures

1. Domestic demand in Taiwan is limited

Countermeasure: With a global market and a respective global strategy, the Company is positioned to leverage cost-reductions through globalized locations and provide international clients with timely services. The global strategy is in part due to the Company's execution and the operations of eCMMS, and provides a cornerstone for the Company's competitiveness overseas.

2. Some raw materials are reliant on imports, with low domestic production

Countermeasure: With the long-term experience in managing connector related products, the Company is experienced in managing the supply-side relationships. On one hand the Company supports domestic suppliers to lower cost and reduce lead-times, on the other the Company maintains amicable relationships with large international suppliers to reduce risk and manage more sources.

3. Acquisition of land proving to be costly

Countermeasure: To offset the domestic costs of land acquisition and allocate resources more efficiently, parts of production line have been shifted to more cost-favorable locations, this also manages location-specific risk. Additionally, the Company have established points of sale across the globe, and in turn better consolidates global resources, provides flexibility and increases the quality of service to our customers.

## **(2) Core Products, Main Applications, and Manufacturing Process**

The product segments of the Company are connectors; electronic casing; cable matching; and assembly. Connectors can be subdivided into I/O and interconnection. I/O are used in computer systems and peripherals such as mice, keyboards, display, printers, drawing machines, and network system related uses. Products examples in this category are: D-SUB connector, circular connector, flat connector, coaxial connector.

Interconnection connectors are used in the main system and related devices, and is utilized between electrical components and the IC board to facilitate signals within the system and modules. For example, the connection between the motherboard, related IC boards and power supply unit. Product example in this category are: edge connectors, IC sockets, flat cable composition and connectors, various plugs and sockets. With the increasing functionality of computers, an increase in related devices, network infrastructure requirements, the demand for I/O connectors have seen an increase. On the other hand, interconnection type connectors, due to computer systems design, the trend of modularization of manufacturing, have also seen an overall increase in usage.

Cable matching is mainly catered to the customers' design, and is subdivided into functionality such as: display, mice, keyboard, network system, telecommunication device, and various circuit-enabled switches.

Assembly is also based on the design requirements by the customer, and produces various computer foundations and internal mechanisms.

### **(3) Status of Core Material Suppliers**

The Company's manufactured products such as connectors, foundations, and assembled products utilize materials such as copper, plastic pellets and auric salt, steel, and the status of suppliers are as below:

1. Copper

Have strategic alliances with several suppliers, to ensure the stability of copper supply. Prices are formulated based on LME, and the Company has dedicated personnel analyzing the market trends of the material, to ensure cost-effective purchases and ensure competitiveness.

2. Plastic Pellets

Develop connector-specific materials with domestic and international manufacturers to increase quality. The manufacturers have established a shipping warehouse in Hong Kong to ensure a steady and timely supply. Prices are negotiated annually, and leverages the Company's economy of scale for bulk purchases to ensure price competitiveness.

3. Auric Salt

Prices for auric salt are based on the international gold price, and calculated based on a formula. The supplier ships directly to the manufacturing plant to lower transportation related risks. The supplier delivers every 3 to 4 days to minimize storage overhead.

4. Steel

Required materials for computer foundation development with domestic and international manufacturers. The Company utilizes market price or annual price negotiations for steel, and leverages the Company's buying power to maintain favorable prices.

5. Other material requirements for assembly or memory modules, or materials required for IC board printing, capacitors, IC. Specific material needs can be acquired directly through the customer.

## **D. Information on Environmental Protection Costs**

### **(a) The loss caused by environmental pollution during the latest year and up to the printing date of this Annual Report:**

None

### **(b) Information on Environmental Protection Matters**

1. The main workshops and production facilities of the Company are located in Tucheng Industrial Park or Hsinchu Science Park. The Company takes environmental protection as its priority, and carries out immediate correction once discovering any problem. It also makes inspection on the existing preventive facilities. Apart from creating a good working and living environment for its employees and the neighborhood, it strictly complies with the discharge standard. For the pollution and wastes generated in the production process, the Company takes the following steps to protect the environment:
  - i. Prevention of water pollution: set up wastewater treatment plants and water quality analysis laboratory in Tucheng factory. Chemical method is applied in wastewater treatment, in which pollutants are removed from wastewater and discharged through discharge outlets. The lab has various instruments to measure temperature, PH value, chemical oxygen demand and suspended solid and analyze heavy metal, so that daily inspection on discharging water can be made and water discharge can be well controlled. The Company's factories in Huyue, Minsheng and Hsinchu all received a letter on permit to connect wastewater (or sewage) to the sewer system, under the reference of TFZ No. 1065061681, 0955060439 and YLZ No. 1000004253, and TFZ No. 1035060107 respectively; and have acquired water pollution permit: New Tapei City SHZ No. 04774-01, 05854-00, 05855-00 for Taipei Tiger Leap (Huyao) Factory, Dingpu No.1 Factory, and Dingpu No.2 Factory respectively.

## Formula:

### (1) Financial Ratio

1. Total liabilities to Total assets = Total liabilities / Total assets
2. Long-term debts to fixed assets = (Net equity + Long-term debts) / Net fixed assets

### (2) Ability to Pay off Debt

1. Current ratio = Current Assets / Current liability
2. Quick ratio = (Current assets - Inventory - Prepaid expenses) / Current liability
3. Interest protection = Net income before income tax and interest expense / Interest expense

### (3) Ability to Operate

1. Account receivable (including account receivable and notes receivable from operation) turnover = Net sales / the Average of account receivable (including account receivable and notes receivable from operation) balance
2. A/R turnover day = 365 / account receivable turnover
3. Inventory turnover = Cost of Goods Sold / the average of inventory
4. Account payable (including account payable and notes payable from operation) turnover = Cost of goods sold / the average of account payable (including account payable and notes payable from operation) balance
5. Inventory turnover day = 365 / Inventory turnover
6. Fixed assets turnover = Net sales / Net Fixed Assets
7. Total assets turnover = Net sales / Total assets

### (4) Earning Ability

1. Return on assets = [PAT + Interest expense  $\times$  (1 - interest rate)] / the average of total assets
2. Return on equity = PAT / the average of net equity
3. Net income ratio = PAT / Net sales
4. EPS = (PAT - Dividend from prefer stock) / weighted average outstanding shares

### (5) Cash Flow

1. Cash flow ratio = Cash flow from operating activities / Current liability
2. Cash flow adequacy ratio = Most recent 5-year Cash flow from operating activities / Most recent 5-year (Capital expenditure + the increase of inventory + cash dividend)
3. Cash investment ratio = (Cash flow from operating activities - cash dividend) / (Gross fixed assets + long-term investment + other assets + working capital)

### (6) Leverage

1. Operating leverage = (Net revenue - variable cost of goods sold and operating expense) / operating income
2. Financial leverage = Operating income / (Operating income - interest expenses)

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

## REPORT OF INDEPENDENT ACCOUNTANTS TRANSLATED FROM CHINESE

To the Board of Directors and Stockholders of Hon Hai Precision Industry Co., Ltd.

### **Opinion**

We have audited the accompanying consolidated balance sheets of Hon Hai Precision Industry Co., Ltd. and its subsidiaries (the “Group”) as at December 31, 2019 and 2018, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, based on our audits and the reports of other independent accountants, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2019 and 2018, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission.

### **Basis for opinion**

We conducted our audit of the consolidated financial statements as of and for the year ended December 31, 2019 in accordance with “Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants”, “Rule No. Financial-Supervisory-Securities-Auditing-1090360805 issued by the Financial Supervisory Commission on February 25, 2020” and generally accepted auditing standards in the Republic of China (R.O.C GAAS); and in accordance with the “Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants” and generally accepted auditing standards in the Republic of China (R.O.C GAAS) for our audit of the consolidated financial statements as of and for the year ended December 31, 2018. Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in

accordance with the Code of Professional Ethics for Certified Public Accountants in the Republic of China (the “Code”), and we have fulfilled our other ethical responsibilities in accordance with the Code. Based on our audits and the reports of other independent accountants, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Key audit matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the year 2019. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters on the consolidated financial statements for the year ended December 31, 2019 were as follows:

#### **Cut-off of hub sales revenue**

##### Description

Refer to Note 4(35) for accounting policies on revenue recognition.

The Group recognises revenue upon acceptance of the goods by the customers (when control of the products is transferred) if picked up from hub. For pick-ups from hub, the Group recognises sales revenue based on movements of inventories contained in the statements or other information provided by the hub custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and discrepancy between the physical inventory the quantities in the hubs and quantities as reflected in accounting records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, cut-off of hub sales revenue was identified as a key audit matter.

##### How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

- A. Assessed and tested the appropriateness of internal controls over cut-off of hub sales revenue for a specific period prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognising movements of inventories and respective transfer of cost of goods sold.
- B. Confirmed or conducted physical count of inventory quantities held at hubs and agreed to accounting records.

### **Allowance for inventory valuation losses**

#### Description

Refer to Note 4(14) for accounting policies on inventory valuation, Note 5(2)3 for uncertainty of accounting estimates and assumptions in relation to inventory valuation losses, and Note 6(7) for details of inventories. As at December 31, 2019, the Group's inventories and allowance for inventory valuation losses amounted to NT\$539,619,235 thousand and NT\$23,847,058 thousand, respectively.

The Group is primarily engaged in manufacturing and sales of 3C electronic products. Due to rapid technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. The Group recognises inventories at the lower of cost and net realisable value, and the net realisable value is estimated based on historical experience. An allowance for inventory valuation losses is provided for those inventories aged over a certain time period and those individually identified as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realisable value for individually obsolete or damaged inventories is subject to management's judgment, we consider allowance for inventory valuation losses a key audit matter.

#### How our audit addressed the matter

We performed the following audit procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

- A. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.

- B. Validated the appropriateness of system logic of inventory aging report utilised by management to ensure proper classification of inventories aged over a certain period of time.
- C. Evaluated the reasonableness of inventories individually identified as obsolete or damaged by checking the related supporting documents and comparing with the information obtained from physical inventory.
- D. Discussed with management the net realisable value of inventories aged over a certain period of time and individually identified as obsolete or damaged, validated respective supporting documents and reperformed the calculation.

### **Financial assets and financial liabilities offsetting agreement with financial institutions**

#### Description

Refer to Note 4(28) for accounting policies on offsetting of financial instruments, Note 5(1)2 for significant judgement on applying accounting policies on offsetting of financial instruments, and Note 6(16) for details of offsetting of financial instruments. As of December 31, 2019, the financial instruments that were offset amounted to NT\$1,424,606,382 thousand.

The Group has entered into financial assets and financial liabilities offsetting agreements, which are in compliance with IAS 32, 'Financial instruments: Presentation', whereby financial assets and liabilities are offset and reported in the net amount since the Group has a legally enforceable right to offset the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

As the determination of whether the Group meets the criteria for offsetting prescribed in IAS 32, 'Financial instruments: Presentation' is subject to management's judgment, and the Group has entered into various individually significant financial assets and financial liabilities offsetting agreements, which would have material effect on the financial statements should the financial assets and financial liabilities be presented separately, we consider offsetting of financial assets and liabilities a key audit matter.

#### How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

- A. Assessed and tested internal controls over financial assets and financial liabilities offsetting agreements with financial institutions, including control processes in determining whether such

agreements meet the criteria under IAS 32, 'Financial instruments: Presentation', and ascertained whether the offsetting made in the financial statements was properly approved and accounted for in compliance with the guidance in IAS 32.

- B. Obtained and reviewed the terms of the above agreements and confirmed whether the criteria under IAS 32, 'Financial instruments: Presentation' were met and the accounting treatment was prescribed in the guidance.
- C. Confirmed the existence and the rights and obligations of financial assets and financial liabilities offsetting agreements with respective financial institutions.

**Impairment assessment on goodwill arising from acquisition of Belkin International Inc. ("Belkin").**

Description

Refer to Note 4(21) for the accounting policy on impairment assessment of goodwill, Note 5(2)2 for the accounting policy on impairment of non-financial assets, critical accounting estimates and assumptions of impairment assessment and Note 6(13) for the details of impairment loss.

As of December 31, 2019, the Group had goodwill arising from acquisition of 100% equity interest in Belkin for NT\$13,563,157 thousand.

Impairment assessment was performed based on the value in use calculation using the discounted cash flow model to determine the recoverable amounts of the cash-generating unit ("CGU"). Significant judgment and estimates about the key assumptions including revenue growth rate, long-term growth rate and discount rate applied to future cash flow forecast are required and will influence the collectible amount and the impairment of goodwill significantly due to the significant judgments and inherent uncertainty. Therefore, we consider the impairment assessment on goodwill arising from acquisition of Belkin International Inc. and its subsidiaries a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

- A. Tested the underlying calculations used in the valuation mode.
- B. Involved valuation specialists to assess the reasonableness of the key assumptions, including expected growth rate and discount rate used as follows:

- (a) Evaluated the assumptions used, mainly revenue growth rate and long-term growth rate within the impairment assessment by comparing them to historical results and economic and industry forecast;
- (b) Benchmarked the discount rate range which is used in determining the recoverable amount against certain market data and industry research; and
- (c) Performed sensitivity analysis over key assumptions in the model in order to assess the potential impact of a range of possible outcomes.

### **Impairment assessment of operating assets of Asia Pacific Telecom Co., and its subsidiaries**

#### Description

Refer to Notes 4(16) and (20) for accounting policies applied to property, plant and equipment and intangible assets, Note 4(21) for accounting policies on impairment assessment of non-financial assets, Note 5(2)1 for critical accounting estimates and key sources of assumption uncertainty applied to property, plant and equipment, intangible assets and other operating assets, and Notes 6(9), (13) and (14) for details of account items.

The subsidiaries' operating assets represent a significant percentage of the Group's total assets, and the valuation of these assets is affected by the overall industry development and the Group's operations. The Group used the value in use to estimate the recoverable amount which involves management's judgements, such as the estimation of future cash flow and determination of discount rate, etc. Management's judgment mentioned above involve future years' forecast which are highly uncertain and have a material impact to the estimation of value in use. Therefore, the impairment assessment of operating assets was identified as a key audit matter.

#### How our audit addressed the matter

We performed the following key audit procedures in respect of the above key audit matter:

- A. We assessed the expected future cash flows prepared by management and its decision process, compared and assessed the consistency of the expected future cash flows with operation plans.
- B. We also obtained and assessed the information provided by the Group and the valuation report prepared by external professional valuers engaged by the Group.

- (a) Compared the parameters used in predicting future cash flows with historical experience, economic and industrial forecasts.
- (b) Compared the parameters used in determining discount rate with the assumptions on capital cost of cash generating units, and with returns rate on similar assets.
- (c) Verified the valuation model calculation.
- (d) Assessed the future cash flow sensitivity analysis prepared by management based on the alternative hypothesis using different discount rates, and confirmed whether management has appropriately considered the possible impact on the estimation uncertainty of impairment assessment.

**Other matter – Reference to audits of other independent accountants**

We did not audit the financial statements of certain consolidated subsidiaries. Those financial statements were audited by other independent accountants, whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included in the consolidated financial statements relative to these consolidated subsidiaries was based solely on the reports of other independent accountants. Total assets of those consolidated subsidiaries amounted to NT\$208,374,823 thousand and NT\$271,749,166 thousand, constituting 6.27% and 8.04% of the consolidated total assets as of December 31, 2019 and 2018, respectively, and total operating revenues amounted to NT\$458,130,373 thousand and NT\$458,975,381 thousand, constituting 8.57% and 8.67% of the consolidated total operating revenues for the years then ended, respectively.

**Other matter – Parent company only financial reports**

We have audited and expressed an unqualified opinion on the parent company only financial statements of Hon Hai Precision Industry Co., Ltd. as at and for the years ended December 31, 2019 and 2018.

**Responsibilities of management and those charged with governance for the consolidated financial statements**

Management is responsible for the preparation and fair presentation of the consolidated financial

statements in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing the Group’s financial reporting process.

### **Independent accountant’s responsibilities for the audit of the consolidated financial statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ROC GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ROC GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- A. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations,

or the override of internal controls.

- B. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal controls.
- C. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- D. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- E. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- F. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

HON HAI PRECISION INDUSTRY CO., LTD. AND SUBSIDIARIES  
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEARS ENDED DECEMBER 31, 2019 AND 2018  
(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS,  
EXCEPT AS OTHERWISE INDICATED)

1. HISTORY AND ORGANISATION

Hon Hai Precision Industry Co., Ltd. (the “Company”) was incorporated as a company limited by shares under the provisions of the Company Act of the Republic of China (R.O.C.). The Company and its subsidiaries (collectively referred herein as the “Group”) are primarily engaged in the manufacture, sales and service of connectors, case, thermal module, wired/wireless communication products, optical products, power supply modules, and assemblies for use in the IT, communications, automotive equipment, precision molding, automobile, and consumer electronics industries.

2. THE DATE OF AUTHORISATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORISATION

These consolidated financial statements were reported to the Board of Directors on March 30, 2020.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS”) as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC effective from 2019 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 9, ‘Prepayment features with negative compensation’	January 1, 2019
IFRS 16, ‘Leases’	January 1, 2019
Amendments to IAS 19, ‘Plan amendment, curtailment or settlement’	January 1, 2019
Amendments to IAS 28, ‘Long-term interests in associates and joint ventures’	January 1, 2019
IFRIC 23, ‘Uncertainty over income tax treatments’	January 1, 2019
Annual improvements to IFRSs 2015-2017 cycle	January 1, 2019

Except for the following, the above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment.

A. IFRS 16, ‘Leases’

- (a) IFRS 16, ‘Leases’, replaces IAS 17, ‘Leases’ and related interpretations and SICs. The standard requires lessees to recognise a ‘right-of-use asset’ and a lease liability (except for those leases with terms of 12 months or less and leases of low-value assets). The accounting stays the same for lessors, which is to classify their leases as either finance leases or operating leases and account for those two types of leases differently. IFRS 16 only requires enhanced disclosures

to be provided by lessors.

- (b) The Group has elected to apply IFRS 16 by not restating the comparative information (referred herein as the ‘modified retrospective approach’) when applying “IFRSs” effective in 2019 as endorsed by the FSC. Accordingly, the Group increased ‘right-of-use asset’ by \$22,746,167, and increased ‘lease liability’ by \$22,746,167 as of January 1, 2019. For the land use right obtained in China, the ‘right-of-use asset’ increased by \$21,316,883 and other non-current assets decreased by \$21,316,883 as of January 1, 2019.
- (c) The Group has used the following practical expedients permitted by the standard at the date of initial application of IFRS 16:
- i. Reassessment as to whether a contract is, or contains, a lease is not required, instead, the application of IFRS 16 depends on whether or not the contracts were previously identified as leases applying IAS 17 and IFRIC 4.
  - ii. The use of a single discount rate to a portfolio of leases with reasonably similar characteristics.
  - iii. The accounting for operating leases whose period will end before December 31, 2019 as short-term leases and accordingly, rent expense of \$733,461 was recognised for the year ended December 31, 2019.
- (d) The Group calculated the present value of lease liabilities by using the weighted average incremental borrowing interest rate ranging from 0.6680% to 4.90%.
- (e) The Group recognised lease liabilities which had previously been classified as ‘operating leases’ under the principles of IAS 17, ‘Leases’. The reconciliation between operating lease commitments under IAS 17 measured at the present value of the remaining lease payments, discounted using the lessee’s incremental borrowing rate and lease liabilities recognised as of January 1, 2019 is as follows:

Operating lease commitments disclosed by applying IAS 17 as at December 31, 2018	\$	26,367,551
Less: Short-term leases	(	2,319,203)
Total lease contracts amount recognised as lease liabilities by applying IFRS 16 on January 1, 2019		24,048,348
Incremental borrowing interest rate at the date of initial application		0.892%~5.41%
Lease liabilities recognised as at January 1, 2019 by applying IFRS 16	\$	22,746,167

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC effective from 2020 are as follows:

<u>New Standards, Interpretations and Amendments</u>	Effective date by International Accounting Standards Board
Amendments to IAS 1 and IAS 8, 'Disclosure Initiative-Definition of Material'	January 1, 2020
Amendments to IFRS 3, 'Definition of a business'	January 1, 2020
Amendments to IFRS 9, IAS 39 and IFRS 7, 'Interest rate benchmark reform'	January 1, 2020

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

<u>New Standards, Interpretations and Amendments</u>	Effective date by International Accounting Standards Board
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by International Accounting Standards Board
IFRS 17, 'Insurance contracts'	January 1, 2021
Amendments to IAS 1, 'Classification of liabilities as current or noncurrent'	January 1, 2022

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Unless otherwise stated, the principal accounting policies applied in the preparation of these consolidated financial statements set out below have been consistently applied to all the periods presented.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and the International Accounting Standard 34, 'Interim financial reporting' as endorsed by the FSC.

(2) Basis of preparation

A. Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:

- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
- (b) Financial assets at fair value through other comprehensive income/Available-for-sale financial assets measured at fair value.

(c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

(a) All subsidiaries are included in the Group’s consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.

(b) Inter-company transactions, balances and unrealized gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

(c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

(d) Changes in a parent’s ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.

(e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss.

(4) Foreign currency translation

- A. The consolidated financial statements are presented in New Taiwan Dollars, which is the Company's functional and the Group's presentation currency.
- B. Foreign currency transactions and balances

- (a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.
- (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.
- (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
- (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within “other gains and losses”.

#### C. Translation of foreign operations

- (a) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
  - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
  - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
  - iii. All resulting exchange differences are recognised in other comprehensive income.
- (b) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Group still retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.
- (c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(d) Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing exchange rates at the balance sheet date.

(5) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
- (a) Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;
  - (b) Assets held mainly for trading purposes;
  - (c) Assets that are expected to be realized within twelve months from the balance sheet date;
  - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
- (a) Liabilities that are expected to be settled within the normal operating cycle;
  - (b) Liabilities arising mainly from trading activities;
  - (c) Liabilities that are to be settled within twelve months from the balance sheet date;
  - (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value, and recognises the gain or loss in profit or loss.
- D. The Group recognises the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(8) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:
- (a) The objective of the Group's business model is achieved both by collecting contractual cash flows and selling financial assets; and
  - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value:
- (a) The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.
  - (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognised in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

(9) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
- (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
  - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(10) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured

at initial invoice amount as the effect of discounting is immaterial.

C. The Group's operating pattern of accounts receivable that are expected to be factored is for the purpose of selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognised in profit or loss.

(11) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income and financial assets at amortised cost including accounts receivable, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(12) Derecognition of financial assets

The Group derecognises a financial asset when one of the following conditions is met:

- A. The contractual rights to receive the cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows of the financial asset have been transferred, and the Group has not retained control of the financial asset.

(13) Leasing arrangement (lessor) – Lease receivable / Operating lease

A. Based on the terms of a lease contract, a lease is classified as a finance lease if the lessee assumes substantially all the risks and rewards incidental to ownership of the leased asset.

(a) At commencement of the lease term, the lessor should record a finance lease in the balance sheet as 'lease receivables' at an amount equal to the net investment in the lease (including initial direct costs). The difference between gross lease receivable and the present value of the receivable is recognised as 'unearned finance income of finance lease'.

(b) The lessor should allocate finance income over the lease term based on a systematic and rational basis reflecting a constant periodic rate of return on the lessor's net investment in the finance lease.

(c) Lease payments (excluding costs for services) during the lease term are applied against the gross investment in the lease to reduce both the principal and the unearned finance income.

B. Lease income from an operating lease (net of any incentives given to the lessee) is recognised in profit or loss on a straight-line basis over the lease term.

(14) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average cost method. The cost of finished goods and work in process comprises raw materials, direct labour, other direct costs and related production overheads (allocated based on

normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expense.

(15) Investments accounted for under the equity method / associates

- A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognised at cost.
- B. The Group's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
- C. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Group's ownership percentage of the associate, the Group recognises change in ownership interests in the associate in 'capital surplus' in proportion to its ownership.
- D. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under the equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
- F. Upon loss of significant influence over an associate, the Group remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognised in profit or loss.
- G. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the

associate are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it retains significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.

H. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(16) Property, plant and equipment

A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.

B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

C. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each component of property, plant and equipment that is significant in relation to the total cost of the item is depreciated separately.

D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change.

The estimated useful lives of property, plant and equipment are as follows:

Buildings	5 ~ 51 years
(Auxiliary buildings	6 ~ 11 years)
Machinery and equipment	3 ~ 9 years
Computer and communication equipment	3 ~ 25 years
Other equipment	1 ~ 25 years

(17) Leasing arrangements (lessee) — right-of-use assets/ lease liabilities

Effective 2019

A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease

term.

B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are comprised of the following:

- (a) Fixed payments, less any lease incentives receivable;
- (b) Variable lease payments that depend on an index or a rate;
- (c) Amounts expected to be payable by the lessee under residual value guarantees;
- (d) The exercise price of a purchase option, if the lessee is reasonably certain to exercise that option; and
- (e) Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The Group subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

C. At the commencement date, the right-of-use asset is stated at cost comprising the following:

- (a) The amount of the initial measurement of lease liability;
- (b) Any lease payments made at or before the commencement date;
- (c) Any initial direct costs incurred by the lessee; and
- (d) An estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term.

When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

(18) Leased assets/ operating leases (lessee)

Prior to 2019

A. Based on the terms of a lease contract, a lease is classified as a finance lease if the Group assumes substantially all the risks and rewards incidental to ownership of the leased asset.

- (a) A finance lease is recognised as an asset and a liability at the lease's commencement at the lower of the fair value of the leased asset or the present value of the minimum lease payments.
- (b) The minimum lease payments are apportioned between the finance charges and the reduction of the outstanding liability. The finance charges are allocated to each period over the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.
- (c) Property, plant and equipment held under finance leases are depreciated over their estimated

useful lives. If there is no reasonable certainty that the Group will obtain ownership at the end of the lease, the asset shall be depreciated over the shorter of the lease term and its useful life.

B. Payments made under an operating lease (net of any incentives received from the lessor) are recognised in profit or loss on a straight-line basis over the lease term.

(19) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Investment property is depreciated on a straight-line basis over its estimated useful life of 6 to 51 years.

(20) Intangible assets

A. Trademark right is stated at cost and regarded as having an indefinite useful life as it was assessed to generate continuous net cash inflow in the foreseeable future. Trademark right is not amortised, but is tested annually for impairment.

B. Goodwill is generated by adopting the acquisition method when merger and acquisition occurs.

C. Patent is amortised on a straight-line basis over its estimated useful life of 2 to 20 years.

D. Customer relationship and developed technologies are amortised on a straight-line basis over its estimated life of 12 years and 2 to 7 years, respectively.

E. Concession obtained individually is stated initially at its costs and is amortised on a straight-line basis over its useful life as follows:

(a) The concession of the mobile broadband spectrum (4G) 700MHz frequency group started from December 2014 and is amortised until 2030. The useful life of the concession is 16 years.

(b) The concession of the mobile broadband spectrum (4G) 2600MHz frequency group started from October 2017 and is amortised until 2033. The useful life of the concession is 16 years.

(c) The Group obtained the concession of the mobile broadband spectrum (4G) 700MHz frequency group in December 2015 and is amortised until 2030. The useful life of the concession is 15 years.

(d) The Group obtained the concession of the mobile broadband spectrum (4G) 900MHz frequency group in December 2015 and is amortised until 2030. The useful life of the concession is 15 years.

(21) Impairment of non-financial assets

A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the

impairment had not been recognised.

- B. The recoverable amount of goodwill shall be evaluated periodically. An impairment is recognised when recoverable amount is lower than carrying amount. Impairment loss should not be reversed in the future.
- C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(22) Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(23) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(24) Financial liabilities at fair value through profit or loss

- A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorised as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss at initial recognition:
  - (a) Hybrid (combined) contracts; or
  - (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
  - (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
- B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognised in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognised in profit or loss.
- C. If the credit risk results in fair value changes in financial liabilities designated as at fair value through profit or loss, they are recognised in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognising in profit or loss for loan commitments or financial guarantee contracts.

(25) Bonds payable

Ordinary corporate bonds issued by the Group are initially recognised at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from bonds payable, which is amortised to profit or loss over the period of bond circulation using the effective interest method as an adjustment to ‘finance costs’.

(26) Convertible bonds payable

Convertible bonds issued by the Group contain conversion options (that is, the bondholders have the right to convert the bonds into the Group’s common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Group classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

- (a) The embedded call options and put options are recognised initially at net fair value as ‘financial assets or financial liabilities at fair value through profit or loss’. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognised as ‘gain or loss on valuation of financial assets or financial liabilities at fair value through profit or loss’.
- (b) The host contracts of bonds or are initially recognised at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortised in profit or loss as an adjustment to ‘finance costs’ over the period of circulation using the effective interest method.
- (c) The embedded conversion options which meet the definition of an equity instrument are initially recognised in ‘capital surplus—share options’ at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.
- (d) Any transaction costs directly attributable to the issuance are allocated to each liability or equity component in proportion to the initial carrying amount of each abovementioned item.
- (e) When bondholders exercise conversion options, the liability component of the bonds (including bonds payable and ‘financial assets or financial liabilities at fair value through profit or loss’) shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the abovementioned liability component and ‘capital surplus—share options’.

(27) Derecognition of financial liabilities

A financial liability is derecognised when the obligation specified in the contract is either discharged or cancelled or expires.

(28) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle

on a net basis or realise the asset and settle the liability simultaneously.

(29) Non-hedging and embedded derivatives

- A. Non-hedging derivatives are initially recognised at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognised in profit or loss.
- B. Under the financial assets, the hybrid contracts embedded with derivatives are initially recognised as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and financial assets at amortised cost based on the contract terms.
- C. Under the non-financial assets, whether the hybrid contracts embedded with derivatives are accounted for separately at initial recognition is based on whether the economic characteristics and risks of an embedded derivative are closely related in the host contract. When they are closely related, the entire hybrid instrument is accounted for by its nature in accordance with the applicable standard. When they are not closely related, the derivative is accounted for differently from the host contract as derivative while the host contract is accounted for by its nature in accordance with the applicable standard. Alternatively, the entire hybrid instrument is designated as financial liabilities at fair value through profit or loss upon initial recognition.

(30) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognised as interest expense. Provisions are not recognised for future operating losses.

(31) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount

of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.

- ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.
- iii. Pension cost for the interim period is calculated on a year-to-date basis by using the pension cost rate derived from the actuarial valuation at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant curtailments, settlements, or other significant one-off events. Also, the related information is disclosed accordingly.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(32) Employee share-based payment

- A. For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognised is based on the number of equity instruments that eventually vest.
- B. Restricted stocks:
  - (a) Restricted stocks issued to employees are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period.
  - (b) For restricted stocks where those stocks do not restrict distribution of dividends to employees

and employees are not required to return the dividends received if they resign during the vesting period, the Group recognises the fair value of the dividends received by the employees who are expected to resign during the vesting period as compensation cost at the date of dividends declared.

- (c) For restricted stocks where employees have to pay to acquire those stocks, if employees resign during the vesting period, they must return the stocks to the Group and the Group must refund their payments on the stocks, the Group recognises the payments from the employees who are expected to resign during the vesting period as liabilities at the grant date, and recognises the payments from the employees who are expected to be eventually vested with the stocks in 'capital surplus – others'.

(33) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred income tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.
- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an

intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

- F. A deferred tax asset shall be recognised for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.
- G. If a change in tax rate is enacted or substantively enacted in an interim period, the Group recognises the effect of the change immediately in the interim period in which the change occurs. The effect of the change on items recognised outside profit or loss is recognised in other comprehensive income or equity while the effect of the change on items recognised in profit or loss is recognised in profit or loss.

(34) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(35) Revenue recognition

- A. The Group manufactures and sells consumer electronics products. Sales are recognised when control of the products has transferred, being when the products are delivered to the customers, the customers has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.
- B. The Group renders telecommunication service. Service revenue is measured by the fair value of the consideration received or receivable taking into account business tax and rebates for the sale of goods to external customers in the ordinary course of the Group's activities. The main methods of revenue recognition are as follows:
  - (a) The communication charges of fixed network and mobile services, as well as the connection charges among telecom operators, are recognised on the basis of the contract terms, which are calculated by predetermined rates and the actual usage volume.
  - (b) Fixed monthly service fees are recognised monthly.
  - (c) Prepaid card revenue is recognised on the basis of the actual usage volume by the customers.
- C. The Group recognises an asset (shown as 'other non-current assets') the incremental costs (mainly

comprised of sales commissions) of obtaining a telecommunication contract if the Group expects to recover those costs. The recognised asset is amortized and consistent with the transfers to the customer of the goods or services to which the asset relates. The Group recognises an impairment loss to the extent that the carrying amount of the asset exceeds the remaining amount of consideration that the Group expects to receive less the costs that have not been recognised as expenses.

- D. Sales revenue is recognised to the extent that a significant reversal is highly improbable based on the contractual price less the estimated sales discounts and allowances. Revenue recognition is revisited at each balance sheet date. No element of financing is deemed present as the sales are made with a credit term consistent with market practice.
- E. A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.
- F. The Group's obligation to provide a refund for faulty products under the standard warranty terms is recognised as a provision.
- G. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognised. If the payments exceed the products sold, a contract liability is recognised

(36) Government grants

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises expenses for the related costs for which the grants are intended to compensate. Government grants related to property, plant and equipment are recognised as non-current liabilities and are amortised to profit or loss over the estimated useful lives of the related assets using the straight-line method.

(37) Business combinations

- A. The Group uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognised amounts of the acquiree's identifiable net assets. All other non-controlling interests should be measured at the acquisition-date fair value.
- B. The excess of the consideration transferred, the amount of any non-controlling interest in the

acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognised and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognised directly in profit or loss on the acquisition date.

(38) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments.

5. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS ON UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgments in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. The above information is addressed below:

(1) Critical judgments in applying the Group's accounting policies

A. Revenue recognition

The Group determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e. the Group is a principal) or to arrange for the other party to provide those goods or services (i.e. the Group is an agent) based on the transaction model and its economic substance. The Group is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Group recognises revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Group is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Group recognises revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

Indicators that the Group controls the good or service before it is provided to a customer include the following:

- (a) The Group is primarily responsible for the provision of goods or services;
- (b) The Group assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer.
- (c) The Group has discretion in establishing prices for the goods or services.

B. Offsetting financial instruments

The Company's financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(2) Critical accounting estimates and assumptions

The Group makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

A. Impairment assessment of tangible and intangible assets (excluding goodwill)

The Group assesses impairment based on its subjective judgement and determines the separate cash flows of a specific group of assets, useful lives of assets and the future possible income and expenses arising from the assets depending on how assets are utilized and industrial characteristics. Any changes of economic circumstances or estimates due to the change of Group strategy might cause adjustments on impairment of assets.

B. Impairment assessment of goodwill

The Group assesses impairment of goodwill based on subjective judgment which includes identifying and allocating assets, liabilities and goodwill to related cash-generating unit to determine recoverable amount of this unit. Details of impairment assessment of goodwill is provided in Note 6(13).

As of December 31, 2019, the Group recognised goodwill after impairment assessment of \$15,406,541.

C. Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Group must determine the net realisable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2019, the carrying amount of inventories was \$515,772,177.

6. DETAILS OF SIGNIFICANT ACCOUNTS

(a) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(b) Forward foreign exchange contracts

The Group enters into foreign exchange forward transactions to hedge the following risk of

exchange rate:

A. Operating activities: Import of raw materials and export sales

B. Investing activities: Import of machinery and equipment

C. Financing activities: Long-term and short-term foreign currency assets and liabilities

(c) Convertible bonds payable

i. The Company's indirect subsidiary, FIH Mobile Limited, acquired convertible bonds issued by Mango International in the amount of US\$60 million. The convertible bonds are embedded derivatives. For the year ended December 31, 2018, FIH Mobile Limited recognised valuation loss of US\$44,806 based on the estimated fair value of the convertible bonds due to significant doubt on Mango International's ability to continue as a going concern. For the year ended December 31, 2019, the valuation gain and loss was \$0 for both years.

ii. The Company's indirect subsidiary, PCE Paragon Solutions Kft., acquired convertible bonds issued by Nanthealth, Inc. in the amount of US\$30 million. The convertible bonds are embedded derivatives. Based on the contract, PCE Paragon Solutions Kft. has the right to require conversion after issue date and until maturity date if the written consent is submitted in advance. If there are remaining convertible bonds at maturity, such convertible bonds will be redeemed in the form of cash.

(d) Put option

The Company's subsidiary, Foxconn (Far East) Limited, acquired Foxconn Ventures Pte. Ltd. in the amount of US\$600,002 thousand and entered into an agreement with Foxconn Ventures Pte. Ltd.'s joint venture shareholder, Softbank Group Corporation. Based on the agreement, the Company's subsidiary, Foxconn (Far East) Limited, has the right to require Foxconn Ventures Pte. Ltd.'s joint venture shareholder, Softbank Group Corporation, to repurchase Alibaba Group Holding Limited's stocks at the original investment price at the date after 2 years from date of agreement. Foxconn Ventures Pte. Ltd. disposed the shares of Alibaba Group Holding Limited for a consideration of US\$ 398,420 thousand on March 20, 2019.

D. Details of the Group's investment in equity instruments and beneficiary certificates are provided in Table 3.

E. The Group has no financial assets at fair value through profit or loss pledged to others.

F. Information relating to credit risk of financial assets and liabilities at fair value through profit or loss is provided in Note 12(2).

(3) Financial assets at fair value through other comprehensive income

- A. Details of acquired through business combinations are provided in Note 6(38).
- B. For the year ended December 31, 2018, the Company recognised \$2,394,961 of goodwill which was generated from business combination and acquisition of Nokia-branded products. For the purposes of impairment testing, goodwill has been allocated to the cash-generating unit (the ‘CGU’) relating to the Nokia-related business. The recoverable amount of this unit has been determined based on value in use calculation. The calculation uses cash flow projections based on financial budgets approved by the directors covering a five-year period. The cash flows beyond the five-year period are extrapolated using a growth rate as follows. The key assumptions for the value in use calculations are as follows:

	<u>For the year ended December 31, 2018</u>
Discount rate	<u>18.81%</u>
Growth rate	<u>3%</u>

This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. Other key assumptions for the value in use calculations relate to the estimation of cash inflows and outflows, which include budget sales and gross margin. Such estimation is based on management’s experience from manufacturing of related feature phones and smart phones and management’s expectations for the market development. During the year, due to the unsatisfactory performance of the CGU and it takes longer than expected time to penetrate the market, the recoverable amount was less than its book value. Based on the valuation, an impairment loss of \$2,394,961 was allocated to the goodwill.

- C. Impairment assessment for goodwill of Belkin International Inc.

The Group acquired Belkin International Inc. (shown as “Belkin”) which generated goodwill of \$13,563,157 for the year ended December 31, 2019. Impairment assessment of goodwill is allocated to the Belkin’s CGU. The recoverable amount of the CGU relating to the goodwill arising from acquisition of Belkin was determined based on value-in-use calculation. The calculation uses projected cash flows based on financial budgets for a five-year period which reflects the medium-term plan of management in expanding the customer based and market share. Cash flows beyond the five-year period are extrapolated using the estimated growth rates. As of December 31, 2019, pre tax discount rate is 13.6%.

Based on previous assessment, there is no impairment loss on goodwill.

As a result of the impairment review, the recoverable amounts of the CGU in which goodwill has been allocated are higher than their carrying amount as at December 31, 2019.

- D. The details of amortization are as follows:

	<u>For the year ended December 31,</u>	
	<u>2019</u>	<u>2018</u>
Operating costs	<u>\$ 1,672,408</u>	<u>\$ 977,098</u>

(14) Other non-current assets

Others	6,502,388	4,107,517
	<u>\$ 15,835,299</u>	<u>\$ 29,823,088</u>

- A. Long-term prepaid rent refers to the land use rights obtained in China. Upon signing of the lease, the amount is paid in full. The Group recognised rental expense of \$738,053 for the year ended December 31, 2018. With the adoption of IFRS 16, the Group reclassified long-term prepaid rent from ‘Other non-current assets’ to ‘right-of-use asset’.
- B. Refundable deposits mainly pertain to deposits for the lease of office buildings and data centers as well as bid bond for 1800MHz, 3.5GHz and 28GHz spectrum. The Company participated in the National Communications Commission’s mobile broadband auction of 2019 for bidding 1800MHz, 3.5GHz and 28GHz spectrum, and paid the bid bond amounting to \$1,000,000 in September 2019.
- C. Utility duct access  
A subsidiary of the Company, Asia Pacific Telecom. Co., Ltd. (“Asia Pacific”), entered into a use of assets contract with Taiwan Railways Administration (“TRA”) in January 2001. According to the contract, TRA provides the right to use 50% of the capacity of optical fiber duct (30 cm width), which was along the same path on both of the rails for 25 years since the Ministry of Transportation and Communication issued the 3G license. Under the contract, Asia Pacific should pay \$8,425,569 as compensation for the 25-year use right to TRA, and both parties agreed that TRA can use the compensation of \$8,000,000 as capital to invest in Asia Pacific. Under the contract, Asia Pacific should pay \$100,000 per year to TRA for 25 years as compensation of the use right, and TRA will no longer allow other telecom companies to use the optical fiber ducts; if any, Asia Pacific can deduct the payment based on the percentage that the other telecom companies used.
- D. Incremental costs of obtaining a contract  
A subsidiary of the Company, Asia Pacific Telecom. Co., Ltd., recognises the incremental costs (mainly comprised of sales commissions) of obtaining a contract with a customer as an asset if the Group expects to recover those costs. The recognised asset is amortised on a systematic basis that is consistent with the transfers to the customer of the goods or services to which the asset relates. The Group recognised amortised cost of \$192,403 in profit or loss for the year ended

December 31, 2019.

E. Details of other non-current assets pledged as collateral are provided in Note 8.

(21) Pensions

A. Defined benefit plans

(a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months

prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by next March.

(b) The amounts recognised in the balance sheet are as follows (shown as “other non-current liabilities”):

	<u>December 31, 2019</u>	<u>December 31, 2018</u>
Present value of defined benefit obligations	\$ 1,954,134	\$ 2,085,143

- (e) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilisation plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the Regulator. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2019 and 2018 is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.

(f) The principal actuarial assumptions used were as follows:

	Year ended December 31,	
	2019	2018
Discount rate	0.80%	1.10%
Future salary increases	3.50%	3.50%

Assumptions regarding future mortality experience are set based on actuarial advice in accordance with published statistics and experience in each territory.

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis was as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
<u>December 31, 2019</u>				
Effect on present value of defined benefit obligation	(\$ 61,696)	\$ 64,388	\$ 57,843	(\$ 55,861)
<u>December 31, 2018</u>				
Effect on present value of defined benefit obligation	(\$ 65,555)	\$ 68,439	\$ 61,659	(\$ 59,517)

The sensitivity analysis above is based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period

(g) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2020 amount to \$16,500.

(h) As of December 31, 2019, the weighted average duration of the retirement plan is 13 years.

#### B. Defined contribution plans

(a) Effective July 1, 2005, the Company and its domestic subsidiaries have established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.

(b) The subsidiaries in mainland China have defined contribution pension plans and contribute an amount monthly based on 8%~9% of employees’ monthly salaries and wages to an independent fund administered by a government agency. The plan is administered by the government of mainland China. Other than the monthly contributions, the Group does not

have further pension liabilities.

(c) The pension costs under the defined contribution pension plans of the Group for the years ended December 31, 2019 and 2018 were \$15,154,169 and \$20,913,004, respectively.

(27) Retained earnings

A. The annual net income of the Company shall be appropriated in accordance with the priorities listed as follows:

- (a) Recovery of losses;
- (b) Appropriation of 10% for legal reserve, where such legal reserve amounts to the total paid-in capital, this provision shall not apply.
- (c) Appropriation or reversal of special reserve pursuant to applicable law or regulation.

As to the earnings available for appropriation to shareholders including accumulated unappropriated earnings and earnings available for appropriation this year, the board of directors is authorised to draft an appropriation plan in accordance with the dividend policy in Section D of this Article.

The board of directors is authorised the distribution of dividends and bonuses in whole or in part may be paid in cash after a resolution has been adopted by a majority vote at a meeting of the board of directors attended by two-thirds of the total number of directors.

The Company is currently at a developing stage. The Company's dividend distribution policy is subject to the Company's current and future investment environment, fund requirements, competition from local and abroad, and capital budgets, as well as taking into consideration of the interests of shareholders and the long-term financial planning. Shareholder dividends are set aside from accumulated unappropriated earnings, which shall not be less than 15% of earnings available for appropriation for the year and cash dividends shall not be less 10% of total dividends distributed.

B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the

Company's paid-in capital.

C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

D. The appropriations of 2018 and 2017 earnings had been resolved at the stockholders' meeting on June 21, 2019 and June 22, 2018, respectively. Details are summarized below:

## 9. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNISED CONTRACT COMMITMENTS

Except for Note 6(4), contingencies and commitments are as follows:

### (1) Contingencies - Significant legal matter

On March 8, 2019, Microsoft Corporation and Microsoft Licensing, GP sued the Group over the dispute regarding the royalty payment under the patent licensing agreement. The case is now in legal proceedings with the assistance of a lawyer and under the jurisdiction of the United States District Court for the Northern District of California.

### (2) Commitments

A. Capital expenditure contracted for at the balance sheet date but not yet incurred is as follows:

	December 31, 2019	December 31, 2018
Property, plant and equipment	\$ 3,850,503	\$ 2,707,620

B. Operating lease commitments

#### Prior to 2019

The Company's subsidiary leases factory dormitory under non-cancellable operating lease agreements. The lease terms are between 5 and 10 years, and the majority of lease agreements are renewable at the end of the lease period at market rate.

The future aggregate minimum lease payments under non-cancellable operating leases are as follows:

	<u>December 31, 2018</u>
Not later than one year	\$ 8,149,450
Later than one year but not later than five years	13,901,885
Later than five years	<u>4,316,216</u>
	<u>\$ 26,367,551</u>

C. As of December 31, 2019, a subsidiary of the Company, Asia Pacific Telecom Co., Ltd., had outstanding contracts of equipment procurements and base transceiver stations construction totaling \$7,603,888, which will be paid in the future or paid by issuing promissory notes and commercial paper.

#### 10. SIGNIFICANT DISASTER LOSS

None.

#### 11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

- A. The Company issued \$6,200,000 Second unsecured corporate bonds, as approved by the regulatory authority on December 30, 2019. The capital has been raised and bonds have been issued on OTC on January 9, 2020.
- B. On February 7, 2020, the board of directors of the Group approved to set up a joint venture with a subsidiary of Yulon Group, Hua-Chuang Automobile Information Technical Center Co., Ltd., to develop automobile related business. The Group contributed \$7,944,000 and held 51% equity of the joint venture.
- C. Due to the impact of the spread of Covid-19, the Group postponed the plans to resume the production of its plants in China to March 30, 2020 in line with the local regulations. As the coronavirus epidemic continues to evolve, the Group has prudently and flexibly adjusted the Group's resources, labour and supply chain to mitigate the impact on its operations. The extent to which the Group's operating revenue is affected by the delay of production resumption depends on the subsequent control of coronavirus epidemic situation.

#### 12. OTHERS

##### (1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to operate with the goal to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet less the total intangible assets.

During 2019, the Group's strategy, which was unchanged from 2018, was to maintain the gearing ratio at 70% or below.

##### (2) Financial instruments

A. Financial instruments by category

Please refer to the consolidated balance sheets and Note 6 for the amounts and details of the financial assets (financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets at amortised cost, investments in debt instruments without active market, accounts receivable (including related parties) and other receivables) and financial liabilities (financial liabilities at fair value through profit or loss, accounts payable (including related parties), other payables, short-term loans, long-term loans and corporate bonds payable).

## B. Financial risk management policies

### (a) Risk categories:

The Group employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

### (b) Management objectives:

- i. Except for market risk, which is controlled by outside factors, the remainder of the foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.
- ii. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.
- iii. The Group's overall risk management policy focuses on the unpredictable item of financial markets and seeks to reduce the risk that potentially pose adverse effects on the Group's financial position and financial performance.
- iv. For the information on the derivative financial instruments that the Group enters into, please refer to Note 6(2).

### (c) Management system:

- i. Risk management is executed by the Group's finance department by following policies approved by the Board. Through cooperation with the Group's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.
- ii. The Board has a written policy covering overall risk management. It also has written policies covering specific issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

## C. Significant financial risks and degrees of financial risks

### (a) Market risk

#### i. Foreign exchange risk

##### (i) Nature:

The Group is a multinational group in the Electronics manufacturing services industry. Most of the exchange rate risk from operating activities come from:

- a. Foreign exchange risk arises from different exchange rates to functional currency as the invoice dates of accounts receivable and payable denominated in non-functional foreign currency are different. Due to the characteristics of the subcontracting industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the variations in currencies of the Company's certain foreign investments in emerging countries (i.e. Brazil, Mexico, etc.) are considered huge, the percentage of the investments is not significant and thus the Company's foreign exchange risk can be maintained in the controllable range. (Note: The Group has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)
- b. Except for the above transactions (operating activities) recognised in the income statement, assets and liabilities recognised in the balance sheet and the net investment in foreign operations also result in the exchange rate risk.

(ii) Management:

- a. For such risks, the Group has set up policies requiring companies in the Group to manage its exchange rate risks.
- b. As to the exchange rate risk arising from the difference between various functional currencies and the reporting currency in the consolidated financial statements, it is managed by the Group's finance department.

(iii) The source:

a. U.S. dollar and NT dollar:

Foreign exchange risk arises primarily from U.S. dollar-denominated cash, cash equivalents, accounts receivable and other receivables, other assets, loans, accounts payable and other payables and other liabilities, which results in exchange loss or gain when they are converted into New Taiwan dollars.

b. U.S. dollar and RMB:

Foreign exchange risk arises primarily from U.S. dollar-denominated cash, cash equivalents, accounts receivable and other receivables, other assets, loans, accounts payable and other payables and other liabilities, which results in exchange loss or gain when they are converted into RMB.

c. JPY and U.S. dollar:

Foreign exchange risk arises primarily from yen-denominated loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into U.S. dollar.

d. JPY and NT dollar:

Foreign exchange risk arises primarily from yen-denominated loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into New Taiwan dollars.

(iv) Extent

The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

(v) Total exchange loss, including realised and unrealised arising from significant foreign exchange variation on the monetary items held by the Group for the years ended December 31, 2019 and 2018 amounted to \$4,509,384 and \$8,223,722, respectively.

ii. Equity securities

(i) Nature

The Group primarily invests in domestic and foreign publicly traded equity instruments, which are accounted for as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and available-for-sale financial assets. The price of those equity instruments will be affected by the uncertainty of the future value of the investment.

(ii) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held constant, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, and investments in equity at fair value through profit or loss are \$815,515 and \$887,193 for the years ended December 31, 2019 and 2018, respectively.

iii. Futures

(i) Nature

The Group is exposed to commodity price risk because of future commodity price fluctuations.

(ii) Extent

The Group sets stop-loss amount to reduce its futures market risk whenever futures contracts are entered into. As a result, there is no significant futures market risk.

iv. Cash flow and fair value interest rate risk

The Group's interest rate risk arises from long-term loans or corporate bonds with floating rates. The Company's long-term corporate bonds with fixed interest rates do not have interest rate risk or fair value interest rate risk.

Long-term loans or corporate bonds with floating rates expose the Group to cash flow interest rate risk, but most of the risks are offset by cash and cash equivalents with variable interest rates.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments.

According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The Group assesses the credit quality of the customers by taking into account their financial position, past experience and other factors to conduct its internal risk management.

Individual risk limits are set based on internal or external ratings in accordance with limits set by the board of directors. The utilisation of credit limits is regularly monitored. Major credit risk arises from cash and cash equivalents, derivative financial instruments and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.

- ii. The Group assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 360 days, a default has been occurred.
- iii. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
- (i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
  - (ii) Default or delinquency in interest or principal repayments;
  - (iii) Adverse changes in national or regional economic conditions that are expected to cause a default.

- iv. The aging analysis of notes receivable and accounts receivable (including related parties) is as follows:

	<u>December 31, 2019</u>	<u>December 31, 2018</u>
Not past due	\$ 1,001,387,391	\$ 1,015,332,780

	<u>\$ 1,037,840,337</u>	<u>\$ 1,062,285,356</u>

The above aging analysis is based on days overdue.

- v. The Group applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:

- (i) Assess the ECLs on an individual basis if a significant default has occurred to certain customers.
- (ii) Classify the other customers' accounts receivable based on the Group's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix.
- (iii) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.
- (iv) As of December 31, 2019 and 2018, the individual provision for impairment of accounts receivable using loss rate methodology or provision matrix is as follows:

December 31, 2019

(c) Liquidity risk

- i. Cash flow forecasting is performed by each operating entity of the Group and aggregated by Group treasury. The Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance, compliance with internal balance sheet ratio targets and, if applicable, external regulatory or legal requirements, for example, currency restrictions.
- ii. The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groups based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

Non-derivative financial liabilities:

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's equity investment without active market is included in Level 3.

B. Fair value information of investment property at cost is provided in Note 6(12).

C. Financial instruments not measured at fair value:

(a) Except for those listed in the table below, the carrying amounts of the Group's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortised cost (excluding bank debentures), short-term loans, notes and accounts payable, other payable and long-term loans approximate to their fair values

(b) The methods and assumptions of fair value measurement are as follows:

Bonds payable: Regarding the bonds issued by the Group, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present value of the expected cash flows and market interest rate.

D. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at December 31, 2019 and 2018 is as follows:

(b) The methods and assumptions the Group used to measure fair value are as follows:

- i. The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	Listed shares	Open-end fund
Market quoted price	Closing price	Net asset value

- ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.
- iii. When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
- iv. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate.
- v. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
- vi. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.

- E. For the years ended December 31, 2019 and 2018, there was no transfer between Level 1 and Level 2.
- F. For the years ended December 31, 2019 and 2018, there was no transfer into or out from Level 3.

- G. Investment segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value. Investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments and ensures compliance with the related requirements in IFRS.

For significant transactions of processing services, trading, receivables and payables, endorsements and guarantees or collaterals provided, and financing, please refer to Note 13(1) A, B, G and H.

14. SEGMENT INFORMATION

(1) General information

The Group has adopted eCMMS (E-enabled Components, Modules, Moves & Services) strategy, and provided a one-stop shop to its customers, which are primarily in the 3C industries, with a total solution for design, development, engineering, procurement, manufacturing, logistics and after-sales service. The Group segregates operating segments from both a customer service and product perspective.

In accordance with IFRS No. 8, "Operating Segments", the Group has determined the operating segments and reportable operating segments. Operating segments which have met certain quantitative threshold are disclosed individually or aggregately as reportable operating segments; other segments which have not met the quantitative threshold are included in the 'all other segments'. The Group has identified the electronic manufacturing integrated services department, which provides global 3C production-related one-stop services, as a reportable operating segment.

(2) Measurement of segment information

The chief operating decision maker assesses performance and allocates resources of the operating segments based on each operating segment's revenue and operating income after adjusting the internal costs and allocated expenses. Except for the recognition of internal costs which shall be in accordance with the Group's related internal calculation basis, the operating segments' accounting policies are the same as disclosed in Note 4.

(3) Segment information

The financial information of reportable segments provided to chief operating decision maker is as follows:

	For the year ended December 31,	
	2019	2018
	Electronic Manufacturing Integration Service	Electronic Manufacturing Integration Service
Net external revenue	\$ 5,114,320,217	\$ 5,273,895,415

Segment profit	<u>\$ 151,924,612</u>	<u>\$ 167,209,748</u>

(4) Reconciliation for segment income (loss)

Sales between segments are carried out at arm's length. The revenue from external parties reported to the chief operating decision-maker is measured in a manner consistent with that in the income statement.

A reconciliation of reportable segment profit or loss to the profit before tax and discontinued operations for the years ended December 31, 2019 and 2018 is provided as follows:

	For the year ended December 31,

Note 1: Code of general ledger account is "investments accounted for under equity method".

Note 2: Code of general ledger account is "financial assets at fair value through Other Comprehensive Income". The disposal gain or loss would be reclassified from "Other Comprehensive Income" to "Retained Earnings".

Note 3: Code of general ledger account is "financial assets at amortized cost". The disposal gain and loss is from interest income.

Note 4: Code of general ledger account is "financial assets at fair value through profit or loss". Due to adoption of IFRS, it would be valued at fair value rather than recognised disposal gain or loss.

Note 5: The total amount of the Group's acquisition or sale of the same security is reaching NT\$300 million or more.

Note 6: Fill in the columns the counterparty and relationship if securities are accounted for under the equity method; otherwise leaves the columns blank.

Note 7: The counterparty is a subsidiary of the Company.

Note 1: The information of transactions between the Company and the consolidated subsidiaries should be noted in "Number" column.

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

(1) The Company to the consolidated subsidiary.

(2) The consolidated subsidiary to the Company.

(3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed.

All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: Part of above transactions with related parties were based on the financial statements of the company for the same period which were not audited by independent accountants.

## Audit Reports of Independent Accountants

Financial Review No. 19002943 (2020)

To Hon Hai Precision Industry Co., Ltd.

### **Opinion**

We have audited the accompanying parent company only balance sheets of Hon Hai Precision Industry Co., Ltd. (hereinafter referred to as ‘Hon Hai’) as of December 31, 2019 and 2018, and the related parent company only statements of comprehensive income, parent company only statements of changes in equity, parent company only statements of cash flows as of January 1 to December 31, 2019 and 2018, and notes to the parent company only financial statements (including a summary of significant accounting policies).

In our opinion, based on our audit results and the audit reports of other public accountants, the above-mentioned parent company only financial statements present fairly, in all material aspects, the parent company only financial position of Hon Hai as of December 31, 2019 and 2018, and its parent company only financial performance and parent company only cash flows as of January 1 to December 31, 2019 and 2018 in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers."

### **Basis for Opinion**

In 2019, we conducted our audits in accordance with the “Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants,” “Jin-Guan-Zheng-Shen-Zi Order No. 1090360805 issued by the Financial Supervisory Commission on February 25, 2020,” and the generally accepted auditing standards in the Republic of China (“ROC GAAS”). In 2018, we conducted our audits in accordance with the “Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants” and the generally accepted auditing standards in the Republic of China (“ROC GAAS”). Our responsibility under such standards will be further explained in the section titled “Independent accountant’s responsibilities for the audit of the parent company only financial statements.” Our staffs subject to the independence requirements are complied with the Codes of Professional Ethics for Certified Public Accountants in the Republic of China (the “Codes”), independent of Hon Hai, and have fulfilled other ethical responsibilities in accordance with the Codes. Based on our audits and the audit reports of other independent accountants, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Key Audit Matters**

Key audit matters refer to those matters that, in our professional judgment, were of most significance in the audit of Hon Hai's 2019 parent company only financial statements. These matters were addressed in the context of our audit of the parent company only financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters of Hon Hai's 2019 parent company only financial statements are as follows:

### **Cut-off of hub sales revenue**

#### Description

For accounting policies on revenue recognition, please refer to Note 4 (32) in the Parent Company Only Financial Statements.

Hon Hai's revenue from hub sales, among other sales patterns, is recognized when customers pick up goods from the hub (i.e. when control over goods is transferred). For pick-ups from the hub, Hon Hai recognizes sales revenue based on movements of inventories contained in the statements or other information provided by the hub custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and a discrepancy between physical inventory quantities in the hubs and quantities as reflected in accounting records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, the cut-off of hub sales revenue was identified as one of the key audit matter.

#### How our audit addressed the matter

We performed the following audit procedures:

1. Assessed and tested the appropriateness of internal controls over cut-off of hub sales revenue for a specific time prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognizing movements of inventories and respective transfer of the cost of goods sold.
2. Confirmed by letter or conducted on-site count of inventory quantities held at hubs and agreed to accounting records.

## **Allowance for inventory valuation losses**

### Description

Refer to Note 4(13) for accounting policies on inventory valuation, Note 5(2) for uncertainty of accounting estimates and assumptions in relation to inventory valuation, and Note 6(6) for details of inventories. As of December 31, 2019, Hon Hai's inventories and allowance for inventory valuation losses amounted to NT\$100,056,179 thousand and NT\$2,131,937 thousand, respectively.

Hon Hai and its subsidiaries are primarily engaged in the manufacture and sales of electronic products. Due to rapid technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. Hon Hai and its subsidiaries measure inventories sold in the ordinary course of business at the lower of cost and net realizable value; the net realizable value for goods aged over a certain period of time or identified individually as obsolete is derived based on the historical experience of dealing with obsolete inventories. The aforementioned allowance for inventory valuation loss mainly comes from goods aged over a certain period of time or identified individually as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realizable value for individually obsolete or damaged inventories is subject to management's judgment, we consider allowance for inventory valuation losses a key audit matter.

### How our audit addressed the matter

We performed the following procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

1. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.
2. Validated the appropriateness of system logic of inventory aging report utilized by management to ensure proper classification of inventories aged over a certain period of time.
3. Evaluated the reasonableness of inventories individually identified as obsolete or damaged with supporting documents, and agreed to information obtained from physical inventory.
4. Discussed with management the net realizable value of inventories aged over a certain period of time and individually identified as obsolete or damaged, validated respective supporting documents and re-performed the calculation.

## **Other matters – Reference to audits of other independent accountants**

Investment accounted for under the equity method included in the Parent Company Only Financial Statements of Hon Hai Precision Industry Co., Ltd. was not audited by us, but by other independent accountants. Therefore, among our opinion on the aforementioned Parent Company Only Financial Statements, the stated amounts and other related information disclosed in Note 13 were based on the audit reports of other independent accountants. As of December 31, 2019 and 2018, the investment accounted for under the equity method amounted to NT\$38,854,657 thousand and NT\$40,748,228 thousand, respectively. Based on the financial statements for 2019 and 2018 audited by other independent accountants, the recognized comprehensive income (comprising share of profit or loss in subsidiaries, associates and joint ventures accounted for under the equity method, and share of other comprehensive income in subsidiaries, associates and joint ventures accounted for under the equity method) amounted to a loss of NT\$911,941 thousand and a loss of NT\$19,716,390 thousand, respectively.

## **Responsibilities of management and those charged with governance for the parent company only financial statements**

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers”, and for such internal control as management determines is necessary to enable the preparation of the parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing Hon Hai’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Hon Hai or to cease operation, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing Hon Hai’s financial reporting process.

## **Independent accountant’s responsibilities for the audit of the parent company only financial statements**

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ROC GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error. Such misstatements

are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with ROC GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Hon Hai's internal controls.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Hon Hai's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause Hon Hai to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the notes, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within Hon Hai to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the audit, and for forming an audit opinion on the parent company only financial statements.

We communicate with those charged with governance regarding, among other matters, the

planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine the key audit matters for Hon Hai's 2019 parent company only financial statements. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

HON HAI PRECISION INDUSTRY CO., LTD.  
NOTES TO THE PARENT COMPANY ONLY FINANCIAL STATEMENTS  
FOR THE YEARS ENDED DECEMBER 31, 2019 AND 2018  
(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS,  
EXCEPT AS OTHERWISE INDICATED)

I. HISTORY AND ORGANIZATION

Hon Hai Precision Industry Co., Ltd. ("the Company") was incorporated as a company limited by shares under the provisions of the Company Act of the Republic of China (R.O.C.). The Company is primarily engaged in the manufacture, sales and service of connectors, case, thermal module, wired/wireless communication products, optical products, power supply modules, and assemblies for use in the IT, communications, automotive equipment, precision molding, automobile, and consumer electronics industries.

II. THE DATE OF AUTHORIZATION FOR ISSUANCE OF THE FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORIZATION

The Parent Company Only Financial Statements were authorized and issued by the Board of Directors on March 30, 2020.

III. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(I) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards ("IFRS") as endorsed by the Financial Supervisory Commission ("FSC")

New, amended and revised International Financial Reporting Standards ("IFRS") that have been endorsed by the FSC and become effective from 2019 are stated as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective Date by International Accounting Standards Board</u>
<i>Amendments to IFRS 9 Prepayment features with negative compensation</i>	January 1, 2019
<i>IFRS 16 Leases</i>	January 1, 2019
<i>Amendments to IAS 19 Plan Amendment, Curtailment or Settlement</i>	January 1, 2019
<i>Amendments to IAS 19 Long-term Interests in Associates and Joint Ventures</i>	January 1, 2019
<i>IFRIC 23 Uncertainty over Income Tax Treatments</i>	January 1, 2019
<i>Annual Improvements - 2015-2017 Cycle</i>	January 1, 2019

Save for the followings, based on the Company's assessment, the major effects arising from the aforementioned standards and interpretations have no significant impact on the Company's financial position and financial performance:

## IFRS 16 Leases

1. IFRS 16 *Leases* replaces IAS 17 *Leases* and related interpretations and SICs. The standard requires lessees to recognize a right-of-use asset and a leasing liability (except for those leases with terms of 12 months or less and leases of low-value assets). Lessor accounting remains the same, which is handled with operating leases or financing leases and only requires additional disclosures.
2. The Company has applied IFRS 16 by not restating the comparative information 9 (hereinafter referred to as “modified retrospective adjustment”) when applying the 2019 IRFS version approved by the FSC. Right-of-use asset was increased by NT\$253,729 and leasing liabilities was increase by NT\$253,729 for the lease contracts of the lessors.
3. The Company adopted the following practical expedients at initial application of IFRS 16:
  - (1) Contracts that have not been reassessed to determined whether it contains a lease shall be accounted by applying IFRS 16, as if it is assessed as the contract identified as leasing that was previously accounted by applying IFRS 17 and IFRIC 4
  - (2) The use of a single discount rate to a portfolio of leases with reasonably similar characteristics.
  - (3) Leases with leasing period ended before December 31, 2019 were accounted as if they were short-term leases. In 2019, the leasing expense recognized for such contracts amounted to NT\$ 2,631.
  - (4) Excluding initial direct cost in the measurement of right-of-use assets.
4. The Company calculated of the present value of the leasing liabilities by using the interest rates on the incremental borrowing, with a weighted average interest rate of 0.1485%-2.3227%.
5. The Company disclosed the committed operating lease in accordance with IAS 17. The present value of the discounted incremental borrowing interest rate on the date of initial application and the adjustment of the leasing liabilities recognized on January 1, 2019 are as follows:

Leasing liabilities disclosed in accordance with IAS 17 on December 31, 2018	\$	272,531
Less: Exemption of short-term leases	(	<u>10,752</u> )
Total leasing contract of leasing liabilities recognized in accordance with IFRS 16 on January 1, 2019		261,779
Multiply by: Interest rate on the Company’s incremental borrowing at the date initial application		<u>0.629%~4.1289%</u>
Leasing liabilities recognized in accordance with IFRS 16 on January 1, 2019	\$	<u><u>253,729</u></u>

(II) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Company

New, amended and revised International Financial Reporting Standards (“IFRS”) that have been endorsed by the FSC and become effective from 2020 are stated as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective Date by International Accounting Standards Board</u>
Amendments to IAS 1 and IAS 8 <i>Disclosure Initiative – Definition of Material</i>	January 1, 2020
Amendments to IFRS 3 <i>Definition of a Business</i>	January 1, 2020
Amendments to IFRS 9, IAS 39 and IFRS 7 <i>Interest Rate Benchmark Reform</i>	January 1, 2020

The aforementioned standards and interpretations have no significant impact on the Company’s financial position and financial performance based on the Company’s assessment.

(III) Effect of IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective Date by International Accounting Standards Board</u>
Amendments to IFRS 10 and IAS 28 <i>Sale or Contribution of Assets between an Investor and its Associate or Joint Venture</i>	To be determine by International Accounting Standards Board
IFRS 17 <i>Insurance Contracts</i>	January 1, 2021
Amendments to IAS 1 <i>Classification of Liabilities as Current or Non-current</i>	January 1, 2022

The aforementioned standards and interpretations have no significant impact on the Company’s financial position and financial performance based on the Company’s assessment.

IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant accounting policies adopted during the preparation of the parent company only financial statements are described as follows: Unless otherwise stated, such policies are consistently applicable to all the periods presented.

(I) Compliance statement

The parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

(II) Basis of preparation

1. Except for the following items, these parent company only financial statements have been prepared under the historical cost convention:

- (1) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

- (2) Financial assets at fair value through other comprehensive income.
  - (3) Defined benefit liabilities recognized based on the net amount of pension fund assets less present value of defined benefit obligation.
2. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the "IFRSs") requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the parent company only financial statements are disclosed in Note 5.

(III) Foreign currency translation

1. The parent company only financial statements are presented in NTD, which is the Company's functional and presentation currency.
2. Foreign currency transactions and balances
  - (1) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.
  - (2) Monetary assets and liabilities denominated in foreign currencies at the period end are retranslated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss in the period in which they arise.
  - (3) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in profit or loss in the period in which they arise. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
  - (4) All foreign exchange gains and losses are presented in the statements of comprehensive income within "other gains and losses".
3. Translation of foreign operations
  - (1) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation

currency are translated into the presentation currency as follows:

- A. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
  - B. Income and expenses for each statement of comprehensive income are translated at average exchange rates of the period; and
  - C. All resulting exchange differences are recognized in other comprehensive income.
- (2) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Company still retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.
  - (3) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Company retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.
  - (4) Goodwill and fair value adjustments arising from the acquisition of a foreign unit are deemed as assets and liabilities of the foreign unit, which are translated at the exchange rate at the end of the period.

(IV) Classification of current and non-current items

1. Assets that meet one of the following criteria are classified as current assets;
  - (1) Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;
  - (2) Assets held mainly for trading purposes;
  - (3) Assets that are expected to be realized within 12 months after the balance sheet date; or
  - (4) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than 12 months after the balance sheet date.

Assets that meet none of the above criteria are classified by the Company as non-current assets.

2. Liabilities that meet one of the following criteria are classified as current liabilities.
  - (1) Liabilities that are expected to be settled within the normal operating cycle;
  - (2) Liabilities held mainly for trading purposes;
  - (3) Liabilities that are to be settled within 12 months after the balance sheet date;

- (4) Liabilities for which the repayment date cannot be extended unconditionally to more than 12 months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Liabilities that meet none of the above criteria are classified by the Company as non-current liabilities.

(V) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(VI) Financial assets at fair value through profit or loss

1. Financial assets at fair value through profit or loss are financial assets that are not measured at amortized cost or fair value through other comprehensive income.
2. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.
3. At initial recognition, the Company measures the financial assets at fair value and recognizes the transaction costs in profit or loss. The Company subsequently measures the financial assets at fair value, and recognizes the gain or loss in profit or loss.
4. The Company recognizes the dividend income in profit or loss when the right to receive payment is established, future economic benefits associated with the dividend flows to the Company, and the amount of the dividend can be measured reliably.

(VII) Financial assets at fair value through other comprehensive income

1. Financial assets at fair value through other comprehensive income comprise equity instruments which are not held for trading, and for which the Company has made an irrevocable election at initial recognition to recognize changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:
  - (1) The objective of the Company's business model is achieved both by collecting contractual cash flows and selling financial assets; and
  - (2) The assets' contractual cash flows represent solely payments of principal and interest on the principal outstanding.
2. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognized and derecognized using trade date accounting.
3. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. The Company subsequently measures the financial assets at fair

value:

- (1) The changes in fair value of equity instruments that were recognized in other comprehensive income. Cumulative gain or loss previously recognized in comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the instrument. The Company recognizes the dividend income in profit or loss when the right to receive payment is established, future economic benefits associated with the dividend flows to the Company, and the amount of the dividend can be measured reliably.
- (2) The changes in fair value of debt instruments are recognized in other comprehensive income. Before derecognition, impairment loss, interest income and gain or loss on foreign exchange which are recognized in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.

(VIII) Financial assets at amortized cost

1. Financial assets at amortized cost are those that meet all of the following criteria:
  - (1) The objective of the Company's business model is achieved by collecting contractual cash flows; and
  - (2) The assets' contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.
2. On a regular way purchase or sale basis, financial assets at amortized cost are recognized and derecognized using trade date accounting.
3. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. Subsequently, impairment loss on and interest income from these financial assets is recognized using the effective interest method in accordance with the amortization procedure. A gain or loss is recognized in profit or loss when the asset is derecognized.
4. The Company's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(IX) Accounts and notes receivable

1. Accounts and notes receivable entitle an unconditional legal right to receive consideration in exchange for transferred goods or rendered services.
2. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.
3. The Company's operating pattern of accounts receivable that are expected to be factored is for the purpose of selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognized in profit or loss.

(X) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income, financial assets at amortized cost, and accounts receivable containing a significant financing component, the Company measures, at each balance sheet date, the impairment provision at 12 months expected credit losses if there has no significant increase in credit risk since initial recognition or measures the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Company recognizes the impairment provision for lifetime ECLs.

(XI) Derecognition of financial assets

The Company derecognizes a financial asset when one of the following conditions is met:

1. The contractual rights to receive the cash flows from the financial asset expire.
2. The contractual rights to receive cash flows of the financial asset have been transferred and the Company has transferred substantially all risks and rewards of ownership of the financial asset.
3. The contractual rights to receive cash flows of the financial asset have been transferred; and the Company has not retained control of the financial asset.

(XII) Lessor Leasing Transaction - Lease Receivable/Operating lease (lessor)

Lease income from an operating lease (net of any incentives given to the lessee) is recognized in profit or loss on a straight-line basis over the lease term.

(XIII) Inventories

Inventories are measured at the lower of cost and net realizable value. Cost is determined using the weighted-average cost method. The cost of finished goods and goods in process comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). However, loan costs are excluded. The item-by-item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(XIV) Investments accounted for under the equity method / subsidiaries and associates

1. Subsidiaries are entities controlled by the Company (including structured entities). The Company controls the entity when the Company is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
2. All unrealized profit or loss resulting from transactions between the Company and its subsidiaries have been eliminated in full. Accounting policies of subsidiaries have been adjusted when necessary in order to be consistent with those of the

Company.

3. The Company's share of profit or loss in subsidiaries after acquisition is recognized in profit or loss, whereas its share of other comprehensive income in subsidiaries after acquisition is recognized in other comprehensive income. If the Company's share of loss in a subsidiary exceeds its share of equity in such a subsidiary, the Company continues to recognize losses in its shareholding percentage.
4. If a change in shareholding in a subsidiary does not result in a loss of control (i.e. transactions with non-controlling interests), such a change is accounted for as an equity transaction, that is, a transaction with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.
5. Associates are all entities over which the Company has significant influence but no control. In general, it is presumed that an investor has significant influence if the investor holds directly or indirectly 20% or more of the voting power of the investee. Investments in associates are accounted for under the equity method and are recognized at cost after acquisition.
6. The Company's share of profits or losses after the acquisition of associates is recognized in profit or loss, and its share of other comprehensive income after acquisition is recognized in other comprehensive income. When the Company's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Company does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
7. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Company's shareholding percentage of the associate, the Company recognizes change in ownership interests in the associate in "capital surplus" in proportion to its shareholding.
8. Unrealized gains or losses on transactions between the Company and its associates are eliminated to the extent of the Company's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
9. In case an associate issues new shares and the Company does not subscribe or acquire new shares proportionately, which results in a change in the Company's ownership percentage of the associate but maintains significant influence on the associate, then "capital surplus" and "investments accounted for under the equity

method" shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Company's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.

10. Upon loss of significant influence over an associate, the Company remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognized in profit or loss.
11. When the Company disposes of its investment in an associate and loses significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. That is, if any gains or losses previously recognized in other comprehensive income are to be reclassified to profit or loss upon disposal of related assets or liabilities, such gains or losses, when the Company loses significant influence over the associates, are reclassified from equity to profit or loss. If it still retains significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
12. According to Regulations Governing the Preparation of Financial Reports by Securities Issuers, the profit or loss of the period and other comprehensive income presented in parent company only financial statements shall be the same as the allocations of profit or loss of the period and of other comprehensive income attributable to owners of the parent presented in the financial statements prepared on a consolidated basis, and the owners' equity presented in the parent company only financial statements shall be the same as the equity attributable to owners of the parent presented in the financial statements prepared on a consolidated basis.

(XV) Property, plant and equipment

1. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
2. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are recognized as profit or loss during the financial period in which they are incurred.
3. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over

their estimated useful lives. If each component of property, plant and equipment is significant in relation to the total cost of the item, it must be depreciated separately.

4. The assets residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets residual values and useful lives differ from previous estimates or the patterns of consumption of the assets future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, “Accounting Policies, Changes in Accounting Estimates and Errors.” from the date of the change. Useful lives of property, plant and equipment are as follows:

Buildings and structures	15 ~ 51 years
( Buildings and auxiliary facilities	6 ~ 11 years)
Machinery and equipment	3 ~ 9 years
Other assets	1 ~ 6 years

(XVI) Lessee Leasing Transaction – Right-of-use Assets/Leasing liabilities

Applicable in 2019

1. Leased assets are recognized as right-of-use assets and leasing liabilities as of the date they become available to the Company. When a lease contract is a short-term lease or a lease of a low-value asset, the lease payment is recognized as an expense over the leasing period using the straight-line method.
2. Leasing liabilities are recognized at the commencement date of the lease at the present value of unpaid lease payments discounted by the interest rate on the Company's incremental borrowings, which include:
  - (1) fixed payments, less any lease incentives that may be received;
  - (2) variable lease payments that depend on a certain index or rate;
  - (3) expected amount paid by the Company under the residual value guarantee;
  - (4) the exercise price of purchasing the option if the lessee can be reasonably certain that such option will be exercised; and
  - (5) penalties to be paid for lease termination if lessor intends to exercise the lease termination option during the leasing period.

The leasing liabilities are measured subsequently using the cost amortized by the interest bill, which provides for interest expense over the term of the lease. When a change in non-contractual results in a change in the leasing period or lease payment, the leasing liability is reassessed and the right-of-use asset is remeasured.

3. Right-of-use assets are recognized at cost at the commencement date of the lease, which includes:
  - (1) the initial measurement amount of the leasing liability;
  - (2) any lease payments made on or before the commencement date;

- (3) any initial direct costs incurred; and
- (4) estimated costs for demolition, removal of the subject asset and location of the recovery period, or restoration of the subject asset to the condition required in the terms and conditions of the lease.

The leasing liabilities are measured subsequently using the cost model, depreciation expenses are provided at the earlier of the end of the useful life of the right-of-use period or the end of the leasing period. When the lease liabilities are remeasured, the right-of-use asset will adjust any amount of remeasurement of the leasing liabilities.

(XVII) Leased assets / operating leases (lessee)

Applicable in 2018

1. Based on the terms of a lease contract, a lease is classified as a finance lease if the Company assumes substantially all the risks and rewards incidental to ownership of the leased asset.
  - (1) A finance lease is recognized as an asset and a liability at the lease's commencement at the lower of the fair value of the leased asset or the present value of the minimum lease payments.
  - (2) The minimum lease payments are apportioned between the finance charges and the reduction of the outstanding liability. The finance charges are allocated to each period over the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.
  - (3) Property, plant and equipment held under finance leases are depreciated over their estimated useful lives. If there is no reasonable certainty that the Company will obtain ownership at the end of the lease, the asset shall be depreciated over the lease term or its useful life, whichever is shorter.
2. Payments made under an operating lease (net of any incentives received from the lessor) are recognized in profit or loss on a straight-line basis over the lease term.

(XVIII) Impairment of non-financial assets

The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less disposal costs or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortized historical cost would have been if the impairment had not been recognized.

(XIX) Loans

1. Loans comprise long-term and short-term bank loans. Loans are recognized initially at fair value, net of transaction costs incurred. Loans are subsequently

stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the loans using the effective interest method.

2. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

(XX) Notes and accounts payable

1. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
2. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(XXI) Financial liabilities at fair value through profit or loss

1. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as measured at fair value through profit or loss at initial recognition:
  - (1) Hybrid (combined) contracts; or
  - (2) They eliminate or significantly reduce a measurement or recognition inconsistency; or
  - (3) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
2. At initial recognition, the Company measures the financial liabilities at fair value and recognizes the transaction costs in profit or loss. The Company subsequently measures the financial liabilities at fair value, and recognizes the gain or loss in profit or loss.
3. If the credit risk results in fair value changes in financial liabilities designated as measured at fair value through profit or loss, they are recognized in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognizing in profit or loss for loan commitments or financial guarantee contracts.

(XXII) Ordinary corporate bonds payable

Ordinary corporate bonds issued by the Company are initially recognized at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from corporate bonds payable, which is amortized to profit or loss over the period of bond circulation

using the effective interest method as an adjustment to "finance costs".

(XXIII) Convertible corporate bonds payable

Convertible corporate bonds issued by the Company contain conversion options (that is, the bondholders have the right to convert the bonds into the Company's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Company classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

1. The host contracts of corporate bonds are initially recognized at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortized in profit or loss as an adjustment to "finance costs" over the period of circulation using the effective interest method.
2. The embedded conversion options which meet the definition of an equity instrument are initially recognized in "capital surplus—share options" at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.
3. Any transaction costs directly attributable to the issuance are allocated to each liability and equity component in proportion to the initial carrying amount of each abovementioned item.
4. When bondholders exercise conversion options, the liability component of the bonds shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the abovementioned liability component and "capital surplus—share options".

(XXIV) Derecognition of financial liabilities

A financial liability is derecognized when the obligation specified in the contract is either discharged or cancelled or expires.

(XXV) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

(XXVI) Non-hedging and embedded derivatives

1. Non-hedging derivatives are initially recognized at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognized in profit or loss.
2. Under the financial assets, the hybrid contracts embedded with derivatives are initially recognized as financial assets at fair value through profit or loss, financial

assets at fair value through other comprehensive income and financial assets at amortized cost based on the contract terms.

3. Under the non-financial assets, whether the hybrid contracts embedded with derivatives are accounted for separately at initial recognition is based on whether the economic characteristics and risks of an embedded derivative are closely related in the host contract. When they are closely related, the entire hybrid instrument is accounted for by its nature in accordance with the applicable standard. When they are not closely related, the derivative is accounted for differently from the host contract as derivative while the host contract is accounted for by its nature in accordance with the applicable standard. Alternatively, the entire hybrid instrument is designated as financial liabilities at fair value through profit or loss upon initial recognition.

(XXVII) Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense. Provisions are not recognized for future operating losses.

(XXVIII) Employee benefits

1. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expense in that period when the employees render service.

2. Pensions

- (1) Defined contribution plans

For defined contribution plans, the contributions are recognized as pension expense when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

- (2) Defined benefit plans

A. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Company in current period or prior periods. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined

benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Company uses interest rates of government bonds (at the balance sheet date) instead.

B. Remeasurements arising from defined benefit plans are recognized in other comprehensive income in the period in which they arise and are recorded as retained earnings.

3. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in accounting estimates. If employee compensation is paid by shares, the Company calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(XXIX) Employee share-based payment

For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognized as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognized is based on the number of equity instruments that eventually vest.

(XXX) Income tax

1. The tax expense for the period comprises current and deferred income tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.
2. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company operates and generates taxable income. Management periodically

- evaluates implementations taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the shareholders resolve to distribute the earnings.
3. Deferred income tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the parent company only balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.
  4. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.
  5. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realize the asset and settle the liability simultaneously.
  6. A deferred tax asset shall be recognized for the carry-forward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.
  7. When a tax rate change occurs in an interim period, the Company recognizes the effect of the change in the period in which the change occurs. In case income tax is related to items other than those recognized in the profit or loss, the effect of the change is recognized in other comprehensive income or equity. In case income

taxes is related to items recognized in profit or loss, the effect of the change is recognized in profit or loss.

(XXXI) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to common shares on the effective date of new shares issuance.

(XXXII) Revenue recognition

1. The Company manufactures and sells consumer electronics products. Sales are recognized when control of the products has transferred, being when the products are delivered to the customers, the customers has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied.
2. Sales revenue is recognized in the amount equal to its contractual price less estimated sales discounts and allowance. Sales revenue is recognized to the extent that a significant reversal is highly improbable. Revenue recognition is revisited at each balance sheet date. No element of financing is deemed present as the sales are made with a credit term consistent with market practice.
3. A receivable is recognized when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.
4. The Company's obligation to provide a refund for faulty products under the standard warranty terms is recognized as a provision.
5. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognized. If the payments exceed the products sold, a contract liability is recognized.

V. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS ON UNCERTAINTY

The preparation of these parent company only financial statements requires management to make critical judgments in applying the Company's accounting policies and make critical accounting assumptions and estimates as to have a reasonable expectation of future events based on the circumstances on the balance sheet date. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such estimates and assumptions bear the risk of making material adjustments to the carrying amount of assets and liabilities for the following fiscal year. Below details the uncertainties of critical accounting judgments, estimates and assumptions:

(I) Critical judgments in applying the Company's accounting policies

Revenue recognition

The Company determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e., the Company is a principal) or to arrange for the other party to provide those goods or services (i.e., the Company is an agent) based on the transaction model and its economic substance. The Company is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Company recognizes revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Company is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Company recognizes revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

Indicators that the Company controls the specified goods or services before they are provided to a customer include the following:

- (1) The Company is primarily responsible for the provision of goods or services;
- (2) The Company assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer; and
- (3) The Company has discretion in establishing prices for the goods or services.

(II) Critical accounting estimates and assumptions

The Company makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Company must determine the net realizable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realizable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2019, the carrying amount of inventories was \$97,924,242.

(1) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(2) Foreign exchange forward contracts

The Company enters into foreign exchange forward transactions to hedge the following risks of exchange rate:

A. Operating activities: Proceeds derived from import of raw materials

and export sales.

B. Investing activities: Proceeds derived from import of machinery and equipment

C. Financing activities: Long-term and short-term foreign currency assets and liabilities (financing)

IV. Details of the Company's investment in equity instruments and beneficiary certificates are provided in Table 3.

V. The Company has no financial assets at fair value through profit or loss pledged to others.

VI. Information relating to credit risk of financial assets and liabilities at fair value through profit or loss is provided in Note 12(2).

2. According to the contractual terms with ING Bank, N.V., the Company is obliged to maintain the agreed financial ratios on the annual consolidated financial statements over the credit periods.

(XIV) Pensions

1. Defined benefit plans
  - (1) The Company has a defined benefit pension plan in accordance with the Labor Standards Act, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years

thereafter of employees who chose to continue to be subject to the pension mechanism under the Labor Standards Act. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last six months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company assesses the balance in the aforementioned labor pension reserve account by December 31 of every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by the end of next March.

- (2) Amounts recognized on the balance sheets are as follows (presented as 'other non-current liabilities'):

- (4) Bank of Taiwan was commissioned to manage the fund of the Company's defined benefit pension plan in accordance with the fund's annual investment and utilization plan and the "Regulations for Revenues, Expenditures, Safe guard and Utilization of the Labor Retirement Fund" (Article 6: The scope of utilization for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate secularization products, etc.). Such utilization is supervised by the Labor Funds Supervisory Committee. With regard to

the utilization of the fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the competent authority. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2019 and 2018 is given in the Annual Labor Retirement Fund Utilization Report announced by the government.

- (5) The principal actuarial assumptions used are summarized as follows:

	<u>2019</u>	<u>2018</u>
Discount rate	<u>0.80%</u>	<u>1.10%</u>
Future salary increases	<u>3.5%</u>	<u>3.50%</u>

Assumptions regarding future mortality experience are set based on actuarial advice in accordance with published statistics and experience in each territory. Due to the change of the main actuarial assumption, the present value of defined benefit obligation is affected. The analysis is as follows:

	<u>Discount rate</u>		<u>Future salary increases</u>	
	Increase	Decrease	Increase	Decrease
	<u>0.25%</u>	<u>0.25%</u>	<u>0.25%</u>	<u>0.25%</u>
December 31, 2019				
Effects on the present value of defined benefit obligation	( \$ 61,696 )	\$ 64,388	\$ 57,843	( \$ 55,861 )

	<u>Discount rate</u>		<u>Future salary increases</u>	
	Increase	Decrease	Increase	Decrease
	<u>0.25%</u>	<u>0.25%</u>	<u>0.25%</u>	<u>0.25%</u>
December 31, 2018				
Effects on the present value of defined benefit obligation	( \$ 65,555 )	\$ 68,439	\$ 61,659	( \$ 59,517 )

The sensitivity analysis above was based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The methods of analyzing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

The sensitivity analysis has been prepared using approaches and assumptions the same as last period.

- (6) Expected contributions to the defined benefit pension plans of the Company for the year ending December 31, 2020 amount to \$16,500.
- (7) As of December 31, 2019, the weighted average duration of the retirement plan is 13 years.

2. Defined contribution plans

- (1) Effective July 1, 2005, the Company have established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company contribute monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The pensions accrued are paid monthly or in lump sum in line with the amounts in employees’ individual accounts and the amounts of accumulated gains.
- (2) The pension costs under the defined contribution pension plans of the Company in 2019 and 2018 were \$226,728 and \$280,291, respectively.

(XVI) Capital

1. As of December 31, 2019, the Company's authorized capital was \$180,000,000, consisting of 18 billion shares of ordinary stock, and the paid-in capital was \$138,629,906, consisting of 13,862,991 thousand shares with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected.

Reconciliation of the number of the Company's outstanding shares at the beginning and end of the period is as follows:

	2019 (in thousand shares)	2018 (in thousand shares)
January 1	13,862,991	17,328,738

2. Pursuant to the resolution adopted at the shareholders' meeting held on June 1, 1999, the Company issued 50,000 thousand ordinary shares so as to issue 25,000 thousand units of Global Depositary Receipts (GDR). Such issuance of ordinary shares had been approved and documented by the former Securities and Futures Commission of the Ministry of Finance. GDRs are issued in Europe, Asia, and the United States, totaling US\$ 347,250 thousand. Primary contractual terms are as follows:

(1) Exercise of voting power

Holders of GDRs have no right to directly exercise voting rights or attend the Company's shareholders' meeting, except when a motion is on the election of directors or supervisors. A holder or holders together holding at least 51% of the GDRs outstanding at the relevant record date of the shareholders' meeting can instruct the Depositary to vote in the same direction in respect of one or more resolutions to be proposed at the meeting.

(2) Sale and withdrawal of GDRs

Under the current R.O.C. law, shares represented by the GDRs may be withdrawn by holders of GDRs commencing three month after the initial issue of GDRs. A holder of a GDR may, provided that the Company has delivered to the custodian physical share certificates in respect of the Deposited Shares, request the Depositary to sell or cause to be sold on behalf of such holder the shares represented by such GDRs.

(3) Dividends

GDR holders are entitled to receive dividends to the same extent as the holders of ordinary shares.

- (4) After years of capitalization of earnings, as of December 31, 2019, 75,796 thousand units of GDRs were outstanding, which represent 151,591 thousand shares of ordinary share.

3. Capital reduction by cash

In order to adjust the capital structure and improve the return on equity, the Company conducted a capital reduction by cash and refunded the share proceeds to shareholders in accordance with the resolution that was reached by the Board of Director on May 11, 2018 and adopted by the shareholders' meeting on June 22, 2018. The reduction amount reached \$34,657,477, representing either 3,465,747 thousand retired shares, or 20% of its capital before such reduction. Such reduction, which became effective on August 8, 2018 after being approved by the Securities and Futures Committee, Financial Supervisory Committee, R.O.C., was resolved by the Board of Directors to be recorded on August 21, 2018.

4. Treasury stocks

The Company's subsidiary, Hon Jin International Investment Co., Ltd., acquired ordinary shares issued by the Company in 1998. As of December 31, 2019 and 2018, the subsidiary owned a total of 1,483,078 shares of the Company's ordinary shares, respectively, at a cost of \$18,901, which was reduced to \$15,194 after share proceeds were returned due to capital reduction.

(XVII) Capital surplus

1. Pursuant to the Company Act, capital reserve arising from paid-in capital in excess of par value on issuance of ordinary shares and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the Securities and Exchange Act requires that the amount of capital reserve to be capitalized mentioned above should not exceed 10% of the paid in capital each year. Capital reserve should not be used to cover accumulated deficit unless the surplus reserve is insufficient. Movements in capital reserve are as follows:

2. Foxconn Industrial Internet, one of the Company's subsidiary, publicly issued 1,969,530 thousand shares of China A shares in June 2018 at the par value of RMB 13.77 per share. The raised funds, net of issuance costs, reached RMB 26,716,439 thousand, resulting in a drop in the Company's shareholding percentage from 94.2% to 84.8%. Capital reserve increased by \$87,629,369, inasmuch as the Company had failed to subscribe to new shares in proportion to its shareholding percentage.

(XVIII) Retained earnings

1. The Company's net earnings after final account are apportioned in the following order:
  - (1) Covering accumulated deficits;
  - (2) Setting aside as legal reserve equal to 10% of current year's net income. However, this is not applicable when the legal reserve has reached the paid-in capital.
  - (3) Setting aside or reversing a special reserve in accordance with other regulatory requirements;

The remaining earnings along with the unappropriated earnings at the beginning of the period are considered as accumulated distributable earnings. In accordance with dividend policy, the proposal of earnings appropriation is prepared by the Board of Directors and resolved by the shareholders.

The Company has authorized the Board of Directors to resolve the distribution of all or part of the dividends and bonuses, capital surplus or legal reserve by way of cash payment by the presence of more than two-thirds of the Directors and a majority of the Directors present. The aforesaid requirement that a resolution shall be resolved at the shareholders' meeting is not applicable.

The Company is at the growing stage. The Company's stock dividend policy shall consider the Company's current and future investment environment, capital needs, local and foreign competition situation and capital budget, along with shareholders' profit and the Company's long-term financial plans. The shareholders' dividends are appropriated based on accumulated distributable earnings, which shall not be lower than 15% of the distributable earnings for the period and the cash dividend shall not be less than 10% of the shareholders'

dividends.

2. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.
3. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.
4. The appropriations of 2018 and 2017 earnings had been resolved at the shareholders' meeting on June 21, 2019 and June 22, 2018, respectively. Details are summarized below:

However, the actual extent of the impact will depend on the subsequent development of the epidemic and the resumption of work.

XII. OTHERS

(I) Capital management

The objective of the Company's capital management is to ensure that the Company can continue as a going concern, that an optimal capital structure is maintained to lower the cost of capital, and that returns are provided to shareholders. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital on the basis of the debt-to-net worth ratio. This ratio is calculated as net debt divided by net worth. Net debt is calculated as total loans (including "current and non-current loans" as shown in the parent company only balance sheet) less cash and cash equivalents. Net worth is calculated as 'equity' as shown in the parent company only balance sheet less the total intangible assets.

The Company's strategic maintenance in 2019 to pin the debt-to-net worth ratio at or below 70% remains unchanged from that in 2018.

(II) Financial instruments

1. Classification of financial instruments

For information and amounts related to the Company's financial assets, which comprise financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets at amortized cost, accounts receivable (including receivables due from related parties and other receivables), and financial liabilities, which comprise financial liability at fair value through profit or loss, accounts payable (including payables to related parties), other payables, short-term loans, long-term loans and corporate bond payables), refer to Note 6 and the parent company only balance sheet.

## 2. Risk management policies

### (1) Risk categories:

The Company employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

### (2) Management objectives:

- A. Except for market risk, which is controlled by external factors, the remainder of the foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.
- B. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.
- C. The Company's overall risk management policy focuses on the unpredictable item of financial markets and seeks to reduce the risk that potentially pose adverse effects on the Company financial position and financial performance.
- D. For the information on the derivative financial instruments that the Company enters into, please refer to Note 6(2).

### (3) Management system:

- A. Risk management is executed by the Company treasury by following policies approved by the Board. Through cooperation with the Company's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.
- B. The Board of Directors has a written policy covering overall risk management. It also has written policies covering specific scopes and issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

## 3. Significant financial risks and degrees of financial risks

### (1) Market risk

#### A. Foreign exchange risk

##### (A) Nature:

The Company is a multinational company in the electronics manufacturing services industry. Most of the exchange rate risk from operating activities come from:

- a. Foreign exchange risk arises from different exchange rates to

functional currency, as the invoice dates of accounts receivable and payable denominated in nonfunctional foreign currency are different. Due to the characteristics of the OEM industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the fluctuations in exchange rates of the Company's certain foreign investments in emerging countries (e.g., Brazil, Mexico, etc.) are considered huge, the percentage of the investments is not significant and thus the Company's foreign exchange risk can be maintained in the controllable range. (Note: The Company has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)

- b. Besides the above transactions (operating activities) recognized in the income statement, assets and liabilities recognized in the balance sheet also result in the exchange rate risk.

(B) Management:

- a. For such risks, the Company has set up policies requiring companies in the Group to manage the exchange rate risks of their functional currencies.
- b. As to the exchange rate risk arising from the difference between various functional currencies and the reporting currency in the consolidated financial statements, it is managed by the Group's finance department.

(C) The source:

- a. USD and NTD:

Foreign exchange risk arises primarily from USD-denominated assets, such as cash and cash equivalents, accounts receivable, and other receivables, and USD-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into NTD.

- b. USD and RMB:

Foreign exchange risk arises primarily from USD-denominated assets, such as cash and cash equivalents, accounts receivable, and other receivables, and USD-denominated liabilities, such as loans, accounts payable and

other payables, which results in exchange loss or gain when they are converted into RMB.

c. JPY and NTD:

Foreign exchange risk arises primarily from JPY-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into NTD.

d. JPY and USD:

Foreign exchange risk arises primarily from JPY-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into USD.

(D) Extent: The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

December 31, 2019					
(Foreign currency : functional currency)	Foreign currency (in thousands)	Exchange rate	Book value (NTD)	Sensitivity analysis

JPY : NTD	2,425,535	0.2782	674,784	1%	6,748

(E) Total exchange gain (loss), including realized and unrealized,

arising from significant foreign exchange fluctuation on the monetary items held by the Company amounted to a gain of \$480,270 and a loss of \$86,716, respectively, for 2019 and 2018.

B. Equity securities

(A) Nature:

The Company primarily invests in domestic and foreign publicly traded equity instruments, which are accounted for as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and available-for-sale financial assets. The price of those equity instruments will be affected by the uncertainty of the future value of the investment.

(B) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held unchanged, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, investments in equity at fair value through profit or loss and available-for-sale equity instruments were \$15,051 and \$17,759, respectively, for 2019 and 2018.

C. Futures

(A) Nature:

The Company is exposed to commodity price risk because of future commodity price fluctuations.

(B) Extent

The Company sets stop-loss amount to reduce its futures market risk whenever futures contracts are entered into. As potential losses are controlled within a reasonable range, there is no significant futures market risk.

D. Cash flow and fair value interest rate risk

The Company's interest rate risk arises from long-term loans or corporate bonds with floating rates. The Company's long-term corporate bonds with fixed interest rates do not have interest rate risk or fair value interest rate risk.

Long-term loans or corporate bonds with floating rates expose the Company to cash flow interest rate risk, but most of the risks are offset by cash and cash equivalents with variable interest rates.

(2) Credit risk

A. Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments. According to the Company's credit policy, each local entity in the Group is responsible for managing and analyzing the credit risk for each

of their new clients before standard payment and delivery terms and conditions are offered. The internal risk control assesses customers' credit quality by taking into account their financial position, historical experience, and other factors.

Individual risk limits are set by the Board of Directors based on internal or external ratings. The utilization of credit limits is regularly monitored. Major credit risk arises from credit risks of cash and cash equivalents, derivative financial instruments, deposits at banks and financial institutions, investments on short-term wealth management products of banks and financial institutions, and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.

- B. The Company assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 360 days, a default has been occurred.
- C. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
  - (A) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
  - (B) Default or delinquency in interest or principal repayments;
  - (C) Adverse changes in national or regional economic conditions that are expected to cause a default.
- D. The aging analysis of accounts receivable (including related parties) is as follows:

	<u>December 31, 2019</u>	<u>December 31, 2018</u>
Not past due	\$ 579,621,106	\$ 536,743,276
Up to 90 days	5,482,036	4,402,617
91-180 days	455,785	512,211
180-270 days	232,045	151,328
270-360 days	681,786	2,551,260
Over 361 days	1,825,078	1,481,532
	<u>\$ 588,297,836</u>	<u>\$ 545,842,224</u>

The table above shows an aging analysis based on the number of days overdue.

- E. The Company applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:
  - (A) Assess the ECLs on an individual basis if a significant default has occurred.
  - (B) Classify the other customers' accounts receivable based on the

Company's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix based on different groups.

- (C) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.
- (D) As of December 31, 2019 and 2018 the individual allowance for impairment of accounts receivable and ones estimated using loss rate methodology or provision matrix are as follows:

	Individual	Group 1	Group 2	Group 3	Group 4	Total
December 31, 2019						
Expected loss rate	100%	0.03%	0.07%	0.04%~0.32%	4.56%~5.37%

(3) Liquidity risk

- A. Cash flow forecasting is performed by each operating entity of the Group and aggregated by Group treasury. The Group treasury monitors rolling forecasts of the Group's liquidity requirements and meets various contractual obligations by maintaining sufficient funds and bank facilities.
- B. The table below analyzes the Company's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities categorized into relevant maturity groups, i.e. based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(III) Fair value information

1. The different levels of inputs used in the valuation techniques for measuring the fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Company's investment in listed stocks and beneficiary certificates is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Company's investment in convertible corporate bonds payable and most of the derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Company's equity investment without active market is included in Level 3.

2. Financial instruments not measured at fair value

- (1) Except for those listed in the table below, the carrying amounts of the Company's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortized cost (excluding bank debentures), short-term loans, notes and accounts payable, other payables and long-term loans) approximate to their fair values.

	December 31, 2019			
	Book value	Level 1	Level 2	Level 3
Financial liabilities:				
Corporate bonds payable	\$ 139,546,000	\$ -	\$ 136,917,685	\$ -
December 31, 2018				
	Book value	Level 1	Level 2	Level 3
Financial liabilities:				
Corporate bonds payable	\$ 144,596,000	\$ -	\$ 137,588,355	\$ -

- (2) The methods and assumptions of fair value measurement are as follows:  
Corporate bonds payable: Regarding the bonds issued by the Company, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present discounted value of the expected cash flows and market interest rate.

3. The Company categorizes financial and non-financial instruments measured at fair value on the basis of the nature, characteristics, risks, and fair value level of

the assets and liabilities.

(1) The related information on assets and liabilities categorized by their nature is as follows:

December 31, 2019	Level 1	Level 2	Level 3	Total

<u>Recurring fair value measurements</u>				
Financial liabilities at fair value through profit or loss				
Derivatives	\$ -	(\$ 453,041)	\$ -	(\$ 453,041)

- (2) The methods and assumptions of fair value measurement are as follows:
- A. The Company adopts market quoted prices as their fair values (i.e., Level 1), which are listed below by the characteristics of the instruments:

	Listed stocks	Open-end fund
Market quoted price	Closing price	Net asset value

- B. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be obtained by reference to the current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including fair value calculated by applying model using market information available at the parent company only balance sheet date.
- C. When assessing non-standard and low-complexity financial instruments, for example, cross currency swap contracts and wealth management products, the Company adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
- D. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present discounted value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate. Put option is evaluated by Black-Scholes option pricing model.
- E. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Company's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, such as model risk or liquidity risk, etc. In accordance with the Company's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably present the fair value of financial and non-financial instruments at the parent company only balance sheet. The pricing information and inputs used during valuation are carefully assessed and adjusted based on current market conditions.

F. The Company takes into account credit risk valuation adjustment to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Company's credit quality.

4. For the years ended December 31, 2019 and 2018, there was no transfer between Level 1 and Level 2.

5. The following chart is the movement of Level 3 in 2019 and 2018:

	Equity instruments for 2019	Equity instruments for 2018
January 1	\$ 153,227	\$ -
Adjustment for retrospective application and retrospective restatement	-	105,789
Gains and losses recognized in other comprehensive income	( 16,116 )	47,438
December 31	<u>\$ 137,061</u>	<u>\$ 153,227</u>

6. Investment segment is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming that the resource of information is independent, reliable and in line with other resources and representative of the exercisable price, frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model, and making any other necessary adjustments to the fair value.

In addition, investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments to ensure compliance with the related requirements in IFRS.

7. The following is the quantitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value as at December 31, 2019	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument: Venture capital shares Private equity fund investment	<u>\$ 137,061</u>	Net asset value	lack of marketability discount	5.00%~10.00% (7.73%)	As the discount for lack of marketability, discount for minority interest, or expected equity value volatility goes higher, the fair value goes lower.
			minority discount of interests	15.00%	
	Fair value as at December 31, 2018	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument: Venture capital shares Private equity fund investment	<u>\$ 153,227</u>	Net asset value	lack of marketability discount	5.00%~10.00% (7.85%)	As the discount for lack of marketability, discount for minority interest, or expected equity value volatility goes higher, the fair value goes lower.
			minority discount of interests	15.00%	

8. The Company has carefully assessed the valuation models and inputs used to measure fair value. However, use of different valuation models or inputs may result in different measurement. The following is the effect on profit or loss or other comprehensive income from financial assets and liabilities categorized within Level 3 if the inputs used in the valuation models have changed:

Note 1: Code of general ledger account is "investments accounted for under equity method".

Note 2: Code of general ledger account is "financial assets at fair value through Other Comprehensive Income". The disposal gain or loss would be reclassified from "Other Comprehensive Income" to "Retained Earnings".

Note 3: Code of general ledger account is "financial assets at amortized cost". The disposal gain and loss is from interest income.

Note 4: Code of general ledger account is "financial assets at fair value through profit or loss". Due to adoption of IFRS, it would be valued at fair value rather than recognised disposal gain or loss.

Note 5: The total amount of the Group's acquisition or sale of the same security is reaching NT\$300 million or more.

Note 6: Fill in the columns the counterparty and relationship if securities are accounted for under the equity method; otherwise leaves the columns blank.

Note 7: The counterparty is a subsidiary of the Company.

Note 1: The information of transactions between the Company and the consolidated subsidiaries should be noted in "Number" column.

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

(1) The Company to the consolidated subsidiary.

(2) The consolidated subsidiary to the Company.

(3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed. All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: Part of above transactions with related parties were based on the financial statements of the company for the same period which were not audited by independent accountants.

Note:

1. Main due to the following reasons:
  - (1) Increase in banks savings interest relative to last period.
  - (2) Decrease exchange rate losses relative to last period.
  - (3) Institutional investors using the equity method increased in profits.
  - (4) The current period's impairment loss comparatively lower than last year.
  - (5) Mainly due to exchange rate fluctuations, resulting in reported exchange profits when changing from USD to NTD.
2. The current period's effective tax rate decreased, due to Taiwan's tax rate for undistributed surplus was changed from 10% to 5%. In addition, there is a preferential tax rate applicable to the overseas capital remittance law in this period.
3. Mainly due to the depreciation of RMB to USD, and USD to NTD, causing adverse effect of the cumulative conversion adjustment caused by the conversion of the report.

## C. Cash Flow Analysis

### (1) Liquidity Analysis of Recent 2 Years

Item \ Year	2019	2018	Ratio Change (%)
Cash flow ratio (%)	14.96%	(2.22%)	(774%)
Cash flow adequacy Ratio (%)	50.74%	46.83%	8%
Cash reinvestment ratio (%)	9.24%	(3.91%)	(336%)

Variance Analysis:

- Cash flow ratio: cash flow ratio increased mainly due to the last period's end accounts payable, which was drastically lower than the year before, creating operating net cash flow; and this period's ending inventory balance being lower than last periods, causing operating net inflow; the current period's operating net cash flows are also markedly higher than the previous period; furthermore, the current period's current liabilities balance is also lower than last period's.
- Cash reinvestment ratio: cash reinvestment ratio increased mainly due to the last period's end accounts payable, which was drastically lower than the year before, creating operating net cash flow; and this period's ending inventory balance being lower than last periods, causing operating net inflow; the current period's operating net cash flows are also markedly higher than the previous period.

- Investment activities: The Company expects expansion of production facilities to meet business demand.
- Financing activities: This year, the Company expects to distribute cash dividends, borrow short-term loans and issue unsecured bonds.

## D. Major Capital Expenditures

### (1) Major Capital Expenditures and its Sources of Capital:

Unit: NT\$000

Project	Actual or Planned Source of Capital	Actual or Planned Date of Completion	Total Capital	Actual or Expected Capital Expenditure	
				2019 (Actual)	2020 (Expected)
Equipment Purchases	Retained Earnings and Revenue	Dec. 31, 2020	1,007,184	(884,502)	1,007,184

### (2) Expected Benefits:

The abovementioned major capital expenditures are needed for the business and operation growth of the company, development of 5G, IoT, artificial intelligence and big data related equipment and technologies. Furthermore, the project hopes to increase overall efficiency and reduce costs by increasing manufacturing capacity and efficiency, assists in R&D; design; electronic equipment manufacturing and the optimization of processes, to strive for stability whilst maintaining innovation.

## E. Investment Policy, Cause of Profit/Loss and Future Investment Plans:

### (1) Policy for Recent Investments:

Investment Policies are aligned to increase manufacturing capacity, and to aid in the Company's revenues and profits.

### (2) Cause of Profit/Loss for Investments:

The Company's 2019 investment income accounted for under the equity method was NT\$104,561,091,000, mainly due favorable operations in invested overseas companies.

### (3) Future Investment Plans for the Coming Year:

The Company's long-term investment strategy is one of prudence, and will be in correlation with market and capacity needs. The Company will continue our commitment to strengthening global competitiveness.

## **F. Risk Assessment**

### **(1) Effect of Changes in Interest Rate, Foreign Exchange and Inflation on Corporate Finance, and our Countermeasures.**

#### **(a) Interest Rates**

##### **Interest Rate Changes 2019**

**USD:** During 2019, the policy and attitude of the Federal Reserve have shifted dramatically, the Fed decreased interest rates three times consecutively by 0.25% on July, September, and October 2019. From preventative decreases to expanding the balance sheet, using currency policy to stimulate the economy. The 10-year Treasury yields have shown a downward trend since 2019.

**JPY:** Since 2016/1/29, in order to continue the boost to Japan's economy and recover from the long-term deflation, the Bank of Japan has continued to maintain portions of Interest Rate on Excess Reserves (IOER) at negative rates of -0.1%, and maintained a controlled framework of 10-year Treasury yields of  $0\% \pm 0.2\%$ . Although maintaining 80 trillion Yen target for government bond buybacks, the actual amount purchased has dropped to an annual 46 trillion JPY. Treasury yields have risen to -0.011% from year-round low at August -0.285%.

**NTD:** Taiwan did not adjust interest rates last year, and as of now the rediscount rate is maintained at 1.375%. Due to disturbances caused by the US-China trade war and the downward trend of the global economy, the 10-year Bond yields fell from the annual 0.91% highs of in the beginning of the year to the current 0.65% towards the end.

**RMB:** The Chinese economy is under continued pressure from the trade-war with the United States in 2019. In the past year, there have been 3 down-adjustments by The People's Bank of China to the required reserve ratio, from 14.5% to 13%. Additionally, the one-year medium-term lending facility (MLF) yield dropped from 3.3% to 3.25%, and one-year loan prime rate (LPR) dropped from 4.31% to 4.15%. Currently, the 1-year deposit and loan benchmark rates are maintained at 1.50% and 4.35% respectively. The 10-year bond yield rates have fallen from last April highs of 3.44% to 3% lows, and returned slightly back to 3.14% towards

year-end.

### **Effect of the Company's Finances**

- Debt:           A. The aforementioned currencies' short-term interest rates have fallen overall, and is beneficial for short-term loans with floating interest rates.
- B. Previous fixed-interest financings for ordinary corporate loans are not affected by interest rate fluctuations.
- Asset:           Interest rate decreases are not beneficial for income from the Company's short-term funds.
- Net Result:     Under proper control, the "Net Interest Income" from the last two years are as follows: +NT\$ 4.856 billion for 2018 and +NT\$ 9.219 billion for 2019.

### **Countermeasures**

The outlook for the 2020 economy is not optimal, with each countries' central banks continually to reduce rates. Currently, USD, NTD and JPY rates have hit bottom. Accordingly, the Company will prepare various financial instruments in mid-to-long term, fixed interest rate USD, NTD and JPY borrowings, to offset possible future risks.

### **(b) Foreign Exchange:**

#### **Foreign Exchange Changes 2019**

- USD-JPY:       Since May, with the falling out of US-China trade negotiations and prompted an increase for risk-avoidance needs worldwide. USD/JPY fallen from April highs of 112.40 to 104.46 in August. But during September, the Fed reinitiated expansion of balance sheet, US-China negotiations resumed, and caused an uptick in the global stock market, USD-JPY recovered to just above 108.
- USD-NTD:       During the first five months of 2019, USD/NTD lingered around 30.800, then with the escalation of the US-China trade wars in May, USD/NTD risen from January lows of 30.740 to August highs of 31.628. But with the easing of the trade war and Taiwan government's incentives for

returning expats, the electronic industry have begun to look up, and performed better than expectations, resulting in the year-end low of USD/NTD of 29.991.

USD-CNY: The US-China trade war was detrimental to Chinese exports, the USD-CNY exchange rates rose from annual lows of March last year to annual highs of September in the same year, from 6.6689 to 7.1854 respectively. Subsequently, with the first phase of trade agreement signed, USD/CNY fell to 6.9632 by year-end.

### **Effect of the Company's Finances**

1. Attributed Profit/Loss:

(A) Pursuant to “IFRS 9 (Financial Instruments)”, profit and loss attributed to interest rates’ fluctuations should be categorized into the two following categories:

a. Profit and Loss attributed to Exchange:

Foreign Exchange related assets or debt (such as operational accounts receivable, accounts payable, financial activities related to demand [time] deposits, short [long] term loans) and the discrepancy caused by exchange are attributed to this category.

b. Financial Assets (Liabilities) Profit and Loss Valuation:

Foreign exchange related assets or liabilities generated from risk avoidance mechanisms (such as Long-term foreign exchange trading), and the profit and loss generated at fair value are listed in this category.

(B) In order to review the Profit and Loss generated from exchange-related fluctuations, the two factors listed above should be consolidated to provide a fuller picture.

2. Profit/Loss status:  
(Note: +Profit, -Loss)

Unit: NT\$100Million

Item Type	2018			2019		
	Profit/Loss attributed to Exchange	Financial Asset (Liability) Profit/Loss Valuation	Total	Profit/Loss attributed to Exchange	Financial Asset (Liability) Profit/Loss Valuation	Total
<b>Consolidated Statement</b>	-82.24	+122.02	+39.78	-45.09	+109.96	+64.87

3. Profit/Loss Description:

The Company has always maintained a conservative approach to risk avoidance, and stringent internal monitoring of trends and changes in foreign exchange and external financial markets. Therefore, the Company can execute risk aversion strategies accordingly, and generate profits attributed to exchange.

#### Countermeasures

1. Fundamental Strategy:

To cater for the complicated external factors at play, the Company attempts to offset liabilities with assets, and reduce the exposure exchange-related fluctuations.

2. Risk Avoidance:

The underlying principle is to square-off the aforementioned net positions.

## **(c) Inflation**

### **Developments in Inflation**

The 2019 Taiwan inflation overall was mellow, with pork prices rising in the first half due to restrictions in supply, pushing a slow increase, average CPI (YOY%) of 0.57%. For the second half the year, due to the slowdown of global economic growth, and the dropping of international energy prices (Brent Crude fluctuating dramatically throughout the year, a price per barrel of US\$66 at years end), causing the reduction of average CPI (YOY%) to 0.55%.

### **Effect of the Company's Finances**

- A. Fundamentally, the Company is an electronics foundry, and products have a tendency to depreciate over long periods of time. However, with a unified corporate strategy, the Company has reduced costs in various processes to offset the effects of inflation.

### **Countermeasures**

- A. The Company will continue to its commitment to various cost-reducing initiatives as a policy, and will be more risk-averse to inflation and deflation related factors.
- B. After a period of decline, commodity prices are in a period of rebounding. The current commodity prices are tapering off, and the Company will keep a close eye on key commodities and adjust procurement strategies accordingly.

## **(2) Policies, Main Causes of Profit/Loss and Action Plans with Respect to High-risk, High-leveraged Investment, Lending or Endorsement Guarantee, and Derivatives Transactions**

### **(a) High-risk, High-leveraged Investments**

None

### **(b) Procedures for Lending Funds to Others and Countermeasures**

#### **(1) Policy:**

Regarding related procedures mentioned in the Company's consolidated financial reports, please refer to the related companies' "Operational Procedures for Lending Funds to Others".

**(2) Main Reasons:**

The Company's lending to legal entities listed in the consolidated financial report have short-term financing needs.

**(3) Countermeasures:**

Depending on the nature of the loan and target's procedures, the Company will undertake necessary countermeasures.

**(c) Procedures for Endorsement & Guarantees and Future Countermeasures**

**(1) Policy:**

Regarding related procedures mentioned in the Company's consolidated financial reports, please refer to the related companies' "Procedures for Endorsement & Guarantees".

**(2) Main Reasons:**

The Company's endorsement and guarantees to legal entities listed in the consolidated financial report are parent/subsidiary companies, and endorsements and guarantees are mainly financing related.

**(3) Countermeasures:**

Implement countermeasure according to the endorsement and guarantee process.

**(d) Derivatives Transactions**

**(1) Policy:**

- A. The Company and the legal entities listed in the consolidated financial report that partake in derivatives transactions will all be in accordance with FSC's "Regulations Governing the Acquisition and Disposal of Assets by Public Companies" and TWSE's "Taiwan Stock Exchange Corporation Directions for Auditing Internal Control Systems of Listed Companies".
- B. As a risk avoidance principle, positions of the Company's asset or liabilities that are in actual possession or expected to be in possession will be closed. This offsets market price fluctuations as risks and risk-avoidance transactions will counteract each other, achieving stable operations.

## **(2) Causes for Profit/Loss**

### **A. Externally:**

Political game theory, black swan theory, and the state of the economy has placed various governments in different predicaments. Different countries have undertaken either tightening or relaxing monetary policies, creating a turbulent and unpredictable foreign exchange market.

### **B. Internally:**

As a principle, derivatives trading will aim to “close the underlying net positions of related hedges”, therefore when the net position incurs a loss, the derivative transaction will be counter to and gain valuation from the asset (or liability).

## **(3) Countermeasures:**

### **A. Stance:**

1. Derivative products are a financial tool and should be judge on how the tool is utilized, to achieve what ends, and the mentality in making such decisions.
2. The Company is committed to internal controls regarding financial derivative transactions, and has implemented various principals to reduce to the risks to a minimum.
3. Domestically, IFRS has implemented strict accounting regulations and guidelines regarding financial derivatives trading. The Company’s procedures are in compliance and even more rigorous than related regulations.

### **B. Policy:**

1. With the recent events, the impacts to the financial markets have been exacerbated. The financial market has been speculative and opportunistic, viciously fueling the outcome of these events. Various price fluctuations are neither based on fundamentals or logic, Additionally, with the hype driven by various financial institutions and media, the risk in the market has risen greatly.
2. Under these conditions, the financial derivatives and its leverage will be used more conservatively and stringently by the Company. Strategically, the Company will not be following the herd or be intimidated by external factors, and actions shall be judge on its “risk avoidance” merits.

**(3) Future Research and Development Projects and Corresponding Budget**

The Company focuses on leading in manufacturing of high-technology products. In order to do so, the Company is committed to recruiting the best R&D talents and invest heavily and efficiently in R&D. The underlying goal is to continue advanced technology development, push the envelope for manufacturing processes and mass manufacturing. **(5) Effects of Technology and Industrial Changes on Corporate Finance and Sales and our Countermeasures**

Under a knowledge-based economy, the life-cycle of the 3C (Computers/Communication/Consumer) electronic product is continually shrinking. Short, small, light, thin, efficient heat dissipation, low-noise are the inevitable trends of these products. Aesthetically pleasing industrial design, low costs are also consumers' key requirements. In the recent years, the Company have aggressively committed R&D resources into precision machine processing; nano-precision mold processing; heat transfer technology; noise treatment; material technology; and sustainable manufacturing, and have received impressive results, both commended by the Company's clients and end consumers. At the same time, in response to the coming trend of digital homes and consolidation of 3C products, the Company have developed strategies and dedicated resources into the field of photoelectric technologies,. The Company will continue to embrace future market demands to meet clients' needs, and continue leading globally in eCMMS.

**(6) The Impact of the Changes of Corporate Image on Corporate Risk Management and our Action Plan**

The outstanding performance of the Company has garnered accolades from Forbes, and ranks 23<sup>rd</sup> in the “Global 500” ranking, and 25th in Forbes “Top 100 Digital Companies”; furthermore, in the Clarivate Analytics report, “2019 Top 100 Global Innovators”, the Company was one of only three Taiwanese institutions selected. This is a recognition of the dedication the Company has displayed in the past 5 years, and the influence of the Group within the information technology, international intellectual property, and innovation space.

The abovementioned accolades show that the Company not only focuses on developing sales operations worldwide, but at the same time assists in risk avoidance with strategic partners and clients; and actively participates in developing and refining corporate social responsibilities globally. The Company’s risk management strategies naturally cover R&D centers and manufacturing facilities in European, American, and Asian continents. After enduring several major events, such as Taiwan’s 921 earthquake; 9/11 terrorism; west coast labor strike, the Iraqi war, and diseases such as SARS; avian influenza; and H1N1, the Company has shown that its regular risk assessment and management initiatives have proved than capable. The Company will continue to simulate various large-scale events, and formulate response strategies accordingly, to protect and maximize value for all shareholders and clients.

**(13) Data Security**

**(a) Data Security Committee**

The Company has established a Data Security Committee organizational structure, and are served by the top executives of business groups; the top executive of IT as a standing committee member; IT managers in business groups as committee members. The committee routinely convenes review meetings, to formulate and inspect data security management targets and policy. In order to effectively implement data security policies, the data security organization has set up functional subgroups consisting of: process/operation; audit; education and training; emergency response; and is assumed by various departmental senior managers. This implementation effectively ensures the steady operation of data security management, and related committee meetings, through to execution.

**(b) Data Security Policy**

The Company's data security policy is "Maintaining the confidentiality; integrity; usability; and legality of the Company's information, and to avoid human error; sabotage; and natural disasters that may cause assets to be used improperly; leaked; manipulated; destroyed or lost, which may impact the Company's operations or interests."

Throughout the years, the Company has adhered to the Data Security Policy, and maintained regular data security education and employee data security training sessions. Furthermore, in response to the trends in global data security and in catering to customer's needs, the Company has implemented the ISO27001 data security standard in 2011, and in June of the same year passed the same certification on major information systems within the Company, the certification is valid though to January 2022. Through the implementation of the ISO27001 certification and policies of the Company, the Company effectively protects clients' data and the Company's intellectual property, and is more responsive and capable, both in metric and proficiency to deal with data security issues that may arise.

The Company is committed to actively handling of exposures to potential data security issues through implementing the Data Security Policy; Response Mechanisms; and Soft and Hardware technologies. However,

considering data insurance is a new field, the Company have employed professional insurance brokerage companies to assess the Group's exposure to risk and degrees of aversion, and review relevant insurance claims institutions for matters regarding claims. After the review and relevant assessments, the Company will immediately implement data insurance, and ensure the Group's data security risk is optimally secure, protected and insured.

**(c) Data Risk Control**

Cyber-attacks are evolving by the day, data security systems are incapable of completely blocking out every single type of cyber-attack, which can be in forms of e-mails, phishing, or brute force attacks such as DDoS. Some methods can inject malicious programs into the intranet to either destroy or steal information. Destructive methods can interrupt the Company's operations, while theft can lead to valuable operational, staff, or client information to be exposed.

The Company vigorously strategizes and implements data security countermeasures, and is committed to the continual improvement of data security environment, and lowering of related risks. The Company have formulated and implemented management policies for our data security policies; organizational duties; access control; physical environment; system development and maintenance; operational continuity; security incident management; and regulatory compliance. From a technical standpoint, the Company has deployed systems such as firewalls; intrusion detection; mail security; operation system automatic detection and updating; antivirus; internet access control; security monitoring; and weakness detection. To ensure the betterment of data security, the Company hosts half-yearly internal and external inspections conducted by professional and institutions, with aims to assess the Company's data security management systems and provide insight for areas for improvement. This report is provided directly to the Data Security Committee.

**(d) Employee Data Security Training:**

The Company provides basic data security education for new employee upon orientation, this includes education training, posters and videos to promote awareness for the issues at hand. Issues that arise from internal data security inspections are rectified by correction procedures immediately, this minimizes the risk of employees leaking company and clients' data. When external data security threats occur, the incident is to be reported immediately. These procedures create a nurturing environment for employees' data security awareness, and increases the Company's data security.

Wuhan PEDA International Logistics Co., Ltd	International Freight Forwarding for Sea, Land and Air; Customs Declaration, Inspection and Inspection Services; Business Information Consultation; Agency or Self-operated Import / Export Business of Various Commodities and Technologies; Warehousing Services; Logistics Information Technology and Logistics Software Technology Research and Development, Technical Consultation; Retail and Wholesale of Medical Devices; Sales and Online Sales of Electronic Products, Daily Goods, Cosmetics; General Logistics; Domestic Air Freight Forwarding; Retail and Wholesale of Prepackaged Foods and Dairy Products.
Wuhan Topone Logistics Co., Ltd.	General freight; freight forwarding; mechanical equipment leasing; car leasing.
Wuhan Jusda Supply Chain Management Limited	Freight Transportation, Freight Forwarding, Customs Declaration and Inspection Agency, Testing Services; Domestic Express Delivery Within The Territory Of Hubei Province; Contracting Freight, Freight Forwarding and Freight Forwarding of Land, River, Sea, Air and Railway; Freight Yard Management; Supply Chain Management and Related Supporting Services and Property Management; Business, Economic and Trade Consulting Services; Electronic, Communication Products and Parts Repair Services; Agent or Self-Operated Import/Export Business of Various Commodities and Technologies; Electronic Products, Online Sales of Daily Goods; Logistics Information Technology and Logistics Software Research and Development, Design, Consulting; Retail and Wholesale of Cosmetics, Class I Medical Devices and Supplies, Prepackaged Foods, Bulk Foods and Dairy Products (Excluding Infant Formula).
Wuhan Zhunxuntong Enterprise Service Co.,Ltd	Business management consulting; logistics information consulting; supply chain management; computer software and hardware technology development, technical consulting, technology transfer, technical services; technology research and development, technical consulting in the field of information technology; electronic products (excluding electronic publications) Online sales; customs declaration and inspection agents; freight forwarders; import and export of goods, import and export of technology, import and export of agents (excluding goods or technologies that are prohibited or restricted by the state).
Wuhan Yuzhan Precision Technology Co., Ltd.	Production of Mobile Communication Systems, Mobile Phones and Parts, Base Stations, Core Network Equipment and Network Detection Equipment and Related Components, New Electronic Components, Portable Medical Electronic Products, Digital Audio and Video Decoding Equipment and Related Components; Research And Development Of Metal, Non-Metallic Materials and Products; Heat Treatment and Surface Treatment Process Development and Mold Design, Manufacturing, Wholesale and Retail; Maintenance Inspection Services for Products of the Company; Warehousing Services; Industrial Robots, Supporting Automation Fixtures, Machining Parts and Components, Technology Development, Production, Wholesale; Import / Export of Goods and Technology, Import And Export Agency.
Henan Zhongyuan RongChuang Fund Management Co., Ltd.	Manage or Trustee Management of Non-Securities Equity Investments and Related Advisory Services.
Henan Zhongyuan Financial Leasing Co.Ltd	Financial Leasing Business, Leasing Business, Domestic and International Procurement of Leased Property, Residual Value Processing and Maintenance of Leased Property, Leasing Transaction Consultation.

Company Name	Business Scope
Henan Yupin Real Estate Co.,Ltd	Real Estate Development, Operation, Sales, Self-owned House Leasing; Industrial Park Operation Management; Real Estate Marketing Planning; Property Management; Real Estate Information Consulting.
HeNan FuChi Technology Co., Ltd.	Research and Development; Production, Sales and Maintenance Services regarding Electronic Products; Warehousing Services (Excluding Flammable and Explosive Chemicals); The Import / Export of Goods and Technology.
HeNan YuZhan Technology Limited	Production and Operation of Third-generation and Subsequent Generations of Mobile Communication Systems, Mobile Phones, Base Stations, Core Network Equipment and Network Detection Equipment and Components, New Electronic Components, Digital Audio and Video Decoding Equipment and Components; Metal / Non-Metal Products Mold Design, Manufacturing; Maintenance and Warehousing Services, Wholesale and Related Supporting Business Of The Above Products; Import / Export Business of Goods and Technology; Design, Production, Sales, Testing, Maintenance and After-sales Operations of Inspection Tools, Fixtures and Components Services; Mobile Communication System Mobile Phone Research and Development; Computer, Mobile Phone Related Software and Hardware Research and Development and Testing.
FangZhou Life Technology Limited	Audio Tape and Record Publishers. Software Publication. Other Publishers Not Elsewhere Classified. Arts and Literature Service. Agents and Managers for Performing Arts, Entertainers, and Models. live house. General Advertising Services. Software Design Services. Intellectual Property. International Trade.
Jin Ji Full Investment Holding Co., Ltd.	Investment. Investment Consultancy.
Jin Ji Full Precision Machinery (WuHan) Co.,Ltd	Development, Production and Operation of Precision Molds, Metal / Non-Metal Mold Components, Machine Components, Electronic Products and Parts; Automation Equipment and related Key Components, Hardware Products, Sheet Metal Products, Injection Molding, Plastic Products, Electronic Amusement Equipment Development, Design, Production, Sales; Heat Treatment; Metal Material Shear Processing, Sales and Supply of Related Materials for Technology; Testing Equipment Calibration, Repair, Maintenance, Testing, Sales; Sales Of Lithium Batteries; Electric Bicycles, Non-electric Bicycles, Travel Tools Products, and Sales and Research of Parts, Sales of Similar Products of the abovementioned Products; Wholesale and Retail of Bicycles and Electric Bicycles; Import / Export Of Goods and Technology, Import / Export Agency.
JIN JI FULL PRECISION MACHINERY (QIN HUANG DAO) CO., LTD	Development, Production and Sales of Precision Molds, Metal / Non-Metal Mold Components, Machine Components, Electronic Components and Parts; Automation Equipment and Components, Hardware Products, Metal Products, Plastic Products Development, Design, Production, Sales; Heat Treatment Processing Metal Materials Shear Processing, Sales and Related Technical Services; Testing Equipment Calibration, Repair, Maintenance, Testing and Sales.
JinJiFull Precision Machinery (Huaian) Co., Ltd.	Research and Development, Design, Production, Processing Precision Stamping Die, Precision Cavity Die, Standardized Mold Parts, Fixture, Inspection Tool, Special Cutting Tools, Electronic-specific Equipment, Test Equipment, Tool And Die; Metal Surface Treatment and Heat Treatment; Plastic Computer Cases Development and Design of Components, Computer Metal Cases Components, New Electronic Components and Related Product Accessories and Softwares; Sales of Self-Produced Products; Short-Term Skills Training.
Jin Ji Precision Pneumatics (Shenzhen) Co., Ltd.	Development, production and management of precision molds, metal and non-metal mold parts, mechanism parts, electronic product parts; development, design, production of automation equipment and its key parts, hardware products, sheet metal products, injection molding, plastic products, sales; heat treatment processing; metal material cutting and processing, sales and provision of related technology and feeding services; calibration, repair, maintenance, testing and sales of testing equipment.
Jin Ji Lu Trading Holdings Co., Limited	Unrestricted, but in accordance to local laws and regulations as prerequisite .
Changchun ChenTai Technology Co., Ltd.	Investment in the Construction of Poly(lactic Acid Degradable Plastic Resin, Modified Plastic Resin Technology Research and Development, Technical Consulting: Services, Production, and Sales.

Company Name	Business Scope
Changchun YongTai Technology Co., Ltd.	Carbon Dioxide-Based Degradable Plastic Resins, Modified Plastic Resins Technical Research and Development. Technical Consulting; Services, Production, and Sales.
Changchun Leiguan Environmental Plastic Products Co., Ltd.	Research and Development of Environmentally Friendly Plastic Products, Sales and Related Products and Technologies; Development of Environmental Technology, Service and Consulting, Wholesale of Environmental Protection Equipment, Construction and Operation of Sewage Treatment Plants.
QianHai Yuzhan (ShenZhen) consulting Management Co., Ltd.	Corporate Information Consultation, Business Management Consulting, Mobile Phone Technology Consulting, Financial Consulting; Marketing Planning.
Nanjing Jusda Supply Chain Management Co., Ltd	Supply Chain Management; Self-Operated, Agency and Import / Export Business of Various Commodities and Technologies; Cargo Transportation Agency; Customs Broker, Inspection; Handling; Warehousing Service; Software Development, Technical Consultation; Electronic Product Maintenance; Quality Inspection Technical Service; Class I Medical Equipment, Cosmetics Sales; Road Cargo Transportation.
NANJING HONGFUSHARP PRECISION ELECTRONICS CO., LTD.	Precision Electronic Equipment, Optoelectronic Technology and Related Equipment, Medical Equipment, Medical Machinery, Automation Equipment Research and Development, Production, Sales, Technical Services, Technical Consulting, Technology Transfer; Self-owned Housing and Equipment Rental; Self-operated and Agency of Various Commodities and Technologies and their related Import / Export Operations.
Nanyang Hongfujing Precision electronic Co., Ltd.	Research and Development, Production and Sales of LCD TVs, Digital TVs, LCD Modules, Electronic Whiteboards, Precision Optical Lenses, Optical Components, Glass Components, Lens Components, Camera Modules, Smart Monitoring Devices, Large Computers, Portable Computers, Desktop Computers, Multimedia Data Processors, Mobile Communication Systems and Equipment, New Electronic Components, Videowalls, New Energy, Energy-saving Products, LED Lamps, Solar Lighting Systems, Smart Lighting Poles, Smart Internet-enabled Multimedia Machines, New Gaming Consoles, Electronic Digital Products, Peripheral Products and Related Parts of the Above-mentioned Products, Software / Hardware Application Systems Integration, and After-sales Maintenance Services. Research and Development, Manufacturing, Testing, Installation, Maintenance of LED Display Products. Energy-saving Renovation of Lighting Systems, Urban Lighting Smart Control System and Energy Management EMC. Wholesale, Import / Export of Related Products of the Above-mentioned Products and Related Supporting Businesses.
NanNing FuGui Precision Industrial Co., Ltd.	Development and Production of New Electronic Components, Broadband Access Network Communication System Equipment, Transmission Communication System Equipment, Metro Ethernet Communication System Equipment, Wireless Local Area Network (Wide Area Network) Equipment, High-End Routers, High-end Switches, Portable Microcomputers, Interactive Tablets, Vehicle Communication Device, Mobile Internet Device, Tablet Computer, Satellite Navigation and Positioning Receiving Device, Wireless Communication Module, Optical Transceiver Module, Module Casing, One Billion Bit Passive Optical Network Terminals, Base Station Filters, Digital Cameras, Video Recording Devices, Digital TV Sets, Digital Audio and Video Decoding Devices, Mobile Phones, Satellite TV Reception Facilities, Solar Cells, Solar Battery Packs, Network Security and Storage Products, Web Servers, Molds Fixture Manufacturing and Maintenance, Measuring Instrument Testing and Calibration, Bicycles, and Parts of the Above-mentioned Products, Accessories (Including Packaging), Construction of Supporting Production Facilities, Sales of Self-Produced Products, Provision of After-sales Service; Import / Export, Wholesale Business and Related Supporting Services for Similar Product Categories; Home Supplies, Home Appliances, Electronic Products Retail Business; Housing Rental.
NanNing FuTaiHong Precision Industrial Co., Ltd.	New Electronic Components, Third-Generation and Subsequent Generations of Mobile Communication Systems, Mobile Phones, Network Cards, Switching Equipment, Digital Clustering System Equipment, Routers, Test Equipment, Tooling and Manufacturing and Sales of the Above-mentioned Products, Provide After-sales Service; Import / Export, Wholesale Business and Related Support Services of Similar Products Categories.

Company Name	Business Scope
JapanCisco-Linksys (Chaengdu) Network Tech Co. (China)	Research, Development, Promotion and Marketing of Data Communications, Electronic Products, Software and Networking Technology Products; Transfer and Licensing of Data Communications, Electronic Products, Software and Networking Technologies; Provision of Data Communications, Electronic Products, Software and Networking Technologies, Technical Support and Services Related to Products. (Including Maintenance Services Related to Data Communication, Electronic Products, Software and Network Technologies and Products, and Provision of Related Parts, Technical Consultation, Training, Installation, Project Management Services, Etc.).
Smarter Technology (Shenzhen) Co., Ltd.	Computer Software, Information System Software Technology Development and Sales; Information System Design, Integration, Operation and Maintenance; Information Technology Consulting; Database Services, Database Management; Property Management; Housekeeping Management; Collection of Dry Cleaning; Designated Driver Services; Cleaning Services; Import / Export of Goods and Technology; Clothing, Textiles, Knitwear, Daily Goods, Stationery, Sporting Goods, Building Materials, Machinery and Equipment, Hardware Products, Electronic Products, Jewelry, Handicrafts Wholesale and Retail; Indoor and Outdoor Decoration Engineering Design, Landscaping Engineering Design, Graphic Design; Engineering Cost Consulting, Network Technology Consulting and Development; Construction and Engineering of Electromechanical Installation, Integrated Wiring Engineering; Design, Development and Sales of Security Products
SOCLE TECHNOLOGY CORP.	Electronic Parts and Components Manufacturing, Software Design Services. Digital Information Supply Services. Product Designing. Other Industry and Commerce Services Not Elsewhere Classified. Wholesale of Precision Instruments Wholesale of Computing and Business Machinery Equipment. Wholesale of Computer Software. Wholesale of Electronic Materials. Retail sale of Computing and Business Machinery Equipment. Retail Sale of Precision Instruments. Retail Sale of Computer Software. Retail Sale of Electronic Materials. Telecommunications Construction. Computing Equipments Installation Construction. International Trade. Research, Design, Development and Manufacturing of the below products: 1. From Specification to Chip Mass Production Design Services. 2. From RTL Circuit to Chip Mass Production Design Services. 3. From Physical Circuit Layout to Chip Mass Production Design Services. 4. Chip Packaging and Probing Mass Production Services.
SOCLE TECHNOLOGY (Shanghai) LTD	Development and Design of Electronic Products, Electronic Components, Integrated Circuits and Components, Transfer of Proprietary Technology Achievements, Wholesale of Similar Products to the Aforementioned, Commission Agency (Excluding Auctions), Import / Export and Related Supporting Services, Trade Information Consulting, International Trade, Entrepot Trade, Intra-firm Trade and Trading Agency.
CHONGQING GUANZHUO TECHNOLOGY CO., LTD.	Multimedia Digital Software / Hardware Design and Development; Software Services; System Integration; Enterprise Management and Corporate Information Consulting; Electronic Products and Equipment (Excluding Electronic Publications) and Accessories, Consumer and Commercial Appliances, Computer Hardware and Software, Communication Equipment, Daily Goods, Office Equipment, Multi-function Machines, Speakers and Technical Services of Related Products; Installation and Maintenance of Home Appliances, Digital Electronic Products, Computer Hardware and Software, Network Communication Equipment; Educational and Medical Product Solutions; Video Systems, Smart Office Solutions; Self-owned Equipment Rental; Multi-Functional Machine Rental Service; Import / Export Of Goods and Technology.

Company Name	Business Scope
CHONGQING FERTILE PLAN LOGISTICS CO., LTD.	Domestic Freight Forwarding and Warehousing Services (Excluding Dangerous Goods); International Freight Forwarding Agency for Import / Export by Land, Sea and Air; Economic and Trade Consultation; Maintenance Services for Electronic Products, Communication Products and Parts; Customs Declaration and Inspection Agency; Loading and Unloading Operations; General Logistics; International and Domestic Trade; Trade Agency; Logistics Information Technology and Logistics Software Research and Development, Design, Consulting; Sales: Food, Ore, Mineral Powder, Coal, Cotton, Metal Materials, Wood, Cement, Plastic Products, Rubber Products, Paper Products, Agricultural and By-products, Clothing, Building Materials, Hardware and Electric Materials, Auto Parts, Arts and Crafts, Electronic Products (Excluding Electronic Publications), Computer Hardware And Software, Cosmetics, Class I Medical Equipment; Import and Export of Goods and Technology .
ChongQing HonFuZhu Trading Co., Ltd.	Catering Services; Sales: Food, Electronic Components, Mechanical / Electrical Equipments and Components, Electronic Products (Excluding Electronic Publications), Molds, Machine Tools, Metal Tools, Cutting Tools, Power Tools, Hands Tools, Hardware Products (Excluding Rare Metals), Plastic Products, Building Materials, Construction Equipment, Office Equipment, Office Supplies, Mobile Phones and Accessories, Computers, Computer Accessories and Expendables, Digital Products, Home Appliances, Household Items, Daily Goods, Coffee Utensils, Arts and Crafts (Except Ivory and its Products); Warehousing; Mobile Phone, Computer, Home Appliance Repair Services; Market Management; Booth Leasing; Import / Export of Goods and Technology.
Chongqing Hongteng Technology Co., Ltd.	Design and Manufacturing of Molds for Metal / Non-Metal Products, End-display Products, Supporting Products for Panels and Modules, Portable Micro-Computers and Parts, Export, Wholesale and Related Supporting Services for the Abovementioned Products and Products of Similar Product Category.
Chongqing Zhunxuntong Customs Service Co., Ltd.	Acting for customs declaration and inspection; computer hardware and software technology development, technical consulting, technology transfer, technical services; business management consulting; logistics information consulting; import and export of goods and technology; enterprise supply chain program design and management.
ChongQing FuGui Electronics Co., Ltd.	Production, Operation, Development f Wireless Modules, Wireless Chargers, Wireless Network Adapters, Trackers, Data Machines, Cable Modules, Switches, Routers, Data Switches, Network Controllers; Import / Export of the Abovementioned Products and related Product Categories, Wholesale Business, Technology Development, Technical Consulting and Maintenance of After-Sales Products and Related Supporting Services.
Chongqing Fuyusheng Electronics Technology Co., Ltd	Production, Sales, Technology Development, Consulting, Agency and Services for: Integration of Computers and Communication Network Systems; Import / Export of Goods and Technologies; Technology Development, Production, Sales and Related Services for Cultural Products; Production, Testing, Installation, Maintenance And Sales of Various Types of Televisions, Computers, Multimedia Data Processors, Mobile Communication Systems and Equipment, New Electronic Components, LCD Touch Devices, Projectors, Servers, Multi-Monitors, New Energy, Energy-saving Products, LED Display Products, LED Lamps, Lighting Systems, Smart Lighting Poles, Game Consoles, Smart Monitoring Equipment; Related Parts, Software and Hardware Application System Integration, After-sales Maintenance Services.
ChongQing Jingmei Precision electronic Co., Ltd.	Development, Manufacturing, Sales and Related Technical Services of Audio-visual Equipment, New Flat Panel Displays, Electronic Devices, Electronic Components, Liquid Crystal Display Screens And LCD TVs, Audio and Video Systems, Panel Modules, New Flat Panel Display Systems and Components; Export Business; LCD Screen and LCD TV Repair Service; Warehousing Services.
Ur Material (Chongqing) Co., Ltd.	Development, Research, Processing, Manufacturing and Sales of Plastic Polymer Materials and Products; Sales of Chemical Products; Technical Research and Development of Functional Plastic Materials and Technical Consultation, Technology Promotion, Technology Transfer; Import / Export Of Goods and Technology.

Company Name	Business Scope
Jusda Supply Chain Management (Shanghai) Co., Ltd.	Supply Chain Management, International Cargo Transportation Agency, Road Cargo Logistics, Warehousing Services, Cooperative-manufacturers Logistics Services, Food Circulation, Business Information Consultation, E-Commerce (Not Allowed to Engage in Value-Added Telecommunications, Financial Services), Technology Development regarding Computer Information Technology, Technical Consultation, Technology Transfer, Technical Services, Daily Goods, Cosmetics, Clothing, Home Appliances, Maternity Products, Sales of Toys.
JUSDA SCM (HUAIAN) CO., Ltd.	Development, Manufacturing, Sales and Related Technical Services of Audio-visual Equipment, New Flat Panel Displays, Electronic Devices, Electronic Components, Liquid Crystal Display Screens And LCD TVs, Audio and Video Systems, Panel Modules, New Flat Panel Display Systems and Components; Export Business; LCD Screen and LCD TV Repair Service; Warehousing Services.
JUSDA SUPPLY CHAIN MANAGEMENT (JIAXING) Co., LTD.	Supply Chain Management; Warehousing Services; Domestic Freight Forwarding; Land, Sea, Air International Freight Forwarding; General Freight; Customs Declaration and Inspection Agency; Logistics Information Technology and Logistics Software Research and Development, Design, Consulting; Storage Facilities and Related Facilities, Operations and Management, and Provide Related Consulting Services. Sales and Online Sales of The Category I Medical Devices, Electronic Products, Cosmetics, Food; Import / Export of Goods and Technology.
JUSDA Energy Technology (Shanghai) Co., Ltd.	Energy Technology; Chemical Technology; Technology Transfer in Information Technology; Technical Services; Technical Consulting; Technology Development; Contract Energy Management; Wholesale of Chemical Products; Import and Export, Commission Agency (Excluding Auctions); Shipping, Land Transportation, and Air Import / Export, International Exhibits; Personal and Cross-boarding Cargo International Freight Agency, including Canvassing, Consignment, Booking, Storage, Transfer, Consolidation and Packing / Unpacking, Settling of Transport-related Fees, Customs Declaration, Inspection, Insurance and related Short-distance Cargo Consultations, Domestic Road Logistics, Domestic Road Logistics Agency, Repairs, Rental of Freezer Storages, Tank Containers (Except Dangerous Goods), Economic, Trade, and Logistics Consultations,

Freight Forwarding and Warehousing Services related to Domestic Transportation; Customs Declaration and Inspection Agency; International Freight Forwarding Agents for Importing / Transporting Goods by Land, Sea and Air; General Logistics, Freight Yard Operations (Warehousing Services; Except Hazardous Chemicals); Transportation (Container) Transportation of Large Objects; Economic and Trade Consultation; Maintenance Of Electronic Products, Communication Products and Parts; Electronic Components, Electronic Products, Digital Products, Computer Hardware and Software and Supporting Equipment, Network Equipment, Communication Equipment ( Excluding Radio and Television Transmission Equipment and Terrestrial Satellite Receiving Equipment), Household Appliances, Electronic Equipment and Components, Precision Molds, Agricultural and Livestock Products, Clothing, Shoes and Hats, Building Materials, Hardware, Automobiles, Motorcycles and Parts, Wholesale of Arts and Crafts (Except Ivory and Its Products, and Cultural Relics); Investment Management and Investment Consulting; Import / Export of Goods and Technology.
Triple Win Precision Electronics (Jin Cheng) Co., Ltd.	Research and Development, Production and Sales of Electronic Products; Import / Export of Goods and Technology.
Jincheng Foxconn intelligent manufacturing institute Co., Ltd.	Intelligent manufacturing technology consulting services; educational information consulting services.
Jincheng Futaihua Precision Electronic Co., Ltd.	Development, Production, Sales and Related Technical Services of Mobile Communication Terminal Equipment and Parts, Digital Audio and Video Decoding Equipment and Parts, Mechanical Automation Equipment and Parts, Electronic Components and Molds; Development, Production, Wholesale, and Maintenance of Multifunctional Industrial Robots; Import / Export of Goods.
Jinchen Hongren Technology Co. Ltd	Pneumatic Components related Products, Metallurgy Powder Products, Cutting Tools Design, Production, Sales And Supporting Services; Metal Surface Treatment Technology Services; Import and Export Operations.

Company Name	Business Scope
Jincheng Hongchuang Intelligent Technology Co., Ltd.	Development, design, production and sales of non-ferrous metals, graphite and other non-metallic mineral products, cemented carbide production equipment and accessories, technical services, technical consulting and technology transfer; import and export of goods and technology.
Jincheng Hongzhi Nano optical-mechanical-electrical institute Co., Ltd.	Technology research and development, technology consulting, technology promotion, technology transfer in the field of optical and electromechanical technology; technology import and export.
Jincheng Hongshuo intelligent technology Co., Ltd.	R&D, design, production and sales of construction machinery equipment, mining equipment and accessories and related technical services, technical consulting and technology transfer; import and export of goods, import and export of technology.
Taibangjie Supply Chain Management(Shen Zhen) Limited	Supply Chain Management Services; Supply Chain Information System Services; Economic Information Consulting; Agency for Customs Declaration Services. Domestic Freight Forwarding; Import / Export of Goods and Technology (Excluding Distribution, State-Owned, Controlled Products); Wholesale of Cosmetics, Class I Medical Devices; Import / Export and Related Supporting Services; Prepackaged Foods (Excluding Reheated Prepackaged Foods) Wholesale; Warehousing Services; General Logistics; Wholesale of Dairy Products.
System Integration(Hai ning) Electronics Co., Ltd.	R&D, manufacturing, and processing: new electronic components, broadband access network communication system equipment, high-end routers, high-end switches, servers, and spare parts for the above products; provide after-sales service; operate the export business of the company's own products and the company. Import business of necessary mechanical equipment, spare parts, original auxiliary materials and technology.
Infocus precision industry(shenzhen) Co., Ltd.	Production and Operation of Computers, E-Book Readers, Digital Photo Frames, Fixed Telephones, Cordless Telephones, Mobile Phones, Microcomputers, Portable Automatic Data Processing Equipment, Multimedia Signal Converters, Video Conversion Routers, Smart Watches, Digital Audio and Video Systems (Excluding TV Sets and National Restricted Products), Portable Personal Information Assistance System. Wholesale, Import, Export and Related Supporting Business of Similar Products. Software Technology Development and Information Technology Promotion Services.
SHUNSIN TECHNOLOGY (ZHONG SHAN) LIMITED	High Speed Fiber Transceiver Module. Assembly of High Frequency Infinite Communication Module and Various Integrated Circuits. Testing and Sales. Production and Operation of New Electronic Components (Hybrid Integrated Circuit, Sensitivity Components and Sensors, Optoelectronic Devices); CSP, MCM and Other Advanced Packaging / Testing; New Energy Power Generation Equipment or Related Key Equipment Manufacturing (Photovoltaic Power Generation); Luminous Efficiency 140lm /W Or Higher Brightness LED, Luminous Efficiency 140lm / W or above and Power 200mw or above White LED Manufacturing; Optical Communication Measuring Instrument, 40Gb / S or above Optical Transceiver Manufacturing; Digital Audio and Video Decoding Equipment, Digital Cable Television System Equipment; Integrated Circuit; Metal Oxide Semiconductor Integrated Circuit Thinning, Cutting, Coil Packaging, Thinning And Cutting; Integrated Circuit Testing; Metal Oxide Semiconductor Integrated Circuit Testing; Electronic Component Testing; Vacuum Coatings; Surge Suppressor Module; Thermal Module; Modem; Projector; Speed 40Gb/S or below Optical Transceiver Manufacturing; Light-Emitting Diode; White Light-Emitting Tube Manufacturing; Smart Labelling; Smart Keys; Fingerprint Modules; Automotive Electronic Device Manufacturing and Development (Vehicle) [Electronic Technology (Automotive Information Systems and Navigation Systems), Electronic Control System Inputs (Sensors and Sampling Systems) Output (Actuator) Components, Embedded Electronic Integrated Systems, Embedded Electronic Instrument Clusters, Tire Pressure Monitoring Systems (TPMS)]; Motors, Pendulum, Electronic Parts; Electronic Manufacturing Equipment, Equipment Parts, Raw Materials of Self-produced Products, Mechanical Equipment, Mechanical and Electrical Equipment, Packaging Materials, Electronic Products and Software, Communication Products and Software, Paper Products (Excluding Books and Periodicals), Rubber And Plastic Products, Metal Products, Hardware and Electric Material, Ceramic Products, Office Equipment and Parts, Car Parts (Excluding Engines), Wholesale of Wires and Cables, Import / Export Agency (Excluding Auction) Operations. Mechanical Equipment Rental. Research and Development, Technical Consulting Services and After-Sales Maintenance Services for the Aforementioned Products.

Company Name	Business Scope
Talentek Microelectronics (Hefei) Limited	Electronic Equipment, Communication Equipment, ATE, Electronic Technology and Software Technology Development, Technical Consulting, Technical Services, Technology Transfer; Electronic Products, Integrated Circuit Production and Sales; Electrical Equipment, Communication Equipment, Automation Equipment Design, Research and Development, Testing, Sales; Commissioned and Commissioning of Semiconductor Integrated Circuit Products; Self-operated and Agency for Import / Export of Various Products and Technologies.
CircuTech Technology Service (Shenzhen) CO.LTD.	Computer software development; computers, servers, game consoles, optoelectronic equipment, data and language switches, routers, communication and network related card boards, mobile phones, LCD monitors, LCD TVs, automotive electronics, related electronic communication products and their components and inspection, maintenance, simple processing and after-sales service of accessory packages; international trade and domestic trade in the bonded area; import and export of goods and technology. Sales of electronic products and electrical appliances; recycling, sales and leasing of used flashlight products, electrical appliances and mobile phones.
Shanxi Kaopu Logistics Co., Ltd.	General cargo transportation, cargo distribution; cargo packaging, human decoration, cargo information consultation, sales of automotive supplies, auto parts; R&D and sales of computer hardware and software
Amworld Microsystems (Shanghai) Ltd.	Research and Development, Production and Processing of New Electronic Components, Digital Audio and Video Decoding Equipment, Broadband Access Network Communication System Equipment, Optical Cross-connect Equipment, Production Parts and Related Software for the Abovementioned Products, Sales of the Company's Own Products and Products of Similar Categories, Providing Related After-sales Services, and Import / Export of Goods and Technology.
Ambit Microsystems (Shanghai) Ltd.	Production and Processing of New Electronic Components (Chip Electronic Components, Power Electronics, Optoelectronic Devices, Sensitivity Components and Sensor Production, Power Amplifiers, Low Noise Amplifiers, Wireless Transmission Modules), Digital Audio and Video Encoding and Decoding Equipment [STB Set-Top Box, Client Access Media Gateway (IAD, MTA), Video Call, Voice Splitter], Internet Communication System Equipment, Asynchronous Transfer Mode (ATM) and IP Data Communication System, Network Switches, Routers, Digital Microwave Synchronization System Transmission Equipment, Optical Synchronization, Optical Cross related Transmission Connection Equipment, Notebook Computers, Liquid Crystal Displays, Mobile Phone Casings and Modules, Computer Thermal Devices and Modules; Precision Molds and Standardized Mold Parts, Cables, Connectors, Electronic Parts; Computers, Servers, Game Consoles, Music Players, PDAs, Telephones, Digital Cameras, Projectors, DVD Players, Portable DVD Players, Music Players (MP3), Video Players (MP4\MP5) and Peripheral Products and Parts of the Abovementioned Products; Satellite TV Broadcasting Ground Receiving Facilities (100% Export), Satellite Navigation and Positioning Receiving Equipment, Auto Parts; Packaging and Printing, Engineering Plastics and Plastic Alloy Production, Digestion and Reuse of Waste Plastics. Production of Parts, Related Software, Maintenance and Commercial Inspection for the Abovementioned Products, Sale of the Company's Products, and Research, Development and Pilot Programs (Including Cooperation with Domestic Research Institutes) of the Abovementioned Products, Transfer of Proprietary Research Results, Warehousing Services, Import / Export of Goods and Technology.
Ambit Microsystems (JiaShan) Ltd.	Sales (Including Online Sales) of: Daily Goods, Computer Hardware and Software and related Accessories, Digital Electronic Products, Hardware and Electricity, Handicrafts, Electrical Machinery and Materials, Decorative Materials, Plastic Products, Auto Parts, Communication Equipment, Communication Instruments and Meters; Prepackaged Foods and Bulk Foods, Dairy Products (Excluding Infant Formula Milk Powder), Fruits, Aquatic Products, Health Foods, Meat Products, Tea; Import / Export of Goods and Technology; Design, Publishing, Agency for Various Types of Advertising; Communications and Network Technology Engineering and Services, Industrial Design.

FuTaiKang Electronics Development (YanTai) Ltd.	Research and Development of Median-to-Large-Sized Electronic Computers, Portable Electronic Computers, New Electronic Components, Electronic-Specific Equipment, New Instrument Components, Precision Die, Standardized Mold Parts and Parts of the Abovementioned Products; Research and Development of High-End Routers, Network Switches, Large-Capacity Optical (Magnetic) Disk Drives and Components, Digital Camera and Key Components, Integrated Circuit, System Integrated Circuit, Operating System; Server, Game Console, Mobile Phone and Other Product Designs and Structural Design of Machine Components; Motorcycle Mold, Fixture Design; Transfer Proprietary Research and Development Results.
FuTaiKang Precision Components (ShenZhen) Co., Ltd	Production and Operation of Various New Electronic Components and Tools, Various types of Printed Circuit Boards, Power Plugs, Sockets and Computer Peripherals. Production and Operation of Electronic Game Machines, Digital Audio-Visual Systems and Accessories, Micro-Computers, Computer Mainframe Casing and related Stamping Hardware, Plastic Components. Digital Audio-Visual Systems and Accessories; Data Communication Multimedia System Equipment, New Technical Equipment Relating to Mobile Communication Networks and Mobile Phone Parts. Data and Voice Switches, Routers and Related Accessories, Information and Communication System Network Technology Development, Technical Consultation, Providing Company's Products After-sales Technical Services.
Futaijie Technology Development (ShenZhen) Co., Ltd.	Research and Development, Production and Operation of Mobile Phone Parts, Electronic Game Machines and Parts, Electronic Products and Parts; Wholesale, Technical Consulting, Import / Export and related Supporting Businesses of: Electronic Components, Computer Hardware and Software and Parts, Electronic Products and Parts, Mechanical Equipment and Parts, Gaming Equipment, Chemical Products Research and Development, Transfer of Proprietary Technical Achievements. After-sales Service of the Abovementioned Products; Import / Export of Goods and Technology; Corporate Management Information Consultation; Property Leases. Outsourcing Services for System Application Management and Maintenance, Information Technology Support Management, Financial Settlement, and Data Processing (Service Outsourcing).
FuTaiHua Industrial (ShenZhen) Limited	Non-Development, Design, Production and Operation of Pneumatic Control Components, Mobile Power, Mobile Phones, Mobile Communication Systems and Parts, Computer Motherboards and Peripherals, Metal and Plastic Products, Precision Molds, Microcomputers, Portable Computers, Laptops, Data Communication Multimedia System, New Display, Digital Audio-Visual Systems. Non-Quota Authorization Management, Acquisition and Export of Non-Licensed Goods, Packaging Business. Production and Operation of Medium-to-Large-Sized Electronic Computers, LCD Screen Parts; Environmental Protection (Sewage Treatment) Facilities Operations; Production and Operation of Mobile Communication Equipment (Including Wearables), Auto Parts, Point Of Sale Information Management System (POS), Smart Pen; Wholesale of Abrasive Materials. Production and Processing of Wireless Communication Testers, Toys. Digital Products, Electronic Products, Computer Hardware and Software and Supporting Equipment, Home Appliances, After-sales Consultation and On-Site Installation / Maintenance; Research and Development of: Wholesale, Technical Consultation, Technical Services, and advancement of similar products and Computer Software / Hardware for the Abovementioned Products, Export and Related Supporting Operations; Transfer of Proprietary Technical Achievements.

Hunan FLNET Trading Co., LTD.	Retail of Daily Sundries, other Electronic Products, Home Appliances, Computers, Software and Supporting Equipment, Communication Equipment, Department Stores, Security Technology Products, Electronic Components, Electronic Products, Photographic Equipment, Audio-Visual Products and Electronic Publications; Sales of Cards and Telephone Recharge Cards; Advertising Production Services, Publishing Services; Repair of Computers and supporting Equipment, Communication Equipment, Household Electronic Products, Home Appliances; Maintenance and Inspection of Imaging Equipment; Retail Services for Audio Equipment Appliances; Other Advertising Services; Advertising Design; Organization and Planning of Cultural Activities; Logo Design; Logo Production; other Office Equipment Maintenance; Home Appliance Installation; Home Appliance Troubleshooting; Home Appliance Repair; Computer and Communication Equipment Rental; Entertainment and Sports Equipment Rental; Audiovisual Products Rental; Other Culture and Daily Goods for Rent.
Guizhou Fuxuntong Trading Co., Ltd.	New Electronic Components, Electronic Products, Digital Products, Computers Software / Hardware and Supporting Equipment, and Parts, Network Equipment, Sales of Home Appliances, Merchandise Display, Technical Services and After-sales Consulting, Installation and Maintenance Services; Import / Export of Goods and Technology; Advertising Operations.
GUIZHOU FUNAYUANCHUANG TECHNOLOGY CO., LTD	Research and Development of New-Nano-Technology Products, Preparation of New-Nano-Technology Product Projects; Preparation of Manufacturing Projects for Touch Systems (Touch Screens, Touch Components, Etc.); Technology Development, Transfer, Service, Consulting, Intellectual Property Rights Consulting; Sales of the Company's Products; Import / Export of Goods and Technology; Wholesale, Import and Export of Electronic Products and Related Supporting Operations. Research and Development and Production of Nanomaterials (Carbon Nanotubes, Carbon Nanotube Lithium Batteries) and Composite Materials; Technical Services, Technical Consultation, Technical Training and Technology Transfer of the Company's Technology.
Guizhou FIH Precision Electronics Co., Ltd.	Engaged in New Electronic Components, Mobile Communication Systems, Mobile Phones, Wearable Smart End-User Devices, Base Station Equipment, Digital Clustering System Equipment, Electronic-specific Equipment, Tooling, Broadband Access Network Communication System Equipment, High-end Routers, Switches, Monitoring Equipment, Photo Recording Equipment, Research and Development, Technical Services, System Integration, Production, Sales, Import / Export Operations and After-sales Service of the Above-mentioned Products Parts.

Company Name	Business Scope
Guizhou Fuhuada Electronic Co., Ltd.	Research and Development, Production and Sales of Medium-to-Large-Scale TV, Medium-to-Large-Scale Computers, Portable Computers, Desktop Computers, Multimedia Data Processors, Mobile Communication Systems and Equipment, New Electronic Components, Electronic Whiteboards, Videowalls, New Energy, Energy Saving Products, LED Lamps, Solar Lighting Systems, Smart Lighting Poles, Smart Multimedia Network Machines, New Game Consoles, Electronic Digital Products, Smart Monitoring Equipment, and the Integration of Peripheral Products and Related Parts, Software and Hardware Applications of the Abovementioned Products, and After-sales Maintenance Service. Research and Development, Manufacturing, Testing, Installation, Maintenance of LED Display Products, Lighting System Energy-Saving Transformation, Urban Lighting Smart Control System, Contract Energy Management EMC. Wholesale, Import / Export of Related Products of the Abovementioned and related Supporting Operations.
Guizhou QianYu Electric Vehicle Service Co., Ltd.	Car Rental; Advertising Design, Production, Agency and Publishing; Car Wash Service; Car Detailing; Sales of Auto Parts; Parking Management; Automotive Technology Development; Software Technology Services; Taxi Service; Micro-Bus Service; Car Freight; Consulting Services; System Integration Services; Charging Services; Charging Station Sales; Electronic Automotive Sales.
EERDUOSI HongHan Precision electronics Co., Ltd.	Design and Manufacturing of Mobile Phones and Components; Design and Manufacturing of Precision Metal / Non-Metal Products Molds and Mold Related Parts; Design and Manufacturing of Automated Industrial Robots and Key Components; Design and Manufacturing of Automotive Electronic Products; Design and Manufacturing of Components (Motors, Batteries and Battery Management Systems).
DYNAMIC COMPUTING TECHNOLOGY CO., LTD.	Other Consultancy. Software Design Services. Data Processing Services. Retail sale of Computing and Business Machinery Equipment. Type II Telecommunications Enterprise.
Synergy Integration Technology (Shanghai) Inc	Engaged in R&D and related technical services of semiconductor production automation systems, R&D and technical services of semiconductor production application software, technical consultation of semiconductor production automation systems, development and development of chip and flat panel display software and hardware, and related technical consultation, sales of self-produced products. (Projects subject to approval according to law may be operated after approval by relevant departments)
SYNERGY INTEGRATION TECHNOLOGY, INC.	Electronic Parts and Components Manufacturing. Computers and Computing Peripheral Equipments Manufacturing. Wholesale of Computing and Business Machinery Equipment. Wholesale of Computer Software. Software Design Services. Data Processing Services. Digital Information Supply Services. Retail sale of Computing and Business Machinery Equipment. Retail Sale of Computer Software. Restrained Telecom Radio Frequency Equipments and Materials Import.
Polight Technologies Ltd.	Wholesale of Electronic Materials. International Trade. Research Development Service. Management Consulting Services. Product Designing. °
