I. Letter to Shareholders

In 2023, the global economy and trade were faced with many challenges. Inflation pressure and high interest rate environment reduced the demand in the end market and the willingness of manufacturers to invest. This was reflected in widespread market weakness and the supply chain's cautious attitude towards inventory management. However, under this significant challenge, with the joint efforts of all employees of Hon Hai, it still achieved NTD 6.162 trillion in consolidated revenue last year, the second highest level in history.

Global GDP growth in 2024 will be roughly the same as last year, and we maintain a neutral view on the information and communication industry this year. However, we expect the operating performance of Hon Hai this year will be better than the year before, thanks to the increase in demand for cloud-based network products from applications such as generative AI.

Given the rapid changes in the market, Hon Hai will give priority to ensuring the stability of operations, responding flexibly to market demands, exerting the core competitiveness of the Group, and assisting customers to enhance value. Hon Hai has also transcended from an EMS to a Platform Solution Provider. Through the BOL (Build Operate Localize) and Contract Design and Manufacturing Service (CDMS) business models, we are able to connect with partners in different regions through comprehensive integration. To create a win-win situation, we will also continue to grasp the leading technology trends and create long-term value for investors.

Financial Performance

Last year's consolidated operating revenue reached NTD 6.162 trillion, a decrease of NTD 464.8 billion from the previous year, mainly due to the macro environment and inventory adjustment, as well as the slowdown of post-pandemic end product demand. Nonetheless, we still posted a year-over-year increase of 0.4% and growth in three key financial ratios, a net income (attributable to the owners of the parent company) of NTD 142.1 billion, and an EPS of NTD 10.25. Earnings per share were the highest since 2008.

A core ICT business with both challenges and opportunities

After experiencing the period of rapid growth driven by the pandemic, the information and communication industry is facing a series of challenges. Central banks around the world have been raising interest rates to curb inflation, which not only slowed economic growth but also had a negative impact on the purchasing power of emerging markets. In this complex economic environment, customers' demand and purchasing power were weak, which also affected Hon Hai's revenue last year. In terms of products, the revenue from Smart Consumer Electronics, Computing, and Cloud and Networking products declined slightly from the previous year, while the revenue from components and other products was roughly flat.

Looking forward to this year, it is expected that Smart Consumer Electronics products such as consumer intelligence and computer terminals will still be affected by the geopolitical situation, but we also see growth opportunities in AI and EV. In view of the uncertainties of these external factors, we will strive to improve the competitiveness of our products, especially in the AI server market which is currently the fastest growing market, and the electric vehicle market which is still in its early stage of growth to ensure that we can compete in the constantly changing environment, maintain a leading position and create another growth momentum.

DIGITIMES Research pointed out that the global server market encountered multiple challenges last year, including the decline in demand for traditional cloud services in the post-pandemic era, the economic pressure brought about by high global inflation, and the surge in demand for generative AI technologies, leading to crowding out effect of server procurement budget. Under the influence of these factors, the global server sales showed a double-digit decline for the first time last year. However, the outlook for capital expenditure by North American cloud service providers (CSPs) this year has improved significantly. According to the information published by Bloomberg in early February this year, the capital expenditure of top four North American cloud service providers is expected to grow from a recession of 2% last year to a growth of more than 20% this year, which is expected to stimulate the recovery of server procurement activities.

In addition, according to TrendForce survey, the shipments of AI servers will grow by over 33% this year. In this high-speed growth area, Hon Hai has demonstrated its full range of manufacturing strength, from the upstream modules and substrates to the downstream servers and cabinets' overall design and manufacturing, and then to the data center construction; Integrated memories, switches, and advanced thermal solutions, especially in the development of upstream graphics chip (GPU) modules and substrates are the core strategy of Hon Hai's AI server development. In addition to expanding its presence in the upstream market, we have also begun to expand the downstream machine assembly, aiming to align the market share of AI servers with that of the overall server market. Hon Hai's huge server scale, manufacturing capacity, and vertical integration advantages are all factors that help customers to seize the opportunity.

After the sales decline of the past two years in the PC and smart phone markets, IDC expects the PC and smart phone markets to get out of recession and return to growth this year. With the stabilization of consumer products, the gradual recovery of the traditional server market and the clear growth trend of AI servers, we expect the overall operation of the information and communication industry this year will be better than that of last year, and Cloud and Networking products will be the main source of growth this year.

Continued promotion of new businesses

In terms of new business development last year, we not only made significant progress in the manufacturing of electric vehicles and the development of components, but also made significant progress in software development, semiconductor manufacturing and the deployment of the robotics business.

The successful IPO of Foxtron Vehicle Technologies Co., Ltd. in November last year marks a significant milestone for the company in electric vehicle industry. This achievement not only enhances Hon Hai's visibility in the electric vehicle field, but also demonstrates to our customers and investors our capabilities in Contract Design and Manufacturing Service (CDMS) and platform sharing. We believe that through the use of the CDMS model, Hon Hai will be able to assist automakers in achieving Time to Market and Time to Cost. Through the division between "branding" and "manufacturing" and combining standardized, modular, and platform-based production methods, we are confident that we can create the greatest added value for Hon Hai and our partners.

Looking forward to the vehicle layout, we have started to deliver the Model C electric vehicles in the first quarter of this year, which will become an important source of revenue for Hon Hai's electric vehicle business this year. The preparation for mass production of Model B electric vehicles will begin at the end of the fourth quarter of this year. This year, we will launch a new concept car model and expand these models to foreign countries next year. In addition, Hon Hai's Ohio factory in the U.S.A. has also officially started to deliver smart electric agricultural traction vehicles to customers in August last year.

In addition to the layout of complete vehicles, Hon Hai has also continued to develop parts and components for electric vehicles. In October of last year, we held the installation ceremony of Kaohsiung Battery Center. It is expected to start production in June this year and reach an annual production capacity of 1.2 million kWh in the third quarter of next year to provide the power for electric buses, passenger cars and energy storage, and key battery products. In addition, the battery factory in Qiaotou Science Park is also expected to start construction this year. It is expected to reach an annual production capacity of 3 million kWh next year. The products include cells, battery packs, LFP cathode materials, anode materials, etc., in order to establish a complete battery industry ecological chain.

In terms of electric vehicle software, the Advanced Driver Assistance Systems (ADAS) business of our subsidiary Flexicab have successively achieved results last year and have been positively recognized by customers in the industry. The Company's Level 2 ADAS products have been installed on Taiwanese car brands, and have also won orders from overseas customers. It is expected to be mass-produced this year. In addition, the new generation of Level 2.9 ADAS products are tested in Taiwan and overseas to ensure compliance with the standards of system testing and verification.

We have also made some achievements in the electric vehicle alliance. Last year, we announced to acquire 50% of the equity of ZF Chassis Modules GmbH. By working with ZF Group, we expanded the scope of business from automotive electronics to power chassis system, further enhancing Hon Hai's vertically integrated service capabilities. This not only allows us to achieve more competitive costs while maintaining stable quality, but also increases the possibility of more cooperation between us and traditional car manufacturers. In the future, we will continue to work with ZF Group to explore more cooperation opportunities in the field of transportation and mobility. In addition, the EV makers we have partnered with PTT are expected to complete final assembly this year, and are expected to start outsourcing orders. Last year, we established a joint venture, Silicon Auto, with the world's leading automotive manufacturer, Stellantis, with each party holding 50% of the shares. It is expected to provide a series of the most advanced design, sales and services of automotive semiconductors starting from 2026. In the field of semiconductor manufacturing, our wafer fab business has shown remarkable results and successfully obtained a number of key semiconductor manufacturing certifications, covering fields such as automotive manufacturing and carbon inventory. These certifications not only prove our professional and leading position in technology, but also provide a solid foundation for our competitiveness in the semiconductor market. In packaging and testing services, our packaging and testing plant has successfully mass-produced driver IC products, demonstrating our comprehensive capabilities in complete testing, gold bumping and dicing technologies. Overall, Hon Hai has the most complete semiconductor vertical integration in the world, and will spare no efforts to develop IC design field in the future.

FARobot is an important part of the robotics business layout of Hon Hai Group in its 3+3 strategy (three emerging industries: electric vehicles, digital health, and robots; and three new technologies: artificial intelligence, semiconductors, and new-generation communications). The industrial robot communication solution provided by FARobot has been gradually adopted by the production line of factory in Taiwan, and successfully expanded to the assembly and testing production line in Malaysia. In addition, the Company attaches great importance to the development of its plants in the United States, and plans to enter the Chinese market this year to further expand its business territory.

Research Development Status

Last year, Hon Hai established "Ion Trap Quantum Computing Laboratory" at Baogao Science and Intellectual Park in Xindian, New Taipei City. This is the first quantum computer development center in Taiwan's industry. The laboratory will be dedicated to providing high-performance computing resources for the next-generation AI and automotive technologies, and laying a solid foundation for the development of Hon Hai in the field of quantum technology. In addition, the laboratory will also utilize Hon Hai's leading advantages in precision manufacturing, semiconductor and packaging technologies, as well as the cultivation of talents, to accelerate the development of quantum hardware technology, thereby providing a powerful driving force for the progress of related technology industries. Last year, Ion Trap Laboratory successfully developed the core technology of the first-generation single-zone blade ion trap. Last year, we further upgraded and launched a new generation of more advanced multi-zone ion traps, which demonstrated our determination and ability to continue to innovate in the field of quantum computing.

Hon Hai is committed to developing excellent battery technology. Faced with the high cost of traditional ternary lithium batteries due to the precious metal cobalt, Hon Hai chose lithium nickel manganese oxide (LNMO) as an alternative cathode material. This method not only effectively reduces the cost of materials, but also reduces the size of the battery module due to high voltage characteristics of LNMO, which saves valuable space for our customers. In the development of lithium metal anode solid-state batteries, we have reached the industry's leading energy density level of 400Wh/kg. This achievement is due to our revolutionary innovation in battery technology, including the introduction of the distribution layer technology, which not only improves the overall performance of the battery but also increases the battery life by about 30%. This lithium metal anode solid-state battery is the result of the joint development between Hon Hai and Blue Solution of Canada. We plan to provide samples to customers this year, which will further consolidate our progress in the field of battery technology.

In the development of automotive SoCs, we have released the first self-developed general-purpose MCU tester IC, which is mainly used in body control systems such as headlights, direction signals and rear-view mirror motors. In addition, we have also launched a simulation development platform that combines a virtual automotive MCU with a physical ADAS computer to predict the direction of vehicle travel and improve vehicle safety. For automotive low-power and analog low-profile ICs, we have launched a full series of 1200V silicon carbide modules for electric vehicle propulsion to meet the needs of passenger cars, commercial vehicles and electric buses. In the future, we will also build a SiC power module factory and R&D center, becoming one of the few electric vehicle manufacturers in the world with the design and manufacturing capabilities of SiC components and modules. With our full range of capabilities from component optimization to architecture design, we can provide customers with better quality electric drive system solutions and ensure a stable supply of production capacity.

Effects of external competition, regulatory environment and overall business environment

In the field of Smart Consumer Electronics, rapid advances in technology and standards have increased the level of competition in the industry. In addition, the rise and fall of the consumer electronics industry is affected by geopolitical conditions, which make regionalization more and more important. Coupled with the seasonal fluctuations of the industry itself, it poses a major challenge to many manufacturers. With 50 years of extensive management experience in talent management, financial operations, logistics coordination and technological innovation, Hon Hai has established an unparalleled standard in the industry. We continue to strengthen supply chain integration, promote technological innovation, ensure stable production and strictly control costs, which enable us to maintain our leading position in the industry.

As the sales growth of the electric vehicle market is expected to slow down this year, manufacturers have cut prices in order to capture a larger market share. The auto union's strike last year led to an increase in labor costs for traditional auto makers, and at the same time, they had to deal with downward price pressure from electric vehicle makers. In this market context, the demand for outsourced manufacturing is expected to increase, which provides a good opportunity for Hon Hai to demonstrate its market strength. Faced with increasing global requirements for ESG and related regulations becoming more stringent, Hon Hai is striving to achieve the goal of net zero emissions, labor rights and corporate governance. Last year, we increased the adoption of clean energy, prepared the first TCFD Vision Report, introduced a third-party audit to ensure labor rights, and opened up external visits to major production sites to optimize our ESG activities with an open attitude. In the future, we will continue to promote the concept of sustainable development in our operations. We will continue to monitor changes in the law and the environment, and actively develop response strategies to minimize operational risks.

Continue to promote sustainable operation

Since 2021, the Company has implemented "0-to-6-year-old Company Care" program to provide childcare subsidies for infants and young children in Hon Hai families. Over the past five years, the program has benefited 1,746 children from Hon Hai. Last year, the Hon Hai Education Foundation distributed more than NTD 50 million of scholarship to support the educational needs of more than 2,000

students. In addition, through Starlight Project, the Foundation has established 22 service locations throughout Taiwan to provide after-school care, dinner and homework assistance for disadvantaged children, demonstrating the social responsibility of "supporting the elderly and the young." This year, we will launch Hon Hai Health Care Center project to provide professional care services to elderly family members, so that employees can work and enjoy life with peace of mind, while ensuring that their family members, whether old or young, are properly taken care of.

Last year, Hon Hai established Kai Hon Energy Fund, and will also establish similar green energy investment platforms in other regions to expand the acquisition of green energy resources, encourage suppliers to participate in green energy development and promote the sustainable development of the entire supply chain. Last year, Hon Hai Green Energy adopted more than 40% of green energy, and will continue to increase the percentage of adoption this year.

To promote environmental sustainability, we have also applied AI technology to reduce emissions and prevent pollution. For example, the software development center is precisely monitoring energy consumption to improve energy efficiency. In addition, we held "Supplier Low-Carbon Transformation Kick-off Conference" last year, which brought together nearly 30 suppliers who are committed to green transformation and work together to achieve the goal of net zero emission.

In terms of marine restoration, we cooperated with National Ocean University to release fry on Heping Island in Keelung and worked together to restore the marine ecology and improve biodiversity. In addition, employees of Hon Hai's Neihu Plant also actively participated in World Cleanup Day activities by volunteering at the park for a day to protect our natural environment.

External Honors and Affirmation

Hon Hai was awarded "Management Team of the Year" and "Investor Relations Team of the Year" by Institutional Investor Asia in the category of hardware technology last year. We also won the first place in "Best CEO", "Best CFO" and "Best IR Professional". In the same year, we also won two awards from IR Magazine, including "Best IR Event" and "Best Innovative Shareholder Communication", which highlighted Hon Hai's recognition by IR Magazine for three consecutive years in investor relations.

Foxconn University participated in the Brandon Hall Award, the "Oscar" in the field of human resources for the first-time last year, and its outstanding performance won the high recognition of "three golds, one silver and one bronze". This not only demonstrates the outstanding ability of Hon Hai in training and human resources development, but also symbolizes its leading position in the global industry. In addition, Chief Service Officer of Hon Hai, Kathy Yang Chiu-chin, stood out from the fierce competition of hundreds of international female executives and won the Asia Pacific Professional Female Executive of the Year award last year. This honor reflects Hon Hai's emphasis on talent development and gender equality. These two honors bear witness to the fact that Hon Hai has demonstrated its industry-leading strength and influence in talent training and leadership development.

Looking into the future, Hon Hai will abide by the strategy of "Sustainable Management = EPS + ESG" and strive to improve financial performance while actively promoting the practice of high standards of environmental protection, labor rights and interests, and high-standard governance, so as to demonstrate the commitment to sustainable management and social responsibility. These achievements have also been shared with our shareholders. The cash dividend payout rate of more than 50% for three consecutive years, and the cash dividend per share last year was the highest since our listing in 1991. We will continue to improve and bring stable returns and increase value to our shareholders.

Chairman, Liu, Young-Way

II. Company Introduction

A. Founding: Founding Date: February 20, 1974

Listing date: June 18, 1991

B. Formation History

- In 1994
1. Increased capital to NT\$1,303,000,000.
 2. Reinvested Vate Technology Co., Ltd.
 3. Reinvested LUNG HWA Electronics.
 4. Many new products like AN and AT were developed.
- In 1995
1. Increased capital to NT\$2,279,000,000.
 2. Reinvested Unimicron Technology Corporation.
 3. Reinvested United Microelectronics Corporation.
 4. Many new products like L/P MCA, SGC and RF were developed.
 5. Huyue Factory carried out its third phase for expansion.
- In 1996
1. Increased capital to NT\$3,580,000,000.
 2. Reinvested Hongyang Venture Capital Investment Co., Ltd.
 3. Reinvested Guifeng Co., Ltd.
- In 1997
1. Increased capital to NT\$5,118,000,000.
 2. Set up the heat transfer product business office and environmental-friendly electroplating technique development department.
 3. Established the Material Testing Center.
- In 1998
1. Increased capital to NT\$7,346,000,000.
 2. Established the High-Speed Electrical Test Lab, the EMI/RFI Lab and Heat Transfer Lab.
 3. Listed into The Information Technology 100 (IT 100) by the Business Week of America for the first time.
- In 1999
1. Increased capital to NT\$11,000,000,000.
 2. Capital was first raised from the international finance market via GDR issuance with 10% premium for issuing, creating a new high in overseas capital raising by domestic enterprises.
 3. Selected as the Best Management Company in Taiwan by Asian Money.
- In 2000
1. Increased capital to NT\$14,529,000,000.
 2. Issued US\$345 million of overseas unsecured and transferable corporate bonds.
 3. Invested Foxconn Optical Technology Inc. through its subsidiary – FOTI Holdings Corporation.
- In 2001
1. Increased capital to NT\$17,687,800,000.
 2. Evaluation of Taiwan Ratings as long-term issuer: grade AA- and its prospect: stability.
 3. Evaluation of Standard & Poor's (S & P): grade BBB and its prospect: stability.
 4. Became the first largest private manufacturing enterprise in Taiwan.
 5. It is the earliest manufacturer of quantity production around the world for Intel Pentium 4 CPU Stocket478.

6. Issued NT\$5 billion of domestic unsecured ordinary corporate bonds.
- In 2002
1. Increased capital to NT\$20,648,970,000.
 2. According to survey of Taiwan Ratings, it was the first largest manufacturing enterprise in Taiwan.
 3. Won the first prize of the Best Corporate Strategy by Asiamoney.com.
 4. Became the first largest exporter in Greater China.
- In 2003
1. Increased capital to NT\$25,191,744,000.
 2. Issued US\$450 million of overseas unsecured and transferable corporate bonds.
 3. According to evaluation of IR Magazine, it was awarded the Best Investor Relation in Taiwan.
 4. Acquired Motorola Chihuahua Factory in Mexico.
- In 2004
1. Increased capital to NT\$32,310,231,130.
 2. Acquired Eimo Oyji of Finland.
 3. Merged Taiwan Ambit Microsystems (Stock) Company.
 4. Became the first largest 3C OEM globally.
- In 2005
1. Increased capital to NT\$40,383,230,780.
 2. Invested Antai Power (Stock) Company through its subsidiary – Hongyang Venture Capital Investment (Stock) Company.
 3. Invested Chi Mei Communication Systems Inc. through its subsidiary – Transworld Holdings Limited.
 4. Issued NT\$11,500,000,000 of domestic unsecured ordinary corporate bonds.
 5. Its overseas subsidiary – Foxconn International Holdings Ltd. was listed in Hong Kong.
 6. Selected as the first largest enterprise in Taiwan firstly by CommonWealth.
 7. Ranked among the Top 15 of the World's Most Admired Companies in Electronics by Fortune.
 8. Became a member of Electronic Industry Code of Conduct (EICC), dedicated to promoting corporate social and environmental responsibilities (hereinafter referred to as SER).
- In 2006
1. Increased capital to NT\$51,681,387,530.
 2. Merged Taiwan Premier Image Technology Corp.
 3. Issued NT\$18,000,000,000 of domestic unsecured and transferable corporate bonds.
 4. Selected as the Happiest Taiwan Enterprise according to the questionnaire survey of 104 Job Bank.
 5. Selected as the Most Desirable Company of office staff of Taiwan according to the survey of Cheers.
 6. Nominated as the Best Investor Relation Company in Taiwan by IR Magazine.
 7. Nominated as the Best Corporate Governance of the Year in Taiwan by IR Magazine.
- In 2007
1. Increased capital to NT\$62,907,665,030.

(2) Awareness of the functional committees' responsibilities. (3) Improvement of board decision quality. (4) Functional committee composition and member selection. (5) Internal control.

2. Evaluation of the performance of the Board of Directors by an external professional and independent institution

On November 12, 2020, the Board of Directors of the Company established "Rules for Performance Evaluation of Board of Directors". External board performance evaluations are conducted at least once every three years. In November 2022, the Company appointed Taiwan

Corporate Governance Association to conduct the external board performance evaluation for 2022 (period from December 1, 2021 to November 30, 2022). The organization and the experts conducting the evaluation have no business relationship with the Company to ensure their independence. They conducted evaluations through questionnaires and online video interviews covering 8 major aspects: board composition, guidance, authorization, supervision, communication, internal control and risk management, self-discipline, and others. Taiwan Corporate Governance Association issued the board performance evaluation report on January 12, 2023. The report on recommendations and expected measures will be presented to the board on March 15, 2023. The overall assessment content and measures are as follows:

(1) Overview of the appraisal report

(i) The atmosphere of the Company's board meetings is becoming more and more open.

The chairperson values a transparent discussion culture, fully respects the opinions of board members, provide directors with sufficient time and information on the proceedings, and increases the frequency of board meetings, as well as more pre-meeting communications and project reports to achieve consensus and improve the efficiency of decision-making. Independent directors can make professional contributions and express opinions through various meetings, and play the role of guidance and supervision as directors.

(ii) The Company has added 2 seats of independent directors to the current Board of Directors, to a total of 5 seats of independent directors, accounting for more than half of the total seats of the Board of Directors, and they are all served by people with professionalism and rich management practices. Independent directors actively participate in and contribute their strengths to the operation of the Board of Directors, thereby enhancing the independence and diversity of the Board of Directors, and enabling the Board of Directors to guide and supervise the management team to play more effectively.

(iii) To enhance the transparency of the Company's information, the Company actively discloses ESG-related activities, and has established an ESG strategy and long-term goal in 2022. In order to be in line with international standards, the Company has committed to net zero carbon emissions by 2050, and participated in carbon disclosure projects; Communicate with international investment institutions so that the outside world can better understand the Company's ESG implementation results.

(2) Suggestions for improvement and future improvement plans

Item	Recommendations of the evaluation report	Measures expected to be taken by the Company
1	In order to give full play to the effectiveness of the Board of Directors and in addition to setting up statutory functional committees such as remuneration and audit, the Company established the Nomination Committee in 2022 to strengthen the selection system for directors and senior management. However, the sustainability committee currently set up by the Company is chaired by the chairman and leads the Sustainability Office to implement the formulation and implementation of relevant ESG policies and	The plan is to upgrade the perpetual committee to a functional committee of the board of directors.

Item	Recommendations of the evaluation report	Measures expected to be taken by the Company
	regulations. It is suggested that the Company may consider elevating the Sustainability Committee to a functional committee of the Board of Directors. On the one hand, the Company's policies and actions in the ESG field should be listed as an important theme of the Board's continuous attention, and the company's investment in this field can be announced to the public. This helps improve the Company's image by ensuring that stakeholders of the Company clearly recognize the Company's progress and results in this field.	
2	The Company has set up a Nomination Committee to make the appointment of directors and even senior executives more open and transparent in the future. This is actually a major progress of the corporate governance system; and the chairman has also expressed his desire to continue to promote other ideas to strengthen corporate governance. We suggest that your company consider The Nomination Committee has been expanded to be the "Corporate Governance and Nomination Committee," which enables Board members to constantly think about ways to further improve corporate governance, and enables the Board of Directors to continue improving and contribute to the improvement of corporate governance.	On October 27, 2023, the Board of Directors approved the expansion of the Nomination Committee into "Corporate Governance and Nomination Committee".
3	In response to the needs of the Company at each stage of development and the composition of the Board of Directors, it is recommended that the Board of Directors of the Company clearly understand the duties and responsibilities of each committee when it assumes office, and review the organizational rules regularly to clearly delineate the duties and responsibilities of each committee. Each functional committee shall review the duties of each functional committee accordingly. Established organizational rules and performance evaluation indicators to enhance the execution synergy of the Board of Directors and functional committees. The "Corporate Governance and Nomination Committee" suggested in Item 2 above may be used to assist in such a process.	It is intended that the "Corporate Governance and Nomination Committee" in collaboration with other responsible units, will be responsible for enhancing the execution synergy of the Board of Directors and functional committees.

Donation of 1 set of bottom nozzle for fire and disaster relief to Dingpu Fire Brigade, Tucheng District, New Taipei City (total price about NTD 90,000). 3. Donation of more than 300 sets of stationery items to the disadvantaged children in the 18 Hon Hai Education Foundation Starlight Project bases. 4. The Hon Hai Education Foundation collected 30 second-hand tablets and laptops from employees and donated them to "Tainan Baihe Commercial and Industrial" and "Chinese Childcare Organization Children's Care Association" to bring better learning opportunities to economically disadvantaged students. 5. Donation of rapid screening reagents to 31 institutions, including social welfare organizations, hospitals, and schools, totaling NTD 17,662,976.				

2. Climate-related information

(1) Implementation of climate-related information

Item	Implementation
1. Describe the monitoring and governance of climate-related risks and opportunities by the Board of Directors and the management. 2. Describe how the identified climate risks and opportunities affect the Company's business, strategy and finance (short, medium, and long-term). 3. Describe the financial impact of extreme climate events and transformation actions. 4. Describe how climate risk identification, assessment, and management processes are integrated into the overall risk management system. 5. If a scenario analysis is used to assess the resilience to climate change risks, the scenarios, parameters, assumptions, analysis factors, and main financial impacts used shall be described. 6. If there is a transformation plan in place to manage climate-related risks, specify the content of the plan, and the indicators and targets used to identify and manage physical risks and transformation risks. 7. If internal carbon pricing is used as a planning tool, the basis for setting the price shall be stated. 8. If climate-related goals are set, the activities covered, the scope of greenhouse gas emissions, the planning period, and the progress of each year should be explained; if using carbon offsets or renewable energy certificates (RECs) to achieve the goals, it should be explained In exchange for the source and quantity of carbon reduction credits or quantity of Renewable Energy Certificates (RECs). 9. Greenhouse gas inventory and assurance status, <u>as well as reduction goals, strategies, and concrete action plans.</u>	1. The Company's climate change management body is the Sustainability Committee, chaired by the Chairman. It reviews the Company's climate change strategies and goals, manages climate change risks and opportunities, and reviews the implementation status and discusses future plans on a yearly basis, and reports to the Board of Directors. The Board of Directors is briefed at least once a year on climate strategies, action plans, policies, budgets and business operations at board meetings. The Chief Environmental Protection Officer of the Company has set up Team E under the ESG team. The team is responsible for the implementation of greenhouse gas reduction paths and proposals, and regularly tracks and reviews the progress and results. 2. Based on the operating characteristics and industry characteristics of Hon Hai, and with reference to the risks and opportunities in the "Recommended Climate-related Financial Disclosures", the material value at risk was assessed by considering the possibility and extent of the impact, and with reference to the results of the stakeholders' issues of concern. The major climate-related risks and opportunities of the Group were summarized and consolidated into 3 major risks and 3 major opportunities. 3. Based on the TCFD framework, Hon Hai conducts financial impact assessment on the three major risks and opportunities of transformation and entity, sets mitigation and adjustment risks, and makes strategic planning for increasing industry opportunities. The estimated financial impact of climate change-related risks is mainly to achieve 2050 net zero emissions from the carbon reduction and decarbonization costs, including increasing energy conservation and carbon reduction facilities and self-built photovoltaic solar energy facilities, fees for renewable energy certificates, fees for the purchase of carbon rights, and additional fees from the instability of new carbon reduction technologies. 4. The Group has established a hierarchical risk management process based on the level of risk issues and unit functions. The overall climate-

	related risk management processes are improved based on the impact of different management levels and risk issues from the group, business group, legal person, and plant sites. 5. Hon Hai has released the Phase 1 TCFD Net Zero Vision Report. Currently, the Company is implementing the Phase 2 report on climate scenario analysis and discussion. The results will be announced on the official website once they are confirmed. 6. The Group has defined two core concepts, "Cleaner Production" and "Resource Management," and proposed a corresponding net zero emission reduction management and monitoring mechanism from the perspective of the Group's value chain in line with the three major climate goals. Starting from the core concepts of climate change mitigation, value chain management, promoting green and smart transformation, creating emerging industries, and improving operational resilience, the Group will gradually embrace the road to Net Zero. 7. Hon Hai is currently conducting a pilot project on internal carbon pricing and will announce the implementation results at a later date. 8. Hon Hai has set the proportion of green power utilization to more than 50% in 2030, and has committed to RE100. In order to achieve this goal, the Group vigorously develops self-built solar (photovoltaic) power stations and integrates electricity under green power procurement plans and investments. In 2023, the Group's use of green power in mainland China has reached 65%, including the direct purchase of clean energy of 352,848,800 kWh, 4,404,860 of Renewable Energy Certificates (RECs), and power generated by self-built solar power station of 300,780,000 kWh. In addition, Hon Hai issued sustainability-linked bonds (SLB) in 2023. 9. Please refer to the following table.

(2) GHG inventory and assurance in the last 2 years

A. Greenhouse gas inventory information

Describe the greenhouse gas emission volume (metric tons CO₂e), intensity (metric tons CO₂e/NTD million), and data coverage for the most recent two years.

Greenhouse gas emissions in the past two years, with the same boundaries as those described above (unit: tons of CO₂e)

Year	Scope 1	Scope 2 (market-based)	Intensity (tons CO ₂ e/NTD million)
2022	222,295	5,535,324	0.869
2023	232,248 (Mainland China)	1,928,758 (Mainland China)	Due to the incompleteness of the data, it will not be disclosed for the time being. After the subsequent data collection is completed, it will be disclosed in the Sustainability Report.

B. Greenhouse gas assertion information

Describe the status of assurance in the last 2 years up to the date of publication of the annual report, including the scope of assurance, institutions of assurance, criteria of assurance, and opinions of assurance.

The total greenhouse gas emissions disclosed by the Company for 2022 and verified by a credible institution using the Assurance Standard No. 3410 “Assurance Engagements on Greenhouse Gas Statements” are assessed to have limited assurance. In 2023, the total greenhouse gas emissions amounted to 22,199 metric tons of CO₂e (legal representative of Hon Hai), and also verified by a credible institution using the Assurance Standard No. 3410 “Assurance Engagements on Greenhouse Gas Statements” with limited assurance. Global assurance for 2023 is still in progress, and the results will be announced after completion.

C. Greenhouse gas reduction goals, strategies and concrete action plans

Describe the greenhouse gas reduction base year and data, reduction goals, strategies, and concrete action plans and achievement of the reduction goals.

Taking 2020 as the base year, the Company has set a target of 42% reduction in 2030 and net zero for 2050.

Regarding the greenhouse gas emissions of Scope 1 and Scope 2 within the Group's operating boundary, the Company adopts four major means to reduce greenhouse gas emissions: energy saving, direct purchase of green power, green power construction, and investment in the purchase of green power certificates. In order to promote carbon reduction in operations, the Company sets annual energy-saving indicators at the beginning of each year, and adopts incentive policies and information platform sharing to promote energy-saving technology upgrades among business groups and subsidiaries.

The Group continues to promote and implement energy-saving projects such as compressed air leakage management and high-efficiency air conditioning machine room renovation, continues to increase the installed capacity of rooftop and ground-mounted solar power stations through self-construction and acquisitions, and increase the usage and ratio of clean energy. In March of this year, we established Kai Hung Energy Co., Ltd. with CDIB Capital, to lead the investment in the sustainable green energy industry and provide the much-needed green power for enterprises.

In addition, in order to achieve Net Zero in the value chain, the Company is also promoting diversified carbon reduction counseling and demonstration projects in the supply chain. In the initial stage, the company actively communicates with suppliers on carbon reduction plans. Through on-site visits and production process research, the carbon assessments of workshop equipment were conducted to help them identify carbon reduction measures, and sharing of carbon reduction results and resources.

Through the summary and analysis of the results, the carbon reduction solutions with good results are extracted, and the carbon reduction strategies are refined year by year to assist the suppliers in achieving the green transformation.

Unit: Tons CO₂e

Base year	Scope 1	Scope 2 (market-based)	Reduction rate achieved

2020	277,369	5,199,433	Due to the incompleteness of the data, it will not be disclosed for the time being. After the subsequent data collection is completed, it will be disclosed in the Sustainability Report.

V. Operational Highlights

A. Business Content

(I) Business Scope

1. Main business activities

Information and communication industry, automation equipment industry, optoelectronics industry, precision machinery industry, automobile industry and consumer electronics industry, as well as related various connectors, casings, radiators, assembly products, optics, and the manufacturing, sales and service of network cable assembly and other products.

In addition to ICT product, the Company continues to expand into 3 new businesses in EV, robotics, and digital health, as well as the 3 core technology fields of AI, semiconductors and new-generation communications.

In 2023, the Group also launched three major platforms: smart manufacturing, smart EV, and smart city, and announced that it will transform from a technology manufacturing service provider to a platform solutions company.

2. Proportion of business

98% of the products are 3C electronics (Computer, Communication, Consumer Electronics). The output and sales volume of the recent two years can be found in the table of Production and Sales.

3. Current products

The products manufactured by the Company include:

(1) Smart Consumer Electronic Products (mainly smartphones, TVs, game consoles, etc.)

Personal consumer electronic products, including smart phones, feature phones, wearable devices, etc.; as well as smart home entertainment systems and equipment, including TVs, game consoles, set-top boxes, speakers, etc.

(2) Cloud and Networking Products (mainly servers, network communications and related products):

Enterprise and consumer network communication equipment, equipment required by cloud storage, including routers, servers, edge computing, data centers, satellite communications and other related equipment.

(3) Computing Products (mainly computers, tablets, etc.):

Work computing equipment, office and workplace computing products, including desktops, notebooks, tablets, office machines, printers, etc.

(4) Components and Others Product (mainly connectors, mechanical parts, services, etc.):

Upstream manufacturing and development of key components, technical components; including connectors, precision optical components, lenses, electronic components, semiconductor products, automotive electronic parts, tool/mold fixtures and mechanical equipment. Additionally, logistics, warehousing, software development, healthcare services, and industrial internet integration solutions also fall into this category.

4. New products, new industries and technologies planned to be developed

The Company actively transforms, upgrades, and promotes the transition from brawn-intensive industries to brain-intensive strategies of "F1.0, F2.0, and F3.0". In addition to the development lights-out factories and automation, the Company also focuses on our defined "3+3 categories" including the three industries of electric vehicles, robotics, and digital health; across three applications of AI, semiconductor and next generation communications.

Among them, electric vehicles and semiconductors will be one of the main growth drivers of the Company in the future. In the development of these two industries, we will continue to expand the fields of overseas markets, components, and software, as well as the localization of operations after construction (BOL) to cope with the industrial trend of globalization and regionalization.

Also, we will continue to expand our global manufacturing with local partners to allocate the best resources by our innovative business model – BOL Model (Build, Operate and Localize). Hon Hai uses the Contract Design and Manufacturing Service (CDMS) business model to perform professional division of labor. Customers can focus on product differentiation and brand building, while Hon Hai focuses on design, spare parts, and the manufacturing of vehicles. As the competition in the electric vehicle market is getting fiercer and fiercer, CDMS can bring the best Time to Market and Time to Cost. Therefore, more and more OEMs have recognized our business model.

In terms of semiconductors, the Company has also continued to strengthen its layout in IC design, and focused on the three major categories of driving assistance, electric drive, and automotive electronic platforms where the cost of electric vehicles has the highest proportion.

Hon Hai is transforming from a manufacturing service company into a platform solutions company. The Company will focus its future development on the three platforms of smart manufacturing, smart electric vehicles and smart city.

Due to the gradual maturity of GenAI, the 50 years of technology and experience the Group has accumulated in components, modules, and system assembly, as well as the experience and technical capabilities accumulated over the past decade in IC and software development, On this solid foundation, we will continue to develop the related technologies and products required for the three major platforms.

(II) Industry overview

1. Industry Status and Development

Current Status

Regarding the electronics industry in the recent years, smartphone accounts for the largest market share in consumer electronic products. According to IDC (International Data Corporation), the global shipment of smart phones in 2023 was less than 1.2 billion units, a decrease of 3% from the 1.21 billion units in 2022. This is mainly due to the overall economic slowdown and destocking and other challenges.

In terms of cloud network products, due to the cooling demand for traditional clouds and the high interest rate environment curbs corporate investment in the post-pandemic era, according to DIGITIMES Research, the annual server shipment in 2023 declined by more than 18% from the previous year. However, the rise of the AI industry will be helpful for the development of such products.

In the field of computer terminal products, Gartner estimates that global PC shipments will decline by more than 14% in 2023 to 240 million units. Mainly due to the pandemic, many consumers have purchased notebook computers, coupled with the continued downturn in the overall global economy, it has affected consumers' expectations and thus reduced their motivation to purchase new phones. In terms of tablet PCs, according to Sigmaintell, the global shipments of tablet PCs decreased by 18.2% in 2023 because some manufacturers have not updated their products, which has affected consumers' demand for tablet PCs.

For components and other products, the demand fluctuated depending on the sales of the end products.

The EV industry continued to grow significantly in 2023. According to DIGITIMES Research, global EV sales grew by 39% to 14.22 million units. The top three markets were China, Europe and the US in order, and China accounted for more than 50% of the market. The outstanding performance of China's electric vehicle market is mainly due to the promotion of government policies and the market share grab by carmakers, which has led to a year-on-year growth rate of 35%; the second largest market, Europe, has sales growth of 20% due to the impact of the Russia-Ukrainian War; the third largest market is the U.S., where Tesla continued to increase its production capacity and traditional car makers launched more electric car models for consumers to choose from, resulting in a sales growth of 78%.

Future Developments

In 2024, the performance of the ICT industry is expected to improve compared to 2023, mainly because the increase in generative AI applications and the improvement of AI server visibility have boosted the demand for cloud-based network products. AI applications will also be gradually expanded to the Edge. It is expected that related products will be launched in the second half of the year. In addition, as the global economy is relatively stable, the demand for consumer electronics has also stabilized.

According to Canalys, the global smart phone market shows signs of stabilizing in 2024, with shipments expected to grow by 4% to 1.17 billion units. The Company believes that the performance of this product category in 2024 will tend to be stable. In the part of cloud network products, as the large-scale cloud companies are expected to purchase general-purpose servers again, and the AI server shipments should be able to grow exponentially as the GPU supply gap eases. Based on the above factors, DIGITIMES

Research expects the overall server shipment to grow again this year. Benefited from the core competitiveness in the field of AI servers, including key technology R&D capabilities, highly digital manufacturing platform, complete vertical and system integration capabilities, deep cooperation with customers, and the Group's global strategic layout for 50 years, and Hon Hai became the leading supplier of AI servers. In 2024, Hon Hai is expected to achieve strong growth in related businesses, of which the revenue from AI servers will grow by more than 40%.

In the field of computer terminal products, according to Canalys analysis, as the PC sold during the pandemic will enter the trend of replacement, coupled with the launch of AI-enabled PC, the market is optimistic that the market will usher in a turning point this year, and the shipment volume is expected to return to growth. PC shipments are expected to grow by 8% in 2024. The performance of this product category is also expected to be stable.

In terms of components and other products, the improved outlook of the ICT industry this year will also drive the demand for related components. In the emerging electronics industry, such as, electric vehicles, robots, and the Internet of Things, each industry player is deploying from different angles, developing their own advantages, and gradually commercializing them. The Group is focusing on improving its product portfolio, so this category is expected to grow.

In the electric vehicle market, DIGITIMES Research estimates that global sales will exceed 18 million units in 2024. However, due to the higher base period, the growth rate may not be as good as the performance in 2021 to 2023.

Although research institutions have predicted that the sales growth of electric vehicles will slow down, the fiercely competitive market environment is still in line with the Group's previous expectations. We continue to believe that extreme weather will drive the growth of electric vehicles. If this factor remains unchanged, the sales of electric vehicles will continue to grow.

By adopting the CDMS business model, Hon Hai is able to assist OEMs in achieving faster Time to Market and Time to Cost benefits. Through the division of labor between "branding" and "manufacturing", we are able to create maximum value for our customers and ourselves.

Looking forward to 2024, the Model C will be delivered from the first quarter, and the shipment for the whole year is expected to exceed 10,000 units. The related sales will generate revenue exceeding NTD 10 billion, and it will be an important operation for the Group's electric vehicle business as one of the sources of revenue.

(b) The Industry Value Chain and Relationships

3. Various Development Trends and Competitive Situation of Products

There are four main product categories. In short-term, the company continues to expand the new businesses in EV and semiconductors:

(1) Smart Consumer Electronic Products (mainly smartphones, TVs, game consoles, etc.)

With the commercial launch of 5G and the gradual adoption of artificial intelligence (AI) into various technological applications, the consumer electronics industry will enter the era of intelligent networking driven by 5G and AI in the coming decade. In the development of 5G, AI and other related products, the Group has advanced deployment plans, analyzed market demand in advance, and continues to work closely with relevant customers; this combined with the Group's advantages, will enable 5G-related smart consumer products to be deployed timely in the market. Many companies have also seen opportunities and invested in. In addition, the Company's long-term focus on high-end mobile phone products has accumulated competitive advantages in scale, technology, speed, yield, cost, and globalization. Even in the face of the global industrial decentralization and the entry of new competitors, the Company can still occupy the largest market share shares.

(2) Cloud and Networking Products Category (mainly servers and networking products)

As a result of the gradual formation of HPC, 5G network and edge computing, enterprise users' purchasing needs of servers to ride on the tailwind of private cloud or even hybrid cloud have been driving worldwide server market growth. Recently, the market has paid attention to the AI server issue brought about by ChatGPT, but the Company has been working on it for a long time. The growth in this field has doubled in the last year, and will continue to have strong growth momentum this year.

The Company has been in the server market for a long time and our quality, technology and service have been one of the most recognized. The swiftly increasing need of a regionalized supply chain under a broad globalized framework from major server customers has raised the bar of manufacturers higher and hence we believe that the Company is well positioned to be a leading system provider on that front. The huge scale and joint development of cutting-edge technologies with customers, which have expanded our leading position in Cloud and Networking Products.

(3) Computing Products (mainly computers, tablets, etc.):

At present, computing products are more mature and stable. As more and more users accept streaming or cloud services across devices, the performance of desktop PCs and notebooks is no longer a consideration. In the post-pandemic era, the market may be able to stabilize the market volume, or the use of information devices such as tablets and flat-panel TVs that did not emphasize computing power in the past may be given priority to.

The demand and supply of this market is relatively mature. Producing high end Notebook, tablets, desktops, printer have been one of the Company's strengths. And also complete product lines, global footprint, and production capacity, supply chain make the company to obtain greater opportunities.

(4) Components and Others Product (mainly connectors, mechanical parts, services, etc.):

Such products are quite diversified, mainly to meet the needs of existing ICT customers, the Company will continue to expand the layout of key components, and increase revenue and profits. In the future, we will also aim to supply components for new businesses such as electric vehicles. These two fields are relatively large-scale industries at this moment. They attract more investment from different countries and enterprises, and there are different competitors in each field.

The company's key competitiveness lies in its long-term cooperative relationship with customers, a complete product line, precision manufacturing capabilities, global footprint, and solid operation management. The long-term development strategy is to establish a complete supply chain with our strategic partners, integrate the internal and external resources of the group. This enhance the competitive advantage of vertical integration and further improve our layout in the industry. And it enhance profitability.

(5) Electronic Vehicle

The total vehicle market size is around 4 trillion US dollar. Based on the market estimated, by 2025, the global EV market will reach 600 billion US dollar. Under the trend that the vehicles have started to adapt motors, instead of internal combustion engine, the complexity and components has significantly decreased. In addition to the direction of software-defined EV, ICT suppliers will have huge potential.

The Company created the MIH Consotium, an standardized and modularized open platform, with hardware and software integration. By BOL business model, it will help us expand our EV global footprint. On the one hand, it secure our client base and to develop higher-value components and software.

(6) Semiconductor

The Company's annual purchase of chips exceeds US\$70 billion. Apart from advanced production processes, many of these production processes are mature. In the past three years, the supply of mature process wafers has been tight, resulting in a bottleneck for product production. However, the Company's scale advantage has obtained sufficient supply and ensured the customer's shipping needs, which in turn has increased market share. Moreover, the chips used in electric vehicles in the future can be up to three times higher than the current. Semiconductors account for 30% of the cost of the entire vehicle, of which power IC account for the other half. It is expected that the cost of SiC will be higher in the future.

Mastering stable supply and differentiated functions ICs means are the key to electric vehicle manufacturing. And it is also one of the ICT clients' values. The company is one of few enterprises with entire semiconductor supply chain from upstream equipment, design, wafer fabs, packaging to testing plants, etc. Through the acquisition of production capacity through equity investment, BOL and joint venture models, and mergers and acquisitions of existing production capacity, we can acquire the chips we need for the development of ICT and electric vehicles with light assets.

(III) Technology and R&D Overview

1. The level of technology, research and development

The Company has utilized proprietary management methods for IIDM-SM; Integration; Innovation; Design; Manufacturing to Sales; Marketing, and coupled with Precision Molding; Material Technologies; Sustainable Manufacturing Technology; SMT Manufacturing Technology; Heat Transfer Technology; Plastic Processing; Metal Processing; Testing Capabilities; Automation Capabilities; Photoelectric Consolidation Technologies; Motherboard Design; E-Commerce Capabilities; Server Design; Wireless Communications and Light Display Modules, to achieve core competitive advantage. The Company also strives to provide the best 6C (Computers, Communication, Consumer electronics, digital Contents, Car parts and modules, Channels) foundry services with our strategic partners globally, and create maximum value for shareholders.

Looking to the future, the Company will remain committed to innovation and R&D; develop cutting-edge prospective applications; commercialize and realize product designs; bring to market the fruits of our research, and continue systemization of management processes, to solidify and maintain the Company's lead in core competencies.

Development of control board EV1 for the charging nest system of UAV Z customer. 16. Development of the power distribution module EV1 for the UAV system of customer Z. 17. Development of the brain computing module EV1 for the UAV system of UAV Z customer. 18. Development of EV1 battery board for UAV system of customer Z. 19. Development of UAV Conformal Coating/Potting technology. A 20.11 kW AC charging station undergoes safety certification verification and is being introduced into mass production. A 21.240 kW DC charging station is designed and undergoing safety certification testing. 22. 9.6kW on-board charger P0 design and function verification. 23. 30kW power module P0 design and function verification.

(IV) Long and Short-term Business Development Plans

1. Short-term Business Development Plans

The Company pursues continued excellence in operational management and cost control, vertical integration, global footprint and provide a “One-Stop Shop” solution for global leading brands. Our commitment is to maintain the high quality of service and related added-value services enable computing, communication, consumer electronics (3C) to enrich lives of the world population.

In addition to securing a leading position in the electronic foundry service (EMS) industry, we are also actively advancing into new product areas and expanding the business of

components, hoping to improve customer service and satisfaction through a more complete supply chain, and improve the Company's profitability.

In the future, the company will leverage ICT advantage and integration capability to enter the electric vehicle market. At the same time, in order to serve customers and create product differentiation, we are also enter the semiconductor industry to provide more diversified services and strive for more business opportunities. The Company will continue this pursuit and provide a diverse range of services, capture business opportunities and deepen our relationships with international brands.

In order to respond to the various economic and trade environment to provide customers with more complete services and strengthen the company's competitiveness, the company not only continues to expand investment but also strengthen our technology, production capacity, automation and other capabilities, in order to match ICT and electric vehicles to regional manufacturing trend. We are also deploying in Europe, America and Asia. In the future, the company will continue to establish relevant production bases, design centers and service centers around the world to meet the needs of customers for design, manufacture and global assembly and delivery.

2. Long-term development plans

The Hon Hai Group is already the world's largest electronic manufacturing service company, with a market share of more than 40%. Therefore, the Company will continue to assist first-tier customers to develop new products and enter new markets, and maintain its leadership in the ICT field.

The Company has also formulated a transformation and upgrade plan to gradually shift from a labor-intensive industry to a brain-intensive industry, in order to upgrade the industry level and increase profits. Therefore, the Company is committed to the development of three major industries, electric vehicles, digital health, and robots, and to the three core technologies of artificial intelligence, semiconductors, and new-generation communications, and has adopted the "3+3" strategy as an important development strategy.

The Company has also established five research institutes and one laboratory through the Hon Hai Research Institute to develop key technologies for the next three to seven years. After the R&D results mature, they will be transferred to the business department for commercial transfer, thereby continuously providing forward-looking technology and growth momentum.

The Company is transforming from a manufacturing service company to a platform solutions company, and will focus on the three major platforms of smart city, smart manufacturing and smart electric vehicles as the main development direction in the future.

Through the contract design and manufacturing service (CDMS) business model, more and more OEMs are showing interest in our model as the competition in the electric vehicle market becomes increasingly fierce.

Through the contract design and manufacturing service (CDMS) business model, the Company has received more and more vehicle manufacturers' opinions on our business model as the competition in the electric vehicle market becomes increasingly fierce.

In the field of semiconductors, the Company continues to strengthen the development of IC design, and focuses on the three core areas of electric vehicle cost with the highest proportion: assisted driving, electric drive, and automotive electronic platform.

The Company is transforming from a manufacturing service company to a platform solutions company, and will focus its future development on three major platforms - smart manufacturing, smart electric vehicles and smart city.

Due to the gradual maturity of generative AI, the Group combines 50 years of technology and experience in parts, modules, and system assembly, and the Group's experience and technical capabilities accumulated in IC and software over the past decade. On this solid foundation, we will continue to develop the related technologies and products required for the three major platforms.

B. Production and Sales Status

(I) Market analysis:

1. Regions where major products (services) are sold (provided)

The Company's products are divided into four categories. Core sales areas cover three continents: Europe, America and Asia.

2. Market share

According to statistics from Bloomberg, the Company ranked first in the electronic foundry service (EMS) field in 2023, with a global market share of 46.1%.

3. Future market supply and demand and growth

The following is a summary of the development of the industries in which the Company's four major categories of products belong:

(1) Consumer electronics (mainly smart phones, TVs, game consoles and other products): As far as smart phones are concerned, the United States, Europe, and China are all mature markets, and the growth of local mobile phone shipments has slowed down. In the future, the growth momentum of the smart phone market will come from emerging regions. In particular, the increase in 5G coverage in China has further boosted the number of 5G smart phone users, and the Chinese smart phone brands have gradually matured and their market share has gradually increased.

In addition, India is also a fast-growing region. As the local smartphone adoption rate is still low; as local telecom companies continue to increase network coverage outside of Tier 1 and Tier 2 cities, the region will attract major smartphone manufacturers to actively invest. It is one of the main driving forces provide growth for global smartphone shipments in the future.

Even with the many years of smartphone hardware developments behind us, the high-end products are still continuing to differentiate and innovate. Leading brands vie to increase added value for smartphones and attract additional income. Smart accessories have become a lynchpin for many brands, accessories such as bracelets, watches and external lenses. Smartphone brand customers around the

world continue to expand outsourcing. In addition, mobile phones are getting lighter and thinner while functions continue to improve. 5G components and mechanisms are more complex and precise than ever. Manufacturers with vertical integration capabilities and mass production capabilities can help brand customers reduce costs and improve competitiveness. There are still opportunities for development in the future.

(2) Cloud computing products (mainly servers, network communication products, etc.): The main products include servers, storage equipment, and network communication equipment. The overview of the relevant industries is as follows:

(i) Server/storage equipment

Cloud computing is on the rise. Many business data have been separated from the physical walls of enterprises and stored on the platform of cloud service providers. The computing services are also outsourced to the cloud service providers. The main reasons for the growth of the overall server industry are the trend of enterprise server replacement and the continued demand from cloud service providers. The application of generative AI has also driven the demand for AI servers, and there will be strong growth momentum in this field.

(ii) Switches and Routers

The popularization of 4G/5G communications, the rise of big data centers, and the promotion of the Internet of Things have driven a significant increase in network traffic. Companies around the world are actively expanding 4G/5G and fiber-optic equipment and strengthening related infrastructure. To ensure a seamless network traffic, lower response times from databases, cloud service providers have continued to invest in related infrastructure. Overall, this market is maintaining its healthy growth. This service will also benefit as AI servers pursue higher performance and require high-speed switches to be connected in series.

(3) Computer terminal products (mainly computers, tablets and other products):

(i) Tablet PCs

In terms of size category, IDC estimates that small-size tablets under 8 inches are squeezed by large-size smartphones, and thus will continue to decline; future tablet products will focus on more than 8 inches and even more than 9 inches. In the large-size market, the larger screen combined with the keyboard design meets the needs of users for content production.

(ii) Computer products: The PC industry dominated by the Wintel camp has been relatively less topical in recent years. IDC believes that in mature markets, there is only a pure replacement demand for PC. In emerging regions, the growth of PC is not significant, because smart phones and tablets have already met many consumer needs.

The PC industry has gone through a growth stage, and the industry has gradually consolidated. Many small brands have merged or withdrawn one after another. In the past, the competition among manufacturers has tended to be moderate. Under this macro environment, big brands with more resources and vertical integration capabilities are likely to benefit.

- (4) Components and Others Product (mainly connectors, mechanical parts, services, etc.): Components include mechanical parts, thermal modules, optics, electronics, PCB and semiconductors. The components themselves will be affected by the demand for products in the three major areas mentioned above. In the related parts and components categories, the optics (touch modules, camera modules, dot matrix projector modules, etc.) and semi-conductor (packaging and testing, wafer fab, semiconductor equipment, chip design, etc.) will be one of the important driving forces for the Company's future growth.

4. Competitive Niche

The company's competitive advantage lies in its complete global footprint, huge production capacity, vertical integration, speed of mass production, and partnership with customers. These are the reasons why we can maintain our leading position in the industry, and are also the most important value for our customers. In the EMS business, we have accumulated nearly 50 years of highly professional management capabilities in managing people, money, logistics, and technology, and it is even more difficult to imitate. Other competing niches are as follows:

- (1) Precision molding technology
- (2) Vertical integration and manufacturing capabilities of plastic molding, stamping, mold-flow, to mechanical components.
- (3) Creation of internal high speed network systems
- (4) Mechanical and barebones computer design capabilities
- (5) Heat transfer and noise treatment capabilities
- (6) SMT software and hardware testing technology
- (7) Rapid mass production capability of PCBA
- (8) Photoelectric consolidation capabilities
- (9) Management Global supply chain management know-how

5. Favorable and unfavorable factors of development prospects and countermeasures

(1) Favorable Factor:

- (i) The structure of the global industry is still undergoing adjustment, and the ability of vertical integration help us to get more outsourcing business opportunities.
- (ii) Close partnership with tier-one customers around the world.
- (iii) The turnaround for 3C product life cycle continue to be squeezed, and the importance of timeliness continue to play a key factor, eCMMS is in a prime position to provide speed, quality, engineering services, flexibility and cost considerations, and can assist the Company's opportunities.
- (iv) With the most complete industrial chain layout, we can quickly introduce solutions to meet customer needs.
- (v) A complete ecosystem of overseas manufacturing, marketing bases to increase the flexibility and efficiency of global resource integration operations which is well managed and can cater to clients' needs.
- (vi) Standardization, computerization, and automation, establish a cooperative operation system of industrial management, quality control, production

- management, and economic management.
- (vii) A firm grasp key capabilities of mold development, and new product development.
 - (viii) The electric vehicle industry is growing rapidly, and will move towards division of labor and ICT in the future, with advantages in design, manufacturing, vertical integration, cost, and global layout.
 - (ix) The stable supply of mature semiconductors has become the key, and it has the advantages of vertical integration from design, fab, packaging plant, plant, equipment, and customers.
- (2) Unfavorable factors and countermeasures
- (i) Slowly growth of the ICT industry
Countermeasure: Improve management capabilities, engage more key components, and develop new products to ensure the long-term development of the existing ICT field. At the same time, investing in new businesses such as electric vehicles and semiconductors in the form of light asset BOL, creating a future growth engine.
 - (ii) Fiercely competition in core business
Countermeasures: With continuously competition, we are also constantly stabilizing vertical integration, improving technical level, cost control and other production capabilities. And the company can increase our leading position in the face of industrial competitiveness.
 - (iii) Regional manufacturing pioneer
Countermeasures: Hon Hai has a diverse and wide range of product lines for many years, so it has carried out regional production in accordance with product characteristics and customer requirements. The company's business experience accumulated in more than 20 countries and more than 100 bases around the world will be able to expand rapidly and show management advantages.
 - (iv) Geopolitics and pandemic
Countermeasures: By flexibly adjust our capacity, supply chain management, inventory management, we shall be able to mitigate short term impact. In the mid to long term, we will leverage our R&D and capacity across major campuses to diversify the risk. In the future, whether it is in the development of new products or planning for mass production, the Company will consider risk diversification and prepare various off-site backup plans.
 - (v) Inflation and raw material costs rising
Countermeasures: Inflation and raw material prices rising and have impact on t assembly business and it will dilute the gross profit margin. We will still take customer demand and maximizing EPS as the top priority.
 - (vi) Rising costs
Response: To address the challenges of manpower and rising costs, we have established a collaborative operation system for industrial control, quality control, production control, and management through standardization, computerization, and automation. At the same time, the company leverage our global layout for flexible capacity allocation, which is reflected in the selling price in a timely manner to reduce the impact.

(vii) Environmental regulations and international trends

Regarding the issue of global warming, the company has responded to the 2050 net zero carbon emission target, introduced renewable energy, invested in scientific carbon emission reduction plans, and join net zero carbon emission action alliance, from energy saving, emission reduction, greening, we continuously put efforts in recycling, green energy, etc., echoing global environmental protection trends.

(II) Important Applications and Production Process of Main Products

The Company's products are divided into four major categories: consumer electronics, cloud networking products, computer terminal products and components, and other products. These mainly consist of information and communication products, which are commonly used in consumer or commercial areas.

Mainly focus on EMS assembled products, and carry out the process of design, parts development, manufacturing and assembly, quality control testing, and shipping to meet customer needs.

(III) Supply Status of Main Raw Materials

The raw materials used in the Company's connectors, chassis and assembly products include copper, plastic pellets, gold salt, and steel. The supply status is as follows:

1. Copper materials: The Company has strategically formed alliances with multiple suppliers to continuously and stably supply the needs for production.
2. Plastic pellets: Jointly develop special materials for connectors with domestic and foreign manufacturers to improve the quality of production. Prices are negotiated annually, and leverages the Company's economy of scale for bulk purchases to ensure price competitiveness.
3. Gold and salt: The price is calculated based on the international gold price quotation. Suppliers have been able to deliver goods directly to the factory and shorten the delivery days to reduce the Company's transportation and inventory risks.
4. Steel materials: Joint development of materials for computer bases with domestic and foreign manufacturers. The Company utilizes market price or annual price negotiations for steel, and leverages the Company's buying power to maintain favorable prices.
5. The raw materials required for other assembly and memory products include PCBs, capacitors, and ICs. This product is processed in accordance with customer needs, and the raw materials can be directly obtained through customers.

D. Information on Environmental Protection Costs

(a) The loss caused by environmental pollution during the latest year and up to the printing date of this Annual Report:

None

(b) 1. The main workshops and production facilities of the Company are located in Tucheng Industrial Park or Hsinchu Science Park. The Company takes environmental protection as its priority, and carries out immediate correction once discovering any problem. It also makes inspection on the existing preventive facilities. Apart from creating a good working and living environment for its employees and the neighborhood, it strictly complies with the discharge standard. For the pollution and wastes generated in the production process, the Company takes the following steps to protect the environment:

- (1) Prevention of water pollution: set up wastewater treatment plants and water quality analysis laboratory in Tucheng factory. Chemical method is applied in wastewater treatment, in which pollutants are removed from wastewater and discharged through discharge outlets. The lab has various instruments to measure temperature, PH value, chemical oxygen demand and suspended solid and analyze heavy metal, so that daily inspection on discharging water can be made and water discharge can be well controlled. The Company's Huyue Plant and Dingpu Plant have both obtained the consent letter for the connection of waste (sewage) water to use the sewage sewer system (Bei Cheng Zi No. 1135060030 and Tu Fu Zi No. 1115062177, respectively), and obtained the following water pollution permits certificates: New Taipei City Huanshui Xu Zi No. 04774-02 (Huyue Plant); New Taipei City Shui Xu Zi No. 05854-00 (Dingpu Plant No. 1) ; New Taipei City Huanshui Xu Zi No. 05855-00 (Dingpu Plant No. 2).
- (2) Prevention of stationary pollution source: waste gas is collected by extraction pipes, and released to the air after the pollutants are removed through the wet scrubber. Every year, the external testing organization is commissioned to detect the viscosity of pollutants in exhaust gas

and reports the result to the competent authorities of environmental protection. The Company obtained the Operating Permit of Stationary Pollution Source in 1998 and extended it in June 2008. The permit No. is: BXCZD No. F0447-02. Currently, the total consumption of acid and alkali does not meet the control standards, and the Permit was returned to the authority per Letter No. 1012095840 from the Environmental Protection Bureau.

- (3) Cleaning of wastes: Works are done in accordance with the Waste Cleaning Plan, and the disposal of waste is reported online in a legal way, and wastes are legally cleaned and recycled.
- (4) Management on toxic chemicals: Toxic chemicals are stored separately and strictly controlled. Moreover, documents on use and inspection are obtained legally, and periodically reported to the component department of environmental protection.

2. The Company has been adhering to the environmental policy of “pollution control and prevention, continuous waste reduction, providing environment-friendly products, protecting the earth, creating a green enterprise,” and strictly abiding by laws and regulations on environmental protection and clients’ requirements by means of effectively controlling raw materials, manufacturing process and delivery. Besides, it is dedicated to continuous improvement in order to better product quality, make sure the products free from restricted materials and promote the transformation of upstream suppliers to green supplying chain so as to comply with RoHS requirements.

3. Current pollution status, the influence of improvement on the Company’s earnings, competitive position and capital expenditure, estimated major expenditure on environmental protection in the following two years:

(1) Estimated capital expenditures for environmental protection in the next two years:

The environmental protection expenditure in 2024 and 2025 is expected to be NTD 57,893,700 and NTD 41,319,500 respectively. The main environmental protection expenditure and items will include:

- (i) Expenses for the replacement, renewal, and addition of polluting equipment
- (ii) Operating expenses of pollution prevention equipment
- (iii) Additional environmental monitoring expenses
- (iv) Waste-related treatment expenses

(2) Influence after improvement

- Effect on net income: None
- Impact on competitive position: None

E. Labor Relations

Current important labor agreement and implementation:

The Company has been treating its employees with sincerity and established mutual trust with them through its welfare system and good training system that guarantee a fulfilling and stable life for them. Though there is no union in the Company, but the Company has established “Workers and Employers Meeting” and have established comprehensive employee communication channels, its employees can give full play to

their team spirit, coordinate the Company's decision, cooperate with each other to create a harmonious environment for working. The Company pursuant to the relevant labor laws and regulations, to protect the legitimate interests of employees, provides employees with safe and healthy working environment, and set up an employee feedback and complaints mechanism. And we disclose employee welfare measures, retirement system and implementation situation on the company's official website. The Company adopts the followings measures to build a harmonious labor relation:

(1) Welfare Measures for Employees:

Founded in July 1985, apart from members appointed by each Business Unit, the remaining members are proposed and elected by employees. The committee members are re-elected every three years, and there are dedicated members appointed to deal with the routine administrative works of the Committee.

Meanwhile, the Company has established the Health Department, which has developed a series of welfare measures to employees and their families in terms of health improvement and health care.

At present, the welfare offerings by the Welfare Committee are as follows:

1. Safe and healthy catering services: An employee cafeteria and a food safety testing center are set up to perform daily sampling inspections of factory meals and process health and safety audits. Team nutritionists have established clear calorie and nutrient settings, and limit the proportion of processed foods and preserved products.
2. Comprehensive employee health management:
 - (1) Medical consultation: Establish a diversified professional medical team such as physicians, nurses, pharmacists, nutritionists, sports coaches, and physiotherapy to provide integrated health management and services. Based on employees' needs, we also provide remote health consultation and consultation, and case tracking and care for employees with chronic diseases to take care of their safety and health.
 - (2) Health care: Multiple health examination institutions are carefully selected to control the quality of employee health examination. Provide a variety of health check programs and flexible choices of health check limits. Professional medical and nursing staff will provide personalized checkup assessment recommendations and regular follow-up reminders to meet employees' health needs.
 - (3) Psychological support: The Company provides employee assistance programs (EAP), which cover eight aspects: career planning, family, interpersonal relationships, relationship issues, emotional issues, legal issues, financial issues, and health issues, to maintain the physical and mental and social health of employees.
 - (4) Health promotion: Establish a one-stop health platform to regularly share global infectious disease information and health knowledge research, and

organize health seminars and ideal weight strategy courses to enhance employees' health awareness.

- (5) Stress-relief at LOHAS: An employee gym is equipped with professional coaches to instruct colleagues on exercise postures and the use of equipment to ensure employees' safety when exercising. Small group courses such as aerobics and stretching are offered regularly, along with online exercise videos to liven up the Group's sports culture. Provide blind massage service to relax the body and mind.

3. Multi-faceted employee welfare:

- (1) Employee group insurance.
- (2) Subsidies for employees' annual health examination.
- (3) Subsidies for club activities.
- (4) Subsidies for employee education and training.
- (5) Gifts for employees' birthdays and festivals.
- (6) Year-end activities and lottery draws.
- (7) Bonuses on weddings and funerals.
- (8) In addition to childbirth allowances, employees are encouraged to have children (including spouses), and care measures such as transportation subsidies and maternity benefits are provided to pregnant female employees.

(2) Employee Communication Channels

The Company actively builds a bridge of communication with employees, and listens to employees' voices through multiple two-way communication to ensure timely response and achieve labor-management harmony. Relevant communication channels are as follows:

1. The Company's internal website/APP: announce the Company's major events and recent promotional content. Assist employees to quickly obtain company-related information.
2. Labor-management meetings: labor-management meeting is held every quarter to coordinate labor-management relations, promote labor-management cooperation, and prevent various labor problems before they arise.
3. Employee feedback and complaints: The Company's internal website and APP provide corresponding problem response channels according to different reasons, so that employees' work and environment-related problems and suggestions can be responded to in a timely manner. The feedback is regularly reviewed by dedicated personnel to ensure smooth feedback channels.
4. Seminars and satisfaction surveys: From time to time, employee seminars and various types of satisfaction surveys are conducted. Plans and improvements are implemented based on the opinions of employees.
5. Employee engagement survey: The survey covers 12 aspects of sustainable employee engagement, willingness to stay, and high-performing employee, including inspirational vision, integration of diversity, understanding goals, trust

in leadership, teamwork, supervisor's support, agile transformation, participation and voice, organizational efficiency, fulfillment of potential, ability improvement, reasonable rewards, etc. Among them, "organizational efficiency" has a high degree of recognition, which means that employees can achieve "balance between work and personal life"; employees in the aspects of "realizing potential" and "participating and speaking" are higher than the global high-tech industry standards; colleagues further express their hope to strengthen their understanding of the Company's strategy and development, and to improve cross-departmental communication among teams.

(3) Career Development and Training for Employees

Education and training are basic employee welfares provided by the Company. The Company encourages employees to “take on-the-job-training, and apply what they’ve learned to work”. The Company takes training as a means to improve employee quality and their work skills, promote the group performance, facilitate the realization of its operation target of “long term, stability, development, science and technology, internationality”. In 2023, the Company organized a total of 406,739 hours of education and training, and the expenses for education and training were about NTD 2,648,200. The training contents are as follows:

1. Orientation for new employees

Guide new recruits to become familiar with courses such as organizational evolution and corporate culture, work environment, labor safety and health, general affairs services, employee benefits, personnel regulations, education and training system, general legal affairs, and information security.

2. Management trainee program

The 6-month long Management trainee program includes three portions: Firstly, a team-based training to familiarize trainees with the Company and business groups and innovation and creative problem solving courses, to increase the trainees ‘soft-power’ and adaptability; secondly a practical production line training, for trainees to understand overseas manufacturing facilities and learn related know-how; lastly, departmental training, a mentorship program that allows trainees to learn on the job.

3. Development of management skills

A tailored training program to meet different needs of different employees at different management levels according to their management needs. The training prepares trainees “organizational, people, and systemic” management skills.

4. Hon Hai Foxconn University

Training program prepared by Hon Hai Foxconn University, to create a systemic management training and online learning platform. Taking a process-oriented, simplified, logical, standardized, systemic, and information-based approach to training programs.

5. International lectures/seminars

The Company invites elites and successful entrepreneurs from different industries to lecture and engage in discussion. Lecturers come from fields such

as but are not limited to industry trends and 3+3 new business, electric vehicles, digital health, robotics, artificial intelligence, semiconductors, new generation communication technology and related fields.

6. Health and well-being lectures

The health management center regularly invites physical and mental health experts to hold appropriate courses during each season in order to help the colleagues to relax after work and to receive in-depth health promotion related knowledge. Courses include exercise, mental well-being, CPR, AED.

(4) Code of Conduct or Ethics

In order to enable all employees to have a better understanding of ethics, rights, obligations and the code of conduct, the Company hereby works out the relevant measures and regulations to provide a basis for all employees. The relevant measures are briefed as follows:

1. Organizational Responsibility and Judgement of Authority

- (1) Rules on decision-making authority and authority decentralization: to improve work efficiency, strengthen the management on authority decentralization.
- (2) Organizational structure of departments and responsibility of each position: clearly regulate the organizational function of each unit and the scope of responsibility and authority of employees.

2. Assist All Employees to Understand Relevant Measures and Regulations.

- (1) Tutoring programs for new employees: to eliminate the new employees' insecurity towards the new environment and soon familiarize the corporate structure, work environment, culture, and colleagues after reporting for duty, and help them to get their mind and body ready for work and reduce new employee turnover rate.
- (2) Code of Conduct: In order for all employees of the global factories to jointly promote the sustainable operation of the Company and fulfill their social responsibilities as a citizen, all employees are required to receive training and comply with the Code of Conduct.
- (3) Special Chapter on Employee Human Rights: The Company publishes the Chapter on Employee Human Rights and provides training in accordance with international human rights guidelines to enable employees to understand the Company's human rights commitments and related policies. The human rights policy helps employees better understand their rights and responsibilities, and ensures that all employees inside and outside the Company can work in a fair and respectful environment.
- (4) Code of business ethics: to improve the behavior quality, business ethics and professional ability of all employees, and to pursue the Company's interests within the legal scope. Every employee has the responsibility to prevent the Company's interests from being lost or impaired and is obliged to maintain

the Company's reputation so as to guarantee its sustainable growth and development.

- (5) Working rules: clearly regulate various working conditions, personnel management regulations, etc., so that employees can follow.
- (6) Employee attendance and leave management measures: The Company will improve the attendance and leave system to establish good work discipline for employees.
- (7) Rewards and punishments regulations: Rewards or punishments are given to employees' behaviors or actions that bring about profits or losses to the Company's operations.
- (8) Employee salary/position promotion: Encourage talents to grow at the same time as the Company. The Company has formulated the "Regulations Governing Annual Promotion of Employees" to take into account the performance, contribution and potential of talents, and implement annual promotions in an open and fair manner through training and rotation plans to provide talents with a clear career development path, saving the organization's talent momentum.
- (9) Employee performance appraisal: The Company evaluates employees' work achievements and performance as the basis for salary adjustment, promotion, bonus distribution and arrangement of education and training courses.

(i) Performance Participation Opportunities

Employees are given equal opportunities to participate in performance appraisals, regardless of their nationality, gender, identity or background. At the same time, we encourage employees to set diversified performance targets that take into account their different backgrounds, abilities, and contributions to reduce unfair treatment of specific or disadvantaged groups.

(ii) Performance evaluation

There is a consensus resolution mechanism for performance calibration to improve the consistency of the scoring standards for performance evaluation, reduce evaluation bias, and improve the fairness of evaluation and evaluation. Employees' performance evaluations are based on indicators such as goal achievement, work attitude, and performance. The process is fair and objective, and is not affected by individual personnel backgrounds.

(iii) Performance communication

Encourage managers to provide feedback in an inclusive manner, and value respect and support during the evaluation process. If an employee has any doubts about the results of the performance appraisal, they can also raise an appeal to the supervisor of the business unit or the human resources unit.

- (10) Protection of employees' rights and interests: In order to ensure that the rights and interests of employees are treated more fairly and properly, and that employees' voices can be timely fed back to the responsible units, the Company has formulated the "Management Measures for Employee

Opinion Sexual Harassment in the Workplace, Complaints, and Disciplinary Measures", "Management Procedures for Personnel Review on Important Employee Incidents", and "Standards on Employee Safety Abnormal Incidents and Information Reporting." In addition to protecting the rights and interests of employees through management measures, the Company has established diversified channels for employees to express opinions, and designed a review mechanism in various measures to form a consensus decision on matters through committee discussion, to avoid bias or abuse of power when handling employee incidents. In 2023, Hon Hai Group believed that the app received a total of 189 complaints or opinions from employees through its Opinion Channel, Employee Portal, and emails.

- (11) Diversity and equality in the workplace: The Company does not discriminate against employees based on their gender, age, nationality, place of birth, ethnicity, language, physical and mental disability, marriage, pregnancy, sexual orientation, religion, political party affiliation, and union membership. The Company establishes a code of conduct and a chapter on human rights for employees, and trains all employees to work in a people-centered environment that respects tolerance, diversity and equality. Given that the Company is in the electronics manufacturing industry, it has a high percentage of male employees, and therefore a relatively high percentage of male supervisors. The Company also regards the percentage of female employees as supervisors as an indicator of workplace diversity. In addition, the Company pays attention to the gender equality and diversity of the composition of the Board of Directors. Currently, there are 7 directors in the Board of Directors, including 2 female directors, accounting for 28.57% of the whole.

(5) Working Environment and Protective Measures for Employee's Personal Safety

1. The Company promotes the occupational safety and health management system. Since 2019, it has been converted and certified by SGS certification company, and obtained ISO45001 (valid from November 24, 2022 to November 24, 2025) and CNS45001 certificates.
2. The Taiwan Conference on Epidemic Prevention, Production Safety and ESG was held to formulate guidelines for epidemic prevention and safe production in Taiwan and create a healthy and safe working environment.
3. Regularly convene the occupational safety and health committee and discuss the company's safety and health policy with labor representatives, commit and pursue the goal of zero injuries, zero occupational diseases, zero accidents, and create the best working environment for all employees.
4. Plan and promote the operations related to safety and health in the factory. In 2023, we won the "Occupational Safety and Health Personnel Merit Award from the Ministry of Labor" and the "New Taipei City Industrial Safety Award Individual Dedication and Contentment Award - Special Excellence" from the New Taipei City Government.
5. According to the "Guidelines for Implementation of Disaster-free Working Hour by Business Units", Huyue Plant has participated in the disaster-free working hour record competition, and by the end of 2023, it has reached 13,274,504 disaster-free working hours; Dingpu Plant has recorded 2,868,049 disaster-free hours.
6. Industrial safety: A Safety and Disaster Prevention Center is set up at the Tucheng headquarters. Each plant can exchange safety messages instantly, provide immediate safety and disaster prevention information, and can establish dedicated response teams based on disasters such as typhoons or pandemics. Emphasis is placed on emergency response personnel training, thus strengthening the Hon Hai Group's safety and disaster prevention system.
7. Security and Fire Protection System Management: Managed the factory safety and security equipment, and constructed the industrial safety cloud and other modules to ensure that the software, hardware, and management mechanisms for the factories are in normal operation. Electric equipment such as switch panels in the plant were tested with an infrared thermal imager, and a thermal infrared imaging promotion team was established. A total of 21 personnel completes the test report on a regular basis. Problems are identified and improvements are made, effectively reducing the hidden dangers and risks of fire in the plant.
8. Occupational health: Inventory the physical and chemical hazard characteristics of each unit in accordance with the annual safety and health management plan, and complete the operating environment monitoring plan including a sampling strategy. The operating environment is better than the legal requirements. Completion of four major programs (unlawful workplace violations, human-factor hazards, maternal health protection, and overwork) with reference to legal guidelines to protect employees from occupational diseases and unlawful violations.

9. Education, training and activities: In 2023, a physical check-in event was held for the "Taiwan Factories Safety, Health and Health Month". The themes of the event included: belief in positive energy, physical breakthrough (fire extinguisher training, firefighting water jet, smoke escape, electric bus escape safety, environmental protection and recycling, and human health) (construction, seminar, emergency response, and improvement proposal), a total of 11,249 people participated in a total of 10 events. In addition, a total of 25 safety and health proposals were processed to jointly optimize and enhance the safety and health of the colleagues' workplaces and provide a friendly workplace.

(6) Retirement System

The Company has formulated the retirement and pension plans for employees according to the Labor Standards Act and the Labor Pension Act, including:

1. Retirement application: The Company has formulated the "Retirement Management Regulations" in accordance with the "Labor Standards Act" and the "Labor Pension Act" to provide employees with clear and unambiguous application regulations and procedures, as well as the operation dates and approval authorities of each unit of the Company.
2. Qualification under Labor Standards Act (old system): defined benefit pension plan
 - a. Retirement application: a worker may apply for voluntary retirement under any of the following conditions: where the worker attains the age of fifty-five and has worked for fifteen years; where the worker has worked for more than twenty-five years; where the worker attains the age of sixty and has worked for ten years.
 - b. Pension payment: the retirement pension base shall be one month's average wage of the worker at the time when his or her retirement is approved. Two bases are given for each full year of service. Those having served over 15 years are given one base for each full year of service and the total number of bases shall be no more than 45. Length of services is calculated as half year when it is less than six months and as one year when it is more than six months. As set forth in Article 54 of the Labor Standards Act, an additional 20% on top of the amount calculated according to the preceding shall be given to workers forced to retire due to conditions incurred from the execution of their duties.
 - c. Employee retirement reserve allocation: The Company shall set aside 2% of the total employee monthly salary amount and deposit them into the employee retirement reserve account pursuant to the applicable retirement system provided by the Labor Standards Act; and ensure that this amount cannot be used as a subject of transfer, seizure, offset, or collateral. Before the end of each year, the employee retirement reserve account balance shall be calculated. If the balance is insufficient to pay employees with conditions specified in Article 53 or Subparagraph 1, Paragraph 1 of Article 54 of the Labor Standard Act for the next year, the Company shall make up the differences before the end of March next year.

d. The supervision of pension funds: Since January 1987, the Company legally established the Supervisory Committee of Workers' Retirement Fund, which is re-elected every three years and in charge of checking the amount, deposit and withdrawal as well as payment of retirement fund so as to ensure employees' rights.

3. Qualification for the Labor Pension Act (new system): defined contribution plan

- The Company grants 6% per month: according to the Monthly Appropriation Scale of the Labor Pension issued by the Bureau of Labor, the Company appropriate 6% of the worker's monthly wage to his/her personal pension fund account.

INDEPENDENT AUDITORS' REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of Hon Hai Precision Industry Co., Ltd.

Opinion

We have audited the accompanying consolidated balance sheets of Hon Hai Precision Industry Co., Ltd. and its subsidiaries (the "Group") as of December 31, 2023 and 2022, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of material accounting policies.

In our opinion, based on our audits and the reports of other independent auditors (please refer to the Other matter section), the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2023 and 2022, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations that came into effect as endorsed by the Financial Supervisory Commission.

Basis for opinion

We conducted our audits in accordance with the Regulations Governing Financial Statement Audit and Attestation Engagements of Certified Public Accountants and Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Group in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. Based on our audits and the reports of other independent auditors, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Group's 2023 consolidated financial statements. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters for the Group's 2023 consolidated financial statements are stated as follows:

Cut-off of hub sales revenue

Description

Refer to Note 4(36) for accounting policies on revenue recognition.

The Group recognises revenue upon acceptance of the goods by the customers (when control of the products is transferred) if picked up from hub. For pick-ups from hub, the Group recognises sales revenue based on movements of inventories contained in the statements or other information provided by the hub custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves

numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and the discrepancy in inventory quantities between the physical inventory and accounting records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, we identified the cut-off of hub sales revenue as a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

- A. Assessed and tested the appropriateness of internal controls over the cut-off of hub sales revenue for a specific period prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognising movements of inventories and respective transfer of cost of goods sold.
- B. Confirmed or conducted physical count of inventory quantities held at hubs and agreed to accounting records.

Allowance for inventory valuation losses

Description

Refer to Note 4(14) for accounting policies on inventory valuation, Note 5(2)3 for uncertainty of accounting estimates and assumptions in relation to inventory valuation losses, and Note 6(7) for details of inventories. As of December 31, 2023, the Group's inventories and allowance for inventory valuation losses amounted to NT\$753,087,940 thousand and NT\$22,322,539 thousand, respectively.

The Group is primarily engaged in manufacturing and sales of 3C electronic products. Due to rapid technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. The Group recognises inventories at the lower of cost and net realisable value, and the net realisable value is estimated based on historical experience. An allowance for inventory valuation losses is provided for those inventories aged over a certain period and those individually identified as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realisable value for individually obsolete or damaged inventories is subject to management's judgment, we considered the allowance for inventory valuation losses a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

- A. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.
- B. Validated the appropriateness of system logic of inventory aging report utilised by management to ensure proper classification of inventories aged over a certain period.

- C. Evaluated the reasonableness of inventories individually identified as obsolete or damaged by checking the related supporting documents and comparing with the information obtained from physical inventory count.
- D. Discussed with management the net realisable value of inventories aged over a certain period and individually identified as obsolete or damaged, validated respective supporting documents and reperformed the calculation.

Impairment assessment on goodwill arising from the acquisition of Belkin International Inc. (“Belkin”) and its subsidiaries

Description

Refer to Note 4(21) for accounting policy on impairment assessment of non-financial assets, Note 5(2)1 for critical accounting estimates and assumptions in relation to impairment assessment of goodwill, and Note 6(13) for details of impairment loss.

As of December 31, 2023, the Group had goodwill arising from the acquisition of Belkin and its subsidiaries amounting to NT\$11,684,205 thousand.

Impairment assessment is performed based on the value in use calculation using the discounted cash flow model to determine the recoverable amounts of the cash-generating unit (“CGU”). As the key assumptions, including expected growth rate and discount rate, used in the calculation of expected future cash flows involve significant judgement and estimation uncertainty and have a significant impact in assessing goodwill impairment, we considered the impairment assessment on goodwill arising from the acquisition of Belkin and its subsidiaries a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

- A. Obtained an understanding of, and validated the key control procedures performed by management, including review and approval of financial budgets and assumptions.
- B. Assessed the appropriateness of the valuation methodology used in determining the recoverable amount.
- C. Involved valuation specialists to assess the reasonableness of the key assumptions, including expected growth rate, expected gross margin and discount rate, used as follows:
 - a. Evaluated the assumptions used, mainly expected growth rate and expected gross margin used in the impairment assessment by comparing them to historical results, economic and industry forecast;
 - b. Benchmarked the discount rate range which is used in determining the recoverable amount against certain market data and industry research; and
 - c. Performed sensitivity analysis over key assumptions used in the model to evaluate the potential impact on the recoverable amounts.

Other matter – Reference to audits of other independent auditors

We did not audit the financial statements of certain consolidated subsidiaries. Those financial statements were audited by other independent auditors, whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included in the consolidated financial statements relative to these consolidated subsidiaries was based solely on the reports of other independent auditors. Total assets of those consolidated subsidiaries amounted to NT\$126,305,856 thousand and NT\$150,659,032 thousand, constituting 3.21% and 3.64% of the consolidated total assets as of December 31, 2023 and 2022, respectively, and total operating revenues amounted to NT\$175,267,526 thousand and NT\$228,515,755 thousand, constituting 2.84% and 3.45% of the consolidated total operating revenues for the years then ended, respectively.

Other matter – Parent company only financial reports

We have audited and expressed an unqualified opinion with other matter paragraph on the parent company only financial statements of Hon Hai Precision Industry Co., Ltd. as at and for the years ended December 31, 2023 and 2022.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations that came into effect as endorsed by the Financial Supervisory Commission, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing the Group's financial reporting process.

Auditors' responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

- A. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- B. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal controls.
- C. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- D. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- E. Evaluate the overall presentation, structure, and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- F. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision, and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we

determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

HON HAI PRECISION INDUSTRY CO., LTD. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2023 AND 2022
(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS,
EXCEPT AS OTHERWISE INDICATED)

1. HISTORY AND ORGANISATION

Hon Hai Precision Industry Co., Ltd. (the “Company”) was incorporated as a company limited by shares under the provisions of the Company Act of the Republic of China (R.O.C.). The Company and its subsidiaries (collectively referred herein as the “Group”) are primarily engaged in the manufacture, sales and service of connectors, case, thermal module, wired/wireless communication products, optical products, power supply modules, and assemblies for use in the IT, communications, automotive equipment, photo-electricity, precision molding, automobile, and consumer electronics industries.

2. THE DATE OF AUTHORISATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORISATION

These consolidated financial statements were authorised for issuance by the Board of Directors on March 14, 2024.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS®”) issued by International Accounting Standards Board (“IASB”) and came into effect as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC and became effective from 2023 are as follows:

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IAS 1, ‘Disclosure of accounting policies’	January 1, 2023
Amendments to IAS 8, ‘Definition of accounting estimates’	January 1, 2023
Amendments to IAS 12, ‘Deferred tax related to assets and liabilities arising from a single transaction’	January 1, 2023
Amendments to IAS 12, ‘International tax reform - pillar two model rules’	May 23, 2023

Except for the following, the above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment.

Refer to Note 6(37) for details of the quantitative impact:

Amendments to IAS 12, “International tax reform - pillar two model rules”

The amendments give companies temporary relief from accounting for deferred income taxes arising from the tax law enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development (OECD). An entity shall neither recognise nor disclose information about deferred tax assets and liabilities related to Pillar Two income taxes.

(2) Effect of new issuances of or amendments to IFRS issued by the IASB as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC and will become effective from 2024 are as follows:

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IFRS 16, 'Lease liability in a sale and leaseback'	January 1, 2024
Amendments to IAS 1, 'Classification of liabilities as current or non-current'	January 1, 2024
Amendments to IAS 1, 'Non-current liabilities with covenants'	January 1, 2024
Amendments to IAS 7 and IFRS 7, 'Supplier finance arrangements'	January 1, 2024

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

(3) IFRS issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRS as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by IASB
IFRS 17, 'Insurance contracts'	January 1, 2023
Amendments to IFRS 17, 'Insurance contracts'	January 1, 2023
Amendment to IFRS 17, 'Initial application of IFRS 17 and IFRS 9 – comparative information'	January 1, 2023
Amendments to IAS 21, 'Lack of exchangeability'	January 1, 2025

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

4. SUMMARY OF MATERIAL ACCOUNTING POLICIES

Unless otherwise stated, the principal accounting policies applied in the preparation of these consolidated financial statements set out below have been consistently applied to all the periods presented.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers", International Financial Reporting Standards, International Accounting Standards, IFRIC® Interpretations, and SIC® Interpretations that came into effect as endorsed by the FSC (collectively referred herein as the "IFRSs").

(2) Basis of preparation

A. Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:

- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
- (b) Financial assets at fair value through other comprehensive income.
- (c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

- (a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
- (b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
- (d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.
- (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive

income in relation to the subsidiary should be reclassified from equity to profit or loss or transferred to retained earnings as specified by applicable IFRSs.

(a) In January 2022, the Group's subsidiary, Fulian Yuzhan Precision Technology Co., Ltd., acquired 63% equity interest in Shenzhen Hengdrive Electric Co., Ltd. at a price of

RMB 378,000 thousand. Shenzhen Hengdrive Electric Co., Ltd. was included in the consolidated financial statements starting from the acquisition date.

- (b) In January 2022, the Group disposed a 100% equity interest in the subsidiary, Foshan Pulida Technology Co., Ltd., at a price of RMB 381,893 thousand and recognised total gain on disposal in the amount of RMB 276,029 thousand. Foshan Pulida Technology Co., Ltd. was not anymore included consolidated financial statements starting from the date of disposal.
- (c) In May 2022, the Group's subsidiary, Bon Shin International Investment Co., Ltd., participated in the cash capital increase of the investee, XSEMI Corporation, whose 49% equity interest was formerly held by Bon Shin International Investment Co., Ltd. through acquiring new shares of XSEMI Corporation at a price of \$1,599,000. Bon Shin International Investment Co., Ltd. cumulatively acquired 51% equity interest in XSEMI Corporation which was included in the consolidated financial statements starting from the date control was obtained.

On May 17, 2023, the Group sold 6% of the shares held in XSEMI Corporation and received cash amounting to \$204,000. In June 2023, the Group lost majority of the seats in the company's Board of Directors. As a result, the Group lost its control over XSEMI Corporation and it was not anymore included in the consolidated financial statements. The Group recognised its investments in the former subsidiary at fair value on the date that control ceased amounting to \$1,602,920 (shown as 'investments accounted for under equity method') and recognised gain of \$221,741 presented as 'other gains and losses'. The major assets of the subsidiary when it ceased to be included in the consolidated financial statements were investments accounted for under equity method amounting to \$3,036,895.

- (d) The Group acquired equity interest in Asia Pacific Telecom Co., Ltd. (APT) in 2019 and included APT as a subsidiary as the Group had acquired the largest portion of voting rights in the shareholders' meeting of APT and directed the relevant activities of APT. On December 15, 2023, the registered ordinary shares in APT were exchanged for the newly issued ordinary shares in Far EasTone Telecommunications Co., Ltd. (FET) at a ratio of one share of APT to 0.0934406 share of FET, and since then, APT merged with FET and APT was the dissolved company. The Group lost control over APT and APT was not anymore included in the consolidated financial statements. The Group recognised the investment in FET at fair value of \$11,580,784 (shown as "financial assets at fair value through other comprehensive income") and gain on disposal of a subsidiary of \$3,895,596 (shown as "other gains and losses"). Refer to Note 6(40) D. for details.
- (e) The Group included Foxtron Vehicle Technologies Co., Ltd. as a subsidiary as the Group had acquired the largest portion of voting rights in the shareholders' meeting of Foxtron Vehicle Technologies Co., Ltd. and directed the relevant activities of Foxtron Vehicle Technologies Co., Ltd.

- (f) The Group's subsidiary, Hong Jin Chang Holdings Co., Ltd.-Hong Kong, was dissolved and liquidated during the year ended December 31, 2022.
- (g) On July 3, 2023, the Group's subsidiary, Foxconn Interconnect Technology Singapore Pte. Ltd., acquired Prettl SWH GmbH and its subsidiaries at an adjusted price of EUR 193,091 thousand. Prettl SWH GmbH and its subsidiaries were included in the consolidated financial statements starting from the acquisition date. Prettl SWH GmbH then changed its name to FIT Voltaira Group GmbH ("Voltaira"). Refer to Note 6(39) for relevant information.
- C. Subsidiaries not included in the consolidated financial statements: None.

Note: The summarised financial information of the subsidiaries stated above were based on each subgroup's consolidated balance sheets, consolidated statements of comprehensive income and consolidated statements of cash flows in the presentation currencies of their own and translated into New Taiwan Dollars at the closing exchange rate at the corresponding balance sheet date and average exchange rates of the corresponding period, respectively.

(4) Foreign currency translation

A. The consolidated financial statements are presented in New Taiwan Dollars, which is the Company's functional and the Group's presentation currency.

B. Foreign currency transactions and balances

(a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise, except when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges.

(b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.

(c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

(d) All foreign exchange gains and losses are presented in the statement of comprehensive income within "other gains and losses".

C. Translation of foreign operations

(a) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;

ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and

iii. All resulting exchange differences are recognised in other comprehensive income.

(b) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Group still retains partial interest in the former foreign associate after losing significant

influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.

(c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(d) Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing exchange rates at the balance sheet date.

(5) Classification of current and non-current items

A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:

(a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;

(b) Assets held mainly for trading purposes;

(c) Assets that are expected to be realised within twelve months from the balance sheet date;

(d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.

B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:

(a) Liabilities that are expected to be settled within the normal operating cycle;

(b) Liabilities arising mainly from trading activities;

(c) Liabilities that are to be settled within twelve months from the balance sheet date;

(d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.

- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value and recognises the gain or loss in profit or loss.
- D. The Group recognises the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(8) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved both by collecting contractual cash flows and selling financial assets.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value:
 - (a) The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.
 - (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognised in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

(9) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
 - (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.

- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(10) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.
- C. The Group's operating pattern of accounts receivable that are expected to be factored is for the purpose of receiving contract cash flow and selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognised in other comprehensive income.

(11) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income and financial assets at amortised cost including accounts receivable that have a significant financing component, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(12) Derecognition of financial assets

The Group derecognises a financial asset when one of the following conditions is met:

- A. The contractual rights to receive the cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows of the financial asset have been transferred; and the Group has not retained control of the financial asset.

(13) Leasing arrangement (lessor) – Lease receivable / Operating lease

- A. Based on the terms of a lease contract, a lease is classified as a finance lease if the lessee assumes substantially all the risks and rewards incidental to ownership of the leased asset.

- (a) At commencement of the lease term, the lessor should record a finance lease in the balance sheet as 'lease receivables' at an amount equal to the net investment in the lease (including initial direct costs). The difference between gross lease receivable and the present value of the receivable is recognised as 'unearned finance income of finance lease'.
 - (b) The lessor should allocate finance income over the lease term based on a systematic and rational basis reflecting a constant periodic rate of return on the lessor's net investment in the finance lease.
 - (c) Lease payments (excluding costs for services) during the lease term are applied against the gross investment in the lease to reduce both the principal and the unearned finance income.
- B. Lease income from an operating lease (net of any incentives given to the lessee) is recognised in profit or loss on a straight-line basis over the lease term.

(14) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average method. The cost of finished goods and work in progress comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

(15) Investments accounted for under the equity method / associates

- A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognised at cost.
- B. The Group's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
- C. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Group's ownership percentage of the associate, the Group recognises change in ownership interests in the associate in 'capital surplus' in proportion to its ownership.
- D. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting

policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

- E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under the equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of or transferred to retained earnings directly according to the requirements in IFRSs.
- F. Upon loss of significant influence over an associate, the Group remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognised in profit or loss.
- G. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate, are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of or transferred to retained earnings directly according to the requirements in IFRSs. If it retains significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
- H. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(16) Investment accounted for using equity method- joint ventures

The Group accounts for its interest in a joint venture using equity method. Unrealised profits and losses arising from the transactions between the Group and its joint venture are eliminated to the extent of the Group's interest in the joint venture. However, when the transaction provides evidence of a reduction in the net realisable value of current assets or an impairment loss, all such losses shall be recognised immediately. When the Group's share of losses in a joint venture equals or exceeds its interest in the joint venture together with any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the joint venture.

(17) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each component of property, plant and equipment that is significant in relation to the total cost of the item is depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change.

The estimated useful lives of property, plant and equipment are as follows:

Buildings	15 ~ 51 years
(Auxiliary buildings	5 ~ 11 years)
Machinery and equipment	3 ~ 9 years
Computer and communication equipment	3 ~ 25 years
Other equipment	1 ~ 25 years

(18) Leasing arrangements (lessee) - right-of-use assets / lease liabilities

- A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.
- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are comprised of the following:
 - (a) Fixed payments, less any lease incentives receivable;
 - (b) Variable lease payments that depend on an index or a rate;
 - (c) Amounts expected to be payable by the lessee under residual value guarantees;
 - (d) The exercise price of a purchase option, if the lessee is reasonably certain to exercise that option; and

- (e) Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The Group subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

C. At the commencement date, the right-of-use asset is stated at cost comprising the following:

- (a) The amount of the initial measurement of lease liability;
- (b) Any lease payments made at or before the commencement date;
- (c) Any initial direct costs incurred by the lessee; and
- (d) An estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

D. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognise the difference between remeasured lease liability in profit or loss.

(19) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Investment property is depreciated on a straight-line basis over its estimated useful life of 6 to 51 years.

(20) Intangible assets

- A. Trademark is amortised on a straight-line basis over its estimated useful life of 3 to 20 years.
- B. Goodwill is generated by adopting the acquisition method when merger and acquisition occurs.
- C. Patent is amortised on a straight-line basis over its estimated useful life of 2 to 20 years.
- D. The developed technologies are obtained from business combination and the capital contribution in the form of technology. They included application technology such as home networking, Internet of Things, model platforms and electric vehicle power systems. If the developed technologies are available for use, they will be amortised on a straight-line basis over its estimated useful life of 4 to 10 years or using the units of production method. The remaining developed technologies that are not yet available for use will be tested annually for impairment and amortised when they are available for use.

- E. Customer relationship and Supplier relationship are obtained as a result of a business combination and are amortised on a straight-line basis over its estimated life of 5 to 12 years.
- F. Software is stated initially at its costs and is amortised on a straight-line basis over its estimated useful life of 2 to 10 years.
- G. Concession obtained individually is stated initially at its costs and is amortised on a straight-line basis over its useful life of 11.5 to 20 years.
- H. Internally generated intangible assets—research and development expenditures
 - (a) Research expenditures are recognised as an expense as incurred.
 - (b) Development expenditures that do not meet the following criteria are recognised as expenses as incurred, but are recognised as intangible assets when the following criteria are met:
 - i. It is technically feasible to complete the intangible asset so that it will be available for use or sale;
 - ii. An entity intends to complete the intangible asset and use or sell it;
 - iii. An entity has the ability to use or sell the intangible asset;
 - iv. It can be demonstrated how the intangible asset will generate probable future economic benefits;
 - v. Adequate technical, financial and other resources to complete the development and to use or sell the intangible asset are available; and
 - vi. The expenditure attributable to the intangible asset during its development can be reliably measured.
 - (c) Upon being available for use, internally generated intangible assets are amortised on a straight-line basis over their estimated useful life.

(21) Impairment of non-financial assets

- A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognising impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.
- B. The recoverable amount of goodwill shall be evaluated annually. An impairment is recognised when recoverable amount is lower than carrying amount. Impairment loss should not be reversed in the future.
- C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are

expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(22) Borrowings

Borrowings comprise long-term and short-term bank borrowings and other long-term and short-term loans. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(23) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(24) Financial liabilities at fair value through profit or loss

A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorised as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss at initial recognition:

- (a) Hybrid (combined) contracts; or
 - (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
 - (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
- B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognised in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognised in profit or loss.
- C. If the credit risk results in fair value changes in financial liabilities designated as at fair value through profit or loss, they are recognised in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognising in profit or loss for loan commitments or financial guarantee contracts.

(25) Bonds payable

Ordinary corporate bonds issued by the Group are initially recognised at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from bonds payable, which is

amortised to profit or loss over the period of bond circulation using the effective interest method as an adjustment to 'finance costs'.

(26) Convertible bonds payable

Convertible bonds issued by the Group contain conversion options (that is, the bondholders have the right to convert the bonds into the Group's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Group classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

- (a) The embedded call options and put options are recognised initially at net fair value as 'financial assets or financial liabilities at fair value through profit or loss'. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognised as 'gain or loss on valuation of financial assets or financial liabilities at fair value through profit or loss'.
- (b) The host contracts of bonds are initially recognised at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortised in profit or loss as an adjustment to 'finance costs' over the period of circulation using the effective interest method.
- (c) The embedded conversion options which meet the definition of an equity instrument are initially recognised in 'capital surplus—share options' at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.
- (d) Any transaction costs directly attributable to the issuance are allocated to each liability or equity component in proportion to the initial carrying amount of each abovementioned item.
- (e) When bondholders exercise conversion options, the liability component of the bonds shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the abovementioned liability component and 'capital surplus—share options'.

(27) Derecognition of financial liabilities

A financial liability is derecognised when the obligation specified in the contract is either discharged or cancelled or expires.

(28) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(29) Non-hedging and embedded derivatives

Non-hedging derivatives are initially recognised at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognised in profit or loss.

(30) Hedge accounting

A. At the inception of the hedging relationship, there is formal designation and documentation of the hedging relationship and the Group's risk management objective and strategy for undertaking the hedge. That documentation shall include identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Group will assess whether the hedging relationship meets the hedge effectiveness requirements.

B. The Group designates the hedging relationship as follows:

Cash flow hedge: a hedge of the exposure to variability in cash flows that is attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction.

C. Cash flow hedges

(a) The cash flow hedge reserve associated with the hedged item is adjusted to the lower of the following (in absolute amounts):

- i. the cumulative gain or loss on the hedging instrument from inception of the hedge; and
- ii. the cumulative change in fair value of the hedged item from inception of the hedge.

(b) The effective portion of the gain or loss on the hedging instrument is recognised in other comprehensive income. The gain or loss on the hedging instrument relating to the ineffective portion is recognised in profit or loss.

(c) The amount that has been accumulated in the cash flow hedge reserve in accordance with (a) is accounted for as follows:

- i. If a hedged forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability, or a hedged forecast transaction for a non-financial asset or non-financial liability becomes a firm commitment for which fair value hedge accounting is applied, the Group shall remove that amount from the cash flow hedge reserve and include it directly in the initial cost or other carrying amount of the asset or liability.
- ii. For cash flow hedges other than those covered by i. above, that amount shall be reclassified from the cash flow hedge reserve to profit or loss as a reclassification adjustment in the same period or periods during which the hedged expected future cash flows affect profit or loss.

- iii. If that amount is a loss and the Group expects that all or a portion of that loss will not be recovered in one or more future periods, it shall immediately reclassify the amount that is not expected to be recovered into profit or loss as a reclassification adjustment.
- (d) When the hedging instrument expires, or is sold, terminated, exercised or when the hedging relationship ceases to meet the qualifying criteria, if the forecast transaction is still expected to occur, the amount that has been accumulated in the cash flow hedge reserve shall remain in the cash flow hedge reserve until the forecast transaction occurs; if the forecast transaction is no longer expected to occur, the amount shall be immediately reclassified from the cash flow hedge reserve to profit or loss as a reclassification adjustment.

(31) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognised as interest expense. Provisions are not recognised for future operating losses.

(32) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms

to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.

ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.

iii. Past service costs are recognised immediately in profit or loss.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(33) Employee share-based payment

A. For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognised is based on the number of equity instruments that eventually vest.

B. Restricted stocks:

(a) Restricted stocks issued to employees are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period.

(b) For restricted stocks where those stocks do not restrict distribution of dividends to employees and employees are not required to return the dividends received if they resign during the vesting period, the Group recognises the fair value of the dividends received by the employees who are expected to resign during the vesting period as compensation cost at the date of dividends declared.

(c) For restricted stocks where employees have to pay to acquire those stocks, if employees resign during the vesting period, they must return the stocks to the Group and the Group must refund their payments on the stocks, the Group recognises the payments from the employees who are expected to resign during the vesting period as liabilities at the grant

date, and recognises the payments from the employees who are expected to be eventually vested with the stocks in 'capital surplus – others'.

(34) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred income tax is recognised, using the balance sheets liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates that have been enacted or substantially enacted by the end of the financial reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.
- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

- F. A deferred tax asset shall be recognised for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

(35) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(36) Revenue recognition

- A. The Group manufactures and sells consumer electronics products. Sales are recognised when control of the products have transferred, being when the products are delivered to or picked by the customers, the customers has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.
- B. Sales revenue is recognised based on the price specified in the contract, net of the estimated sales discounts and allowances. Revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date. The contract cost does not include a significant financing component as the sales are made with credit term consistent with market practice.
- C. A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.
- D. The Group's obligation to provide a refund for faulty products under the standard warranty terms is recognised as a provision.
- E. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognised. If the payments exceed the products sold, a contract liability is recognised.

(37) Government grants

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises expenses for the related costs for which the grants are intended to compensate. Government grants related to property, plant and equipment are recognised as non-current liabilities and are amortised to profit or loss over the estimated useful lives of the related assets using the straight-line method.

(38) Business combinations

- A. The Group uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognised amounts of the acquiree's identifiable net assets. All other non-controlling interests should be measured at the acquisition-date fair value.
- B. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognised and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognised directly in profit or loss on the acquisition date.

(39) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments.

5. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS ON UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgments in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. The above information is addressed below:

(1) Critical judgments in applying the Group's accounting policies

A. Revenue recognition

The Group determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e. the Group is a principal) or to arrange for the other party to provide those goods or services (i.e. the Group is an agent) based on the transaction model and its economic substance. The Group is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Group recognises revenue at gross amount of consideration to which it expects to be entitled in

exchange for those goods or services transferred. The Group is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Group recognises revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

After receiving the materials or services procured, the Group directs the use of the goods and services and provides critical manufacturing processing technique, in order to produce and significantly integrate various goods and services into the combined output as the resulting devices and transfers to a customer. The following indicators are used to determine whether the Group controls the good or service before it is transferred to a customer and considers itself as a principal:

- (a) The Group is primarily responsible for the provision of goods or services;
- (b) The Group assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer.
- (c) The Group has discretion in establishing prices for the goods or services.

B. Offsetting financial instruments

The Company's financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(2) Critical accounting estimates and assumptions

The Group makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

A. Impairment assessment of goodwill

The Group assesses impairment of goodwill based on subjective judgment which includes identifying and allocating assets, liabilities and goodwill to related cash-generating unit to determine recoverable amount of this unit. Details of impairment assessment of goodwill is provided in Note 6(13).

As of December 31, 2023, the Group recognised goodwill after impairment assessment of \$20,398,374.

B. Impairment assessment of investments accounted for using equity method

The Group assesses the impairment of an investment accounted for using equity method and the goodwill it contains as soon as there is any indication that it might have been impaired and its carrying amount cannot be recovered. The Group assesses the recoverable amounts of an investment accounted for under the equity method based on the present

value of the Group's share of expected future cash flows of the investee, and analyses the reasonableness of related assumptions.

As of December 31, 2023, the Group's goodwill included in the investments accounted for under the equity method, net of impairment loss, amounted to \$12,483,507.

C. Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Group must determine the net realisable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2023, the carrying amount of inventories was \$730,765,401.

6. DETAILS OF SIGNIFICANT ACCOUNTS

(a) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(b) Forward foreign exchange contracts

The Group enters into foreign exchange forward transactions to reduce the following risk of exchange rate:

A. Operating activities: Import of raw materials and export sales.

B. Investing activities: Import of machinery and equipment.

C. Financing activities: Long-term and short-term foreign currency assets and liabilities.

E. Details of the Group's investments in equity instruments and beneficiary certificates are provided in Table 3.

F. The Group has no financial assets at fair value through profit or loss pledged to others.

G. Information relating to credit risk of financial assets and liabilities at fair value through profit or loss is provided in Note 12(2).

- A. The Group acquired the new shares of XSEMI Corporation in May 2022 and held 51% equity interest which resulted in the Group obtaining control over XSEMI Corporation. Subsequently, XSEMI Corporation participated in the new share private placement of Advanced Power Electronics Corporation in the amount of \$2,886,800 and held 30.08% equity interest which was shown as investment accounted for using the equity method.
- B. On May 17, 2023, the Group sold 6% of shares held in XSEMI Corporation. In June 2023, the Group lost majority of the seats in the company's Board of Directors. As a result, the Group lost its control over XSEMI Corporation. Refer to Note 4(3) B (c). for details.
- C. The Group sold shares of Fitipower Integrated Technology Inc. ("Fitipower Integrated") resulting to a reduction in its equity interest to less than 20% in 2023. On June 15, 2023, the Group lost its significant influence over Fitipower Integrated, with the resignation of the director's position in Fitipower Integrated. The Group remeasured the remaining investment in Fitipower Integrated at its fair value and transferred it to financial assets at fair value through other comprehensive income. Any difference between fair value and carrying amount is recognised in gain on disposal of investment amounting to \$3,672,435 (shown as 'other gains and losses').

D. A subsidiary of the Group, Foxconn Industrial Internet Co., Ltd., entered into the ‘Partnership Agreement of Xingwei (Guangzhou) Industrial Investment Partnership (Limited Partnership)’ on March 25, 2022. As a limited partner, Foxconn Industrial Internet Co., Ltd. subscribed the shares of fund of Xingwei (Guangzhou) Industrial Investment Partnership (Limited Partnership) amounting to RMB 9,800,000 thousand. As of December 31, 2023, the Group had recovered RMB 5,380,000 thousand from its investment. Subsequently, as of March 14, 2024, the Group recovered another RMB1,050,000 thousand.

E. The above additions and disposals of investments accounted for under equity method included the amount transferred in from other accounts or recognised as disposal transferred out.

F. The abovementioned changes in other equity items refer to recognition of currency translation differences of associates and unrealised gains (losses) on valuation of financial assets. Others arise from the translation of the financial statements of the foreign operations’ associates into the Group’s presentation currency.

A. Refer to Note 6(39) for details of intangible assets acquired through business combination and Note 6(40) D. for details of intangible assets derecognised due to the changes in loss of control in subsidiaries.

B. Impairment assessment for goodwill of Belkin International Inc.

As of December 31, 2023, the Group's goodwill from the acquisition of Belkin International Inc. (referred herein as "Belkin") decreased to \$11,684,205 (USD \$380,470 thousand) as a result of the disposal of Linksys, a subsidiary of Belkin, in 2021. Impairment assessment of goodwill is allocated to Belkin's CGU. The recoverable amount of the CGU relating to the goodwill arising from acquisition of Belkin was determined based on value-in-use calculation. The calculation uses projected cash flows based on financial budgets for the next five-year period.

Management determined expected revenue growth rate based on past performance and their expectations of market development. The long-term weighted average growth rates used are consistent with the projection included in industry reports. Pre-tax discount rate used reflects the risk premium of the segment and operating region.

The assumptions used in the main assessment as of December 31, 2023 are as follows:

Five-year compound revenue growth rate	9.3 %
Long-term growth rate	2 %
Pre-tax discount rate	20.1 %

Based on the above assessment, there is no impairment loss on goodwill as of December 31, 2023.

C. The details of amortization are as follows:

A. 3.5GHz frequency band through Multi Operator Core Network (MOCN)

A subsidiary of the Group, Asia Pacific Telecom Co., Ltd., entered into a cooperation agreement on 3.5GHz frequency band through MOCN with FET. The period of the agreement is from September 4, 2020 to December 31, 2040. This cooperation agreement was approved with conditions by the National Communications Commission (NCC) Committee and the Fair Trade Commission. Both signing parties agreed that the Group will share two-ninths of the network deployment cost of FET's 3.5GHz frequency band in order to obtain use right capacity, of which the cost of spectrum sharing amounted to \$9,473,000.

B. Incremental costs of obtaining a contract

A subsidiary of the Company, APT, recognises the incremental costs (mainly comprised of sales commissions) of obtaining a contract with a customer as an asset if the Group expects to recover those costs. The recognised asset is amortised on a systematic basis that is consistent with the transfers to the customer of the goods or services to which the asset relates. The Group recognised amortised costs of \$1,739,587 and \$2,114,054 in profit or loss for the years ended December 31, 2023 and 2022, respectively.

C. On December 15, 2023, the Group lost control over APT and therefore the Group derecognised long-term prepayments and incremental costs of obtaining a contract. Refer to Note 6(40) D. for details.

D. Details of net investment in lease is provided in Note 6(11).

A. First overseas convertible bond issue of 2017

- (a) The Company issued the first overseas unsecured convertible bonds totaling USD 500 million with the approval of the competent authority on August 22, 2017. The bonds carry zero coupon rate over five years. The circulation period is from November 6, 2017 to November 6, 2022.
- (b) The conversion options for the first overseas convertible bond issue of 2017 are separated from the liabilities and recorded as ‘capital surplus – share options’ amounting to \$1,099,253. The convertible bonds matured on November 6, 2022. The convertible corporate bonds were not converted into ordinary shares, therefore, ‘capital surplus - share options’ was reclassified to ‘capital surplus - share premium’.

B. First unsecured convertible bond issue of 2018

ShunSin Technology Holdings Limited, a subsidiary of the Group, issued the first unsecured convertible bonds totaling \$1,500 million with the approval of the competent authority on January 10, 2018. The bonds carry zero coupon rate over five years. The circulation period is from February 12, 2018 to February 12, 2023. On February 13, 2023, the trading of these corporate bonds on the Taipei Exchange was terminated.

C. First overseas unsecured convertible bond issue of 2021

- (a) The Company issued the first overseas unsecured convertible bonds totaling USD 700 million with the approval of the competent authority on May 26, 2021. The bonds carry zero coupon rate over five years. The circulation period is from August 5, 2021 to August 5, 2026. The Company will fully redeem the bonds at the price of the bonds’ face value plus -0.41% of the face value at the maturity date.
- (b) The conversion price is adjusted in line with the model specified in the conversion rules. As of December 31, 2023, no bonds were converted into common stock at the conversion price of NT\$147.932 in dollars (using the exchange rate of 1 USD: 27.978 TWD) which was adjusted by the Company on July 10, 2023 based on the conversion rules of the first overseas convertible bond issue of 2021.

- (c) In accordance with the conversion rules, if the convertible bond is purchased (including purchased from the secondary market), early redeemed, or repaid at maturity by the Company, or if the convertible bond is converted into common stocks or redeemed by the bondholder, the bond is to be retired and will not be reissued.
 - (d) In accordance with the conversion rules, the rights and obligations of common stocks converted are the same as the outstanding ones previously subscribed.
 - (e) The conversion options for the first overseas convertible bond issue of 2021 are separated from the liabilities and recorded as 'capital surplus - share options' amounting to \$336,012.
 - (f) In accordance with the conversion rules, bondholders have the right to request the Company to redeem any bonds at the price of the bonds' par value upon three years from the issue date. As the bondholders of the convertible corporate bonds will be able to exercise the put options in the third quarter of 2024, the convertible corporate bonds were transferred to 'long-term liabilities, current portion'. After the put options exceed their exercise period, the unexercised put options will be transferred back to 'bonds payable' if they meet the definition of non-current liabilities.
- D For details of principal, interest rate, maturity and other information of corporate bonds payable and foreign unsecured corporate bonds, refer to Table 12.

A. According to the syndicated loan agreement signed with 18 banks, including Mizuho Corporate Bank Ltd., the syndicated loan agreement signed with 2 banks, including Mizuho Corporate Bank Ltd., First Commercial Bank, the syndicated loan agreement signed with 12 banks, including CTBC Bank and in accordance with the loan agreement signed with Bank of China and Industrial and Commercial Bank of China, the Group shall maintain certain

financial ratios (including current ratio, net debt-to-tangible assets ratio, net tangible assets, interest coverage ratio, proprietary funds ratio and ratio of self-owned capital) , to be tested semi-annually and annually on consolidated basis.

The Group's financial ratios in the consolidated financial statements for the year ended December 31, 2023 met the financial covenants of above mentioned syndicated loan agreements. The Group was able to meet the required financial covenants under the syndicated loan agreements.

B. As of December 31, 2023 and 2022, the Group's long term loan with Banc of America Leasing & Capital, LLC ("Boa Leasing") was due to the sale of machinery and equipment to Boa Leasing and the subsequent lease back of the machinery and equipment from Boa Leasing, which was not a sale of assets under IFRS 15. Therefore, the Group continues to recognise the amount of \$4,697,696 and \$5,188,534, respectively, for the consideration received as long-term loans.

C. Details of assets pledged as collateral for long-term loans are provided in Note 8.

(21) Pensions

A. Defined benefit plans

(a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law of Taiwan, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by next March.

(b) The amounts recognised in the balance sheet are as follows (shown as "other non-current liabilities"):

(d) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilisation plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings are less than aforementioned rates, government shall make payment for the deficit after being authorised by the Regulator. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2023 and 2022 is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.

(e) The principal actuarial assumptions used were as follows:

	2023	2022
Discount rate	1.2%	1.4%
Future salary increases	3.5%	3.5%

Assumptions regarding future mortality rate are set based on actuarial advice in accordance with published statistics and experience in each territory. Because the main actuarial assumption changed, the present value of defined benefit obligation is affected.

The analysis was as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2023				
Effect on present value of defined benefit obligation	\$ (36,611)	\$ 37,940	\$ 33,585	\$ (32,650)
	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2022				
Effect on present value of defined benefit obligation	\$ (41,388)	\$ 42,951	\$ 38,312	\$ (37,194)

The sensitivity analysis above is based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension

liability in the balance sheet are the same. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

(f) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2024 amount to \$12,717.

(g) As of December 31, 2023, the weighted average duration of the retirement plan is 11 years.

B. Defined contribution plans

(a) Effective July 1, 2005, the Company and its domestic subsidiaries have established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.

(b) The Group’s Mainland China subsidiaries have a defined contribution plan. Monthly contributions to an independent fund administered by the government in accordance with the pension regulations in the People’s Republic of China (PRC) are based on certain percentage of employees’ monthly salaries and wages. The contribution percentage was 16%. Other than the monthly contributions, the Group has no further obligations.

(c) The pension costs under the defined contribution pension plans of the Group for the years ended December 31, 2023 and 2022 were \$18,178,868 and \$18,290,482, respectively.

(25) Share capital—common stock

- A. As of December 31, 2023, the Company's authorised capital was \$180,000,000, consisting of 18,000,000 thousand shares of ordinary stock, and the paid-in capital was \$138,629,906, consisting of 13,862,991 thousand shares with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected.
- B. Pursuant to the resolution adopted at the stockholders' meeting held on June 1, 1999, and after obtaining approval from the SFC, the Company issued 50 million ordinary shares so as to issue 25 million units of Global Depository Receipts (GDRs) in Europe, Asia and the USA. The issuance amounted to USD 347,250 thousand, and the main terms and conditions of the GDRs are as follows:

(a) Voting

Holders of GDRs have no right to directly exercise voting rights or attend the Company's stockholders' meeting, except when a motion is on the election of directors or supervisors. A holder or holders together holding at least 51% of the GDRs outstanding at the relevant record date of the stockholders' meeting can instruct the Depositary to vote in the same direction in respect of one or more resolutions to be proposed at the meeting.

(b) Sale and withdrawal of GDRs

Under the current R.O.C. law, shares represented by the GDRs may be withdrawn by holders of GDRs commencing three months after the initial issue of GDRs. A holder of a GDR may, provided that the Company has delivered to the custodian physical share certificates in respect of the Deposited Shares, request the Depositary to sell or cause to be sold on behalf of such holder the shares represented by such GDRs.

(c) Dividends

GDR holders are entitled to receive dividends to the same extent as the holders of common stock.

- (d) As of December 31, 2023, 64,930 thousand units of GDRs were outstanding, which represents 129,859 thousand shares of common stock.

C. Treasury stocks

(27) Retained earnings

A. The annual net income of the Company shall be appropriated in accordance with the priorities listed as follows:

(a) Recovery of losses;

(b) Appropriation of 10% for legal reserve.

(c) Appropriation or reversal of special reserve pursuant to applicable law or regulation.

As to the earnings available for appropriation to shareholders including accumulated unappropriated earnings and earnings available for appropriation this year, the board of directors is authorised to draft an appropriation plan in accordance with the dividend policy in Section D of the Articles of Incorporation.

The board of directors is authorised to distribute dividends and bonuses in whole or in part, which may be paid in cash after a resolution has been adopted by a majority vote at a meeting of the board of directors attended by two-thirds of the total number of directors.

The Company is currently at a developing stage. The Company's dividend distribution policy is subject to the Company's current and future investment environment, fund requirements, competition from local and abroad, and capital budgets, as well as taking into consideration the interests of shareholders and the long-term financial planning. Shareholder dividends are appropriated based on accumulated unappropriated earnings, which shall not be less than 15% of distributable earnings for the year and cash dividends shall not be less 10% of total dividends.

B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.

C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

D. The appropriations of 2023 earnings were proposed during the board meeting on March 14, 2024. The appropriations of 2022 earnings had been resolved at the shareholders' meeting on May 31, 2023. Details are summarized as follows:

At December 31	\$ 193,134,544	\$ 199,986,123

- A. Some subsidiaries of the Group have issued employee share-based payment and new shares during 2023 and 2022. The Group has not purchased additional shares in proportion to its ownership and thus, the non-controlling interest of the Group decreased by \$124,773 and \$298,979 and equity attributable to owners of the parent increased by \$5,685,800 and decreased by \$7,895,181 as of December 31, 2023 and 2022, respectively.
- B. The main reason for the change in 2023 is because APT merged with FET, and thus, the non-controlling interest of the Group decreased by \$13,145,086; Foxtron Vehicle Technologies Co., Ltd.'s stocks were officially listed on Taiwan Stock Exchange, and the entity issued new shares, and thus, the non-controlling interest of the Group increased by \$4,804,552.
- C. The main reason for the change in 2022 is because the Group jointly established a subsidiary company with YAGEO Corporation. Consequently, the non-controlling interest of the Group increased by \$1,811,400.
- D. In 2022, Foxconn Industrial Internet Co., Ltd., a subsidiary of the Group, paid \$7,763,248 in cash due to a stock repurchase. This transaction resulted in a decrease in the Group's non-controlling interest by \$1,235,338 and a decrease in capital surplus by \$6,527,910.

(30) Operating revenue

- A. Disaggregation of revenue from contracts with customers

The Group derives revenue from the transfer of goods and services over time and at a point in time. Details of major product lines and geographical regions are provided in Note 14(5).

- B. Contract assets and liabilities

The Group has recognised the following revenue-related contract liabilities (shown as "other current liabilities"):

- D. The Company has not recognised taxable temporary differences associated with investment in subsidiaries as deferred tax liabilities. As of December 31, 2023 and 2022, the temporary differences unrecognised as deferred tax liabilities were \$1,319,005,094 and \$1,262,215,852, respectively.
- E. The Company's income tax returns through 2021 have been assessed and approved by the Tax Authority.
- F. The Group has applied the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes.
- G. The Group's exposure to Pillar Two income taxes arising from the Pillar Two legislation is as follows:

The Group is within the scope of the Pillar Two model rules published by the Organisation for Economic Co-operation and Development (OECD). Pillar Two legislation was enacted in the European Union, Vietnam and Japan, the jurisdiction in which certain subsidiaries are incorporated, and will come into effect from the fiscal year of 2024. Additionally, legislation was substantively enacted in Singapore, the jurisdiction in which certain subsidiaries are incorporated, and will come into effect from the fiscal year of 2025. Therefore, the Group has no related current tax exposure as of December 31, 2023.

Under the legislation, the Group has obligations to pay a top-up tax for the difference between its GloBE effective tax rate per jurisdiction and the 15% minimum rate.

The Group is in the process of assessing its exposure to the Pillar Two legislation for when it comes into effect. This assessment indicates for jurisdiction of the European Union, Vietnam, Japan and Singapore. However, due to the complexities in applying the legislation and the impact of specific adjustments envisaged in the Pillar Two legislation which give rise to different effective tax rates compared to those calculated in accordance with IAS 12, 'Income taxes', the Group is currently assessing on applying the legislation.

H. The Group has applied the Amendments to IAS 12, 'Income taxes' issued on May 23, 2023, and the exception was applied on the information of recognising and disclosing about deferred tax assets and liabilities related to Pillar Two income taxes.

(39) Business combinations

- A. Fulian Yuzhan Precision Technology Co., Ltd., a subsidiary of the Group, acquired 100% equity interest in Shenzhen Hengdrive Electric Co., Ltd. in January 2022 for a consideration of RMB 378,000 thousand. The subsidiary mainly acquired accounts receivable, inventories, property, plant and equipment and intangible assets as a result of said acquisition.
- B. In May 2022, the Group acquired the newly issued common shares of XSEMI Corporation by \$1,599,000. The Group held 51% equity interest in XSEMI Corporation after the acquisition. In the aforementioned merger, the acquisition is mainly comprised of cash, right-of-use assets and property, plant and equipment.
- C. In July 2023, the Group acquired the IC (integrated circuit) and SiC (Silicon Carbide) product and module business of XSEMI Corporation by \$204,000 and established a new entity, PowerX Semiconductor Corporation. In the aforementioned merger, the acquisition is mainly comprised of inventories, property, plant and equipment, intangible assets and other payables.
- D. The Group's subsidiary, Foxconn Interconnect Technology Singapore Pte. Ltd., acquired 100% equity interest in Prettl SWH GmbH and its subsidiaries at an adjusted price of \$6,528,172 (EUR 193,091 thousand) on July 3, 2023. Since then, Prettl SWH GmbH and its subsidiaries became the Group's subsidiaries. Prettl SWH GmbH then changed its name to FIT Voltaira group GmbH ("Voltaira group").

Voltaira group is a German designer and manufacturer of automotive component which is primarily engaged in the development and manufacture of best-in-class, high-end automotive sensor harnesses and connectivity and electrification solutions. This acquisition is expected to enhance the Group's competitive advantage in the layout of key components related to electric vehicles.

- (a) The following table summarises the consideration paid for Voltaira Group and the fair values of the assets acquired and liabilities assumed at the acquisition date:

	<u>July 3, 2023</u>

9. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNISED CONTRACT COMMITMENTS

Except for Note 6(4), contingencies and commitments are as follows:

(1) Contingencies - significant legal events

On November 7, 2022, the Group reached an equity agreement with Lordstown Motors Corp. (Lordstown), a NASDAQ listed company in the United States, agreeing that the Group will subscribe Class A ordinary shares at USD 1.76 (in dollars) per share, totalling USD 70,000 thousand, and Series A preferred shares at USD 100 (in dollars) per share, totalling USD 100,000 thousand.

As of December 31, 2023, the Group had paid USD 22,734 thousand for ordinary shares and USD 30,000 thousand for preferred shares and the corresponding shares obtained were subsequently measured at fair value, and were classified as 'non-current financial assets at fair

value through other comprehensive income’ and ‘non-current financial assets at fair value through profit or loss’.

However, there was a dispute between the Group and Lordstown over the application of the provisions in the investment agreement, and the Group suspended the remaining investments. On June 27, 2023, Lordstown filed for bankruptcy in Delaware Bankruptcy Court in the United States and filed a complaint against the Group. As of the issuance date of the financial statements, the bankruptcy and the appeal procedures of Lordstown were both in progress. The Group had suspended the subsequent negotiation actions. As for the lawsuit filed by Lordstown, the Group is still unable to predict the result of the litigation and cannot reliably estimate the contingent liabilities.

(2) Commitments

A. Capital expenditures contracted for at the balance sheet date but not yet incurred are as follows:

	December 31, 2023	December 31, 2022
Property, plant and equipment	\$ 21,791,502	\$ 5,375,158
Financial assets at fair value through profit or loss	7,993,171	8,090,786

B. On July 24, 2023, the Group reached an equity agreement with ZF Friedrichshafen AG in Germany, agreeing that the subsidiary will subscribe ordinary shares not exceeding EUR 500,000 thousand and Class A preferred shares not exceeding EUR 60,000 thousand of its subsidiary, ZF Chassis Modules GmbH (“ZF Chassis”). The settlement of the transaction is pending to the fulfillment of the conditions specified in the agreement (included but not limited to obtaining the approval from the competent authority and ZF Chassis’s reorganisation) before it could be processed. The aforementioned expected acquisition price was shown as capital expenditures contracted for at the balance sheet date but not yet incurred - investments accounted for using equity method.

10. SIGNIFICANT DISASTER LOSS

None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

- (1) The appropriation of 2023 earnings was approved by the Board of Directors on March 14, 2024. Refer to Note 6(27) for details.
- (2) The Company issued \$11,400,000 first unsecured corporate bonds, as approved by the regulatory authority on January 2, 2024. The capital has been raised and bonds have been issued on OTC on January 11, 2024.

(3) On January 8, 2024, the Company entered into a purchase agreement with an associate, Sakai Display Products Corporation (hereinafter referred to as "SDP"), and the Company expects to purchase products with a total price of US\$246,000 thousand for five years from 2024 to 2028, based on the Company's demand. The Company may adjust the purchase price and quantity according to the actual demand. As of the issuance date of the financial statements, all the abovementioned purchase price has been paid.

12. OTHERS

(1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to operate with the goal to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet less the total intangible assets.

During 2023, the Group's strategy, which was unchanged from 2022, was to maintain the gearing ratio at 70% or below.

(2) Financial instruments

A. Financial instruments by category

Refer to the consolidated balance sheets and Note 6 for the amounts and details of the financial assets (financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets at amortised cost, accounts receivable (including related parties) and other receivables) and financial liabilities (financial liabilities at fair value through profit or loss, accounts payable (including related parties), other payables, short-term loans, long-term loans and corporate bonds payable).

B. Financial risk management policies

(a) Risk categories:

The Group employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

(b) Management objectives:

- i. Except for market risk, which is controlled by outside factors, the remainder of the foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.

- ii. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.
- iii. The Group's overall risk management policy focuses on the unpredictable item of financial markets and seeks to reduce the risk that potentially pose adverse effects on the Group's financial position and financial performance.
- iv. For the information on the derivative financial instruments that the Group enters into, refer to Notes 6(2).

(c) Management system:

- i. Risk management is executed by the Group's finance department by following policies approved by the Board. Through cooperation with the Group's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.
- ii. The Board has a written policy covering overall risk management. It also has written policies covering specific issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

C. Significant financial risks and degrees of financial risks

(a) Market risk

i. Foreign exchange risk

(i) Nature:

The Group is a multinational group in the Electronics manufacturing services industry. Most of the exchange rate risk from operating activities come from:

- a. Foreign exchange risk arises from different exchange rates to functional currency as the invoice dates of accounts receivable and payable denominated in non-functional foreign currency are different. Due to the characteristics of the subcontracting industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the variations in currencies of the Company's certain foreign investments in emerging countries (i.e. Brasil and Mexico, etc.) are considered huge, the percentage of the investments is not significant and thus the Company's foreign exchange risk can be maintained in the controllable range. (Note: The Group has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)
- b. Except for the above transactions (operating activities) recognised in the income statement, assets and liabilities recognised in the balance sheet and the net investment in foreign operations also result in the exchange rate risk.

(ii) Management:

- a. For such risks, the Group has set up policies requiring companies in the Group to manage its exchange rate risks.
- b. As to the exchange rate risk arising from the difference between various functional currencies and the reporting currency in the consolidated financial statements, it is managed by the Group's finance department.

(iii) The source:

a. USD and TWD:

Foreign exchange risk arises primarily from USD-denominated cash, cash equivalents, accounts receivable and other receivables, loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into TWD.

b. USD and RMB:

Foreign exchange risk arises primarily from USD-denominated cash, cash equivalents, accounts receivable and other receivables, loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into RMB.

c. USD and CZK:

Foreign exchange risk arises primarily from CZK-denominated cash, cash equivalents and accounts receivable, loans and accounts payable, which results in exchange loss or gain when they are converted into USD.

(iv) Extent :

The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

(v) Total exchange gain (loss), including realised and unrealised arising from significant foreign exchange variation on the monetary items held by the Group for the years ended December 31, 2023 and 2022 amounted to \$6,263,204 and (\$6,322,498), respectively.

ii Equity securities

i) Nature

The Group primarily invests in domestic and foreign publicly traded equity instruments, which are accounted for as financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. The price of those equity instruments will be affected by the uncertainty of the future value of the investment.

ii) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held constant, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, and investments in equity at fair value through profit or loss are \$889,175 and \$859,319 for the years ended December 31, 2023 and 2022, respectively.

iii Cash flow and fair value interest rate risk

(i) The Group's interest rate risk arises from long-term loans and short-term loans. Borrowings with floating rates expose the Group to cash flow interest rate risk, but part of the risks are offset by cash and cash equivalents with variable interest rates. Borrowings with fixed rates expose the Group to fair value interest rate risk. The Group's borrowings are mainly fixed and floating interest rates. During the years

ended December 31, 2023 and 2022, the Group's borrowings at variable rate were mainly denominated in USD.

- (ii) The Group manages its cash flow interest rate risk by using fixed-to-fixed interest rate swaps. Under these swaps, the Group agrees with other parties to exchange, at specified intervals (mainly quarterly), the difference between fixed contract rates and floating rate interest amounts calculated by reference to the agreed notional principal amounts.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments.

According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The Group assesses the credit quality of the customers by taking into account their financial position, past experience and other factors to conduct its internal risk management.

Individual risk limits are set based on internal or external ratings in accordance with limits set by the board of directors. The utilisation of credit limits is regularly monitored. Major credit risk arises from cash and cash equivalents, derivative financial instruments and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk

- ii. The Group assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 360 days, a default has occurred.
- iii. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
 - (i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
 - (ii) Default or delinquency in interest or principal repayments;
 - (iii) Adverse changes in national or regional economic conditions that are expected to cause a default.

- iv The aging analysis of notes receivable and accounts receivable (including related parties) is as follows:

	December 31, 2023	December 31, 2022
Not past due	\$ 861,038,332	\$ 1,078,204,591
Up to 90 days	10,558,960	17,726,196
91 to 180 days	2,096,667	3,971,822
181 to 270 days	1,558,199	2,999,238
271 to 360 days	1,679,586	303,471
Over 361 days	12,039,923	7,587,349
	<u>\$ 888,971,667</u>	<u>\$ 1,110,792,667</u>

The above aging analysis is based on days overdue.

- v. The Group applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:
- (i) Assess the ECLs on an individual basis if a significant default has occurred to certain customers.
 - (ii) Classify the other customers' accounts receivable based on the Group's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix.
 - (iii) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.
 - (iv) As of December 31, 2023 and 2022, the individual provision for impairment of accounts receivable using loss rate methodology or provision matrix is as follows:

	Individual	Group 1	Group 2	Group 3	Group 4	Total

- Group2. Standard Poor's or Fitch's rating of BBB, Moody's rating of Baa, or rated as B or C in accordance with the Group's credit policies for those that have no external credit ratings.
- Group3. Standard Poor's or Fitch's rating of BB + and below, or Moody's rating of Ba1 and below.
- Group4. Rated as other than A, B, or C in accordance with the Group's credit policies for those that have no external credit ratings.
- vi. As of December 31, 2023 and 2022, the Group calculated the expected loss rate based on historical overdue repayment to assess other receivables - related parties impairment losses and no allowance for uncollectible accounts was recognised for both years.
- vii. Movements in relation to the Group's loss allowance for accounts receivable (including related parties) is as follows:

	2023	2022
At January 1	\$ 12,102,496	\$ 7,551,020
Provision for impairment loss	4,686,208	4,402,403

At December 31	<u>\$ 16,701,504</u>	<u>\$ 12,102,496</u>

(c)Liquidity risk

- i. Cash flow forecasting is performed by each operating entity of the Group and aggregated by Group treasury. The Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance, compliance with internal balance sheet ratio targets and, if applicable, external regulatory or legal requirements, for example, currency restrictions.
- ii. The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks and open-end funds is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in listed stocks during the lock-up period, convertible corporate bonds payable, most of the derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's equity investment without active market is included in Level 3.

B. Fair value information of investment property at cost is provided in Note 6(12).

C. Financial instruments not measured at fair value:

(a) Except for those listed in the table below, the carrying amounts of the Group's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortised cost (excluding bank debentures), short-term loans, notes and accounts payable, other payables and long-term loans approximate to their fair values:

Financial liabilities:				
Bonds payable	<u>\$ 258,682,706</u>	<u>\$ -</u>	<u>\$ 246,661,956</u>	<u>\$ -</u>

(b) The methods and assumptions of fair value measurement are as follows:

Bonds payable: Regarding the bonds issued by the Group, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present value of the expected cash flows and market interest rate.

D. The related information on financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at December 31, 2023 and 2022 is as follows:

(b) The methods and assumptions the Group used to measure fair value are as follows:

- i. The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	Listed shares	Open-end fund
Market quoted price	Closing price	Net asset value

- ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.
- iii. When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.

- iv. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate (Black-Scholes model).
 - v. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
 - vi. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.
- E. For the year ended December 31, 2023, there was no transfer between Level 1 and Level 2. For the year ended December 31, 2022, the shares of Didi Global Inc. held were transferred from Level 2 to Level 1 as they were released from the lock-up period in the second quarter.
- F. The following chart is the movement of Level 3 for the years ended December 31, 2023 and 2022:

	2023	2022
At January 1	\$ 103,637,137	\$ 105,221,164
Losses recognised in profit	(1,186,847)	(12,587,478)
Losses recognised in other comprehensive income	(3,811,233)	(6,217,153)

At December 31	<u>\$ 94,938,791</u>	<u>\$ 103,637,137</u>

- G. Investment segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing

back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value. Investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments and ensures compliance with the related requirements in IFRSs.

H. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

13. SUPPLEMENTARY DISCLOSURES

(1) Significant transactions information

- A. Loans to others: Refer to table 1.
- B. Provision of endorsements and guarantees to others: Refer to table 2.
- C. Holding of marketable securities at the end of the period (not including subsidiaries, associates and joint ventures): Refer to table 3.
- D. Acquisition or sale of the same security with the accumulated cost reaching NT\$300 million or 20% of paid-in capital or more: Refer to table 4.
- E. Acquisition of real estate reaching NT\$300 million or 20% of paid-in capital or more: Refer to table 5.
- F. Disposal of real estate reaching NT\$300 million or 20% of paid-in capital or more: Refer to table 6.
- G. Purchases or sales of goods from or to related parties reaching NT\$100 million or 20% of paid-in capital or more: Refer to table 7.
- H. Receivables from related parties reaching NT\$100 million or 20% of paid-in capital or more: Refer to table 8.
- I. Trading in derivative instruments undertaken during the reporting periods: Refer to Notes 6(2).
- J. Significant inter-company transactions during the reporting periods: Refer to table 9.

(2) Information on investees

Names, locations and other information of investee companies (not including investees in Mainland China): Refer to table 10.

(3) Information on investments in Mainland China

- A. Basic information: Refer to table 11.
- B. Significant transactions, either directly or indirectly through a third area, with investee companies in the Mainland Area: The Company appointed Foxconn (Far East) Limited's Mainland investee to render processing services and to trade. The transactions were eliminated in the consolidated financial statements. For significant transactions of processing services, trading, receivables and payables, endorsements and guarantees or collaterals provided, and financing, refer to Notes 13(1) A, B, G and H.

(4) Major shareholders

For the names, number and ratio of shares held by shareholders holding over 5% of the Company's shares: Refer to table 13.

14. SEGMENT INFORMATION

(1) General information

The Group has adopted eCMMS (E-enabled Components, Modules, Moves & Services) strategy, and provided a one-stop shop to its customers, which are primarily in the 3C

industries, with a total solution for design, development, engineering, procurement, manufacturing, logistics and after-sales service.

The Group segregates group systems from both a customer service and product perspective. Each segment's performance is assessed based on the operating results of different group systems in the consolidated financial statements reported for review by the chief operating decision maker.

(2) Measurement of segment information

The chief operating decision maker assesses performance and allocates resources of the operating segments based on each operating segment's revenue and operating income after adjusting the internal costs and allocated expenses. Except for the recognition of internal costs which shall be in accordance with the Group's related internal calculation basis, the operating segments' accounting policies are the same as disclosed in Note 4.

In accordance with IFRS No. 8, "Operating Segments", the Group has determined the operating segments and reportable operating segments. Operating segments which have met certain quantitative threshold are disclosed individually or aggregately as reportable operating segments depending on whether the segments have similar economic characteristics and the aggregation meets the core principal of the standard; other segments which have not met the quantitative threshold are included in 'all other segments'. When deciding on an aggregate disclosure, the criteria for consideration include: (1) the nature of the products and services; (2) the nature of the production process; (3) the customer types or categories of the products or services; and (4) the methods used to distribute its products or provide its services. The Group has identified the Hon Hai parent group, FII subgroup and FIH subgroup as reportable segments.

(3) Segment information

A. The segment information reported to the chief operating decision maker for making operating decisions for each segment is measured in a manner consistent with that in the statement of comprehensive income. Thus, the reconciliation is not required.

B. The segment information provided to the chief operating decision maker for the reportable segments is as follows:

Foxconn (Far East) Limited, Competition Team Technologies Limited, Foxconn Singapore Pte Ltd., ECMMS Precision Singapore Pte. Ltd. and Falcon Precision Trading Pte. Ltd. share the limit of guarantees on medium-term note (MTN) issuance platform of US\$5 billion, of which Competition Team Technologies Limited has utilised US\$1 billion, and the other three corporations including Foxconn Singapore Pte Ltd., ECMMS Precision Singapore Pte. Ltd. and Falcon Precision Trading Pte. Ltd. have not utilised the limit of guarantees. In order to avoid duplicate announcements, the remaining amount of US\$4 billion is hereby included in the calculation of Foxconn (Far East) Limited.

Note 7: FIH Mobile Limited and its 100% subsidiaries, FIH (Hong Kong) Limited, FIH Mexico Industry SA. de C.V., S&B Industry, Inc., Great Promote Limited, Eliteday Enterprises Limited, Extra High Enterprises Limited, FIH Co., Ltd. mutually endorse their bank debts and share the limit of US\$300 million.

Among them, the ceiling on the total amount of endorsements/ guarantees provided by FIH Mobile Limited is 100% of its own net asset value, and the ceiling of a single party is 100% of its own net asset value.

The ceiling on the total amount of endorsements/ guarantees provided by FIH Mexico Industry SA. de C.V., FIH (Hong Kong) Limited, S&B Industry, Inc., Great Promote Limited, Eliteday Enterprises Limited, Extra High Enterprises Limited, and FIH Co., Ltd. is 200% of its own net asset value, and the ceiling of a single party is 100% of its own net asset value.

The above table separately discloses the portion of the endorsement/guarantees provided by FIH Mobile Limited and its subsidiaries in respect of bank debts that have drawn down and are attributable to the respective subsidiaries as a result of the shared limit. The remaining shared limit is included in FIH Mobile Limited's. The net asset value of the endorser/guarantor is used to calculate the limit. Since no company has incurred bank debts, FIH (Hong Kong) Limited acts as the representative of the guarantor. When a company actually incurs bank debts, the actual amount of debts will be disclosed.

The limit on endorsements/guarantees is calculated as follows:

Company name	Limit on endorsements/ guarantees provided for a single party	Ceiling on total amount of endorsements/guarantees provided
FIH Mobile Limited	47,861,107	47,861,107
FIH Mexico Industry S A.de C.V.	3,384,808	6,769,616

Note 1: The information of transactions between the Company and the consolidated subsidiaries should be noted in “Number” column.

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

- (1) The Company to the consolidated subsidiary.
- (2) The consolidated subsidiary to the Company.
- (3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed. All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: The aforementioned transactions with related parties were based on the financial statements of the company for the same period which were audited by independent auditors.

HON HAI PRECISION INDUSTRY CO., LTD.

**PARENT COMPANY ONLY FINANCIAL
STATEMENTS AND INDEPENDENT AUDITORS'
REPORT**

DECEMBER 31, 2023 AND 2022

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

INDEPENDENT AUDITORS' REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of Hon Hai Precision Industry Co., Ltd.

Opinion

We have audited the accompanying parent company only balance sheets of Hon Hai Precision Industry Co., Ltd. (hereinafter referred to as 'Hon Hai') as at December 31, 2023 and 2022, and the related parent company only statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the parent company only financial statements, including a summary of material accounting policies.

In our opinion, based on our audits and the reports of other independent auditors (please refer to the Other matter section), the accompanying parent company only financial statements present fairly, in all material respects, the financial position of Hon Hai as at December 31, 2023 and 2022, and its financial performance and its cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for opinion

We conducted our audits in accordance with the Regulations Governing Financial Statement Audit and Attestation Engagements of Certified Public Accountants and Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the parent company only financial statements* section of our report. We are independent of Hon Hai in accordance with the Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. Based on our audits and the reports of other independent auditors, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of Hon Hai's 2023 parent company only financial statements. These matters were addressed in the context of our audit of the parent company only financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters for Hon Hai's 2023 parent company only financial statements are stated as follows:

Cut-off of hub sales revenue

Description

Refer to Note 4(29) for accounting policies on revenue recognition.

Hon Hai recognises revenue upon acceptance of the goods by the customers (when control of the products is transferred) if picked up from hub. For pick-ups from hub, Hon Hai recognises sales revenue based on movements of inventories contained in the statements or other information provided by the hub

custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and the discrepancy in inventory quantities between the physical inventory and accounting records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, we identified the cut-off of hub sales revenue as a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

- A. Assessed and tested the appropriateness of internal controls over the cut-off of hub sales revenue for a specific period prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognising movements of inventories and respective transfer of cost of goods sold.
- B. Confirmed or conducted physical count of inventory quantities held at hubs and agreed to accounting records.

Allowance for inventory valuation losses

Description

Refer to Note 4(13) for accounting policies on inventory valuation, Note 5(2) for uncertainty of accounting estimates and assumptions in relation to inventory valuation losses, and Note 6(6) for details of inventories. As of December 31, 2023, Hon Hai's inventories and allowance for inventory valuation losses amounted to NT\$136,634,988 thousand and NT\$4,290,696 thousand, respectively.

Hon Hai and its subsidiaries are primarily engaged in manufacturing and sales of 3C electronic products. Due to rapid technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. Hon Hai and its subsidiaries recognise inventories at the lower of cost and net realisable value, and the net realisable value is estimated based on historical experience. An allowance for inventory valuation losses is provided for those inventories aged over a certain period and those individually identified as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realisable value for individually obsolete or damaged inventories is subject to management's judgment, we considered the allowance for inventory valuation losses a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

- A. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.

- B. Validated the appropriateness of system logic of inventory aging report utilised by management to ensure proper classification of inventories aged over a certain period.
- C. Evaluated the reasonableness of inventories individually identified as obsolete or damaged by checking the related supporting documents and comparing with the information obtained from physical inventory count.
- D. Discussed with management the net realisable value of inventories aged over a certain period and individually identified as obsolete or damaged, validated respective supporting documents and reperformed the calculation.

Other matter – Reference to audits of other independent auditors

We did not audit the financial statements of certain investments accounted for under the equity method. Those financial statements were audited by other independent auditors, whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included in the parent company only financial statements and other related information disclosed in Note 13, relative to these investments accounted for under the equity method was based solely on the reports of other independent auditors. As of December 31, 2023 and 2022, the balances of these investments accounted for under the equity method amounted to NT\$30,763,306 thousand and NT\$35,018,967 thousand, constituting 0.90% and 0.98% of total assets, respectively, and the related comprehensive (loss) income (including the share of profit or loss in subsidiaries, associates and joint ventures accounted for under the equity method and the share of other comprehensive income in subsidiaries, associates and joint ventures accounted for under the equity method) amounted to (NT\$4,394,223) thousand and NT\$7,184,989 thousand, constituting 3.94% and 4.77% of total comprehensive income for the years then ended, respectively.

Responsibilities of management and those charged with governance for the parent company only financial statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing Hon Hai’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Hon Hai or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing Hon Hai’s financial reporting process.

Auditors' responsibilities for the audit of the parent company only financial statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and professional skepticism throughout the audit. We also:

- A. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- B. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Hon Hai's internal control.
- C. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- D. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Hon Hai's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- E. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- F. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within Hon Hai to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the parent company only financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

NOTES TO THE PARENT COMPANY ONLY FINANCIAL STATEMENTS

FOR THE YEARS ENDED DECEMBER 31, 2023 AND 2022

(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS, EXCEPT AS OTHERWISE INDICATED)

1. HISTORY AND ORGANISATION

Hon Hai Precision Industry Co., Ltd. (the “Company”) was incorporated as a company limited by shares under the provisions of the Company Act of the Republic of China (R.O.C.). The Company is primarily engaged in the manufacture, sales and service of connectors, case, thermal module, wired/wireless communication products, optical products, power supply modules, and assemblies for use in the IT, communications, automotive equipment, precision molding, automobile, and consumer electronics industries.

2. THE DATE OF AUTHORISATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORISATION

These parent company only financial statements were authorised for issuance by the Board of Directors on March 14, 2024.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

- (1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS®”) issued by International Accounting Standards Board (“IASB”) and came into effect as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC and became effective from 2023 are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective date by IASB</u>
Amendments to IAS 1, ‘Disclosure of accounting policies’	January 1, 2023
Amendments to IAS 8, ‘Definition of accounting estimates’	January 1, 2023
Amendments to IAS 12, ‘Deferred tax related to assets and liabilities arising from a single transaction’	January 1, 2023
Amendments to IAS 12, ‘International tax reform - pillar two model rules’	May 23, 2023

Except for the following, the above standards and interpretations have no significant impact to the Company’s financial condition and financial performance based on the Company’s assessment. The quantitative impact will be disclosed when the assessment is complete.

Amendments to IAS 12, “International tax reform - pillar two model rules”

The amendments give companies temporary relief from accounting for deferred income taxes arising from the tax law enacted or substantively enacted to implement the Pillar Two model rules published by the Organisation for Economic Co-operation and Development (OECD). An entity shall neither recognise nor disclose information about deferred tax assets and liabilities related to Pillar Two income taxes.

(2) Effect of new issuances of or amendments to IFRS issued by the IASB as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC and will become effective from 2024 are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective date by IASB</u>
Amendments to IFRS 16, 'Lease liability in a sale and leaseback'	January 1, 2024
Amendments to IAS 1, 'Classification of liabilities as current or non-current'	January 1, 2024
Amendments to IAS 1, 'Non-current liabilities with covenants'	January 1, 2024
Amendments to IAS 7 and IFRS 7, 'Supplier finance arrangements'	January 1, 2024

The above standards and interpretations have no significant impact to the Company's financial condition and financial performance based on the Company's assessment.

(3) IFRS issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRS as endorsed by the FSC are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective date by IASB</u>
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by IASB
IFRS 17, 'Insurance contracts'	January 1, 2023
Amendments to IFRS 17, 'Insurance contracts'	January 1, 2023
Amendment to IFRS 17, 'Initial application of IFRS 17 and IFRS 9 – comparative information'	January 1, 2023
Amendments to IAS 21, 'Lack of exchangeability'	January 1, 2025

The above standards and interpretations have no significant impact to the Company's financial condition and financial performance based on the Company's assessment.

4. SUMMARY OF MATERIAL ACCOUNTING POLICIES

Unless otherwise stated, the principal accounting policies applied in the preparation of these parent company only financial statements set out below have been consistently applied to all the periods presented.

(1) Compliance statement

The parent company only financial statements of the Company have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers".

(2) Basis of preparation

A.Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:

- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
 - (b) Financial assets at fair value through other comprehensive income.
 - (c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.
- B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC® Interpretations, and SIC® Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.
- (3) Foreign currency translation
- A. The parent company only financial statements of the Company are presented in New Taiwan Dollars, which is the Company’s functional and presentation currency.
- B. Foreign currency transactions and balances
- (a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise, except when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges.
 - (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.
 - (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
 - (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within “other gains and losses”.

C. Translation of foreign operations

- (a) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
 - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
 - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
 - iii. All resulting exchange differences are recognised in other comprehensive income.
- (b) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Company still retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.
- (c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Company retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.
- (d) Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing exchange rates at the balance sheet date.

(4) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;
 - (b) Assets held mainly for trading purposes;
 - (c) Assets that are expected to be realised within twelve months from the balance sheet date;
 - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
 - (a) Liabilities that are expected to be settled within the normal operating cycle;
 - (b) Liabilities arising mainly from trading activities;

- (c) Liabilities that are to be settled within twelve months from the balance sheet date;
- (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(5) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(6) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Company measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Company subsequently measures the financial assets at fair value, and recognises the gain or loss in profit or loss.
- D. The Company recognises the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.

(7) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Company has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. The Company subsequently measures the financial assets at fair value:
The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.

(8) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
- (a) The objective of the Company's business model is achieved by collecting contractual cash flows.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Company's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(9) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Company a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.
- C. The Company's operating pattern of accounts receivable that are expected to be factored is for the purpose of receiving contract cash flow and selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognised in other comprehensive income.

(10) Impairment of financial assets

For financial assets at amortised cost including accounts receivable that have a significant financing component, at each reporting date, the Company recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Company recognises the impairment provision for lifetime ECLs.

(11) Derecognition of financial assets

The Company derecognises a financial asset when one of the following conditions is met:

- A. The contractual rights to receive the cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows of the financial asset have been transferred and the Company has transferred substantially all risks and rewards of ownership of the financial asset.

C. The contractual rights to receive cash flows of the financial asset have been transferred; and the Company has not retained control of the financial asset.

(12) Leasing arrangement (lessor) – Lease receivable / Operating lease

Lease income from an operating lease (net of any incentives given to the lessee) is recognised in profit or loss on a straight-line basis over the lease term.

(13) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average method. The cost of finished goods and work in progress comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

(14) Investments accounted for under the equity method / associates

- A. Subsidiaries are all entities (including structured entities) controlled by the Company. The Company controls an entity when the Company is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
- B. Unrealised gains or losses occurred from the transactions between the Company and subsidiaries have been offset. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
- C. The Company's share of its subsidiaries' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Company's share of losses in a subsidiary equals or exceeds its interest in the subsidiary, the Company continues to recognise losses proportionate to its ownership.
- D. Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.
- E. Associates are all entities over which the Company has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognised at cost.
- F. The Company's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Company's share of losses in an

associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Company does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

- G. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Company's ownership percentage of the associate, the Company recognises change in ownership interests in the associate in 'capital surplus' in proportion to its ownership.
- H. Unrealised gains on transactions between the Company and its associates are eliminated to the extent of the Company's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
- I. In the case that an associate issues new shares and the Company does not subscribe or acquire new shares proportionately, which results in a change in the Company's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under the equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Company's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of or transferred to retained earnings directly according to the requirements in IFRSs.
- J. Upon loss of significant influence over an associate, the Company remeasures any investment retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognised in profit or loss.
- K. When the Company disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate, are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of or transferred to retained earnings directly according to the requirements in IFRSs. If it retains significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
- L. When the Company disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.

M. Pursuant to the Regulations Governing the Preparation of Financial Reports by Securities Issuers, profit (loss) of the current period and other comprehensive income in the non-consolidated financial statements shall equal to the amount attributable to owners of the parent in the financial statements prepared with basis for consolidation. Owners' equity in the non-consolidated financial statements shall equal to equity attributable to owners of the parent in the financial statements prepared with basis for consolidation.

(15) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each component of property, plant and equipment that is significant in relation to the total cost of the item is depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows

Buildings	15 ~ 51 years
(Auxiliary buildings	5 ~ 11 years)
Machinery and equipment	3 ~ 9 years
Other equipment	1 ~ 6 years

(16) Leasing arrangements (lessee) - right-of-use assets / lease liabilities

- A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Company. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.
- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are comprised of the following:
 - (a) Fixed payments, less any lease incentives receivable;

- (b) Variable lease payments that depend on an index or a rate;
- (c) Amounts expected to be payable by the lessee under residual value guarantees;
- (d) The exercise price of a purchase option, if the lessee is reasonably certain to exercise that option; and
- (e) Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The Company subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

C. At the commencement date, the right-of-use asset is stated at cost comprising the following:

- (a) The amount of the initial measurement of lease liability;
- (b) Any lease payments made at or before the commencement date;
- (c) Any initial direct costs incurred by the lessee; and
- (d) An estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

D. For lease modifications that decrease the scope of the lease, the lessee shall decrease the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognise the difference between remeasured lease liability in profit or loss.

(17) Impairment of non-financial assets

The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognising impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.

(18) Borrowings

Borrowings comprise short-term bank borrowings and short-term loans. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the

redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(19) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(20) Financial liabilities at fair value through profit or loss

- A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorised as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss at initial recognition:
 - (a) Hybrid (combined) contracts; or
 - (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
 - (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
- B. At initial recognition, the Company measures the financial liabilities at fair value. All related transaction costs are recognised in profit or loss. The Company subsequently measures these financial liabilities at fair value with any gain or loss recognised in profit or loss.
- C. If the credit risk results in fair value changes in financial liabilities designated as at fair value through profit or loss, they are recognised in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognising in profit or loss for loan commitments or financial guarantee contracts.

(21) Bonds payable

Ordinary corporate bonds issued by the Company are initially recognised at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from bonds payable, which is amortised to profit or loss over the period of bond circulation using the effective interest method as an adjustment to 'finance costs'.

(22) Convertible bonds payable

Convertible bonds issued by the Company contain conversion options (that is, the bondholders have the right to convert the bonds into the Company's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Company classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

- A. The host contracts of bonds are initially recognised at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortised in profit or loss as an adjustment to 'finance costs' over the period of circulation using the effective interest method.
- B. The embedded conversion options which meet the definition of an equity instrument are initially recognised in 'capital surplus—share options' at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.
- C. Any transaction costs directly attributable to the issuance are allocated to each liability or equity component in proportion to the initial carrying amount of each abovementioned item.
- D. When bondholders exercise conversion options, the liability component of the bonds shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the abovementioned liability component and 'capital surplus—share options'.

(23) Derecognition of financial liabilities

A financial liability is derecognised when the obligation specified in the contract is either discharged or cancelled or expires.

(24) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(25) Non-hedging and embedded derivatives

Non-hedging derivatives are initially recognised at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognised in profit or loss.

(26) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Company in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Company uses interest rates of government bonds (at the balance sheet date) instead.
- ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.
- iii. Past service costs are recognised immediately in profit or loss.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Company calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(27) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

- C. Deferred income tax is recognised, using the balance sheets liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates that have been enacted or substantially enacted by the end of the financial reporting period and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.
- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.
- F. A deferred tax asset shall be recognised for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

(28) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(29) Revenue recognition

- A. The Company manufactures and sells consumer electronics products. Sales are recognised when control of the products have transferred, being when the products are delivered to or picked by the customers, the customers have full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's

acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied.

- B. Sales revenue is recognised based on the price specified in the contract, net of the estimated sales discounts and allowances. Revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date. The contract cost does not include a significant financing component as the sales are made with credit term consistent with market practice.
- C. A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.
- D. The Company's obligation to provide a refund for faulty products under the standard warranty terms is recognised as a provision.
- E. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognised. If the payments exceed the products sold, a contract liability is recognised.

5. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS ON UNCERTAINTY

The preparation of these parent company only financial statements requires management to make critical judgments in applying the Company's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. The above information is addressed below:

(1) Critical judgments in applying the Company's accounting policies

Revenue recognition

The Company determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e. the Company is a principal) or to arrange for the other party to provide those goods or services (i.e. the Company is an agent) based on the transaction model and its economic substance. The Company is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Company recognises revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Company is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Company recognises revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

After receiving the materials or services procured, the Company directs the use of the goods and services and provides critical manufacturing processing technique, in order to produce and significantly integrate various goods and services into the combined output as the resulting devices and transfers to a customer. The following indicators are used to determine whether the Company controls the good or service before it is transferred to a customer and considers itself as a principal:

- A. The Company is primarily responsible for the provision of goods or services;
- B. The Company assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer.
- C. The Company has discretion in establishing prices for the goods or services.

(2) Critical accounting estimates and assumptions

The Company makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

A. Impairment assessment of investments accounted for using equity method

The Company assesses the impairment of an investment accounted for using equity method and the goodwill it contains as soon as there is any indication that it might have been impaired and its carrying amount cannot be recovered. The Company assesses the recoverable amounts of an investment accounted for under the equity method based on the present value of the Company's share of expected future cash flows of the investee, and analyses the reasonableness of related assumptions.

As of December 31, 2023, the Company's goodwill included in the investments accounted for under the equity method, net of impairment loss, amounted to \$8,264,779.

B. Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Company must determine the net realisable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2023, the carrying amount of inventories was \$132,344,292.

(a) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(b) Forward foreign exchange contracts

The Company enters into foreign exchange forward transactions to reduce the following risk of exchange rate:

- i. Operating activities: Import of raw materials and export sales.
- ii. Investing activities: Import of machinery and equipment.
- iii. Financing activities: Long-term and short-term foreign currency assets and liabilities.

D. The Company has no financial assets at fair value through profit or loss pledged to others.

E. Information relating to credit risk of financial assets and liabilities at fair value through profit or loss is provided in Note 12(2).

A. First overseas convertible bond issue of 2017

- (a) The Company issued the first overseas unsecured convertible bonds totaling USD 500 million with the approval of the competent authority on August 22, 2017. The bonds carry zero coupon rate over five years. The circulation period is from November 6, 2017 to November 6, 2022.
- (b) The conversion options for the first overseas convertible bond issue of 2017 are separated from the liabilities and recorded as ‘capital surplus – share options’ amounting to \$1,099,253. The convertible bonds matured on November 6, 2022. The convertible corporate bonds were not converted into ordinary shares, therefore, ‘capital surplus - share options’ was reclassified to ‘capital surplus - share premium’.

B. First overseas unsecured convertible bond issue of 2021

- (a) The Company issued the first overseas unsecured convertible bonds totaling USD 700 million with the approval of the competent authority on May 26, 2021. The bonds carry zero coupon rate over five years. The circulation period is from August 5, 2021 to August 5, 2026. The Company will fully redeem the bonds at the price of the bonds’ face value plus -0.41% of the face value at the maturity date.

- (b) The conversion price is adjusted in line with the model specified in the conversion rules. As of December 31, 2023, no bonds were converted into common stock at the conversion price of NT\$147.932 in dollars (using the exchange rate of 1 USD: 27.978 TWD) which was adjusted by the Company on July 10, 2023 based on the conversion rules of the first overseas convertible bond issue of 2021.
 - (c) In accordance with the conversion rules, if the convertible bond is purchased (including purchased from the secondary market), early redeemed, or repaid at maturity by the Company, or if the convertible bond is converted into common stocks or redeemed by the bondholder, the bond is to be retired and will not be reissued.
 - (d) In accordance with the conversion rules, the rights and obligations of common stocks converted are the same as the outstanding ones previously subscribed.
 - (e) The conversion options for the first overseas convertible bond issue of 2021 are separated from the liabilities and recorded as 'capital surplus - share options' amounting to \$336,012.
 - (f) In accordance with the conversion rules, bondholders have the right to request the Company to redeem any bonds at the price of the bonds' par value upon three years from the issue date. As the bondholders of the convertible corporate bonds will be able to exercise the put options in the third quarter of 2024, the convertible corporate bonds were transferred to 'long-term liabilities, current portion' from the period. After the put options exceed their exercise period, the unexercised put options will be transferred back to 'bonds payable' if they met the definition of non-current liabilities.
- C. For details of principal, interest rate, maturity and other information of corporate bonds payable and foreign unsecured corporate bonds, refer to Statement 12.

(13) Pensions

A. Defined benefit plan

- (a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law of Taiwan, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for

retirement in the following year, the Company will make contributions for the deficit by next March.

- (b) The amounts recognised in the balance sheet are as follows (shown as “other non-current liabilities”):

	December 31, 2023	December 31, 2022
Present value of defined benefit obligations	\$ 1,442,472	\$ 1,545,895

(d) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilisation plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings are less than aforementioned rates, government shall make payment for the deficit after being authorised by the Regulator. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2023 and 2022 is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.

(e) The principal actuarial assumptions used were as follows:

	2023	2022
Discount rate	<u>1.20%</u>	<u>1.40%</u>
Future salary increases	<u>3.5%</u>	<u>3.5%</u>

Assumptions regarding future mortality rate are set based on actuarial advice in accordance with published statistics and experience in each territory. Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis was as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2023				
Effect on present value of defined benefit obligation	<u>\$ (36,611)</u>	<u>\$ 37,940</u>	<u>\$ 33,585</u>	<u>\$ (32,650)</u>
	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2022				
Effect on present value of defined benefit obligation	<u>\$ (41,388)</u>	<u>\$ 42,951</u>	<u>\$ 38,312</u>	<u>\$ (37,194)</u>

The sensitivity analysis above is based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

- (f) Expected contributions to the defined benefit pension plan of the Company for the year ending December 31, 2024 amount to \$12,717.
- (g) As of December 31, 2023, the weighted average duration of the retirement plan is 11 years.

B. Defined contribution plan

- (a) Effective July 1, 2005, the Company has established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company contributes monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.
- (b) The pension costs under the defined contribution pension plans of the Company for the years ended December 31, 2023 and 2022 were \$241,203 and \$232,503, respectively.

(14) Share capital–common stock

A. As of December 31, 2023, the Company's authorised capital was \$180,000,000, consisting of 18,000,000 thousand shares of ordinary stock, and the paid-in capital was \$138,629,906, consisting of 13,862,991 thousand shares with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected.

B. Pursuant to the resolution adopted at the stockholders' meeting held on June 1, 1999, and after obtaining approval from the SFC, the Company issued 50 million ordinary shares so as to issue 25 million units of Global Depository Receipts (GDRs) in Europe, Asia and the USA. The issuance amounted to USD 347,250 thousand, and the main terms and conditions of the GDRs are as follows:

(a) Voting

Holders of GDRs have no right to directly exercise voting rights or attend the Company's stockholders' meeting, except when a motion is on the election of directors or supervisors. A holder or holders together holding at least 51% of the GDRs outstanding at the relevant record date of the stockholders' meeting can instruct the Depositary to vote in the same direction in respect of one or more resolutions to be proposed at the meeting.

(b) Sale and withdrawal of GDRs

Under the current R.O.C. law, shares represented by the GDRs may be withdrawn by holders of GDRs commencing three months after the initial issue of GDRs. A holder of a GDR may, provided that the Company has delivered to the custodian physical share certificates in respect of the Deposited Shares, request the Depositary to sell or cause to be sold on behalf of such holder the shares represented by such GDRs.

(c) Dividends

GDR holders are entitled to receive dividends to the same extent as the holders of common stock.

(d) As of December 31, 2023, 64,930 thousand units of GDRs were outstanding, which represents 129,859 thousand shares of common stock.

C. Treasury stocks

The Company's subsidiary, Hon Jin International Investment Co., Ltd., acquired ordinary shares issued by the Company in 1998. As of December 31, 2023 and 2022, the subsidiary held a total of 1,483,078 shares of the Company's common stock. The original cost of treasury stocks was \$18,901, and the cost after capital reduction was \$15,194.

(15) Capital surplus

Pursuant to the R.O.C. Company Act, capital reserve arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Act requires that the amount of capital reserve to be capitalised mentioned above should not exceed 10% of the paid-in capital each year. Capital reserve should not be used to cover accumulated deficit unless the legal reserve is insufficient. Movements in capital reserve are as follows:

Regarding the recognition of the capital surplus from changes in equity interests in associates, refer to Note 6(7) for details; expiration of stock options in convertible corporate bonds based on the redemption ratio, refer to Note 6(12) for details.

(16) Retained earnings

A. The annual net income of the Company shall be appropriated in accordance with the priorities listed as follows:

(a) Recovery of losses;

(b) Appropriation of 10% for legal reserve.

(c) Appropriation or reversal of special reserve pursuant to applicable law or regulation.

As to the earnings available for appropriation to shareholders including accumulated unappropriated earnings and earnings available for appropriation this year, the board of directors is authorised to draft an appropriation plan in accordance with the dividend policy in Section D of the Articles of Incorporation.

The board of directors is authorised to distribute dividends and bonuses in whole or in part, which may be paid in cash after a resolution has been adopted by a majority vote at a meeting of the board of directors attended by two-thirds of the total number of directors.

The Company is currently at a developing stage. The Company's dividend distribution policy is subject to the Company's current and future investment environment, fund requirements, competition from local and abroad, and capital budgets, as well as taking into consideration the interests of shareholders and the long-term financial planning. Shareholder dividends are appropriated based on accumulated unappropriated earnings, which shall not be less than 15% of distributable earnings for the year and cash dividends shall not be less 10% of total dividends.

B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.

C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.

D. The appropriations of 2023 earnings were proposed during the board meeting on March 14, 2024. The appropriations of 2022 earnings had been resolved at the shareholders' meeting on May 31, 2023. Details are summarized as follows:

	2023		2022	
	Amount	Dividends per share (in dollars)	Amount	Dividends per share (in dollars)

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE

(1) The appropriation of 2023 earnings was approved by the Board of Directors on March 14, 2024. Refer to Note 6(16) for details.

- (2) The Company issued \$11,400,000 first unsecured corporate bonds, as approved by the regulatory authority on January 2, 2024. The capital has been raised and bonds have been issued on OTC on January 11, 2024.
- (3) On January 8, 2024, the Company entered into a purchase agreement with an associate, Sakai Display Products Corporation (hereinafter referred to as "SDP"), and the Company expects to purchase products with a total price of US\$246,000 thousand for five years from 2024 to 2028, based on the Company's demand. The Company may adjust the purchase price and quantity according to the actual demand. As of the issuance date of the financial statements, all the above mentioned purchase price has been paid.

12. OTHERS

(1) Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to operate with the goal to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet less the total intangible assets.

During 2023, the Company's strategy, which was unchanged from 2022, was to maintain the gearing ratio at 70% or below.

(2) Financial instruments

A. Financial instruments by category

Refer to the parent company only balance sheets and Note 6 for the amounts and details of the financial assets (financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets at amortised cost, accounts receivable (including related parties) and other receivables) and financial liabilities (financial liabilities at fair value through profit or loss, accounts payable (including related parties), other payables, short-term loans, long-term loans and corporate bonds payable).

B. Financial risk management policies

(a) Risk categories:

The Company employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

(b) Management objectives:

- i. Except for market risk, which is controlled by outside factors, the remainder of the foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.
- ii. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.
- iii. The Company's overall risk management policy focuses on the unpredictable item of financial markets and seeks to reduce the risk that potentially pose adverse effects on the Company's financial position and financial performance.
- iv. For the information on the derivative financial instruments that the Company enters into, refer to Notes 6(2).

(c) Management system:

- i. Risk management is executed by the Company's finance department by following policies approved by the Board. Through cooperation with the Company's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.
- ii. The Board has a written policy covering overall risk management. It also has written policies covering specific issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

C. Significant financial risks and degrees of financial risks

(a) Market risk

i. Foreign exchange risk

(i) Nature:

The Company is a multinational company in the Electronics manufacturing services industry.

- a. Foreign exchange risk arises from different exchange rates to functional currency as the invoice dates of accounts receivable and payable denominated in non-functional foreign currency are different. Due to the characteristics of the subcontracting industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the variations in currencies of the Company's certain foreign investments in emerging countries (i.e. Brasil and Mexico, etc.) are considered huge, the percentage of the investments is not significant and thus the

Company's foreign exchange risk can be maintained in the controllable range.
(Note: The Company has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)

- b. Except for the above transactions (operating activities) recognised in the income statement, assets and liabilities recognised in the balance sheet and the net investment in foreign operations also result in the exchange rate risk.

(ii) Management:

- a. For such risks, the Company has set up policies requiring companies in the Company to manage its exchange rate risks.
- b. As to the exchange rate risk arising from the difference between various functional currencies and the reporting currency in the consolidated financial statements, it is managed by the Group's finance department.

(iii) The source:

USD and TWD:

Foreign exchange risk arises primarily from USD-denominated cash, cash equivalents, accounts receivable and other receivables, loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into TWD.

(iv) Extent:

The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

(Foreign currency: Functional currency)	December 31, 2023				
	Foreign currency amount (in thousands)	Exchange rate	Book value (TWD)	Sensitivity analysis	
				Extent of variation	Effect on profit or loss
<u>Financial assets</u>

	December 31, 2022				
(Foreign currency: Functional currency)	Foreign currency amount (in thousands)	Exchange rate	Book value (TWD)	Sensitivity analysis	
				Extent of variation	Effect on profit or loss
<u>Financial assets</u>					
<u>Monetary items</u>					
USD : TWD	\$ 52,260,115	30.71	\$ 1,604,908,127	5 %	\$ 80,245,406
<u>Net effect in consolidated entities with foreign currency</u>					
USD : TWD	\$ 53,209,055	30.71	\$ 1,634,050,083		
<u>Financial liabilities</u>					
<u>Monetary items</u>					
USD : TWD	\$ 56,503,162	30.71	\$ 1,735,212,100	5 %	\$ 86,760,605

(v) Total exchange gain (loss), including realised and unrealised arising from significant foreign exchange variation on the monetary items held by the Company for the years ended December 31, 2023 and 2022 amounted to (\$817,648) and (\$9,250,113), respectively.

ii Equity securities

(i) Nature

The Company primarily invests in domestic and foreign publicly traded equity instruments, which are accounted for as financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. The price of those equity instruments will be affected by the uncertainty of the future value of the investment.

(ii) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held constant, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, and investments in equity at fair value through profit or loss are \$129,148 and \$30,936 for the years ended December 31, 2023 and 2022, respectively.

iii Cash flow and fair value interest rate risk

(i) The Company's interest rate risk arises from short-term loans. Borrowings with floating rates expose the Company to cash flow interest rate risk, but part of the risks are offset by cash and cash equivalents with variable interest rates. Borrowings with fixed rates expose the Company to fair value interest rate risk. The Company's borrowings are mainly fixed and floating interest rates.

(ii) The Company manages its cash flow interest rate risk by using fixed-to-fixed interest rate swaps. Under these swaps, the Company agrees with other parties to exchange, at specified intervals (mainly quarterly), the difference between fixed

contract rates and floating rate interest amounts calculated by reference to the agreed notional principal amounts.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments.

According to the Company's credit policy, the Company is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The Company assesses the credit quality of the customers by taking into account their financial position, past experience and other factors to conduct its internal risk management.

Individual risk limits are set based on internal or external ratings in accordance with limits set by the board of directors. The utilisation of credit limits is regularly monitored. Major credit risk arises from cash and cash equivalents, derivative financial instruments and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.

- ii. The Company assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 360 days, a default has occurred.
- iii. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
 - (i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
 - (ii) Default or delinquency in interest or principal repayments;
 - (iii) Adverse changes in national or regional economic conditions that are expected to cause a default.
- iv. The aging analysis of notes receivable and accounts receivable (including related parties) is as follows:

	December 31, 2023	December 31, 2022
Not past due	\$ 362,939,974	\$ 546,197,139
Up to 90 days	33,911,730	10,807,411
91 to 180 days	411,043	904,443
181 to 270 days	606,086	316,077
271 to 360 days	94,953	1,526
Over 361 days	3,296,469	3,284,054
	<u>\$ 401,260,255</u>	<u>\$ 561,510,650</u>

The above aging analysis is based on days overdue.

- v. The Company applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:
- (i) Assess the ECLs on an individual basis if a significant default has occurred to certain customers.
 - (ii) Classify the other customers' accounts receivable based on the Company's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix.
 - (iii) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.
 - (iv) As of December 31, 2023 and 2022, the individual provision for impairment of accounts receivable using loss rate methodology or provision matrix is as follows:

	Individual	Group 1	Group 2	Group 3	Group 4	Total
December 31, 2023						
Expected loss rate	100%	0.05%	0.11%	1.29%~28.57%	2.64%~20.7%

Group 1: Standard Poor's, Fitch's, or Moody's rating of A-level, or rated as A-level in accordance with the Company's credit policies for those that have no external credit ratings.

Group 2: Standard Poor's or Fitch's rating of BBB, Moody's rating of Baa, or rated as B or C in accordance with the Company's credit policies for those that have no external credit ratings.

Group 3: Standard Poor's or Fitch's rating of BB + and below, or Moody's rating of Ba1 and below.

Group 4: Rated as other than A, B, or C in accordance with the Company's credit policies for those that have no external credit ratings.

- vi. As of December 31, 2023 and 2022, the Company calculated the expected loss rate based on historical overdue repayment to assess other receivables - related parties impairment losses and no allowance for uncollectible accounts was recognised.
- vii. Movements in relation to the Company's loss allowance for accounts receivable (including related parties) is as follows:

	2023	2022
At January 1	\$ 3,968,052	\$ 2,949,059
(Reversal of) provision for impairment loss	(510,567)	1,018,993
At December 31	<u>\$ 3,457,485</u>	<u>\$ 3,968,052</u>

(c) Liquidity risk

- i. Cash flow forecasting is performed by each operating entity of the Company and aggregated by Company treasury. The Company treasury monitors rolling forecasts of the Company's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Company does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Company's debt financing plans, covenant compliance, compliance with internal balance sheet ratio targets and, if applicable, external regulatory or legal requirements, for example, currency restrictions.
- ii. The table below analyses the Company's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Company's investment in listed stocks and open-end funds is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Company's investment in convertible corporate bonds payable, most of the derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Company's equity investment without active market is included in Level 3.

B. Financial instruments not measured at fair value:

(a) Except for those listed in the table below, the carrying amounts of the Company's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortised cost (excluding bank debentures), short-term loans, notes and accounts payable and other payables approximate to their fair values:

December 31, 2023				
	Book Value	Fair Value		
		Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	\$ 206,483,116	\$ -	\$ 197,600,500	\$ -
December 31, 2022				
	Book Value	Fair Value		
		Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	\$ 167,233,116	\$ -	\$ 159,625,743	\$ -

(b) The methods and assumptions of fair value measurement are as follows:

Bonds payable: Regarding the bonds issued by the Company, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present value of the expected cash flows and market interest rate.

C. The related information on financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at December 31, 2023 and 2022 is as follows:

(a) The related information on the nature of the assets and liabilities is as follows:

Derivatives	\$ -	\$ (3,131,950)	\$ -	\$ (3,131,950)

- (b) The methods and assumptions the Company used to measure fair value are as follows:
- i. The instruments the Company used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	Listed shares	Open-end fund
Market quoted price	Closing price	Net asset value

- ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.
 - iii. When assessing non-standard and low-complexity financial instruments, for example, interest rate swap contracts and foreign exchange swap contracts, the Company adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
 - iv. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate.
 - v. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Company's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Company's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
 - vi. The Company takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Company's credit quality.
- D. For the years ended December 31, 2023 and 2022, there was no transfer between Level 1 and Level 2.

- E. The following chart is the movement of Level 3 for the years ended December 31, 2023 and 2022:

	2023	2022
	Equity instruments	Equity instruments
At January 1	\$ 1,307,538	\$ 307,575
Losses recognised in other comprehensive income	(437,425)	(604,914)
Acquired during the year	485,003	1,604,877
Investment cost refund	(9,019)	-
At December 31	<u>\$ 1,346,097</u>	<u>\$ 1,307,538</u>

- F. Investment segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value. Investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments and ensures compliance with the related requirements in IFRS Accounting Standards.
- G. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at December 31, 2023	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:					
Unlisted shares	<u>\$ 1,111,304</u>	Net assets value	Discount for lack of marketability	13%~19% (18%)	The higher the discount for lack of marketability, the lower the fair value.
	<u>\$ 220</u>	Market comparable companies	Discount for lack of marketability	29%	The higher the revenue multiple, the higher the fair value; the higher the discount for lack of marketability, the lower the fair value.
			Revenue multiple	0.86	

	Fair value at December 31, 2023	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:					
Unlisted shares	\$ 234,573	Stock value in complex capital structure	Discount for lack of marketability	27%	The higher the expected equity value volatility and net value multiple, the higher the fair value; the higher the discount for lack of marketability, the lower the fair value.
			Expected equity value volatility	45%	
			Net value multiple	4.05	
	Fair value at December 31, 2022	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:					
Unlisted shares	\$ 1,009,539	Net assets value	Discount for lack of marketability	18%~20% (20%)	The higher the discount for lack of marketability, the lower the fair value.
	\$ 219	Market comparable companies	Discount for lack of marketability	29%	The higher the revenue multiple, the higher the fair value; the higher the discount for lack of marketability, the lower the fair value.
			Revenue multiple	0.86	
	\$ 297,780	Stock value in complex capital structure	Discount for lack of marketability	30%	The higher the expected equity value volatility and net value multiple, the higher the fair value; the higher the discount for lack of marketability, the lower the fair value.
			Expected equity value volatility	57%	
			Net value multiple	5.42	

- H. The Company has carefully assessed the valuation models and assumptions used to measure fair value. However, use of different valuation models or assumptions may result in different measurement. The following is the effect on profit or loss or on other comprehensive income from financial assets and liabilities categorised within Level 3 if the inputs used to valuation models have changed:

		December 31, 2023				
	Input	Change	Recognised in profit or loss		Recognised in other comprehensive income	
			Favourable change	Unfavourable change	Favourable change	Unfavourable change

Note 1: Code of general ledger account is "investments accounted for under equity method".

Note 2: Code of general ledger account is "financial assets at fair value through other comprehensive income", its gain (loss) on disposal was from other comprehensive income directly transferred to retained earnings.

Note 3: Code of general ledger account is "financial assets at fair value through profit or loss".

Note 4: Code of general ledger account is "financial assets at amortised cost".

Note 5: Fill in the columns the counterparty and relationship if securities are accounted for under the equity method; otherwise leaves the columns blank.

Note 6: The counterparty is a subsidiary of the Company.

Note 7: Aforementioned amounts were investment cost, for the information of their book value amount, please refer to Note 6(8) and table 10.

Note 8: The Group sold equity of Fitipower Integrated Technology Inc. ("Fitipower Integrated") to less than 20% in 2023. On June 15, 2023, the Group lost its significant influence over Fitipower Integrated, with the resignation of the director's position in Fitipower Integrated. The Group remeasures any investment retained in Fitipower Integrated at its fair value and transfers it to financial assets at fair value through other comprehensive income.

Note 9: Hon Hai Precision Industry Co., Ltd. is referred to as Hon Hai, Hyield Venture Capital Co., Ltd. is referred to as Hyield, Hon Chi International Investment Co., Ltd. is referred to as Hon Chi, Hon Yuan International Investment Co., Ltd. is referred to as Hon Yuan, Bon Shin International Investment Co., Ltd. is referred to as Bon Shin, Lin Yih International Investment Co., Ltd. is referred to as Lin Yih.

Note 10: The total amount of the Group's acquisition or sale of the same security is reaching NT\$300 million or more.

Note 11: On December 15, 2023, Far EasTone Telecommunications Co., Ltd. (FET) merged with Asia Pacific Telecom Co., Ltd. (APT) through share swap, as a result, the Group lost its control over APT. The registered ordinary shares in APT were exchanged for the registered ordinary shares in FET at a ratio of one share of APT to 0.0934406 share of FET. The fair value on the date of loss of control was \$11,580,784 thousand, and the difference between the fair value and the carrying amount was recognised as gains on disposal of investment.

Note 1: The information of transactions between the Company and the consolidated subsidiaries should be noted in “Number” column.

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

- (1) The Company to the consolidated subsidiary.
- (2) The consolidated subsidiary to the Company.
- (3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed. All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: The aforementioned transactions with related parties were based on the financial statements of the company for the same period which were audited by independent auditors.

C. Cash Flow Analysis

(1) Liquidity Analysis of Recent 2 Years

Item \ Year	2023	2022	Ratio Change (%)
Cash flow ratio (%)	23.34%	5.19%	349.62%
Cash flow adequacy Ratio (%)	76.78%	43.11%	78.11%
Cash reinvestment ratio (%)	14.63%	1.44%	919.22%

Variance Analysis:

1. Cash flow ratio: Although the external environment had an impact on International Logistics in 2023, the Company's commitment to supply chain and inventory management resulted in a significant decrease in inventory levels; at the end of 2022, due to the COVID-19 pandemic, the Chinese plants had temporarily suspended production. The deferred effect made the cash collection amount of accounts receivable in 2023 increase from the previous year, and thus the cash flow ratio increased in 2023.
2. Cash flow adequacy ratio: In 2023, the Company continued to strengthen its external investment layout in accordance with the development of the 3+3 strategy and business expansion; however, due to the effective control of inventory and appropriate. Therefore, the cash flow adequacy ratio has increased significantly compared to 2022.

3. Cash reinvestment ratio: Due to the significant increase in cash inflow from operating activities in 2023 compared to 2022, the cash reinvestment ratio in 2023 increased.

Cash beginning balance (1)	Cash flow from operating activities (2)	Projected cash outflow for the year (3)	Projected cash surplus (deficit) amount (1) + (2) - (3)	Measures to make up for the expected cash shortage	
				Investment activities	Financing activities
136,500,282	3,836,106,984	3,766,526,538	206,080,728	-	-
Analysis of changes in cash flow for the current year (2024): 1. Operating activities: The Company expects revenue and profit to continue to grow. 2. Investment activities: The Company expects expansion of production facilities to meet business demand. 3. Financing activities: This year, the Company expects to distribute cash dividends, borrow short-term loans, and propose to issue unsecured bonds.					

(2) Cash Flow Forecast for the Coming Year

Unit: NT\$ Thousand

D. Major Capital Expenditures

(1) Major Capital Expenditures and its Sources of Capital:

Unit: NT\$ Thousand

Project	Actual or expected sources of funds	Expected date of completion	Total funds required	Actual or Expected Capital Expenditure	
				2023 (actual)	2024 (projected)
Equipment Purchases	Retained Earnings and Revenue	2023.12.31	1,154,336	1,041,694	1,154,336

(2) Expected Benefits:

The above capital expenditure is to meet the needs of the Company's business growth, and actively develop the 3+3 strategy and increase the purchase of related machinery and equipment to expand production capacity and improve production efficiency; and continue to research and develop, design, and manufacture various electronic equipment products to optimize the manufacturing process. This way, we can improve quality and efficiency, reduce costs and reduce inventory, and strive for stable growth through innovation.

E. Investment Policy, Cause of Profit/Loss and Future Investment Plans:

(1) Policy for Recent Investments:

Investment Policies are aligned to increase manufacturing capacity, and to aid in the Company's revenues and profits.

(2) Cause of Profit/Loss for Investments:

The Company's investment income recognized under the equity method for 2023 was NTD 131,699,310 thousand, mainly due to the sound operation of the overseas reinvestment company and profits.

(3) Future Investment Plans for the Coming Year:

The Company's long-term investment strategy is one of prudence, and will be in correlation with market and capacity needs. The Company will continue our commitment to strengthening global competitiveness.

F. Risk Assessment

(1) Effect of Changes in Interest Rate, Foreign Exchange and Inflation on Corporate Finance, and our Countermeasures.

1. Interest Rates

(1) Changes in interest rates by country in 2023:

USD: In 2023, due to the impact of strong interest rate hikes in the previous year, thunderstorms with small and medium-sized banks in the U.S. in March, and U.S. inflation gradually falling from the high point, the Fed gradually slowed down the pace of interest rate hikes. By maintaining high interest rate until the end of the year, and raising interest rate by 4 basis points to 5.50% during the year, the 10-year US bond yield rose from 3.74% at the beginning of the year to the highest point of 5.02% in October, and then fell back to 3.88% at the end of the year.

JPY: In 2023, the domestic and foreign demand in Japan was still weak. In order to stabilize the economic recovery, the Bank of Japan maintained loose monetary policy. However, in the face of the Fed's high interest rate, the yen depreciated against the US dollar, Japanese bonds continued to be sold, and the 10-year Japanese government bond yield continued to hit the upper limit. Therefore, BOJ relaxed the upper limit of the YCC to 1.00% in July, and further allowed YCC exceeded 1.00%, and the 10-year government bond yield rose sharply from 0.413% in January to a high of 0.952% in October, and then fell back at the end of the year to 0.608%.

TWD: In 2023, the Central Bank of Taiwan followed the Fed to raise interest rates in the first quarter of 2023 and maintained interest rates until the end of the year. The rediscount rate was raised by 0.50% to 1.875%. The yield on Taiwan 10-year government bond rose from 1.28% at the beginning of the year to the highest point in October 1.34%, and then fell back to 1.21% at the end of the year.

RMB: In 2023, China had just started to remove lockdowns and the economic recovery was rather weak. The People's Bank of China maintained an accommodative monetary policy and the deposit reserve requirement ratio at large financial institutions was reduced from 11.00% to 10.50%. The one-year LPR interest rate was reduced from 3.65% to 3.45%. The 5-year LPR rate was reduced from 4.30% to 4.20%. The 10-year government bond yield dropped from 2.83% at the beginning of the year to 2.56% at the end of the year.

(2) Effect of the Company's Finances

Debt:

- A. Short-term interest rates in major operating currencies have risen, which is relatively unfavorable for short-term loans with floating interest rates.
- B. Previous fixed-interest financings for ordinary corporate loans are not affected by interest rate fluctuations.

Asset: The rising interest rate will be beneficial to the Company's short-term capital from investment income.

Net result: Due to proper management and control, "net interest income" was generated in the past two years. It was NTD +8.567 billion in 2022 and NTD +16.157 billion in 2023.

(3) Countermeasures

In 2024, the focus will be on the monetary policies of the central banks of various countries. The geopolitical conflicts still exist, and there is a risk of a rebound in prices. As a result, the monetary policies of the central banks of major countries will be different and the risk of economic cooling will be reduced. The interest rate of USD remains high, and the interest rate of NTD and JPY has increased slightly. Therefore, the Company will reasonably arrange various financing instruments as soon as possible to raise medium and long-term funds with low interest rate in USD, NTD or JPY.

2. Foreign Exchange:

(1) Changes in exchange rates in 2023:

USD-JPY: In 2023, the US bond interest rate was still rising, while the Japanese economy was weak and inflation fell from the high point. BOJ maintained an accommodative policy. The US-Japan interest rate spread widened. USD/JPY continued to rise, from a low of 130.80 at the beginning of the year to a high of 151.72 in November. As the DXY weakened, it fell back to the vicinity of 141.04 at the end of the year.

USD/TWD: Expected slower inflation in the U.S. and a slower rise in U.S. bond yields. However, under high interest rates, the US dollar is still strong. At the same time, due to slowdown in Taiwan's external demand and weak exports, the Taiwan dollar remains weak. USD/TWD reached a maximum of 32.481 in October. As the expectation of the U.S. to cut interest rate gradually increased, the USD fell back. At the end of the year, USD/TWD fell back to around 30.579.

USD/CNY: In 2023, China just started to remove lockdowns from lockdown. Due to the strong USD and the weaker-than-expected economic recovery in China, the expectation of interest rate cut increased. USD/CNY rose from 6.9150 in January to 7.3439 in September. Afterwards, the Politburo meeting was convened to release the stimulative policies and boost the market's confidence in the economic recovery. In addition, as DXY gradually slowed down, USD/CNY gradually fell back to around 7.1000 at the end of the year.

(2) Effect of the Company's Finances

A. Attributed Profit/Loss:

(A) Pursuant to "IFRS 9 (Financial Instruments)", profit and loss attributed to interest rates' fluctuations should be categorized into the two following categories:

a. Profit and Loss attributed to Exchange:

Foreign Exchange related assets or debt (such as operational accounts receivable, accounts payable, financial activities related to demand [time] deposits, short [long] term loans) and the discrepancy caused by exchange are attributed to this category.

b. Financial Assets (Liabilities) Profit and Loss Valuation:

Foreign exchange related assets or liabilities generated from risk avoidance mechanisms (such as Long-term foreign exchange trading), and the profit and loss generated at fair value are listed in this category.

(B) In order to review the Profit and Loss generated from exchange-related fluctuations, the two factors listed above should be consolidated to provide a fuller picture.

B. Profit/Loss status: (Note: +Profit, -Loss)

Unit: NT\$100Million

Type \ Item	2022			2023		
	Exchange gain or loss	Profit or loss from valuation of financial assets (liabilities)	Total	Exchange gain or loss	Profit or loss from valuation of financial assets (liabilities)	Total
Consolidated Statement	-63.22	-76.69	-139.91	+62.63	-74.70	-12.07

C. Profit/Loss Description: The Company has always maintained a conservative approach to risk avoidance, and stringent internal monitoring of trends and changes in foreign exchange and external financial markets. Therefore, the Company can execute risk aversion strategies accordingly, and generate profits attributed to exchange. However, due to the high cost of hedging for most currencies, the hedging effectiveness will diminish over time.

(3) Countermeasures

A. Fundamental Strategy: To cater for the complicated external factors at play, the Company attempts to offset liabilities with assets, and reduce the exposure exchange-related fluctuations.

B. Risk Avoidance: The underlying principle is to square-off the aforementioned net positions.

3. Inflation

(1) Changes: In the first half of 2023, Taiwan's inflation gradually declined as global raw material prices slowed down. However, domestic demand remained stable. Meanwhile, the Company's CPI (YOY%) was 2.50%.

(2) Effect on the Company's profit and loss: The Company is an OEM for electronics in nature, and the prices of its products tend to drop for a long time. However, the Company will work hard to reduce various costs to minimize the impact of inflation.

(3) Countermeasures:

A. The Company will continue to its commitment to various cost-reducing initiatives as a policy, and will be more risk-averse to inflation and deflation related factors.

B. The price of raw materials has declined after the sharp rise, but there is still room for growth in the future. The Company will closely observe the changes in the prices of various important raw materials and dynamically adjust the procurement strategy.

(2) Policies, Main Causes of Profit/Loss and Action Plans with Respect to High-risk, High-leveraged Investment, Lending or Endorsement Guarantee, and Derivatives Transactions

1. High-risk, High-leveraged Investments: None

2. Procedures for Lending Funds to Others and Countermeasures

(1) Policy: Regarding related procedures mentioned in the Company's consolidated financial reports, please refer to the related companies' "Operational Procedures for Lending Funds to Others".

(2) Main Reasons: The Company's lending to legal entities listed in the consolidated financial report have short-term financing needs.

(3) Countermeasures: Depending on the nature of the loan and target's procedures, the Company will undertake necessary countermeasures.

3. Procedures for Endorsement & Guarantees and Future Countermeasures:

(1) Policy: The endorsement and guarantee provided by the Company and the individual juristic persons included in the consolidated financial statements shall be handled in accordance with the "Procedures for Endorsement and Guarantee" of the respective companies.

(2) Main reason: The endorsements and guarantees provided by the Company and the individual legal persons included in the consolidated financial statements are in principle the parent company and subsidiaries, and the endorsements and guarantees are mainly for financing guarantees.

(3) Future countermeasures: Carry out necessary control measures in accordance with the Operational Procedures for Endorsements and Guarantees.

4. Derivatives Transactions

(1) Policy:

A. The Company and the legal entities listed in the consolidated financial report that partake in derivatives transactions will all be in accordance with FSC's "Regulations Governing the Acquisition and Disposal of Assets by Public Companies" and TWSE's "Taiwan Stock Exchange Corporation Directions for Auditing Internal Control Systems of Listed Companies".

B. As a risk avoidance principle, positions of the Company's asset or liabilities that are in actual possession or expected to be in possession will be closed. This offsets market price fluctuations as risks and risk-avoidance transactions will counteract each other, achieving stable operations.

(2) Causes for Profit/Loss:

A. Externally: Political game theory, black swan theory, and the state of the economy has placed various governments in different predicaments. Different countries have undertaken either tightening or relaxing monetary policies, creating a turbulent and unpredictable foreign exchange market.

B. Internally: As a principle, derivatives trading will aim to "close the underlying net positions of related hedges". Therefore, when a loss occurs to the substantial net position, a corresponding gain in financial asset (liability) valuation will occur to "the inverse derivative trade in order to offset the hedging of the substantial net position", and vice versa.

(3) Countermeasures:

A. Stance:

- (A) Derivative products are a financial tool and should be judge on how the tool is utilized, to achieve what ends, and the mentality in making such decisions.
- (B) The Company is committed to internal controls regarding financial derivative transactions, and has implemented various principals to reduce to the risks to a minimum.
- (C) Domestically, IFRS has implemented strict accounting regulations and guidelines regarding financial derivatives trading. The Company's procedures are in compliance and even more rigorous than related regulations

B. Policy:

- (A) With the recent events, the impacts to the financial markets have been exacerbated. The financial market has been speculative and opportunistic, viciously fueling the outcome of these events. Various price fluctuations are neither based on fundamentals or logic, Additionally, with the hype driven by various financial institutions and media, the risk in the market has risen greatly.
- (B) Under these conditions, the financial derivatives and its leverage will be used more conservatively and stringently by the Company. Strategically, the Company will not be following the herd or be intimidated by external factors, and actions shall be judge on its "risk avoidance" merits.

(3) Future Research and Development Projects and Corresponding Budget

The Company focuses on leading the mass production of high-tech technology products, and its method is to effectively gather outstanding R&D talents, and invest the best R&D technologies and processes related to the Company's core competencies. The R&D expenditure in 2024 is expected to be NTD 120 billion.

(4) Effects of Changes in Policies and Regulations on Corporate Finance and Sales and our Countermeasures

(5) Impacts of changes in technology (including information communication security risks) and industry changes on the Company's financial operations, and responsive measures

In recent years, the Company has joined the world's top customers, actively committed to the research and development of technology, and kept abreast of industry changes. In the future, the Company will continue to develop development in line with market trends and customer needs. Therefore, there are no changes in technology (including information and communications security risks) and industry changes Impact on the financial position and operation of the Company.

(6) The Impact of the Changes of Corporate Image on Corporate Risk Management and our Action Plan

The Company has a large number of customers and products, bases distributed all over the world, and employees up to one million, so it is vulnerable to the impact of unexpected events. The Company actively invests in ESG and improves the working and living environment. In addition to enhancing management standards and corporate image, it can also drive the supply chain to improve standards and

reduce overall operational risks. Therefore, there is no corporate crisis caused by the change of corporate image.

(7) Anticipated Results and Risks of Acquisition

As of the printing of the annual report, the Company has no applicable acquisition.

(8) Anticipated Results and Risks of Expansion of Factory Buildings

The main clients of the Company are leading brands of the industry, in an effort to more promptly and better serve these customers, the Company has established foundations in key strategic positions around the globe.

(9) Risks during Concentrated Stock Replenishment and Sale

Collaborating on a global scale with like-minded group of quality suppliers, the Company effectively mitigate risks prone to a particular market, product, or sale, but also offsets risks for suppliers against the industry.

(10) Effects and risks to the Company in the event a major quantity of shares belonging to a director, supervisor, or shareholder holding greater than a 10 percent stake in the Company has been transferred or has otherwise changed hands, and mitigation measures being or to be taken: None.

(11) Effects and Risks of Change in Operating Right

	computer cases, microcomputers, portable computers, notebook computers, and multimedia Computers and servers, data communication multimedia systems, new types of monitors, household electric heating appliances and devices, new types of power electronic components, wires and cable assemblies, power supplies, computer motherboards, materials for optoelectronics, optoelectronic equipment, active and passive components Devices, sensors, single-mode optical fibers and new technology equipment supporting communication networks, communication and network related cards, optical drives, multimedia computer video signal recording and playback equipment, digital audio and video systems (excluding televisions and nationally restricted products) , precision ceramics, optical communication ceramics Sleeves, photoelectric clamps, photoelectric manufacturing equipment, plastics and products, digital cameras and key parts, copiers, wireless phones, electronic special equipment (including mobile phone manufacturing equipment, semi-conductor manufacturing equipment, LCD panel manufacturing equipment), projectors, tin Paste, LCD digital TV, automatic peripheral equipment, mobile phone, multimedia phone, satellite navigation and positioning receiving equipment, intelligent electronic toys, automobile, home appliances and communication electronic products, zinc and aluminum alloy die-casting and processing spare parts, multi-dimensional Glasses, LCD integrated sales terminal electronic cash register, printer ink cartridges, new environmental protection and energy saving lamps, pocket data recorders and players, security products, automatic teller machines, micro cash sorting machines, solar cells, solar battery packs, smart wearable products, All types of video cameras and accessories, multimedia recording equipment, multimedia players, vending machines (including money exchange machines), automatic teller machines, solar power generation devices, game consoles, game machine enclosures, virtual reality product enclosures, software products, physical Production of networked electronic software and hardware, computer software and hardware, computer system integration, computer network technology, computer network software, computer application software, smart mobile service equipment, Class II medical devices, and similar products of the above as well as their spare parts and accessories Maintenance of precision instruments and equipment; sheet metal stamping and cutting. Processing of oscillating atomizer.
Foxconn Smart Agriculture (Shenzhen) Co., Ltd.	Production, sale, processing, transportation, storage, and other related services of agricultural products; intelligent agricultural management; technical services, technology development, technology consultation, technology exchange, technology transfer, and technology extension; vegetable cultivation; fresh vegetable wholesale; fresh vegetable retail; packaging; Agricultural production and operation-related technology, information, and facility construction and operation services; sales of smart agricultural machinery equipment; sales of agricultural machinery; installation and maintenance of agricultural, forestry, animal husbandry, and fishery professional machinery.
Foxconn New Business Development Group Co., Ltd.	Corporate headquarters management; park management services; basic software development for artificial intelligence; technical services, technical development, technical consultation, technical exchange, technology transfer, technology promotion; sales of complete vehicles for new energy vehicles; sales of new energy vehicle battery swapping facilities; battery manufacturing; battery sales; energy storage technology services; research and development of intelligent robots; sales of intelligent robots; brand management; supply chain management services (except for items that require approval by law, independently conducted business activities based on business licenses and legal requirements).
Foxconn Electrical Industry Development (Kunshan) Co., Ltd.	Development and Production of computers and computer peripheral equipment, Servers, Mobile Phones and network communications equipment, audio-visual, film and television equipment, etc., as well as connectors, cable assemblies, optoelectronic devices, etc. of automobiles electrical systems. New Electronic Components, New Instrument Components, Precision Molds and its aforementioned products and Parts, Sales of Self-produced Products.
Foxconn Precision Components (ShenZhen) Co., Ltd.	Permission items: Production and operation of electronic calculator spare parts, interface equipment and connectors, new electronic components and power electronic components, new instrument components and materials, precision molds and accessories, new display devices, electronic game machines, micro calculators

Company name	Business Scope
	and related spare parts 100% of components are exported and related spare parts. To provide after-sale service for self-produced products. Leasing of self-owned properties.
Foxconn Precision Electronics (TaiYuan) Co., Ltd.	General items: Electronic components manufacturing; artificial intelligence application software development; network and information security software development; terminal testing equipment manufacturing; camera and equipment manufacturing; communication equipment manufacturing; network equipment manufacturing; mold manufacturing; information technology consulting services; electronic product sales; Export; communication equipment repair; display device manufacturing; mechanical equipment research and development; integrated circuit manufacturing; software development; artificial intelligence theory and algorithm software development; artificial intelligence basic software development; technical service, development consultation, exchange, transfer, and promotion; digital cultural creativity Software development; cloud computing equipment technical services; intelligent robot research and development; internet sales (excluding sales of licensed goods); display component sales; other special instrument manufacturing; professional design services; special equipment repair; instrument and meter repair; electrical equipment repair; storage equipment rental data processing and storage support services; integrated circuit sales; mobile terminal equipment manufacturing; virtual reality equipment manufacturing; auto parts research and development; auto parts and accessories manufacturing; Parts manufacturing; retail of motorcycles and spare parts; bicycle manufacturing; retail of bicycles and spare parts; non-ferrous metal casting; sales of molds; manufacturing of household appliances; manufacturing of household appliances. Permission items: Inspection and testing services.
Foxconn Precision Electronics (YanTai) Co., Ltd.	Development and Production of New Electronic Components, Mobile Communication Systems, base stations, Switching Equipment and Digital Clustering System Equipment and their parts and components, Electronic Products Testing Equipment, Digital Cameras and key components and Molds related to the above products, assembling LCD TVs and Digital TV Sets, provide related Technology Consulting and after-sales service, and sells the company's own products to engage in the import and export business of the above-mentioned related products; provide contract energy management services, engage in the wholesale of New Environmentally Friendly Energy-Saving Lamps Business; Electric and Non-electric Bicycles development, Design, Development, Processing, Sales.
Fuyou Wande Trading Limited Company	General items: Sale of food (only pre-packaged food); import and export of goods; vending machine sales; technical services, technology development, technology consultation, technology exchange, technology transfer, and technology promotion; advertisement design and agency; advertisement production; advertisement release; sales of electronic products; Purpose Sales of commercial prepaid cards; sales of household appliances; sales of gas and liquid separation and purification equipment; sales of second-class medical equipment; sales of mechanical equipment; mechanical equipment research and development; production of labor protection supplies; sales of labor protection supplies; retail of protective equipment for medical personnel ; wholesale of protective equipment for medical personnel; production of daily masks (non-medical); sales of daily masks (non-medical); production of protective equipment for medical personnel (Class I medical devices); manufacturing of commerce, catering, and service equipment; commercial, Sale of special equipment for catering and service; sale of health food (pre-packaged). Permission items: Sale of food; manufacture of Class II medical devices; food production; beverage production.
FuHong Precision Components (ShenZhen) Co., Ltd.	Production and operation of plugs and sockets, plastics, molds and their parts, telecommunication connectors, computer network connectors, instruments and meters, and automatic manufacturing equipment for computer parts; 70% of products are exported. Addition: Production and operation of other new electronic components, power electronic components, and optoelectronic components; 70% of the sales added products are exported. Increase: Production and operation of computer case components, computer cooling devices, and data communication and multimedia system equipment. 70% of the value-added products are exported.

Company name	Business Scope
	Engaged in the import and export of goods and technologies (excluding distribution and state-controlled commodities).
Fu MinG Tuo property management (ShenZhen) Ltd.	Property management; rental of self-owned houses; charging and selling of motor vehicles.
Fujintong Financial Information Service(Shanghai) Co., Ltd	Engaged in technology development, technology transfer, technology consulting, technical services in the field of network technology, information technology consulting services, information consulting services (excluding licensing information consulting services), information system integration services, computers, software and auxiliary equipment, environmental protection Sales of equipment, electrical equipment, electronic products, hardware products, electronic components, mechanical equipment, communication equipment, molds, and import and export of goods and technologies.
FuJin Precision Industrial (ShenZhen) Co., Ltd.	Production and operation of new electronic components, precision molds, instruments and meters, computer shells and various chassis and stamping hardware and plastic products (excluding restricted items and pollution processes); microcomputers, multi-function microcomputers, portable computers, notebook computers, multimedia computers and servers, data communication multimedia system equipment, New monitors, new technology equipment supporting communication networks, data and language switches, routers, communication and network related cards, and high-performance computer cards; spare parts for the above products, and mobile phone spare parts. Engaged in computer-aided design, aided manufacturing, aided testing, and other application systems, technology development and consultation of information communication network systems and other application systems, and after-sales technical services for self-produced products.
Fu Jin Ji Network Science-Technology (Henan) Co., Ltd.	Computer network technology research and development, technical services, Technology Consulting; engaged in Import / Exports of Goods and Technology; Mechanical Equipment, Mechanical Equipment components, MoldsProcessing components, Metal Processing components, Automation Robots and components, LED lighting equipment, metal materials, Plastic materials, Chemical Products (excluding flammable and explosive materials and hazardous chemicals), Packaging Materials' Sales; Computer Software's technical development and Sales; Mechanical Equipment Leasing;; maintenance and technical services.
Fuyu Energy Technology (Kunshan) Co., Ltd.	Engaged in the R&D, commercial wholesale, and import/export of solar frames, photovoltaic brackets, ground piles and their spare parts, metallic fasteners, and auto parts. Investment and construction of solar photovoltaic power generation related projects, electricity operation and sales (installed capacity: 4MW), energy management contract, energy-saving products and system integration, sales of self-produced products; solar photovoltaic system integration, construction and installation, photovoltaic power generation technology consulting services.
Fuyu (Funing) Energy Technology Co., Ltd.	Research and Development, Processing, assembly of Solar Cells, Photovoltaic application products and related components.
Fuyu properties (Shanghai) Co., Ltd	General categories: non-residential real estate leasing; property management; parking lot services; information consulting services (excluding licensing information consulting services); corporate management; sales of daily necessities; clothing wholesale; clothing retail. Items permitted: Development and management of real estate.
BREAKTIME INC.	Data Storage Media Manufacturing and Duplicating, Wholesale of Computer Software., Retail Sale of Computer Software., Retail sale of Others, Retail Business Without Shop., Other Consultancy, International Trade, Intellectual Property., Investment Consultancy, Management Consulting Services., Other Consultancy., Software Design Services., Data Processing Services., Digital Information Supply Services., the third party payment, General Advertising Services., Leaflet Distribution, network certification service industry, Market research and survey industry, Other Industry and Commerce Services Not Elsewhere Classified. .
FuZhun Precision Tooling (HuaiAn) Co., Ltd.	Development, production, and processing of fine blanking dies, precision cavity molds, and mold standard parts; electronic special equipment, testing instruments, tools and molds; computer plastic enclosure components, computer metal enclosure components, and other new electronic components and their accessories and related software development. Sale of self-produced products.
FUZHUN PRECISION TOOLING (JIASHAN) CO., LTD	General items: Manufacturing of electronic components and electromechanical components; manufacturing of metal tools; manufacturing of industrial automatic

Company name	Business Scope
	control system devices; manufacturing of numerical control machine tools; manufacturing of electronic measuring instruments; manufacturing of industrial robots; manufacturing of special operation robots; manufacturing of service and consumer robots; research and development of intelligent robots; Control system integration; industrial control computer and system manufacturing; computer software, hardware and peripheral equipment manufacturing; audio equipment manufacturing; household appliances manufacturing; environmental protection equipment manufacturing; plastic product manufacturing; metallic material manufacturing; non-ferrous metal alloy manufacturing; mold manufacturing; Non-ferrous metal rolling; processing of mechanical parts and spare parts; artificial intelligence general application system; special equipment repair; general equipment repair; electrical equipment repair; manufacturing of automated high-bay storage equipment and digital audio (video) encoding/decoding equipment. Items permitted: Manufacture of Class II medical devices; production of Class III medical devices; and import/export of goods.
FuJin Precision Industrial (JinCheng) Co., Ltd.	General items: Manufacturing of electronic components; mold manufacturing; mold sales; manufacturing of special ceramics products; sales of special ceramics products; manufacturing of electronic specialized equipment; sales of electronic specialized equipment; research and development of new materials technology; manufacturing of optical communication equipment; sales of optical communication equipment; manufacturing of plastic products; sales of plastic products; manufacturing of electronic components and electromechanical component equipment; sales of electronic components and electromechanical component equipment; retail of electronic components; wholesale of electronic components; manufacturing of optical cables; sales of optical cables; sales of electronic specialized materials; manufacturing of electronic specialized materials; research and development of electronic specialized materials; manufacturing of cameras and equipment; sales of cameras and equipment; manufacturing of optoelectronic devices; sales of optoelectronic devices; manufacturing of other electronic devices; research and development of automotive components; manufacturing of automotive components and accessories; manufacturing of discrete semiconductor devices; sales of discrete semiconductor devices; manufacturing of electronic (gas) physical equipment and other electronic equipment; sales of Class I medical devices; production of Class I medical devices; sales of Class II medical devices. Permitted items: Production of Class II medical devices; Production of Class III medical devices; Operation of Class III medical devices.
FuTaiJing Precision Electronics (BeiJing) Co., Ltd	General items: manufacturing of electronic components; manufacturing of televisions; manufacturing of mobile terminal equipment; manufacturing of mobile communication equipment; manufacturing of communication equipment; manufacturing of general-purpose equipment (excluding manufacturing of special equipment); manufacturing of special-purpose equipment (excluding manufacturing of licensed professional equipment); Mechanical and electrical equipment manufacturing; electronic measuring instrument manufacturing; terminal measuring equipment manufacturing; film and television recording/playback equipment manufacturing; camera and equipment manufacturing; household appliances manufacturing; intelligent unmanned aerial vehicle manufacturing; computer software, hardware and peripheral equipment manufacturing; digital home product manufacturing; virtual reality Equipment manufacturing; wearable smart device manufacturing; smart home consumer device manufacturing; cultural and office equipment manufacturing; auto parts and accessories manufacturing; industrial robot manufacturing; intelligent vehicle equipment manufacturing; navigation terminal manufacturing; satellite mobile communication terminal manufacturing; service consumption Robot manufacturing; electronic equipment manufacturing; electronic (gas) physical equipment and other electronic equipment manufacturing; network equipment manufacturing; security equipment manufacturing; information security equipment manufacturing; audio equipment manufacturing; Internet equipment manufacturing; Internet of Things equipment manufacturing; gas and liquid separation and pure equipment manufacturing; mold manufacturing; technical service, technology development, technology consultation, technology exchange, technology transfer, technology promotion; information system integration service; artificial intelligence industry application system integration service; domestic trade

	agency; procurement agency service; sales agency; Import and export of goods; import and export of technology; import and export agency. Items permitted: Manufacture of radio and television transmission equipment; production of sterilization instruments; production of Class II medical devices; and production of Class III medical devices.
Futaijing Precision Electronics Yantai Co., Ltd.	R&D and Processing of New Electronic Components, Mobile Communication Systems (including Mobile Phones), Digital Clustering System Equipment and its components, Electronic Products Testing Equipment, Digital Camera Modules and key components, Electronic Products components, Sales of Self-produced Products And provide self-developed Technology Consulting, technical services; electronic equipment and its raw materials, wholesale of parts and components and its Import/Export.
Fu Tai International Investment Co., Ltd	Investment industry, venture capital industry, investment consulting industry, management consulting industry
FuTaiKang Electronics Development (YanTai) Ltd.	Research and development of large and medium-sized electronic computers, portable electronic computers, industrial PCs, new electronic components, electronic special equipment, new instrument components, fine blanking dies, standard mold parts, and spare parts for the above products; research, development, and sales of high-end routers, Appearance design and mechanical component structure of network switches, high-capacity optical (magnetic) disk drives and their components, digital cameras and key components, integrated circuits, system integrated circuits, operating systems, software systems, servers, game consoles, mobile phones, etc. Design: automobile and motorcycle mold and jig design; information technology consultation and service; import and export of goods and technologies, import and export agency; transfer of own research and development results.
FuTaiKang Precision Components (ShenZhen) Co., Ltd	Production and operation of various new electronic components and tools, various types of printed circuit boards, power plugs, sockets and computer peripheral equipment. 70% of products are exported. Increase: Production and operation of electronic game consoles, digital audio and video systems and their spare parts (excluding televisions and products restricted by the state), microcomputers, computer cases and their related stamping hardware and plastic parts. Among the sales added products, 100% of digital audio and video systems and their spare parts are exported; 70% of other products are exported. Increase: Production and operation of data communication multimedia system equipment, new technology equipment supporting communication networks, and mobile phone spare parts. 5% of the value-added products are exported. Addition: Production and operation of data and voice switches, routers, and related accessories; engagement in information and communication system network technology development and technical consultation; provision of after-sales technical services for self-produced products; export sales increased by 70%.
FuTaiJie Science & Technology Development (ShenZhe	General items: Research and development of mobile phone spare parts, electronic game consoles and their spare parts, and electronic products and their spare parts; electronic components, computer software and hardware and their spare parts, electronic products and their spare parts, mechanical equipment and their spare parts, games and entertainment Research and development, wholesale, technical consultation, import and export of equipment and chemical products (excluding hazardous chemicals) (not involving state-operated trade-managed goods, and for goods subject to quotas, licensing, and other special regulations, applications shall be handled in accordance with relevant national regulations), and transfer of self-developed technological achievements and after-sales service of the above products; import and export of goods and technologies (excluding distribution and state-controlled products); Enterprise management information consultation; lease of self-owned properties (operational with valid property certificates); outsourcing of system application management and maintenance, information technology support management, financial settlement, and data processing by way of service outsourcing; non-ferrous metals (solder paste, tin bars, tin ingots and other tin products) materials, copper rods, copper tapes, phosphor bronze balls, copper foils, copper alloys and other copper materials); wholesale, import and export of

	disposable medical masks, N95 masks, forehead thermometers (not involving state-operated trade-managed goods, and for goods subject to quotas, licensing, and other special regulations, applications shall be handled in accordance with relevant national regulations), and related ancillary services; smart factories R&D and design of overall system solutions; R&D and design of intelligent production lines and intelligent manufacturing equipment; emerging energy and energy conservation technology services. R&D of emerging energy technologies; sales of electrical accessories for new energy vehicles; sales of intelligent transmission and distribution and control equipment; sales of photovoltaic equipment and components; solar power generation technology services; sales of solar thermal power generation equipment; sales of solar thermal power generation products. Permission items: Production and operation of mobile phone spare parts, electronic game consoles and their spare parts, electronic products and their spare parts; electronic components and spare parts, computer software and hardware and their spare parts, electronic products and their spare parts, and mechanical equipment and their spare parts of maintenance services. Installation, maintenance, and testing of transmission, supply, and reception facilities; and electricity generation, transmission, and supply (distribution).
FuTaiHua Industrial (ShenZhen) Limited	General items: Sales of charging piles; sales of electric bicycles; sales of e-bikes, mobility scooters and spare parts; sales of smart home consumer equipment. Permission items: Electricity transmission, distribution, and control equipment; smart home consumer equipment; mopeds; development, design, production, and operation of game consoles and their spare parts, pneumatic control components, mobile power supplies, mobile phones, mobile communication systems and their spare parts, and computer mainframes PCB and peripheral equipment, hardware and plastic products, precision molds, microcomputers, portable computers, notebook computers, data communication multimedia systems, new monitors, and digital audio and video systems. Engaged in the acquisition and export of commodities that are not subject to quota and license management, and non-specialized in trading, and packaging. Production and operation of large and medium-sized computers, liquid crystal display spare parts; operation of environmental protection (sewage treatment) facilities; production and operation of mobile communication equipment (including wearable devices) (limited to Longhua branch), auto parts (limited to Longhua branch), POS systems (limited to Longhua branch), and smart pens (limited to Longhua branch); Wholesale of Abrasives. Production and processing of wireless communication testers and toys. Digital products, electronic products, computer software and hardware and auxiliary equipment, household appliances, after-sales consultation and on-site installation and maintenance; engaged in similar products of the above products and computer software and hardware, smart equipment, smart electronic products, Class I medical devices, R&D, wholesale, technical consultation, technical service, import and export of smart home equipment software and hardware (not involving state-operated trade-managed goods, and for goods subject to quotas, licensing, and other special regulations, applications shall be handled in accordance with relevant national regulations), sanitary ware and furniture, and transfer of self-developed technical results. Providing elderly care services, nursing consultations (excluding national restricted or prohibited items such as nursing homes, medical services, accommodation, catering services, etc). Catering management; Catering services.
Futaihua Precision Industry (Weihai) Co., Ltd.	Mold manufacturing; mold sales; chemical product sales (excluding licensed chemical products); metal material manufacturing; metal processing machinery manufacturing; mechanical parts and components processing; metal cutting processing services; mechanical equipment research and development; electronic components manufacturing; Offset printing equipment manufacturing; copying and offset printing equipment sales; cultural and office equipment manufacturing; office equipment sales; office equipment consumables manufacturing; office equipment consumables sales; additive manufacturing equipment manufacturing; additive manufacturing equipment sales; non-residential real estate leasing; goods import export; technology import and export.
FuTaiHua Precision Electronics (ChengDu) Co., Ltd.	Manufacturing, R&D, sales, and technical services of wearable smart devices, projection equipment, and spare parts; design and manufacturing of metal molds, non-metallic products molds, jigs, calibration jigs, and their spare parts; information

	and communication services Technical development and consultation of network systems and other application systems; packaging; warehousing (excluding hazardous chemicals); cutting, bending, and welding of various steel plates and aluminum (profile); development, production, and maintenance of automated equipment and related accessories wholesale and retail of electronic products, digital products, computer software and hardware and their auxiliary equipment, and household appliances; technical services and after-sales consulting, installation and maintenance services; engaged in the wholesale, import and export of similar products Ancillary services; after-sales service for self-produced products and technical services for spare parts; mechanical equipment rental; design, production, agency, and release of advertisements (excluding balloon advertisements); photography services; marketing planning; decoration engineering design and construction (Operation by qualification); organization and planning of cultural and artistic exchange activities; graphic design and production; business management consulting; education consulting; human resource intermediary services (shall not engage in business activities without obtaining relevant administrative permits or approvals); quality inspection technical services (excluding licensed operating items); production and sales of Class II medical devices (shall not engage in business activities without obtaining relevant administrative permits or approvals); production and sales of daily masks (non-medical) production and sales; processing, manufacturing, wholesale and retail of plastic products; recycling and utilization of renewable resources (excluding hazardous materials, motor vehicles, and waste electrical and electronic products handling) (not operating within the Third Ring Road) (to be operated in selected locations).
FuNeng New Energy Technology (Nanyang) Co., Ltd.	Provide technical diagnosis of energy consumption and design of energy-saving projects, technical energy-saving transformation of lighting system, professional services of operation and maintenance management; New Energy technology service field and planning and technical services of energy-saving and intelligent products, and energy-saving project transformation projects.
FuDing Precision Components (ShenZhen) Co., Ltd.	General items: Sales of electric vehicle charging; centralized fast charging stations; operation of electric vehicle charging infrastructure; advertising production. Permission items: Production and operation of various plugs and sockets, plastic products, molds and their parts, telecommunication connectors, instrumentation equipment, and new electronic components (excluding restricted items); 70% of products are exported. Research and development, production and operation of mobile phone related spare parts, various power distribution switches, Bluetooth speakers, wireless audio and video sharing devices, cartons, foam, non-standard automated equipment, automatic optical testing equipment, and automated equipment; engaged in the above products and their spare parts, accessories and Wholesale, import and export of similar commodities, technical consultation, technical services, and related ancillary services; transfer of self-developed technical achievements; on-site installation, maintenance, and after-sales service of the above products.
FIH (TIANJIN) PRECISION INDUSTRY CO., LTD.	Development, Processing, Sales and Maintenance Third Generation and Subsequent Generations of Mobile Communication Systems and Mobile Phones, New Electronic Components, Mobile Communication Systems, base stations, Switching Equipment and Digital Clustering System Equipment and their parts, Electronic Products Testing Equipment, Digital Cameras and key parts and Molds related to the above products, and provide related Technology Consulting and after-sales service; Self-owned Factory Lease.
FIH (NANJING) COMMUNICATION CO., LTD.	Development and manufacturing of third-generation and subsequent mobile communication system mobile phones; development and testing of computer and mobile phone related software and hardware, system integration, application services, and related technical services; 2G/3G mobile phones, smart phones, network cards, tablet computers and other communication products, Import/export, wholesale, commission agency (excluding auction) and related ancillary services of communication modules and software. General items: IoT equipment manufacturing; IoT technology research and development; IoT equipment sales; IoT technology services; software development; AI hardware sales; smart vehicle equipment sales; smart robot sales; wholesale of electronic components; import/export agency; goods Import and export; wholesale of computer software, hardware and auxiliary equipment; computer and office equipment maintenance;

Fuxiang Private equity investment fund joint ventur	Equity investment, industrial investment, investment consulting, investment management, business management consulting, business information consulting.
FuXiang Precision Industrial (KunShan) Co., Ltd.	Research, development, production, and processing of new electronic components (new electromechanical components); new instrument components, precision molds, tooling and molds; portable computers and components; electronic special equipment, testing instruments, three-axis or more linked numerical control machine tools, numerical control systems, and servo device, digital TV, new flat panel display devices, digital sound reproduction equipment, digital audio and video encoding/decoding equipment, touch control system (touch screen, touch components, etc.), smart home equipment, medical instruments and equipment, film and television recording and playback equipment , communication system equipment, smart consumer equipment, and the development of spare parts and related software for the above products; PC+ABS, halogen-free flame retardant PC+ABS, PC+ABS+glass fiber, ABS+PMMA, ABS+PET and other plastic alloys; waste plastics and sale of self-produced products.
FuHuaJie Industrial (ShenZhen) Limited	Production and operation of multimedia phones, packaging, portable microcomputers, new flat panel display devices, computer aided design, aided testing, printers, mobile phones, digital audio and video systems, printer ink cartridges, digital cameras and their components, and game consoles. Wholesale, import and export of similar commodities mentioned above, optoelectronic products, solid state lighting sources (LED and similar products), lamps and accessories, and related ancillary services.
FuhuaKe Precision Industry (GuiZhou) Co., Ltd.	Development, production, and operation of consumer electronic product motherboards, power boards, photoelectric boards, driver boards, light bars, and their spare parts; sales of consumer electronic products and their spare parts, and surface adhesion technology equipment; testing and maintenance of self-produced products and after-sale service. Engaged in the sale, import and export of the above products, their spare parts, and general goods, and related ancillary services. Equipment rental service.
FUGUIKANG PRECISION ELECTRONICS (GUIZHOU) CO., LTD.	Research, development, production, and sale of medium and large TVs, medium and large computers, portable computers, desktop computers, multimedia data processors, mobile communication systems and equipment, new electronic components, electronic whiteboards, video walls, new energy, and energy-saving products. LED lamps, solar lighting systems, smart light poles, multimedia network smart phones, new game consoles, electronic digital products, smart monitoring equipment, servers, automatic optical switching network equipment, high-speed storage systems and smart storage devices, network signal analyzers and Peripherals and related spare parts for the above products, software and hardware application system integration, and after-sales maintenance services. Research and development, manufacturing, testing, installation, and maintenance of LED display products, energy-saving renovation of lighting systems, and energy contract management (EMC) of urban lighting intelligent control systems. Engaged in the import, export and wholesale of products not produced by the above companies (excluding game consoles), and related ancillary services. Operation of

Company name	Business Scope
	environmental protection (sewage treatment, waste gas treatment) facilities, environmental protection technical services, and labor services (excluding labor dispatch).
FuYang Soleros Technology(NANAYNG) CO., LTD	Photovoltaic Power Generation; investment, procurement, sales, and management of New Energy projects such as Photovoltaic Power Generation, system integration, and related supporting facilities, equipment; and related technology development and application, consulting services; investment management and investment consulting.
Fu Sheng Optoelectronics Technology(Kunshan) Co., Ltd	Development and manufacturing of optoelectronics technology, Technology Transfer, Technology Consulting, technical services, optical communication modules, high-speed connectors and cables; development and testing of New Energyautomobiles charging systems, Sales of Self-produced Products; Optoelectronics Sales of the product. Manufacturing of auto parts and accessories.
FuDing Electronic Technology (JiaShan) Co., Ltd.	General items: research and development of intelligent robots; manufacturing of electronic components and electromechanical components; sales of electronic components and electromechanical components; manufacturing of numerical control machine tools; selling of numerical control machine tools; manufacturing of electronic measuring instruments; selling of electronic measuring instruments; manufacturing of industrial robots; selling of industrial robots; manufacturing of special robots; services Manufacturing of consumer robots; sales of consumer robots; manufacturing of computer software, hardware and peripheral equipment; wholesale of computer software, hardware and auxiliary equipment; retail of computer software, hardware and auxiliary equipment; manufacturing of industrial control computers and systems; industrial control Sales of computers and systems; audio equipment manufacturing; audio equipment sales; mold manufacturing; mold sales; processing of mechanical parts and spare parts; sales of mechanical parts and spare parts; general artificial intelligence application system; production of daily masks (non-medical); daily Sales of face masks (non-medical); production of labor protection supplies; sales of labor protection supplies; sewage treatment and recycling; sales of intelligent robots; manufacturing of material handling equipment; sales of material handling equipment; sales of intelligent storage equipment; manufacturing of radio and television equipment (excluding radio and television transmission equipment); sale of Class II medical equipment; rental of Class II medical equipment; wholesale of medical masks. Items permitted: Production of Class II medical devices; production of Class III medical devices; production of medical masks; business in Class III medical devices.
FuDing Precision Industrial (ZhengZhou) Co., Ltd.	Development and Production of New Electronic Components, electronic special materials, Electronic-specific Equipment, Testing Equipment, Tooling, portable Micro-Computers, High-End Routers, high-end Servers, Computer Digital Signal Processing Systems and Boards, Solar Cells, third generation and Subsequent communication systems Mobile Phones, Digital Audio and Video Decoding Devices, digital sound reproduction equipment, automobile electronic devices and parts of the above-mentioned products; Design and manufacturing of metals and non-Sheet Metal Products Molds; Development of high-tech non-ferrous metals materials; Scrap Plastic digestion and reuse; Sales of Self-produced Products; Development and DevelopmentOperationAutomation Equipment, related and Parts, and equipment maintenance and after-sales service.
Rich Dreams Network Technology (Hangzhou) Limited	Sevices:computer software and hardware technology development, technical services, Technology Consulting, Technology Transfer, entrusted to engage in product inspection, testing, and proofing services (for qualifications involving qualification certificate Operation); Sales (including online Sales): computer software and hardware, photographic equipment, electronic components, hardware and electrical equipment, Sales of office supplies, Ceramics, Handicrafts, Mobile Phones and Accessories, auto parts, Electronic Products (except special control), Toys (except analog Toys); trust enterprise asset management; import and export of goods and technology.
Fuhong Cloud Computing (TianJin) Co., Ltd.	General items: Computer soft and hardware, and external peripheral manufacturing; Computer Hardware and Software and Supporting Equipmentwholesale;Computer Hardware and Software and Supporting Equipment retail; cloud computing equipment Sales; cloud computing equipment manufacturing; Internet data services; Molds manufacturing; Molds Sales; Software

Company name	Business Scope
	Development; technical services, technology development, Technology Consulting, technical exchanges, Technology Transfer, Technology Promotion; computer and communications equipment leasing; Non-residential real estate lease. Permission items: Import and export of goods.
Fulian Allion (Beijing) Trading Co., Ltd.	Retail sale of computer software, hardware and auxiliary equipment; wholesale of computer software, hardware and auxiliary equipment; retail of electronic components; wholesale of electronic components; retail of hardware products; wholesale of hardware products; sale of software; sale of communication equipment; sale of mechanical equipment; sale of electronic products ; sales of electrical equipment; computer system services; procurement agency services; import and export of goods; software development; technical services, technology development, technology consultation, technology exchange, technology transfer, and technology promotion; sales agency; computer software, hardware and peripheral equipment manufacturing; Trading brokerage; import/export agency.
Fulian Excellence Technology (Shaoxing) Co., Ltd.	Technical service, technology development, technology consultation, technology exchange, technology transfer, technology promotion; software development; mechanical equipment research and development; electronic components and electromechanical components equipment manufacturing; electronic special equipment manufacturing; electronic components manufacturing; electronic components and electromechanical components Equipment sales; sales of electronic equipment; sales of electronic products; computer and communication equipment rental; smart storage equipment sales; retail of computer software, hardware and auxiliary equipment; wholesale of computer software, hardware and auxiliary equipment; sales of communication equipment; import/export agency; goods Import and export; technology import and export.
ShanXi Yuding Precision Technology Co., Ltd.	Production and operation of third-generation and subsequent mobile communication system mobile phones, base stations, core network equipment, network testing equipment and their spare parts, new electronic components and their spare parts, portable medical electronic products, digital audio and video decoding equipment and Parts; research and development of metal and non-metallic materials and products, heat treatment and surface treatment technology research and development, and design and manufacturing of product molds; development, preparation and application of process consumables; bonded warehousing and logistics, maintenance and testing, and after-sales service Business provision of related technical consultation and after-sale service, and sale of the Company's self-produced products; intelligent manufacturing upgrade, intelligent automation of whole plant connection, automation equipment, computer software and hardware and peripheral equipment, smart city system, industrial manufacturing control software; Technical development, technical consultation, technology transfer, R&D, design, manufacturing, sales, and maintenance of industrial robots; engaged in the import and export business of the above-mentioned related products.
FULIAN TECHNOLOGY (ZHOU KOU) CO., LTD	General category: mobile terminal equipment manufacturing; mobile communication equipment manufacturing; communication equipment manufacturing; wearable smart device manufacturing; electronic components manufacturing; audio equipment manufacturing; computer software, hardware and peripheral equipment manufacturing; electronic special-purpose materials manufacturing; metal cutting processing services Manufacturing of metal materials; manufacturing of molds; processing of mechanical parts and spare parts; sales of mobile terminal equipment; sales of mobile communication equipment; sales of communication equipment; sales of audio equipment; sales of electronic special materials; sales of molds; sales of metallic materials; repair of metal products; mechanical Sale of spare parts; sale of renewable resources; research and development of new materials technology; general cargo warehousing services (excluding hazardous chemicals and other items that require licensing). Export; technology import and export.
